## 1.1 KVSCCommon.Database Namensraum

Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929

Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

### Klassen

	Name	Beschreibung
	<a href="#">_Accounts</a> ( <a href="#">see page 2</a> )	Hilfsklasse für die Erlösskonten
	<a href="#">Accounts</a> ( <a href="#">see page 3</a> )	Erweiterungsklasse für die Erlösskonten
	<a href="#">Adress</a> ( <a href="#">see page 11</a> )	Erweiterungsklasse zur DB Adress
	<a href="#">AuthorativeChargeAccounts</a> ( <a href="#">see page 30</a> )	This is class KVSCCommon.Database.AuthorativeChargeAccounts.
	<a href="#">BankAccount</a> ( <a href="#">see page 33</a> )	This is class KVSCCommon.Database.BankAccount.
	<a href="#">BIC_DE</a> ( <a href="#">see page 44</a> )	This is class KVSCCommon.Database.BIC_DE.
	<a href="#">CarOwner</a> ( <a href="#">see page 51</a> )	Erweiterungsklasse zur DB CarOwner
	<a href="#">ChangeLog</a> ( <a href="#">see page 62</a> )	This is class KVSCCommon.Database.ChangeLog.
	<a href="#">ChangeLogColumnNames</a> ( <a href="#">see page 69</a> )	This is class KVSCCommon.Database.ChangeLogColumnNames.
	<a href="#">Contact</a> ( <a href="#">see page 74</a> )	Erweiterungsklasse für die Kontaktdaten
	<a href="#">CostCenter</a> ( <a href="#">see page 85</a> )	Erweiterungsklasse
	<a href="#">Customer</a> ( <a href="#">see page 96</a> )	Erweiterungsklasse für die Kundentabelle
	<a href="#">CustomerProduct</a> ( <a href="#">see page 117</a> )	This is class KVSCCommon.Database.CustomerProduct.
	<a href="#">DataClasses1DataContext</a> ( <a href="#">see page 122</a> )	This is class KVSCCommon.Database.DataClasses1DataContext.
	<a href="#">DeregistrationOrder</a> ( <a href="#">see page 173</a> )	Erweiterungsklasse für die DeregistrationOrder Tabelle
	<a href="#">DocketList</a> ( <a href="#">see page 180</a> )	Erweiterungsklasse für die DocketList Tabelle (Laufzettelverwaltung)
	<a href="#">Document</a> ( <a href="#">see page 194</a> )	This is class KVSCCommon.Database.Document.
	<a href="#">DocumentConfiguration</a> ( <a href="#">see page 202</a> )	This is class KVSCCommon.Database.DocumentConfiguration.
	<a href="#">DocumentType</a> ( <a href="#">see page 207</a> )	This is class KVSCCommon.Database.DocumentType.
	<a href="#">EmptyStringIfNull</a> ( <a href="#">see page 212</a> )	Hilfsklasse um eingegebene Felder zu prüfen
	<a href="#">ILoggingExtensions</a> ( <a href="#">see page 214</a> )	Schnittstelle fuer das Logging
	<a href="#">Invoice</a> ( <a href="#">see page 215</a> )	Erweiterungsklasse für die Tabelle Invoice
	<a href="#">InvoiceHelper</a> ( <a href="#">see page 238</a> )	This is class KVSCCommon.Database.InvoiceHelper.
	<a href="#">InvoiceIDInvoiceRunID</a> ( <a href="#">see page 239</a> )	This is class KVSCCommon.Database.InvoiceIDInvoiceRunID.
	<a href="#">InvoiceItem</a> ( <a href="#">see page 241</a> )	Erweiterungsklasse für die Rechnungspositionen
	<a href="#">InvoiceItemAccountItem</a> ( <a href="#">see page 255</a> )	Erweiterungsklasse für die Rechnungspositionen/Erloeskonten
	<a href="#">InvoiceNumber</a> ( <a href="#">see page 262</a> )	This is class KVSCCommon.Database.InvoiceNumber.
	<a href="#">InvoiceRunReport</a> ( <a href="#">see page 267</a> )	This is class KVSCCommon.Database.InvoiceRunReport.
	<a href="#">InvoiceTypes</a> ( <a href="#">see page 277</a> )	This is class KVSCCommon.Database.InvoiceTypes.
	<a href="#">LargeCustomer</a> ( <a href="#">see page 284</a> )	Erweiterungsklasse der Grosskunden DB
	<a href="#">LargeCustomerRequiredField</a> ( <a href="#">see page 307</a> )	This is class KVSCCommon.Database.LargeCustomerRequiredField.
	<a href="#">Location</a> ( <a href="#">see page 312</a> )	Erweiterungsklasse der Location DB
	<a href="#">LocationOrderJoins</a> ( <a href="#">see page 332</a> )	Hilfsklasse für die Standort Auftrags Verknuepfungen
	<a href="#">LogType</a> ( <a href="#">see page 333</a> )	This is class KVSCCommon.Database.LogType.
	<a href="#">Mailinglist</a> ( <a href="#">see page 338</a> )	Erweiterungsklasse fuer die Mailinglist DB Tabelle
	<a href="#">MailinglistType</a> ( <a href="#">see page 347</a> )	This is class KVSCCommon.Database.MailinglistType.
	<a href="#">Make</a> ( <a href="#">see page 352</a> )	Erweiterungsklasse fue die DB Tabelle Make
	<a href="#">Order</a> ( <a href="#">see page 359</a> )	Erweiterungsklasse für die DB Tabelle Order
	<a href="#">OrderInvoice</a> ( <a href="#">see page 389</a> )	Erweiterungsklasse für die OrderInvoice Tabelle
	<a href="#">OrderItem</a> ( <a href="#">see page 395</a> )	Erweiterungsklasse für die OrderItem Tabelle

	OrderItemStatus ( <a href="#">see page 412</a> )	This is class KVSCCommon.Database.OrderItemStatus.
	OrderStatus ( <a href="#">see page 418</a> )	This is class KVSCCommon.Database.OrderStatus.
	OrderType ( <a href="#">see page 423</a> )	This is class KVSCCommon.Database.OrderType.
	PackingList ( <a href="#">see page 430</a> )	Erweiterungsklasse für die Datenbanktabelle PackingList (Lieferscheintabelle)
	PathPosition ( <a href="#">see page 444</a> )	Klasse für die Pfadverwaltung
	Permission ( <a href="#">see page 447</a> )	Erweiterungsklasse fuer die DB Tabelle Permission
	PermissionProfile ( <a href="#">see page 455</a> )	Erweiterungsklasse fuer die DB Tabelle PermissionProfile
	PermissionProfilePermission ( <a href="#">see page 464</a> )	This is class KVSCCommon.Database.PermissionProfilePermission.
	Person ( <a href="#">see page 469</a> )	Erweiterungsklasse fuer die DB Tabelle Person
	Price ( <a href="#">see page 482</a> )	Erweiterungsklasse fuer die DB Tabelle Price
	PriceAccount ( <a href="#">see page 492</a> )	This is class KVSCCommon.Database.PriceAccount.
	Product ( <a href="#">see page 497</a> )	This is class KVSCCommon.Database.Product.
	ProductCategory ( <a href="#">see page 514</a> )	Erweiterungsklasse fuer die DB Tabelle ProductCategory
	Registration ( <a href="#">see page 520</a> )	Erweiterungsklasse fuer die DB Tabelle Registration
	RegistrationLocation ( <a href="#">see page 536</a> )	This is class KVSCCommon.Database.RegistrationLocation.
	RegistrationOrder ( <a href="#">see page 542</a> )	Erweiterungsklasse fuer die DB Tabelle RegistrationOrder
	RegistrationOrderType ( <a href="#">see page 554</a> )	This is class KVSCCommon.Database.RegistrationOrderType.
	RequiredField ( <a href="#">see page 560</a> )	This is class KVSCCommon.Database.RequiredField.
	RequiredFieldTranslation ( <a href="#">see page 567</a> )	This is class KVSCCommon.Database.RequiredFieldTranslation.
	SmallCustomer ( <a href="#">see page 572</a> )	Erweiterungsklasse fuer die DB Tabelle SmallCustomer
	Systemlog ( <a href="#">see page 580</a> )	This is class KVSCCommon.Database.Systemlog.
	temp_Customers2 ( <a href="#">see page 591</a> )	This is class KVSCCommon.Database.temp_Customers2.
	temp_Products ( <a href="#">see page 599</a> )	This is class KVSCCommon.Database.temp_Products.
	tempOrder ( <a href="#">see page 602</a> )	Temporaere Klasse fuer Auftrag und Auftragspositionen
	User ( <a href="#">see page 603</a> )	Erweiterungsklasse fuer die DB Tabelle User
	UserPermission ( <a href="#">see page 621</a> )	This is class KVSCCommon.Database.UserPermission.
	UserPermissionProfile ( <a href="#">see page 626</a> )	This is class KVSCCommon.Database.UserPermissionProfile.
	Vehicle ( <a href="#">see page 631</a> )	Erweiterungsklasse fuer die DB Tabelle Vehicle
	WebServiceLogin ( <a href="#">see page 645</a> )	This is class KVSCCommon.Database.WebServiceLogin.
	WebServiceLoginCustomer ( <a href="#">see page 652</a> )	This is class KVSCCommon.Database.WebServiceLoginCustomer.

### Aufzählungen

	Name	Beschreibung
	EntityState ( <a href="#">see page 658</a> )	Enum fuer die Datenbank Statuse
	LogTypes ( <a href="#">see page 658</a> )	Enums für die Logtypen
	OrderItemState ( <a href="#">see page 659</a> )	Auftragspositionsstatus
	OrderState ( <a href="#">see page 659</a> )	Auftragsstatus

### Interfaces

	Name	Beschreibung
	ILogging ( <a href="#">see page 657</a> )	Stellt die Schnittstelle zwischen der Datenbank und dem Code dar

## 1.1.1 \_Accounts Klasse

Hilfsklasse für die Erläskonten

### Klassen Hierarchie

`KVSCCommon.Database._Accounts`

### C#

```
public class _Accounts;
```

### Datei

\_Accounts.cs ([see page 693](#))

## Mitglieder

## Accounts Eigenschaften

	Name	Beschreibung

**1.1.2.1 Accounts.Accounts Konstruktor****C#**

```
public Accounts();
```

**Anmerkungen**

This is Accounts, a member of class Accounts.

**1.1.2.2 Accounts Felder****1.1.2.2.1 Accounts.\_AccountId Feld****C#**

```
private System.Guid _AccountId;
```

**Anmerkungen**

This is \_AccountId, a member of class Accounts.

### 1.1.2.2.2 Accounts.\_AccountNumber Feld

**C#**

```
private string _AccountNumber;
```

**Anmerkungen**

This is \_AccountNumber, a member of class Accounts.

### 1.1.2.2.3 Accounts.\_CustomerId Feld

**C#**

```
private System.Nullable<System.Guid> _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class Accounts.

### 1.1.2.2.4 Accounts.\_PriceAccount Feld

**C#**

```
private EntitySet<PriceAccount> _PriceAccount;
```

**Anmerkungen**

This is \_PriceAccount, a member of class Accounts.

### 1.1.2.2.5 Accounts.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Accounts.

## 1.1.2.3 Accounts Methoden

### 1.1.2.3.1 Accounts.attach\_PriceAccount Methode

**C#**

```
private void attach_PriceAccount(PriceAccount entity);
```

**Anmerkungen**

This is attach\_PriceAccount, a member of class Accounts.

### 1.1.2.3.2 Accounts.CreateAccount Methode

Erstelle ein neues Erloeskonte

**C#**

```
public static Accounts CreateAccount(Guid? CustomerId, string AccountNumber,  
DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid? CustomerId	Kundenid
string AccountNumber	Kontonummer
DataClasses1DataContext dbContext	Datenbank Kontext

**Resultate**

Erloeskonto

### 1.1.2.3.3 Accounts.DeleteAccount Methode

L sche ein bestehendes Erl skonto

**C#**

```
public static void DeleteAccount(Guid CustomerId, string AccountNumber,
DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid CustomerId	Kundenid
string AccountNumber	Kontonummer
DataClasses1DataContext dbContext	Datenbank Kontext

### 1.1.2.3.4 Accounts.detach\_PriceAccount Methode

**C#**

```
private void detach_PriceAccount(PriceAccount entity);
```

**Anmerkungen**

This is detach\_PriceAccount, a member of class Accounts.

### 1.1.2.3.5 Accounts.generateAccountNumber Methode

Gibt Erloeskonten als Liste zur ck

**C#**

```
public static IQueryable<_Accounts> generateAccountNumber(DataClasses1DataContext
dbContext, Guid itemId, bool isPrinted);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbank Kontext
Guid itemId	Rechnungspositionsid
bool isPrinted	Ist Gedruckt

**Resultate**

IQueryable

### 1.1.2.3.6 Accounts.OnAccountIdChanged Methode

**C#**

```
private void OnAccountIdChanged();
```

**Anmerkungen**

This is OnAccountIdChanged, a member of class Accounts.

### 1.1.2.3.7 OnAccountIdChanging Methode

#### 1.1.2.3.7.1 Accounts.OnAccountIdChanging Methode (Guid)

Aenderungsevents für die Historie

**C#**

```
private void OnAccountIdChanging(Guid value);
```

**Parameter**

Parameter	Beschreibung
Guid value	

#### 1.1.2.3.7.2 Accounts.OnAccountIdChanging Methode (System.Guid)

**C#**

```
private void OnAccountIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnAccountIdChanging, a member of class Accounts.

### 1.1.2.3.8 Accounts.OnAccountNumberChanged Methode

**C#**

```
private void OnAccountNumberChanged();
```

**Anmerkungen**

This is OnAccountNumberChanged, a member of class Accounts.

### 1.1.2.3.9 Accounts.OnAccountNumberChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnAccountNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.2.3.10 Accounts.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.2.3.11 Accounts.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class Accounts.

**1.1.2.3.12 OnCustomerIdChanging Methode****1.1.2.3.12.1 Accounts.OnCustomerIdChanging Methode (Guid?)**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCustomerIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.2.3.12.2 Accounts.OnCustomerIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnCustomerIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class Accounts.

**1.1.2.3.13 Accounts.OnLoaded Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.2.3.14 Accounts.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Accounts.

**1.1.2.3.15 Accounts.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Accounts.

### 1.1.2.3.16 Accounts.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Accounts.

## 1.1.2.4 Accounts Eigenschaften

### 1.1.2.4.1 Accounts.AccountId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AccountId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid AccountId;
```

**Anmerkungen**

This is AccountId, a member of class Accounts.

### 1.1.2.4.2 Accounts.AccountNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AccountNumber",  
DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string AccountNumber;
```

**Anmerkungen**

This is AccountNumber, a member of class Accounts.

### 1.1.2.4.3 Accounts.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class Accounts.

### 1.1.2.4.4 Accounts.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Accounts.

### 1.1.2.4.5 Accounts.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Accounts.

**1.1.2.4.6 Accounts.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Accounts.

**1.1.2.4.7 Accounts.PriceAccount Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Accounts_PriceAccount",  
Storage="_PriceAccount", ThisKey="AccountId", OtherKey="AccountId")]  
public EntitySet<PriceAccount> PriceAccount;
```

**Anmerkungen**

This is PriceAccount, a member of class Accounts.

**1.1.2.5 Accounts Ereignisse****1.1.2.5.1 Accounts.PropertyChanged Ereignis****C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Accounts.

**1.1.2.5.2 Accounts.PropertyChanging Ereignis****C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Accounts.

---

**1.1.3 Adress Klasse**

Erweiterungsklasse zur DB Adress

**Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.Address")]  
public class Address : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

	OnZipcodeChanging (  see page 25)	Aenderungsevents fÃ¼r die Historie
	SendPropertyChanged (  see page 25)	This is SendPropertyChanged, a member of class Adress.
	SendPropertyChanging (  see page 25)	This is SendPropertyChanging, a member of class Adress.

### 1.1.3.1 Adress.Address Konstruktor

C#

```
public Adress();
```

Anmerkungen

This is Adress, a member of class Adress.

### 1.1.3.2 Adress Felder

#### 1.1.3.2.1 Adress.\_CarOwner Feld

C#

```
private EntitySet<CarOwner> _CarOwner;
```

Anmerkungen

This is \_CarOwner, a member of class Adress.

#### 1.1.3.2.2 Adress.\_City Feld

C#

```
private string _City;
```

Anmerkungen

This is \_City, a member of class Adress.

#### 1.1.3.2.3 Adress.\_Country Feld

C#

```
private string _Country;
```

**Anmerkungen**

This is \_Country, a member of class Adress.

**1.1.3.2.4 Adress.\_Customer Feld****C#**

```
private EntitySet<Customer> _Customer;
```

**Anmerkungen**

This is \_Customer, a member of class Adress.

**1.1.3.2.5 Adress.\_Customer1 Feld****C#**

```
private EntitySet<Customer> _Customer1;
```

**Anmerkungen**

This is \_Customer1, a member of class Adress.

**1.1.3.2.6 Adress.\_Customer2 Feld****C#**

```
private EntitySet<Customer> _Customer2;
```

**Anmerkungen**

This is \_Customer2, a member of class Adress.

**1.1.3.2.7 Adress.\_DocketList Feld****C#**

```
private EntitySet<DocketList> _DocketList;
```

**Anmerkungen**

This is \_DocketList, a member of class Adress.

**1.1.3.2.8 Adress.\_Id Feld****C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Adress.

**1.1.3.2.9 Adress.\_Invoice Feld****C#**

```
private EntitySet<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class Adress.

### 1.1.3.2.10 Address.\_Location Feld

**C#**

```
private EntitySet<Location> _Location;
```

**Anmerkungen**

This is \_Location, a member of class Address.

### 1.1.3.2.11 Address.\_Location1 Feld

**C#**

```
private EntitySet<Location> _Location1;
```

**Anmerkungen**

This is \_Location1, a member of class Address.

### 1.1.3.2.12 Address.\_Location2 Feld

**C#**

```
private EntitySet<Location> _Location2;
```

**Anmerkungen**

This is \_Location2, a member of class Address.

### 1.1.3.2.13 Address.\_PackingList Feld

**C#**

```
private EntitySet<PackingList> _PackingList;
```

**Anmerkungen**

This is \_PackingList, a member of class Address.

### 1.1.3.2.14 Address.\_RegistrationLocation Feld

**C#**

```
private EntitySet<RegistrationLocation> _RegistrationLocation;
```

**Anmerkungen**

This is \_RegistrationLocation, a member of class Address.

### 1.1.3.2.15 Address.\_Street Feld

**C#**

```
private string _Street;
```

**Anmerkungen**

This is \_Street, a member of class Address.

### 1.1.3.2.16 Address.\_StreetNumber Feld

**C#**

```
private string _StreetNumber;
```

**Anmerkungen**

This is \_StreetNumber, a member of class Adress.

**1.1.3.2.17 Adress.\_Zipcode Feld****C#**

```
private string _Zipcode;
```

**Anmerkungen**

This is \_Zipcode, a member of class Adress.

**1.1.3.2.18 Adress.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Adress.

**1.1.3.3 Adress Methoden****1.1.3.3.1 Adress.attach\_CarOwner Methode****C#**

```
private void attach_CarOwner(CarOwner entity);
```

**Anmerkungen**

This is attach\_CarOwner, a member of class Adress.

**1.1.3.3.2 Adress.attach\_Customer Methode****C#**

```
private void attach_Customer(Customer entity);
```

**Anmerkungen**

This is attach\_Customer, a member of class Adress.

**1.1.3.3.3 Adress.attach\_Customer1 Methode****C#**

```
private void attach_Customer1(Customer entity);
```

**Anmerkungen**

This is attach\_Customer1, a member of class Adress.

**1.1.3.3.4 Adress.attach\_Customer2 Methode****C#**

```
private void attach_Customer2(Customer entity);
```

**Anmerkungen**

This is attach\_Customer2, a member of class Adress.

**1.1.3.3.5 Adress.attach\_DocketList Methode****C#**

```
private void attach_DocketList(DocketList entity);
```

**Anmerkungen**

This is attach\_DocketList, a member of class Adress.

**1.1.3.3.6 Adress.attach\_Invoice Methode****C#**

```
private void attach_Invoice(Invoice entity);
```

**Anmerkungen**

This is attach\_Invoice, a member of class Adress.

**1.1.3.3.7 Adress.attach\_Location Methode****C#**

```
private void attach_Location(Location entity);
```

**Anmerkungen**

This is attach\_Location, a member of class Adress.

**1.1.3.3.8 Adress.attach\_Location1 Methode****C#**

```
private void attach_Location1(Location entity);
```

**Anmerkungen**

This is attach\_Location1, a member of class Adress.

**1.1.3.3.9 Adress.attach\_Location2 Methode****C#**

```
private void attach_Location2(Location entity);
```

**Anmerkungen**

This is attach\_Location2, a member of class Adress.

**1.1.3.3.10 Adress.attach\_PackingList Methode****C#**

```
private void attach_PackingList(PackingList entity);
```

**Anmerkungen**

This is attach\_PackingList, a member of class Adress.

### 1.1.3.3.11 Adress.attach\_RegistrationLocation Methode

**C#**

```
private void attach_RegistrationLocation(RegistrationLocation entity);
```

#### Anmerkungen

This is attach\_RegistrationLocation, a member of class Adress.

### 1.1.3.3.12 Adress.ContentEquals Methode

Vergleiche zwei Adressen zu einander

**C#**

```
public bool ContentEquals(Adress toCompare);
```

#### Parameter

Parameter	Beschreibung
Adress toCompare	Zu vergleichende Adresse

#### Resultate

bool

### 1.1.3.3.13 Adress.CreateAdress Methode

Erstellt eine neue Adresse.

**C#**

```
public static Adress CreateAdress(string street, string streetNumber, string zipcode, string city, string country, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string street	Straße.
string streetNumber	Hausnummer.
string zipcode	Postleitzahl.
string city	Ort.
string country	Land.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

#### Resultate

Die neue Adresse.

### 1.1.3.3.14 Adress.CreateCopy Methode

Erstelle eine Kopie der Adress (☞ see page 11)

**C#**

```
public static Adress CreateCopy(Adress address, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
Adress address	Zu kopierende Adress (☞ see page 11)
DataClasses1DataContext dbContext	Datenbank Kontext

#### Resultate

Adress (☞ see page 11)

### 1.1.3.3.15 Adress.DeleteAddress Methode

Löscht die angegebene Adresse aus der Datenbank.

**C#**

```
public static void DeleteAddress(Guid addressId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid addressId	Id (see page 27) der Adresse.
DataClasses1DataContext dbContext	

### 1.1.3.3.16 Adress.detach\_CarOwner Methode

**C#**

```
private void detach_CarOwner(CarOwner entity);
```

**Anmerkungen**

This is detach\_CarOwner, a member of class Adress.

### 1.1.3.3.17 Adress.detach\_Customer Methode

**C#**

```
private void detach_Customer(Customer entity);
```

**Anmerkungen**

This is detach\_Customer, a member of class Adress.

### 1.1.3.3.18 Adress.detach\_Customer1 Methode

**C#**

```
private void detach_Customer1(Customer entity);
```

**Anmerkungen**

This is detach\_Customer1, a member of class Adress.

### 1.1.3.3.19 Adress.detach\_Customer2 Methode

**C#**

```
private void detach_Customer2(Customer entity);
```

**Anmerkungen**

This is detach\_Customer2, a member of class Adress.

### 1.1.3.3.20 Adress.detach\_DocketList Methode

**C#**

```
private void detach_DocketList(DocketList entity);
```

**Anmerkungen**

This is detach\_DocketList, a member of class Adress.

### 1.1.3.3.21 Adress.detach\_Invoice Methode

**C#**

```
private void detach_Invoice(Invoice entity);
```

**Anmerkungen**

This is detach\_Invoice, a member of class Adress.

### 1.1.3.3.22 Adress.detach\_Location Methode

**C#**

```
private void detach_Location(Location entity);
```

**Anmerkungen**

This is detach\_Location, a member of class Adress.

### 1.1.3.3.23 Adress.detach\_Location1 Methode

**C#**

```
private void detach_Location1(Location entity);
```

**Anmerkungen**

This is detach\_Location1, a member of class Adress.

### 1.1.3.3.24 Adress.detach\_Location2 Methode

**C#**

```
private void detach_Location2(Location entity);
```

**Anmerkungen**

This is detach\_Location2, a member of class Adress.

### 1.1.3.3.25 Adress.detach\_PackingList Methode

**C#**

```
private void detach_PackingList(PackingList entity);
```

**Anmerkungen**

This is detach\_PackingList, a member of class Adress.

### 1.1.3.3.26 Adress.detach\_RegistrationLocation Methode

**C#**

```
private void detach_RegistrationLocation(RegistrationLocation entity);
```

**Anmerkungen**

This is detach\_RegistrationLocation, a member of class Adress.

### 1.1.3.3.27 Adress.OnCityChanged Methode

**C#**

```
private void OnCityChanged();
```

**Anmerkungen**

This is OnCityChanged, a member of class Adress.

**1.1.3.3.28 Adress.OnCityChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCityChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.3.3.29 Adress.OnCountryChanged Methode****C#**

```
private void OnCountryChanged();
```

**Anmerkungen**

This is OnCountryChanged, a member of class Adress.

**1.1.3.3.30 Adress.OnCountryChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCountryChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.3.3.31 Adress.OnCreated Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.3.3.32 Adress.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Adress.

### 1.1.3.3.33 Adress.OnIdChanging Methode

C#

```
private void OnIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnIdChanging, a member of class Adress.

### 1.1.3.3.34 Adress.OnLoaded Methode

Aenderungsevents für die Historie

C#

```
private void OnLoaded();
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.3.3.35 Adress.OnStreetChanged Methode

C#

```
private void OnStreetChanged();
```

#### Anmerkungen

This is OnStreetChanged, a member of class Adress.

### 1.1.3.3.36 Adress.OnStreetChanging Methode

Aenderungsevents für die Historie

C#

```
private void OnStreetChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.3.3.37 Adress.OnStreetNumberChanged Methode

C#

```
private void OnStreetNumberChanged();
```

#### Anmerkungen

This is OnStreetNumberChanged, a member of class Adress.

### 1.1.3.3.38 Adress.OnStreetNumberChanging Methode

Aenderungsevents für die Historie

C#

```
private void OnStreetNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.3.3.39 Adress.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Adress.

**1.1.3.3.40 Adress.OnZipcodeChanged Methode****C#**

```
private void OnZipcodeChanged();
```

**Anmerkungen**

This is OnZipcodeChanged, a member of class Adress.

**1.1.3.3.41 Adress.OnZipcodeChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnZipcodeChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.3.3.42 Adress.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Adress.

**1.1.3.3.43 Adress.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Adress.

**1.1.3.4 Adress Eigenschaften**

### 1.1.3.4.1 Adress.CarOwner Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_CarOwner",  
Storage="_CarOwner", ThisKey="Id", OtherKey="AdressId")]  
public EntitySet<CarOwner> CarOwner;
```

#### Anmerkungen

This is CarOwner, a member of class Adress.

### 1.1.3.4.2 Adress.City Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_City", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string City;
```

#### Anmerkungen

This is City, a member of class Adress.

### 1.1.3.4.3 Adress.Country Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Country", DbType="VarChar(50)  
NOT NULL", CanBeNull=false)]  
public string Country;
```

#### Anmerkungen

This is Country, a member of class Adress.

### 1.1.3.4.4 Adress.Customer Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Customer",  
Storage="_Customer", ThisKey="Id", OtherKey="AdressId")]  
public EntitySet<Customer> Customer;
```

#### Anmerkungen

This is Customer, a member of class Adress.

### 1.1.3.4.5 Adress.Customer1 Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Customer1",  
Storage="_Customer1", ThisKey="Id", OtherKey="InvoiceAdressId")]  
public EntitySet<Customer> Customer1;
```

#### Anmerkungen

This is Customer1, a member of class Adress.

### 1.1.3.4.6 Adress.Customer2 Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Customer2",  
Storage="_Customer2", ThisKey="Id", OtherKey="InvoiceDispatchAdressId")]
```

```
public EntitySet<Customer> Customer2;
```

**Anmerkungen**

This is Customer2, a member of class Adress.

### 1.1.3.4.7 Adress.DocketList Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_DocketList",  
Storage="_DocketList", ThisKey="Id", OtherKey="RecipientAdressId")]  
public EntitySet<DocketList> DocketList;
```

**Anmerkungen**

This is DocketList, a member of class Adress.

### 1.1.3.4.8 Adress.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Adress.

### 1.1.3.4.9 Adress.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Adress.

### 1.1.3.4.10 Adress.Invoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Invoice",  
Storage="_Invoice", ThisKey="Id", OtherKey="InvoiceRecipientAdressId")]  
public EntitySet<Invoice> Invoice;
```

**Anmerkungen**

This is Invoice, a member of class Adress.

### 1.1.3.4.11 Adress.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Adress.

### 1.1.3.4.12 Adress.Location Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Location",
```

```
Storage="_Location", ThisKey="Id", OtherKey="AdressId")]  
public EntitySet<Location> Location;
```

**Anmerkungen**

This is Location, a member of class Address.

### 1.1.3.4.13 Address.Location1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Location1",  
Storage="_Location1", ThisKey="Id", OtherKey="InvoiceAdressId")]  
public EntitySet<Location> Location1;
```

**Anmerkungen**

This is Location1, a member of class Address.

### 1.1.3.4.14 Address.Location2 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Location2",  
Storage="_Location2", ThisKey="Id", OtherKey="InvoiceDispatchAdressId")]  
public EntitySet<Location> Location2;
```

**Anmerkungen**

This is Location2, a member of class Address.

### 1.1.3.4.15 Address.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Address.

### 1.1.3.4.16 Address.PackingList Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_PackingList",  
Storage="_PackingList", ThisKey="Id", OtherKey="RecipientAdressId")]  
public EntitySet<PackingList> PackingList;
```

**Anmerkungen**

This is PackingList, a member of class Address.

### 1.1.3.4.17 Address.RegistrationLocation Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_RegistrationLocation",  
Storage="_RegistrationLocation", ThisKey="Id", OtherKey="RegistrationLocationAdressId")]  
public EntitySet<RegistrationLocation> RegistrationLocation;
```

**Anmerkungen**

This is RegistrationLocation, a member of class Address.

### 1.1.3.4.18 Adress.Street Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Street", DbType="VarChar(100)
NOT NULL", CanBeNull=false)]
public string Street;
```

#### Anmerkungen

This is Street, a member of class Adress.

### 1.1.3.4.19 Adress.StreetNumber Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_StreetNumber",
DbType="VarChar(10)")]
public string StreetNumber;
```

#### Anmerkungen

This is StreetNumber, a member of class Adress.

### 1.1.3.4.20 Adress.Zipcode Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Zipcode", DbType="VarChar(10)
NOT NULL", CanBeNull=false)]
public string Zipcode;
```

#### Anmerkungen

This is Zipcode, a member of class Adress.

## 1.1.3.5 Adress Ereignisse

### 1.1.3.5.1 Adress.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class Adress.

### 1.1.3.5.2 Adress.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class Adress.

## 1.1.4 AuthorativeChargeAccounts Klasse

### Klassen Hierarchie

`KVSCCommon.Database.AuthorativeChargeAccounts`

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.AuthorativeChargeAccounts")]
public class AuthorativeChargeAccounts;
```

### Datei

DataClasses1.designer.cs ([see page 695](#))

### Anmerkungen

This is class KVSCCommon.Database.AuthorativeChargeAccounts.

### Mitglieder

### Methoden

	Name	Beschreibung
	AuthorativeChargeAccounts ( <a href="#">see page 31</a> )	This is AuthorativeChargeAccounts, a member of class AuthorativeChargeAccounts.

### AuthorativeChargeAccounts Felder

	Name	Beschreibung
	_Invoiceld ( <a href="#">see page 31</a> )	This is _Invoiceld, a member of class AuthorativeChargeAccounts.
	_InvoiceItemAccountItemld ( <a href="#">see page 31</a> )	This is _InvoiceItemAccountItemld, a member of class AuthorativeChargeAccounts.
	_InvoiceItemld ( <a href="#">see page 31</a> )	This is _InvoiceItemld, a member of class AuthorativeChargeAccounts.
	_IsAuthorativeCharge ( <a href="#">see page 31</a> )	This is _IsAuthorativeCharge, a member of class AuthorativeChargeAccounts.
	_OrderItemld ( <a href="#">see page 32</a> )	This is _OrderItemld, a member of class AuthorativeChargeAccounts.
	_RevenueAccountText ( <a href="#">see page 32</a> )	This is _RevenueAccountText, a member of class AuthorativeChargeAccounts.

### AuthorativeChargeAccounts Eigenschaften

	Name	Beschreibung
	Invoiceld ( <a href="#">see page 32</a> )	This is Invoiceld, a member of class AuthorativeChargeAccounts.
	InvoiceItemAccountItemld ( <a href="#">see page 32</a> )	This is InvoiceItemAccountItemld, a member of class AuthorativeChargeAccounts.
	InvoiceItemld ( <a href="#">see page 32</a> )	This is InvoiceItemld, a member of class AuthorativeChargeAccounts.
	IsAuthorativeCharge ( <a href="#">see page 33</a> )	This is IsAuthorativeCharge, a member of class AuthorativeChargeAccounts.
	OrderItemld ( <a href="#">see page 33</a> )	This is OrderItemld, a member of class AuthorativeChargeAccounts.
	RevenueAccountText ( <a href="#">see page 33</a> )	This is RevenueAccountText, a member of class AuthorativeChargeAccounts.

### AuthorativeChargeAccounts Eigenschaften

	Name	Beschreibung
	Invoiceld ( <a href="#">see page 32</a> )	This is Invoiceld, a member of class AuthorativeChargeAccounts.

### AuthorativeChargeAccounts Felder

	Name	Beschreibung
	_Invoiceld ( <a href="#">see page 31</a> )	This is _Invoiceld, a member of class AuthorativeChargeAccounts.
	_InvoiceItemAccountItemld ( <a href="#">see page 31</a> )	This is _InvoiceItemAccountItemld, a member of class AuthorativeChargeAccounts.
	_InvoiceItemld ( <a href="#">see page 31</a> )	This is _InvoiceItemld, a member of class AuthorativeChargeAccounts.

	<code>_IsAuthorativeCharge</code> (  see page 31)	This is <code>_IsAuthorativeCharge</code> , a member of class <code>AuthorativeChargeAccounts</code> .
	<code>_OrderItemId</code> (  see page 32)	This is <code>_OrderItemId</code> , a member of class <code>AuthorativeChargeAccounts</code> .
	<code>_RevenueAccountText</code> (  see page 32)	This is <code>_RevenueAccountText</code> , a member of class <code>AuthorativeChargeAccounts</code> .

## 1.1.4.1 AuthorativeChargeAccounts.AuthorativeChargeAccounts Konstruktor

C#

```
public AuthorativeChargeAccounts();
```

Anmerkungen

This is `AuthorativeChargeAccounts`, a member of class `AuthorativeChargeAccounts`.

## 1.1.4.2 AuthorativeChargeAccounts Felder

### 1.1.4.2.1 AuthorativeChargeAccounts.\_InvoiceId Feld

C#

```
private System.Guid _InvoiceId;
```

Anmerkungen

This is `_InvoiceId`, a member of class `AuthorativeChargeAccounts`.

### 1.1.4.2.2 AuthorativeChargeAccounts.\_InvoiceItemAccountItemId Feld

C#

```
private System.Guid _InvoiceItemAccountItemId;
```

Anmerkungen

This is `_InvoiceItemAccountItemId`, a member of class `AuthorativeChargeAccounts`.

### 1.1.4.2.3 AuthorativeChargeAccounts.\_InvoiceItemId Feld

C#

```
private System.Guid _InvoiceItemId;
```

Anmerkungen

This is `_InvoiceItemId`, a member of class `AuthorativeChargeAccounts`.

### 1.1.4.2.4 AuthorativeChargeAccounts.\_IsAuthorativeCharge Feld

C#

```
private bool _IsAuthorativeCharge;
```

Anmerkungen

This is `_IsAuthorativeCharge`, a member of class `AuthorativeChargeAccounts`.

### 1.1.4.2.5 AuthorativeChargeAccounts.\_OrderItemId Feld

**C#**

```
private System.Guid _OrderItemId;
```

**Anmerkungen**

This is \_OrderItemId, a member of class AuthorativeChargeAccounts.

### 1.1.4.2.6 AuthorativeChargeAccounts.\_RevenueAccountText Feld

**C#**

```
private string _RevenueAccountText;
```

**Anmerkungen**

This is \_RevenueAccountText, a member of class AuthorativeChargeAccounts.

## 1.1.4.3 AuthorativeChargeAccounts Eigenschaften

### 1.1.4.3.1 AuthorativeChargeAccounts.InvoiceId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid InvoiceId;
```

**Anmerkungen**

This is InvoiceId, a member of class AuthorativeChargeAccounts.

### 1.1.4.3.2 AuthorativeChargeAccounts.InvoiceItemAccountItemId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceItemAccountItemId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid InvoiceItemAccountItemId;
```

**Anmerkungen**

This is InvoiceItemAccountItemId, a member of class AuthorativeChargeAccounts.

### 1.1.4.3.3 AuthorativeChargeAccounts.InvoiceItemId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceItemId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid InvoiceItemId;
```

**Anmerkungen**

This is InvoiceItemId, a member of class AuthorativeChargeAccounts.

### 1.1.4.3.4 AuthorativeChargeAccounts.IsAuthorativeCharge Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsAuthorativeCharge",
DbType="Bit NOT NULL")]
public bool IsAuthorativeCharge;
```

Anmerkungen

This is IsAuthorativeCharge, a member of class AuthorativeChargeAccounts.

### 1.1.4.3.5 AuthorativeChargeAccounts.OrderItemId Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderItemId",
DbType="UniqueIdentifier NOT NULL")]
public System.Guid OrderItemId;
```

Anmerkungen

This is OrderItemId, a member of class AuthorativeChargeAccounts.

### 1.1.4.3.6 AuthorativeChargeAccounts.RevenueAccountText Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RevenueAccountText",
DbType="VarChar(50) NOT NULL", CanBeNull=false)]
public string RevenueAccountText;
```

Anmerkungen

This is RevenueAccountText, a member of class AuthorativeChargeAccounts.

## 1.1.5 BankAccount Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.BankAccount")]
public class BankAccount : INotifyPropertyChanging, INotifyPropertyChanged;
```

Datei

DataClasses1.designer.cs (🔗 see page 695)

Anmerkungen

This is class KVSCCommon.Database.BankAccount.

Mitglieder

Methoden

	Name	Beschreibung
🔗	BankAccount (🔗 see page 36)	This is BankAccount, a member of class BankAccount.

**BankAccount Felder**

	Name	Beschreibung
	_Accountnumber ( <a href="#">↗</a> see page 36)	This is _Accountnumber, a member of class BankAccount.
	_BankCode ( <a href="#">↗</a> see page 36)	This is _BankCode, a member of class BankAccount.
	_BankName ( <a href="#">↗</a> see page 36)	This is _BankName, a member of class BankAccount.
	_BIC ( <a href="#">↗</a> see page 36)	This is _BIC, a member of class BankAccount.
	_CarOwner ( <a href="#">↗</a> see page 37)	This is _CarOwner, a member of class BankAccount.
	_CostCenter ( <a href="#">↗</a> see page 37)	This is _CostCenter, a member of class BankAccount.
	_IBAN ( <a href="#">↗</a> see page 37)	This is _IBAN, a member of class BankAccount.
	_Id ( <a href="#">↗</a> see page 37)	This is _Id, a member of class BankAccount.
	_SmallCustomer ( <a href="#">↗</a> see page 37)	This is _SmallCustomer, a member of class BankAccount.
 	emptyChangingEventArgs ( <a href="#">↗</a> see page 37)	This is emptyChangingEventArgs, a member of class BankAccount.

**BankAccount Methoden**

	Name	Beschreibung
	attach_CarOwner ( <a href="#">↗</a> see page 38)	This is attach_CarOwner, a member of class BankAccount.
	attach_CostCenter ( <a href="#">↗</a> see page 38)	This is attach_CostCenter, a member of class BankAccount.
	attach_SmallCustomer ( <a href="#">↗</a> see page 38)	This is attach_SmallCustomer, a member of class BankAccount.
 	CreateBankAccount ( <a href="#">↗</a> see page 38)	Erstellt eine neu Bankverbindung.
 	DeleteBank ( <a href="#">↗</a> see page 38)	LÄscht die angegebene Bank aus der Datenbank.
	detach_CarOwner ( <a href="#">↗</a> see page 39)	This is detach_CarOwner, a member of class BankAccount.
	detach_CostCenter ( <a href="#">↗</a> see page 39)	This is detach_CostCenter, a member of class BankAccount.
	detach_SmallCustomer ( <a href="#">↗</a> see page 39)	This is detach_SmallCustomer, a member of class BankAccount.
	OnAccountnumberChanged ( <a href="#">↗</a> see page 39)	This is OnAccountnumberChanged, a member of class BankAccount.
	OnAccountnumberChanging ( <a href="#">↗</a> see page 39)	Aenderungsevents fÄ¼r die Historie
	OnBankCodeChanged ( <a href="#">↗</a> see page 39)	This is OnBankCodeChanged, a member of class BankAccount.
	OnBankCodeChanging ( <a href="#">↗</a> see page 40)	Aenderungsevents fÄ¼r die Historie
	OnBankNameChanged ( <a href="#">↗</a> see page 40)	This is OnBankNameChanged, a member of class BankAccount.
	OnBankNameChanging ( <a href="#">↗</a> see page 40)	Aenderungsevents fÄ¼r die Historie
	OnBICChanged ( <a href="#">↗</a> see page 40)	This is OnBICChanged, a member of class BankAccount.
	OnBICChanging ( <a href="#">↗</a> see page 40)	This is OnBICChanging, a member of class BankAccount.
	OnCreated ( <a href="#">↗</a> see page 40)	Aenderungsevents fÄ¼r die Historie
	OnIBANChanged ( <a href="#">↗</a> see page 41)	This is OnIBANChanged, a member of class BankAccount.
	OnIBANChanging ( <a href="#">↗</a> see page 41)	This is OnIBANChanging, a member of class BankAccount.
	OnIdChanged ( <a href="#">↗</a> see page 41)	This is OnIdChanged, a member of class BankAccount.
	OnIdChanging ( <a href="#">↗</a> see page 41)	This is OnIdChanging, a member of class BankAccount.
	OnLoaded ( <a href="#">↗</a> see page 41)	Aenderungsevents fÄ¼r die Historie
	OnValidate ( <a href="#">↗</a> see page 41)	This is OnValidate, a member of class BankAccount.
 	SendPropertyChanged ( <a href="#">↗</a> see page 42)	This is SendPropertyChanged, a member of class BankAccount.
 	SendPropertyChanging ( <a href="#">↗</a> see page 42)	This is SendPropertyChanging, a member of class BankAccount.

**BankAccount Eigenschaften**

	Name	Beschreibung
	Accountnumber ( <a href="#">↗</a> see page 42)	This is Accountnumber, a member of class BankAccount.

	detach_CostCenter ( <a href="#">↗</a> see page 39)	This is detach_CostCenter, a member of class BankAccount.
	detach_SmallCustomer ( <a href="#">↗</a> see page 39)	This is detach_SmallCustomer, a member of class BankAccount.
	OnAccountnumberChanged ( <a href="#">↗</a> see page 39)	This is OnAccountnumberChanged, a member of class BankAccount.
	OnAccountnumberChanging ( <a href="#">↗</a> see page 39)	Aenderungsevents fÄ¼r die Historie
	OnBankCodeChanged ( <a href="#">↗</a> see page 39)	This is OnBankCodeChanged, a member of class BankAccount.
	OnBankCodeChanging ( <a href="#">↗</a> see page 40)	Aenderungsevents fÄ¼r die Historie
	OnBankNameChanged ( <a href="#">↗</a> see page 40)	This is OnBankNameChanged, a member of class BankAccount.
	OnBankNameChanging ( <a href="#">↗</a> see page 40)	Aenderungsevents fÄ¼r die Historie
	OnBICChanged ( <a href="#">↗</a> see page 40)	This is OnBICChanged, a member of class BankAccount.
	OnBICChanging ( <a href="#">↗</a> see page 40)	This is OnBICChanging, a member of class BankAccount.
	OnCreated ( <a href="#">↗</a> see page 40)	Aenderungsevents fÄ¼r die Historie
	OnIBANChanged ( <a href="#">↗</a> see page 41)	This is OnIBANChanged, a member of class BankAccount.

	OnIBANChanging ( <a href="#">see page 41</a> )	This is OnIBANChanging, a member of class BankAccount.
	OnIdChanged ( <a href="#">see page 41</a> )	This is OnIdChanged, a member of class BankAccount.
	OnIdChanging ( <a href="#">see page 41</a> )	This is OnIdChanging, a member of class BankAccount.
	OnLoaded ( <a href="#">see page 41</a> )	Aenderungsevents für die Historie
	OnValidate ( <a href="#">see page 41</a> )	This is OnValidate, a member of class BankAccount.
	SendPropertyChanged ( <a href="#">see page 42</a> )	This is SendPropertyChanged, a member of class BankAccount.
	SendPropertyChanging ( <a href="#">see page 42</a> )	This is SendPropertyChanging, a member of class BankAccount.

### 1.1.5.1 BankAccount.BankAccount Konstruktor

**C#**

```
public BankAccount ( ) ;
```

**Anmerkungen**

This is BankAccount, a member of class BankAccount.

### 1.1.5.2 BankAccount Felder

#### 1.1.5.2.1 BankAccount.\_Accountnumber Feld

**C#**

```
private string _Accountnumber;
```

**Anmerkungen**

This is \_Accountnumber, a member of class BankAccount.

#### 1.1.5.2.2 BankAccount.\_BankCode Feld

**C#**

```
private string _BankCode;
```

**Anmerkungen**

This is \_BankCode, a member of class BankAccount.

#### 1.1.5.2.3 BankAccount.\_BankName Feld

**C#**

```
private string _BankName;
```

**Anmerkungen**

This is \_BankName, a member of class BankAccount.

#### 1.1.5.2.4 BankAccount.\_BIC Feld

**C#**

```
private string _BIC;
```

**Anmerkungen**

This is \_BIC, a member of class BankAccount.

### 1.1.5.2.5 BankAccount.\_CarOwner Feld

**C#**

```
private EntitySet<CarOwner> _CarOwner;
```

**Anmerkungen**

This is \_CarOwner, a member of class BankAccount.

### 1.1.5.2.6 BankAccount.\_CostCenter Feld

**C#**

```
private EntitySet<CostCenter> _CostCenter;
```

**Anmerkungen**

This is \_CostCenter, a member of class BankAccount.

### 1.1.5.2.7 BankAccount.\_IBAN Feld

**C#**

```
private string _IBAN;
```

**Anmerkungen**

This is \_IBAN, a member of class BankAccount.

### 1.1.5.2.8 BankAccount.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class BankAccount.

### 1.1.5.2.9 BankAccount.\_SmallCustomer Feld

**C#**

```
private EntitySet<SmallCustomer> _SmallCustomer;
```

**Anmerkungen**

This is \_SmallCustomer, a member of class BankAccount.

### 1.1.5.2.10 BankAccount.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class BankAccount.

## 1.1.5.3 BankAccount Methoden

### 1.1.5.3.1 BankAccount.attach\_CarOwner Methode

**C#**

```
private void attach_CarOwner(CarOwner entity);
```

**Anmerkungen**

This is attach\_CarOwner, a member of class BankAccount.

### 1.1.5.3.2 BankAccount.attach\_CostCenter Methode

**C#**

```
private void attach_CostCenter(CostCenter entity);
```

**Anmerkungen**

This is attach\_CostCenter, a member of class BankAccount.

### 1.1.5.3.3 BankAccount.attach\_SmallCustomer Methode

**C#**

```
private void attach_SmallCustomer(SmallCustomer entity);
```

**Anmerkungen**

This is attach\_SmallCustomer, a member of class BankAccount.

### 1.1.5.3.4 BankAccount.CreateBankAccount Methode

Erstellt eine neu Bankverbindung.

**C#**

```
public static BankAccount CreateBankAccount(DataClasses1DataContext dbContext, string name, string accountnumber, string bankcode, string IBANNumber, string BICNumber);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.
string name	Name der Bank.
string accountnumber	Kontonummer der Bankverbindung.
string bankcode	Bankleitzahl der Bank.
string IBANNumber	Aktuelle IBAN (siehe page 43) Nummer

**Resultate**

Die neue Bankverbindung.

### 1.1.5.3.5 BankAccount.DeleteBank Methode

Löscht die angegebene Bank aus der Datenbank.

**C#**

```
public static void DeleteBank(Guid bankId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	
adressId	Id (siehe page 43) der Bank.

### 1.1.5.3.6 BankAccount.detach\_CarOwner Methode

**C#**

```
private void detach_CarOwner(CarOwner entity);
```

**Anmerkungen**

This is detach\_CarOwner, a member of class BankAccount.

### 1.1.5.3.7 BankAccount.detach\_CostCenter Methode

**C#**

```
private void detach_CostCenter(CostCenter entity);
```

**Anmerkungen**

This is detach\_CostCenter, a member of class BankAccount.

### 1.1.5.3.8 BankAccount.detach\_SmallCustomer Methode

**C#**

```
private void detach_SmallCustomer(SmallCustomer entity);
```

**Anmerkungen**

This is detach\_SmallCustomer, a member of class BankAccount.

### 1.1.5.3.9 BankAccount.OnAccountnumberChanged Methode

**C#**

```
private void OnAccountnumberChanged();
```

**Anmerkungen**

This is OnAccountnumberChanged, a member of class BankAccount.

### 1.1.5.3.10 BankAccount.OnAccountnumberChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnAccountnumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.5.3.11 BankAccount.OnBankCodeChanged Methode

**C#**

```
private void OnBankCodeChanged();
```

**Anmerkungen**

This is OnBankCodeChanged, a member of class BankAccount.

### 1.1.5.3.12 BankAccount.OnBankCodeChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnBankCodeChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.5.3.13 BankAccount.OnBankNameChanged Methode

**C#**

```
private void OnBankNameChanged();
```

**Anmerkungen**

This is OnBankNameChanged, a member of class BankAccount.

### 1.1.5.3.14 BankAccount.OnBankNameChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnBankNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.5.3.15 BankAccount.OnBICChanged Methode

**C#**

```
private void OnBICChanged();
```

**Anmerkungen**

This is OnBICChanged, a member of class BankAccount.

### 1.1.5.3.16 BankAccount.OnBICChanging Methode

**C#**

```
private void OnBICChanging(string value);
```

**Anmerkungen**

This is OnBICChanging, a member of class BankAccount.

### 1.1.5.3.17 BankAccount.OnCreated Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.5.3.18 BankAccount.OnIBANChanged Methode****C#**

```
private void OnIBANChanged();
```

**Anmerkungen**

This is OnIBANChanged, a member of class BankAccount.

**1.1.5.3.19 BankAccount.OnIBANChanging Methode****C#**

```
private void OnIBANChanging(string value);
```

**Anmerkungen**

This is OnIBANChanging, a member of class BankAccount.

**1.1.5.3.20 BankAccount.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class BankAccount.

**1.1.5.3.21 BankAccount.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class BankAccount.

**1.1.5.3.22 BankAccount.OnLoaded Methode**

Aenderungsevents f r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.5.3.23 BankAccount.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class BankAccount.

### 1.1.5.3.24 BankAccount.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class BankAccount.

### 1.1.5.3.25 BankAccount.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class BankAccount.

## 1.1.5.4 BankAccount Eigenschaften

### 1.1.5.4.1 BankAccount.Accountnumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Accountnumber",  
DbType="VarChar(50) NOT NULL")]  
public string Accountnumber;
```

**Anmerkungen**

This is Accountnumber, a member of class BankAccount.

### 1.1.5.4.2 BankAccount.BankCode Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_BankCode", DbType="VarChar(50)  
NOT NULL")]  
public string BankCode;
```

**Anmerkungen**

This is BankCode, a member of class BankAccount.

### 1.1.5.4.3 BankAccount.BankName Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_BankName", DbType="VarChar(100)  
NOT NULL")]  
public string BankName;
```

**Anmerkungen**

This is BankName, a member of class BankAccount.

### 1.1.5.4.4 BankAccount.BIC Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_BIC")]
```

```
public string BIC;
```

**Anmerkungen**

This is BIC, a member of class BankAccount.

### 1.1.5.4.5 BankAccount.CarOwner Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="BankAccount_CarOwner",  
Storage="_CarOwner", ThisKey="Id", OtherKey="BankAccountId")]  
public EntitySet<CarOwner> CarOwner;
```

**Anmerkungen**

This is CarOwner, a member of class BankAccount.

### 1.1.5.4.6 BankAccount.CostCenter Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="BankAccount_CostCenter",  
Storage="_CostCenter", ThisKey="Id", OtherKey="BankAccountId")]  
public EntitySet<CostCenter> CostCenter;
```

**Anmerkungen**

This is CostCenter, a member of class BankAccount.

### 1.1.5.4.7 BankAccount.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class BankAccount.

### 1.1.5.4.8 BankAccount.IBAN Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IBAN", DbType="VarChar(100)")]  
public string IBAN;
```

**Anmerkungen**

This is IBAN, a member of class BankAccount.

### 1.1.5.4.9 BankAccount.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class BankAccount.

### 1.1.5.4.10 BankAccount.ItemId Eigenschaft

C#

```
public object ItemId;
```

#### Anmerkungen

This is ItemId, a member of class BankAccount.

### 1.1.5.4.11 BankAccount.LogDBContext Eigenschaft

Erweiterungsklasse zur DB BankAccount (🔗 see page 33)

C#

```
public DataClasses1DataContext LogDBContext;
```

### 1.1.5.4.12 BankAccount.SmallCustomer Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="BankAccount_SmallCustomer",  
Storage="_SmallCustomer", ThisKey="Id", OtherKey="BankAccountId")]  
public EntitySet<SmallCustomer> SmallCustomer;
```

#### Anmerkungen

This is SmallCustomer, a member of class BankAccount.

## 1.1.5.5 BankAccount Ereignisse

### 1.1.5.5.1 BankAccount.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class BankAccount.

### 1.1.5.5.2 BankAccount.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class BankAccount.

---

## 1.1.6 BIC\_DE Klasse

#### Klassen Hierarchie

```
KVSCCommon.Database.BIC_DE
```

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.BIC_DE")]
```

```
public class BIC_DE;
```

## Datei

DataClasses1.designer.cs ([see page 695](#))

## Anmerkungen

This is class KVSCCommon.Database.BIC\_DE.

## Mitglieder

### Methoden

	Name	Beschreibung
	BIC_DE ( <a href="#">see page 46</a> )	This is BIC_DE, a member of class BIC_DE.

### BIC\_DE Felder

	Name	Beschreibung
	_Aenderungskennzeichen ( <a href="#">see page 46</a> )	This is _Aenderungskennzeichen, a member of class BIC_DE.
	_Bankleitzahl ( <a href="#">see page 46</a> )	This is _Bankleitzahl, a member of class BIC_DE.
	_Bankleitzahlloeschung ( <a href="#">see page 46</a> )	This is _Bankleitzahlloeschung, a member of class BIC_DE.
	_Bezeichnung ( <a href="#">see page 47</a> )	This is _Bezeichnung, a member of class BIC_DE.
	_BIC ( <a href="#">see page 47</a> )	This is _BIC, a member of class BIC_DE.

public string Kurzbezeichnung;
```

#### Anmerkungen

This is Kurzbezeichnung, a member of class BIC\_DE.

### 1.1.6.3.8 BIC\_DE.Merkmal Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Merkmal",
DbType="NVarChar(50)")]
public string Merkmal;
```

**Anmerkungen**

This is Merkmal, a member of class BIC\_DE.

**1.1.6.3.9 BIC\_DE.Nachfolgebankleitzahl Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Nachfolgebankleitzahl",
DbType="NVarChar(50)")]
public string Nachfolgebankleitzahl;
```

**Anmerkungen**

This is Nachfolgebankleitzahl, a member of class BIC\_DE.

**1.1.6.3.10 BIC\_DE.Ort Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Ort", DbType="NVarChar(500)")]
public string Ort;
```

**Anmerkungen**

This is Ort, a member of class BIC\_DE.

**1.1.6.3.11 BIC\_DE.PAN Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PAN", DbType="NVarChar(50)")]
public string PAN;
```

**Anmerkungen**

This is PAN, a member of class BIC\_DE.

**1.1.6.3.12 BIC\_DE.PLZ Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PLZ", DbType="NVarChar(50)")]
public string PLZ;
```

**Anmerkungen**

This is PLZ, a member of class BIC\_DE.

**1.1.6.3.13 BIC\_DE.Pruefziffer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Pruefziffer",
DbType="NVarChar(50)")]
public string Pruefziffer;
```

**Anmerkungen**

This is Pruefziffer, a member of class BIC\_DE.

## 1.1.7 CarOwner Klasse

Erweiterungsklasse zur DB CarOwner

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.CarOwner" ) ]
public class CarOwner : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([see page 695](#))

### Mitglieder

#### Methoden

	Name	Beschreibung
	CarOwner ( <a href="#">see page 53</a> )	This is CarOwner, a member of class CarOwner.

#### CarOwner Felder

	Name	Beschreibung
	_Adress ( <a href="#">see page 53</a> )	This is _Adress, a member of class CarOwner.
	_AdressId ( <a href="#">see page 53</a> )	This is _AdressId, a member of class CarOwner.
	_BankAccount ( <a href="#">see page 54</a> )	This is _BankAccount, a member of class CarOwner.
	_BankAccountId ( <a href="#">see page 54</a> )	This is _BankAccountId, a member of class CarOwner.
	_Contact ( <a href="#">see page 54</a> )	This is _Contact, a member of class CarOwner.
	_ContactId ( <a href="#">see page 54</a> )	This is _ContactId, a member of class CarOwner.
	_Id ( <a href="#">see page 54</a> )	This is _Id, a member of class CarOwner.
	_Name ( <a href="#">see page 54</a> )	This is _Name, a member of class CarOwner.
	_Registration ( <a href="#">see page 54</a> )	This is _Registration, a member of class CarOwner.
	_Vorname ( <a href="#">see page 55</a> )	This is _Vorname, a member of class CarOwner.
	emptyChangingEventArgs ( <a href="#">see page 55</a> )	This is emptyChangingEventArgs, a member of class CarOwner.

#### CarOwner Methoden

	Name	Beschreibung
	attach_Registration ( <a href="#">see page 55</a> )	This is attach_Registration, a member of class CarOwner.
	CreateCarOwner ( <a href="#">see page 55</a> )	Erstelle einen neuen Fahrzeughalter
	detach_Registration ( <a href="#">see page 56</a> )	This is detach_Registration, a member of class CarOwner.
	OnAdressIdChanged ( <a href="#">see page 56</a> )	This is OnAdressIdChanged, a member of class CarOwner.
	OnAdressIdChanging ( <a href="#">see page 56</a> )	Aenderungsevents f��r die Historie
	OnBankAccountIdChanged ( <a href="#">see page 56</a> )	This is OnBankAccountIdChanged, a member of class CarOwner.
	OnBankAccountIdChanging ( <a href="#">see page 56</a> )	Aenderungsevents f��r die Historie
	OnContactIdChanged ( <a href="#">see page 57</a> )	This is OnContactIdChanged, a member of class CarOwner.
	OnContactIdChanging ( <a href="#">see page 57</a> )	Aenderungsevents f��r die Historie
	OnCreated ( <a href="#">see page 57</a> )	Aenderungsevents f��r die Historie
	OnFirstNameChanged ( <a href="#">see page 58</a> )	This is OnFirstNameChanged, a member of class CarOwner.
	OnFirstNameChanging ( <a href="#">see page 58</a> )	Aenderungsevents f��r die Historie
	OnIdChanged ( <a href="#">see page 58</a> )	This is OnIdChanged, a member of class CarOwner.
	OnIdChanging ( <a href="#">see page 58</a> )	This is OnIdChanging, a member of class CarOwner.
	OnLoaded ( <a href="#">see page 58</a> )	Aenderungsevents f��r die Historie
	OnNameChanged ( <a href="#">see page 58</a> )	This is OnNameChanged, a member of class CarOwner.
	OnNameChanging ( <a href="#">see page 59</a> )	Aenderungsevents f��r die Historie
	OnValidate ( <a href="#">see page 59</a> )	This is OnValidate, a member of class CarOwner.
	SendPropertyChanged ( <a href="#">see page 59</a> )	This is SendPropertyChanged, a member of class CarOwner.

	SendPropertyChanging ( <a href="#">see page 59</a> )	This is SendPropertyChanging, a member of class CarOwner.
---	--	---

### CarOwner Eigenschaften

	Name	Beschreibung
	Adress ( <a href="#">see page 59</a> )	This is Adress, a member of class CarOwner.
	AdressId ( <a href="#">see page 59</a> )	This is AdressId, a member of class CarOwner.
	BankAccount ( <a href="#">see page 60</a> )	This is BankAccount, a member of class CarOwner.
	BankAccountId ( <a href="#">see page 60</a> )	This is BankAccountId, a member of class CarOwner.
	Contact ( <a href="#">see page 60</a> )	This is Contact, a member of class CarOwner.
	ContactId ( <a href="#">see page 60</a> )	This is ContactId, a member of class CarOwner.
	EntityState ( <a href="#">see page 60</a> )	This is EntityState, a member of class CarOwner.
	FirstName ( <a href="#">see page 61</a> )	This is FirstName, a member of class CarOwner.
	FullName ( <a href="#">see page 61</a> )	Gibt den vollständigen Namen zurück (Fahrzeughalter)
	Id ( <a href="#">see page 61</a> )	This is Id, a member of class CarOwner.
	ItemId ( <a href="#">see page 61</a> )	This is ItemId, a member of class CarOwner.
	LogDbContext ( <a href="#">see page 61</a> )	This is LogDbContext, a member of class CarOwner.
	Name ( <a href="#">see page 61</a> )	This is Name, a member of class CarOwner.
	Registration ( <a href="#">see page 62</a> )	This is Registration, a member of class CarOwner.

### CarOwner Ereignisse

	Name	Beschreibung
	PropertyChanging ( <a href="#">see page 62</a> )	This is PropertyChanging, a member of class CarOwner.
	PropertyChanged ( <a href="#">see page 62</a> )	This is PropertyChanged, a member of class CarOwner.

### CarOwner Eigenschaften

	Name	Beschreibung
	Adress ( <a href="#">see page 59</a> )	This is Adress, a member of class CarOwner.
	AdressId ( <a href="#">see page 59</a> )	This is AdressId, a member of class CarOwner.
	BankAccount ( <a href="#">see page 60</a> )	This is BankAccount, a member of class CarOwner.
	BankAccountId ( <a href="#">see page 60</a> )	This is BankAccountId, a member of class CarOwner.
	Contact ( <a href="#">see page 60</a> )	This is Contact, a member of class CarOwner.
	ContactId ( <a href="#">see page 60</a> )	This is ContactId, a member of class CarOwner.
	EntityState ( <a href="#">see page 60</a> )	This is EntityState, a member of class CarOwner.
	FirstName ( <a href="#">see page 61</a> )	This is FirstName, a member of class CarOwner.
	FullName ( <a href="#">see page 61</a> )	Gibt den vollständigen Namen zurück (Fahrzeughalter)
	Id ( <a href="#">see page 61</a> )	This is Id, a member of class CarOwner.
	ItemId ( <a href="#">see page 61</a> )	This is ItemId, a member of class CarOwner.
	LogDbContext ( <a href="#">see page 61</a> )	This is LogDbContext, a member of class CarOwner.
	Name ( <a href="#">see page 61</a> )	This is Name, a member of class CarOwner.
	Registration ( <a href="#">see page 62</a> )	This is Registration, a member of class CarOwner.

### CarOwner Ereignisse

	Name	Beschreibung
	PropertyChanging ( <a href="#">see page 62</a> )	This is PropertyChanging, a member of class CarOwner.
	PropertyChanged ( <a href="#">see page 62</a> )	This is PropertyChanged, a member of class CarOwner.

### CarOwner Felder

	Name	Beschreibung
	_Adress ( <a href="#">see page 53</a> )	This is _Adress, a member of class CarOwner.
	_AdressId ( <a href="#">see page 53</a> )	This is _AdressId, a member of class CarOwner.
	_BankAccount ( <a href="#">see page 54</a> )	This is _BankAccount, a member of class CarOwner.
	_BankAccountId ( <a href="#">see page 54</a> )	This is _BankAccountId, a member of class CarOwner.
	_Contact ( <a href="#">see page 54</a> )	This is _Contact, a member of class CarOwner.
	_ContactId ( <a href="#">see page 54</a> )	This is _ContactId, a member of class CarOwner.
	_Id ( <a href="#">see page 54</a> )	This is _Id, a member of class CarOwner.
	_Name ( <a href="#">see page 54</a> )	This is _Name, a member of class CarOwner.
	_Registration ( <a href="#">see page 54</a> )	This is _Registration, a member of class CarOwner.
	_Vorname ( <a href="#">see page 55</a> )	This is _Vorname, a member of class CarOwner.
	emptyChangingEventArgs ( <a href="#">see page 55</a> )	This is emptyChangingEventArgs, a member of class CarOwner.

**CarOwner Methoden**

	Name	Beschreibung
	attach_Registration (  see page 55)	This is attach_Registration, a member of class CarOwner.
	CreateCarOwner (  see page 55)	Erstelle einen neuen Fahrzeughalter
	detach_Registration (  see page 56)	This is detach_Registration, a member of class CarOwner.
	OnAdressIdChanged (  see page 56)	This is OnAdressIdChanged, a member of class CarOwner.
	OnAdressIdChanging (  see page 56)	Aenderungsevents f��r die Historie
	OnBankAccountIdChanged (  see page 56)	This is OnBankAccountIdChanged, a member of class CarOwner.
	OnBankAccountIdChanging (  see page 56)	Aenderungsevents f��r die Historie
	OnContactIdChanged (  see page 57)	This is OnContactIdChanged, a member of class CarOwner.
	OnContactIdChanging (  see page 57)	Aenderungsevents f��r die Historie
	OnCreated (  see page 57)	Aenderungsevents f��r die Historie
	OnFirstNameChanged (  see page 58)	This is OnFirstNameChanged, a member of class CarOwner.
	OnFirstNameChanging (  see page 58)	Aenderungsevents f��r die Historie
	OnIdChanged (  see page 58)	This is OnIdChanged, a member of class CarOwner.
	OnIdChanging (  see page 58)	This is OnIdChanging, a member of class CarOwner.
	OnLoaded (  see page 58)	Aenderungsevents f��r die Historie
	OnNameChanged (  see page 58)	This is OnNameChanged, a member of class CarOwner.
	OnNameChanging (  see page 59)	Aenderungsevents f��r die Historie
	OnValidate (  see page 59)	This is OnValidate, a member of class CarOwner.
	SendPropertyChanged (  see page 59)	This is SendPropertyChanged, a member of class CarOwner.
	SendPropertyChanging (  see page 59)	This is SendPropertyChanging, a member of class CarOwner.

**1.1.7.1 CarOwner.CarOwner Konstruktor****C#**

```
public CarOwner();
```

**Anmerkungen**

This is CarOwner, a member of class CarOwner.

**1.1.7.2 CarOwner Felder****1.1.7.2.1 CarOwner.\_Adress Feld****C#**

```
private EntityRef<Adress> _Adress;
```

**Anmerkungen**

This is \_Adress, a member of class CarOwner.

**1.1.7.2.2 CarOwner.\_AdressId Feld****C#**

```
private System.Nullable<System.Guid> _AdressId;
```

**Anmerkungen**

This is \_AdressId, a member of class CarOwner.

### 1.1.7.2.3 CarOwner.\_BankAccount Feld

**C#**

```
private EntityRef<BankAccount> _BankAccount;
```

**Anmerkungen**

This is \_BankAccount, a member of class CarOwner.

### 1.1.7.2.4 CarOwner.\_BankAccountId Feld

**C#**

```
private System.Nullable<System.Guid> _BankAccountId;
```

**Anmerkungen**

This is \_BankAccountId, a member of class CarOwner.

### 1.1.7.2.5 CarOwner.\_Contact Feld

**C#**

```
private EntityRef<Contact> _Contact;
```

**Anmerkungen**

This is \_Contact, a member of class CarOwner.

### 1.1.7.2.6 CarOwner.\_ContactId Feld

**C#**

```
private System.Nullable<System.Guid> _ContactId;
```

**Anmerkungen**

This is \_ContactId, a member of class CarOwner.

### 1.1.7.2.7 CarOwner.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class CarOwner.

### 1.1.7.2.8 CarOwner.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class CarOwner.

### 1.1.7.2.9 CarOwner.\_Registration Feld

**C#**

```
private EntitySet<Registration> _Registration;
```

Anmerkungen

This is \_Registration, a member of class CarOwner.

1.1.7.2.10 CarOwner.\_Vorname Feld

C#

```
private string _Vorname;
```

Anmerkungen

This is \_Vorname, a member of class CarOwner.

1.1.7.2.11 CarOwner.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

Anmerkungen

This is emptyChangingEventArgs, a member of class CarOwner.

1.1.7.3 CarOwner Methoden

1.1.7.3.1 CarOwner.attach\_Registration Methode

C#

```
private void attach_Registration(Registration entity);
```

Anmerkungen

This is attach\_Registration, a member of class CarOwner.

1.1.7.3.2 CarOwner.CreateCarOwner Methode

Erstelle einen neuen Fahrzeughalter

C#

```
public static CarOwner CreateCarOwner(string name, string firstName, Guid? bankAccountId,
Guid? contactId, Guid? adressId, DataClasses1DataContext dbContext);
```

Parameter

Parameter	Beschreibung
string name	Nachname
string firstName	Vorname
Guid? bankAccountId	ID der Bankverbindung
Guid? contactId	ID des Kontaktdatensatzes
Guid? adressId	ID der Adresse
DataClasses1DataContext dbContext	DB Kontext

Resultate

CarOwner (🔗 see page 51)

### 1.1.7.3.3 CarOwner.detach\_Registration Methode

**C#**

```
private void detach_Registration(Registration entity);
```

**Anmerkungen**

This is detach\_Registration, a member of class CarOwner.

### 1.1.7.3.4 CarOwner.OnAdressIdChanged Methode

**C#**

```
private void OnAdressIdChanged();
```

**Anmerkungen**

This is OnAdressIdChanged, a member of class CarOwner.

### 1.1.7.3.5 OnAdressIdChanging Methode

#### 1.1.7.3.5.1 CarOwner.OnAdressIdChanging Methode (Guid?)

Aenderungsevents f r die Historie

**C#**

```
private void OnAdressIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

#### 1.1.7.3.5.2 CarOwner.OnAdressIdChanging Methode (System.Nullable<System.Guid>)

**C#**

```
private void OnAdressIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnAdressIdChanging, a member of class CarOwner.

### 1.1.7.3.6 CarOwner.OnBankAccountIdChanged Methode

**C#**

```
private void OnBankAccountIdChanged();
```

**Anmerkungen**

This is OnBankAccountIdChanged, a member of class CarOwner.

### 1.1.7.3.7 OnBankAccountIdChanging Methode

#### 1.1.7.3.7.1 CarOwner.OnBankAccountIdChanging Methode (Guid?)

Aenderungsevents f r die Historie

**C#**

```
private void OnBankAccountIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.7.3.7.2 CarOwner.OnBankAccountIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnBankAccountIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnBankAccountIdChanging, a member of class CarOwner.

**1.1.7.3.8 CarOwner.OnContactIdChanged Methode****C#**

```
private void OnContactIdChanged();
```

**Anmerkungen**

This is OnContactIdChanged, a member of class CarOwner.

**1.1.7.3.9 OnContactIdChanging Methode****1.1.7.3.9.1 CarOwner.OnContactIdChanging Methode (Guid?)**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnContactIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.7.3.9.2 CarOwner.OnContactIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnContactIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnContactIdChanging, a member of class CarOwner.

**1.1.7.3.10 CarOwner.OnCreated Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.7.3.11 CarOwner.OnFirstNameChanged Methode

**C#**

```
private void OnFirstNameChanged();
```

#### Anmerkungen

This is OnFirstNameChanged, a member of class CarOwner.

### 1.1.7.3.12 CarOwner.OnFirstNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnFirstNameChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.7.3.13 CarOwner.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

#### Anmerkungen

This is OnIdChanged, a member of class CarOwner.

### 1.1.7.3.14 CarOwner.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnIdChanging, a member of class CarOwner.

### 1.1.7.3.15 CarOwner.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.7.3.16 CarOwner.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

#### Anmerkungen

This is OnNameChanged, a member of class CarOwner.

### 1.1.7.3.17 CarOwner.OnNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.7.3.18 CarOwner.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class CarOwner.

### 1.1.7.3.19 CarOwner.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class CarOwner.

### 1.1.7.3.20 CarOwner.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class CarOwner.

## 1.1.7.4 CarOwner Eigenschaften

### 1.1.7.4.1 CarOwner.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_CarOwner",  
Storage="_Adress", ThisKey="AdressId", OtherKey="Id", IsForeignKey=true)]  
public Adress Adress;
```

**Anmerkungen**

This is Adress, a member of class CarOwner.

### 1.1.7.4.2 CarOwner.AdressId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AdressId",  
DbType="UniqueIdentifier")]
```

```
public System.Nullable<System.Guid> AdressId;
```

**Anmerkungen**

This is AdressId, a member of class CarOwner.

### 1.1.7.4.3 CarOwner.BankAccount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="BankAccount_CarOwner",  
Storage="_BankAccount", ThisKey="BankAccountId", OtherKey="Id", IsForeignKey=true)]  
public BankAccount BankAccount;
```

**Anmerkungen**

This is BankAccount, a member of class CarOwner.

### 1.1.7.4.4 CarOwner.BankAccountId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_BankAccountId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> BankAccountId;
```

**Anmerkungen**

This is BankAccountId, a member of class CarOwner.

### 1.1.7.4.5 CarOwner.Contact Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_CarOwner",  
Storage="_Contact", ThisKey="ContactId", OtherKey="Id", IsForeignKey=true)]  
public Contact Contact;
```

**Anmerkungen**

This is Contact, a member of class CarOwner.

### 1.1.7.4.6 CarOwner.ContactId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ContactId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> ContactId;
```

**Anmerkungen**

This is ContactId, a member of class CarOwner.

### 1.1.7.4.7 CarOwner.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class CarOwner.

#### 1.1.7.4.8 CarOwner.FirstName Eigenschaft

##### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Name="Firstname", Storage="_Vorname",  
DbType="VarChar(50)")]  
public string FirstName;
```

##### Anmerkungen

This is FirstName, a member of class CarOwner.

#### 1.1.7.4.9 CarOwner.FullName Eigenschaft

Gibt den vollständigen Namen zurück (Fahrzeughalter)

##### C#

```
public string FullName;
```

#### 1.1.7.4.10 CarOwner.Id Eigenschaft

##### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

##### Anmerkungen

This is Id, a member of class CarOwner.

#### 1.1.7.4.11 CarOwner.ItemId Eigenschaft

##### C#

```
public object ItemId;
```

##### Anmerkungen

This is ItemId, a member of class CarOwner.

#### 1.1.7.4.12 CarOwner.LogDbContext Eigenschaft

##### C#

```
public DataClasses1DataContext LogDbContext;
```

##### Anmerkungen

This is LogDbContext, a member of class CarOwner.

#### 1.1.7.4.13 CarOwner.Name Eigenschaft

##### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT  
NULL")]  
public string Name;
```

##### Anmerkungen

This is Name, a member of class CarOwner.

### 1.1.7.4.14 CarOwner.Registration Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="CarOwner_Registration",
Storage="_Registration", ThisKey="Id", OtherKey="CarOwnerId")]
public EntitySet<Registration> Registration;
```

**Anmerkungen**

This is Registration, a member of class CarOwner.

### 1.1.7.5 CarOwner Ereignisse

#### 1.1.7.5.1 CarOwner.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class CarOwner.

#### 1.1.7.5.2 CarOwner.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class CarOwner.

## 1.1.8 ChangeLog Klasse

**Klassen Hierarchie**

**C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.ChangeLog")]
public class ChangeLog;
```

**Datei**

DataClasses1.designer.cs (see page 695)

**Anmerkungen**

This is class KVSCCommon.Database.ChangeLog.

**Mitglieder**

**Methoden**

	Name	Beschreibung
	ChangeLog (see page 64)	This is ChangeLog, a member of class ChangeLog.

**ChangeLog Felder**

	Name	Beschreibung
	_Date (see page 64)	This is _Date, a member of class ChangeLog.

	_Exception (🔗 see page 64)	This is _Exception, a member of class ChangeLog.
	_Expr1 (🔗 see page 64)	This is _Expr1, a member of class ChangeLog.
	_Expr2 (🔗 see page 64)	This is _Expr2, a member of class ChangeLog.
	_FirstName (🔗 see page 65)	This is _FirstName, a member of class ChangeLog.
	_Id (🔗 see page 65)	This is _Id, a member of class ChangeLog.
	_LastLogin (🔗 see page 65)	This is _LastLogin, a member of class ChangeLog.
	_Login (🔗 see page 65)	This is _Login, a member of class ChangeLog.
	_LogTypeld (🔗 see page 65)	This is _LogTypeld, a member of class ChangeLog.
	_LogUserId (🔗 see page 65)	This is _LogUserId, a member of class ChangeLog.
	_Name (🔗 see page 65)	This is _Name, a member of class ChangeLog.
	_Referenceld (🔗 see page 66)	This is _Referenceld, a member of class ChangeLog.
	_TableName (🔗 see page 66)	This is _TableName, a member of class ChangeLog.
	_TableProperty (🔗 see page 66)	This is _TableProperty, a member of class ChangeLog.
	_Text (🔗 see page 66)	This is _Text, a member of class ChangeLog.

### ChangeLog Eigenschaften

	Name	Beschreibung
	Date (🔗 see page 66)	This is Date, a member of class ChangeLog.
	Exception (🔗 see page 66)	This is Exception, a member of class ChangeLog.
	Expr1 (🔗 see page 67)	This is Expr1, a member of class ChangeLog.
	Expr2 (🔗 see page 67)	This is Expr2, a member of class ChangeLog.
	FirstName (🔗 see page 67)	This is FirstName, a member of class ChangeLog.
	Id (🔗 see page 67)	This is Id, a member of class ChangeLog.
	LastLogin (🔗 see page 67)	This is LastLogin, a member of class ChangeLog.
	Login (🔗 see page 68)	This is Login, a member of class ChangeLog.
	LogTypeld (🔗 see page 68)	This is LogTypeld, a member of class ChangeLog.
	LogUserId (🔗 see page 68)	This is LogUserId, a member of class ChangeLog.
	Name (🔗 see page 68)	This is Name, a member of class ChangeLog.

## 1.1.8.1 ChangeLog.ChangeLog Konstruktor

**C#**

```
public ChangeLog();
```

**Anmerkungen**

This is ChangeLog, a member of class ChangeLog.

## 1.1.8.2 ChangeLog Felder

### 1.1.8.2.1 ChangeLog.\_Date Feld

**C#**

```
private System.DateTime _Date;
```

**Anmerkungen**

This is [\\_Date](#), a member of class ChangeLog.

### 1.1.8.2.2 ChangeLog.\_Exception Feld

**C#**

```
private string _Exception;
```

**Anmerkungen**

This is [\\_Exception](#), a member of class ChangeLog.

### 1.1.8.2.3 ChangeLog.\_Expr1 Feld

**C#**

```
private long _Expr1;
```

**Anmerkungen**

This is [\\_Expr1](#), a member of class ChangeLog.

### 1.1.8.2.4 ChangeLog.\_Expr2 Feld

**C#**

```
private string _Expr2;
```

**Anmerkungen**

This is [\\_Expr2](#), a member of class ChangeLog.

### 1.1.8.2.5 ChangeLog.\_FirstName Feld

**C#**

```
private string _FirstName;
```

**Anmerkungen**

This is \_FirstName, a member of class ChangeLog.

### 1.1.8.2.6 ChangeLog.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class ChangeLog.

### 1.1.8.2.7 ChangeLog.\_LastLogin Feld

**C#**

```
private System.Nullable<System.DateTime> _LastLogin;
```

**Anmerkungen**

This is \_LastLogin, a member of class ChangeLog.

### 1.1.8.2.8 ChangeLog.\_Login Feld

**C#**

```
private string _Login;
```

**Anmerkungen**

This is \_Login, a member of class ChangeLog.

### 1.1.8.2.9 ChangeLog.\_LogTypeld Feld

**C#**

```
private int _LogTypeId;
```

**Anmerkungen**

This is \_LogTypeld, a member of class ChangeLog.

### 1.1.8.2.10 ChangeLog.\_LogUserId Feld

**C#**

```
private System.Guid _LogUserId;
```

**Anmerkungen**

This is \_LogUserId, a member of class ChangeLog.

### 1.1.8.2.11 ChangeLog.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class ChangeLog.

**1.1.8.2.12 ChangeLog.\_ReferenceId Feld****C#**

```
private System.Nullable<System.Guid> _ReferenceId;
```

**Anmerkungen**

This is \_ReferenceId, a member of class ChangeLog.

**1.1.8.2.13 ChangeLog.\_TableName Feld****C#**

```
private string _TableName;
```

**Anmerkungen**

This is \_TableName, a member of class ChangeLog.

**1.1.8.2.14 ChangeLog.\_TableProperty Feld****C#**

```
private string _TableProperty;
```

**Anmerkungen**

This is \_TableProperty, a member of class ChangeLog.

**1.1.8.2.15 ChangeLog.\_Text Feld****C#**

```
private string _Text;
```

**Anmerkungen**

This is \_Text, a member of class ChangeLog.

**1.1.8.3 ChangeLog Eigenschaften****1.1.8.3.1 ChangeLog.Date Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Date", DbType="DateTime NOT NULL")]  
public System.DateTime Date;
```

**Anmerkungen**

This is Date, a member of class ChangeLog.

**1.1.8.3.2 ChangeLog.Exception Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Exception",
```

```
DbType="VarChar(MAX)")]
public string Exception;
```

**Anmerkungen**

This is Exception, a member of class ChangeLog.

### 1.1.8.3.3 ChangeLog.Expr1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Expr1", DbType="BigInt NOT
NULL")]
public long Expr1;
```

**Anmerkungen**

This is Expr1, a member of class ChangeLog.

### 1.1.8.3.4 ChangeLog.Expr2 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Expr2", DbType="VarChar(50) NOT
NULL", CanBeNull=false)]
public string Expr2;
```

**Anmerkungen**

This is Expr2, a member of class ChangeLog.

### 1.1.8.3.5 ChangeLog.FirstName Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FirstName",
DbType="VarChar(50)")]
public string FirstName;
```

**Anmerkungen**

This is FirstName, a member of class ChangeLog.

### 1.1.8.3.6 ChangeLog.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier
NOT NULL")]
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class ChangeLog.

### 1.1.8.3.7 ChangeLog.LastLogin Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LastLogin", DbType="DateTime")]
public System.Nullable<System.DateTime> LastLogin;
```

**Anmerkungen**

This is LastLogin, a member of class ChangeLog.

### 1.1.8.3.8 ChangeLog.Login Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Login", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Login;
```

#### Anmerkungen

This is Login, a member of class ChangeLog.

### 1.1.8.3.9 ChangeLog.LogTypeId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LogTypeId", DbType="Int NOT NULL")]  
public int LogTypeId;
```

#### Anmerkungen

This is LogTypeId, a member of class ChangeLog.

### 1.1.8.3.10 ChangeLog.LogUserId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LogUserId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid LogUserId;
```

#### Anmerkungen

This is LogUserId, a member of class ChangeLog.

### 1.1.8.3.11 ChangeLog.Name Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

#### Anmerkungen

This is Name, a member of class ChangeLog.

### 1.1.8.3.12 ChangeLog.ReferenceId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ReferenceId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> ReferenceId;
```

#### Anmerkungen

This is ReferenceId, a member of class ChangeLog.

### 1.1.8.3.13 ChangeLog.TableName Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TableName",  
DbType="VarChar(50)")]
```

```
public string TableName;
```

Anmerkungen

This is TableName, a member of class ChangeLog.

1.1.8.3.14 ChangeLog.TableProperty Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TableProperty",
DbType="VarChar(50)")]
public string TableProperty;
```

Anmerkungen

This is TableProperty, a member of class ChangeLog.

1.1.8.3.15 ChangeLog.Text Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Text", DbType="VarChar(MAX)")]
public string Text;
```

Anmerkungen

This is Text, a member of class ChangeLog.

1.1.9 ChangeLogColumnNames Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.ChangeLogColumnNames")]
public class ChangeLogColumnNames : INotifyPropertyChanging, INotifyPropertyChanged;
```

## 1.1.9.1 ChangeLogColumnNames.ChangeLogColumnNames Konstruktor

**C#**

```
public ChangeLogColumnNames();
```

**Anmerkungen**

This is ChangeLogColumnNames, a member of class ChangeLogColumnNames.

## 1.1.9.2 ChangeLogColumnNames Felder

### 1.1.9.2.1 ChangeLogColumnNames.\_ColumnNames Feld

**C#**

```
private string _ColumnNames;
```

**Anmerkungen**

This is \_ColumnNames, a member of class ChangeLogColumnNames.

### 1.1.9.2.2 ChangeLogColumnNames.\_IdColumnName Feld

**C#**

```
private string _IdColumnName;
```

**Anmerkungen**

This is \_IdColumnName, a member of class ChangeLogColumnNames.

### 1.1.9.2.3 ChangeLogColumnNames.\_TableName Feld

**C#**

```
private string _TableName;
```

**Anmerkungen**

This is \_TableName, a member of class ChangeLogColumnNames.

### 1.1.9.2.4 ChangeLogColumnNames.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class ChangeLogColumnNames.

## 1.1.9.3 ChangeLogColumnNames Methoden

### 1.1.9.3.1 ChangeLogColumnNames.OnColumnNamesChanged Methode

**C#**

```
private void OnColumnNamesChanged();
```

**Anmerkungen**

This is OnColumnNamesChanged, a member of class ChangeLogColumnNames.

### 1.1.9.3.2 ChangeLogColumnNames.OnColumnNamesChanging Methode

**C#**

```
private void OnColumnNamesChanging(string value);
```

**Anmerkungen**

This is OnColumnNamesChanging, a member of class ChangeLogColumnNames.

### 1.1.9.3.3 ChangeLogColumnNames.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class ChangeLogColumnNames.

### 1.1.9.3.4 ChangeLogColumnNames.OnIdColumnNameChanged Methode

**C#**

```
private void OnIdColumnNameChanged();
```

**Anmerkungen**

This is OnIdColumnNameChanged, a member of class ChangeLogColumnNames.

### 1.1.9.3.5 ChangeLogColumnNames.OnIdColumnNameChanging Methode

**C#**

```
private void OnIdColumnNameChanging(string value);
```

**Anmerkungen**

This is OnIdColumnNameChanging, a member of class ChangeLogColumnNames.

### 1.1.9.3.6 ChangeLogColumnNames.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class ChangeLogColumnNames.

### 1.1.9.3.7 ChangeLogColumnNames.OnTableNameChanged Methode

**C#**

```
private void OnTableNameChanged();
```

**Anmerkungen**

This is OnTableNameChanged, a member of class ChangeLogColumnNames.

**1.1.9.3.8 ChangeLogColumnNames.OnTableNameChanging Methode****C#**

```
private void OnTableNameChanging(string value);
```

**Anmerkungen**

This is OnTableNameChanging, a member of class ChangeLogColumnNames.

**1.1.9.3.9 ChangeLogColumnNames.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class ChangeLogColumnNames.

**1.1.9.3.10 ChangeLogColumnNames.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class ChangeLogColumnNames.

**1.1.9.3.11 ChangeLogColumnNames.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class ChangeLogColumnNames.

**1.1.9.4 ChangeLogColumnNames Eigenschaften****1.1.9.4.1 ChangeLogColumnNames.ColumnNames Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ColumnNames",  
DbType="VarChar(MAX)")]  
public string ColumnNames;
```

**Anmerkungen**

This is ColumnNames, a member of class ChangeLogColumnNames.

**1.1.9.4.2 ChangeLogColumnNames.IdColumnName Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IdColumnName",
```

```
DbType="VarChar(250)")]
public string IdColumnName;
```

#### Anmerkungen

This is IdColumnName, a member of class ChangeLogColumnNames.

### 1.1.9.4.3 ChangeLogColumnNames.TableName Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TableName",
DbType="VarChar(255) NOT NULL", CanBeNull=false, IsPrimaryKey=true)]
public string TableName;
```

#### Anmerkungen

This is TableName, a member of class ChangeLogColumnNames.

## 1.1.9.5 ChangeLogColumnNames Ereignisse

### 1.1.9.5.1 ChangeLogColumnNames.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class ChangeLogColumnNames.

### 1.1.9.5.2 ChangeLogColumnNames.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class ChangeLogColumnNames.

## 1.1.10 Contact Klasse

Erweiterungsklasse für die Kontaktdaten

#### Klassen Hierarchie

#### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.Contact")]
public class Contact : INotifyPropertyChanging, INotifyPropertyChanged;
```

#### Datei

	OnMobilePhoneChanged ( <a href="#">↗</a> see page 82)	This is OnMobilePhoneChanged, a member of class Contact.
	OnMobilePhoneChanging ( <a href="#">↗</a> see page 82)	Aenderungsevents fÄ¼r die Historie
	OnPhoneChanged ( <a href="#">↗</a> see page 82)	This is OnPhoneChanged, a member of class Contact.
	OnPhoneChanging ( <a href="#">↗</a> see page 82)	Aenderungsevents fÄ¼r die Historie
	OnValidate ( <a href="#">↗</a> see page 82)	This is OnValidate, a member of class Contact.
	SendPropertyChanged ( <a href="#">↗</a> see page 83)	This is SendPropertyChanged, a member of class Contact.
	SendPropertyChanging ( <a href="#">↗</a> see page 83)	This is SendPropertyChanging, a member of class Contact.

**Contact Eigenschaften**

	Name	Beschreibung
	CarOwner ( <a href="#">↗</a> see page 83)	This is CarOwner, a member of class Contact.
	Customer ( <a href="#">↗</a> see page 83)	This is Customer, a member of class Contact.
	Email ( <a href="#">↗</a> see page 83)	This is Email, a member of class Contact.
	EntityState ( <a href="#">↗</a> see page 84)	This is EntityState, a member of class Contact.
	Fax ( <a href="#">↗</a> see page 84)	This is Fax, a member of class Contact.
	Id ( <a href="#">↗</a> see page 84)	This is Id, a member of class Contact.
	ItemId ( <a href="#">↗</a> see page 84)	This is ItemId, a member of class Contact.
	Location ( <a href="#">↗</a> see page 84)	This is Location, a member of class Contact.
	LogDBContext ( <a href="#">↗</a> see page 84)	This is LogDBContext, a member of class Contact.
	MobilePhone ( <a href="#">↗</a> see page 85)	This is MobilePhone, a member of class Contact.

	Phone ( <a href="#">↗</a> see page 85)	This is Phone, a member of class Contact.
	User ( <a href="#">↗</a> see page 85)	This is User, a member of class Contact.

**Contact Ereignisse**

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 85)	This is PropertyChanged, a member of class Contact.
	PropertyChanging ( <a href="#">↗</a> see page 85)	This is PropertyChanging, a member of class Contact.

**Contact Eigenschaften**

	Name	Beschreibung
	CarOwner ( <a href="#">↗</a> see page 83)	This is CarOwner, a member of class Contact.
	Customer ( <a href="#">↗</a> see page 83)	This is Customer, a member of class Contact.
	Email ( <a href="#">↗</a> see page 83)	This is Email, a member of class Contact.
	EntityState ( <a href="#">↗</a> see page 84)	This is EntityState, a member of class Contact.
	Fax ( <a href="#">↗</a> see page 84)	This is Fax, a member of class Contact.
	Id ( <a href="#">↗</a> see page 84)	This is Id, a member of class Contact.
	ItemId ( <a href="#">↗</a> see page 84)	This is ItemId, a member of class Contact.
	Location ( <a href="#">↗</a> see page 84)	This is Location, a member of class Contact.
	LogDbContext ( <a href="#">↗</a> see page 84)	This is LogDbContext, a member of class Contact.
	MobilePhone ( <a href="#">↗</a> see page 85)	This is MobilePhone, a member of class Contact.
	Phone ( <a href="#">↗</a> see page 85)	This is Phone, a member of class Contact.
	User ( <a href="#">↗</a> see page 85)	This is User, a member of class Contact.

**Contact Ereignisse**

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 85)	This is PropertyChanged, a member of class Contact.
	PropertyChanging ( <a href="#">↗</a> see page 85)	This is PropertyChanging, a member of class Contact.

**Contact Felder**

	Name	Beschreibung
	_CarOwner ( <a href="#">↗</a> see page 77)	This is _CarOwner, a member of class Contact.
	_Customer ( <a href="#">↗</a> see page 77)	This is _Customer, a member of class Contact.
	_Email ( <a href="#">↗</a> see page 77)	This is _Email, a member of class Contact.
	_Fax ( <a href="#">↗</a> see page 77)	This is _Fax, a member of class Contact.
	_Id ( <a href="#">↗</a> see page 78)	This is _Id, a member of class Contact.
	_Location ( <a href="#">↗</a> see page 78)	This is _Location, a member of class Contact.
	_MobilePhone ( <a href="#">↗</a> see page 78)	This is _MobilePhone, a member of class Contact.
	_Phone ( <a href="#">↗</a> see page 78)	This is _Phone, a member of class Contact.
	_User ( <a href="#">↗</a> see page 78)	This is _User, a member of class Contact.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 78)	This is emptyChangingEventArgs, a member of class Contact.

**Contact Methoden**

	Name	Beschreibung
	attach_CarOwner ( <a href="#">↗</a> see page 79)	This is attach_CarOwner, a member of class Contact.
	attach_Customer ( <a href="#">↗</a> see page 79)	This is attach_Customer, a member of class Contact.
	attach_Location ( <a href="#">↗</a> see page 79)	This is attach_Location, a member of class Contact.
	attach_User ( <a href="#">↗</a> see page 79)	This is attach_User, a member of class Contact.
	CreateContact ( <a href="#">↗</a> see page 79)	Erstelle einen neuen Kontakt
	DeleteContact ( <a href="#">↗</a> see page 79)	Löscht den angegebenen Kontakt aus der Datenbank
	detach_CarOwner ( <a href="#">↗</a> see page 80)	This is detach_CarOwner, a member of class Contact.
	detach_Customer ( <a href="#">↗</a> see page 80)	This is detach_Customer, a member of class Contact.
	detach_Location ( <a href="#">↗</a> see page 80)	This is detach_Location, a member of class Contact.
	detach_User ( <a href="#">↗</a> see page 80)	This is detach_User, a member of class Contact.
	OnCreated ( <a href="#">↗</a> see page 80)	Aenderungsevents für die Historie
	OnEmailChanged ( <a href="#">↗</a> see page 81)	This is OnEmailChanged, a member of class Contact.
	OnEmailChanging ( <a href="#">↗</a> see page 81)	Aenderungsevents für die Historie
	OnFaxChanged ( <a href="#">↗</a> see page 81)	This is OnFaxChanged, a member of class Contact.
	OnFaxChanging ( <a href="#">↗</a> see page 81)	Aenderungsevents für die Historie
	OnIdChanged ( <a href="#">↗</a> see page 81)	This is OnIdChanged, a member of class Contact.

	OnIdChanging (  see page 81)	This is OnIdChanging, a member of class Contact.
	OnLoaded (  see page 82)	Aenderungsevents f��r die Historie
	OnMobilePhoneChanged (  see page 82)	This is OnMobilePhoneChanged, a member of class Contact.
	OnMobilePhoneChanging (  see page 82)	Aenderungsevents f��r die Historie
	OnPhoneChanged (  see page 82)	This is OnPhoneChanged, a member of class Contact.
	OnPhoneChanging (  see page 82)	Aenderungsevents f��r die Historie
	OnValidate (  see page 82)	This is OnValidate, a member of class Contact.
	SendPropertyChanged (  see page 83)	This is SendPropertyChanged, a member of class Contact.
	SendPropertyChanging (  see page 83)	This is SendPropertyChanging, a member of class Contact.

## 1.1.10.1 Contact.Contact Konstruktor

**C#**

```
public Contact();
```

**Anmerkungen**

This is Contact, a member of class Contact.

## 1.1.10.2 Contact Felder

### 1.1.10.2.1 Contact.\_CarOwner Feld

**C#**

```
private EntitySet<CarOwner> _CarOwner;
```

**Anmerkungen**

This is \_CarOwner, a member of class Contact.

### 1.1.10.2.2 Contact.\_Customer Feld

**C#**

```
private EntitySet<Customer> _Customer;
```

**Anmerkungen**

This is \_Customer, a member of class Contact.

### 1.1.10.2.3 Contact.\_Email Feld

**C#**

```
private string _Email;
```

**Anmerkungen**

This is \_Email, a member of class Contact.

### 1.1.10.2.4 Contact.\_Fax Feld

**C#**

```
private string _Fax;
```

**Anmerkungen**

This is \_Fax, a member of class Contact.

### 1.1.10.2.5 Contact.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Contact.

### 1.1.10.2.6 Contact.\_Location Feld

**C#**

```
private EntitySet<Location> _Location;
```

**Anmerkungen**

This is \_Location, a member of class Contact.

### 1.1.10.2.7 Contact.\_MobilePhone Feld

**C#**

```
private string _MobilePhone;
```

**Anmerkungen**

This is \_MobilePhone, a member of class Contact.

### 1.1.10.2.8 Contact.\_Phone Feld

**C#**

```
private string _Phone;
```

**Anmerkungen**

This is \_Phone, a member of class Contact.

### 1.1.10.2.9 Contact.\_User Feld

**C#**

```
private EntitySet<User> _User;
```

**Anmerkungen**

This is \_User, a member of class Contact.

### 1.1.10.2.10 Contact.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Contact.

## 1.1.10.3 Contact Methoden

### 1.1.10.3.1 Contact.attach\_CarOwner Methode

**C#**

```
private void attach_CarOwner(CarOwner entity);
```

**Anmerkungen**

This is attach\_CarOwner, a member of class Contact.

### 1.1.10.3.2 Contact.attach\_Customer Methode

**C#**

```
private void attach_Customer(Customer entity);
```

**Anmerkungen**

This is attach\_Customer, a member of class Contact.

### 1.1.10.3.3 Contact.attach\_Location Methode

**C#**

```
private void attach_Location(Location entity);
```

**Anmerkungen**

This is attach\_Location, a member of class Contact.

### 1.1.10.3.4 Contact.attach\_User Methode

**C#**

```
private void attach_User(User entity);
```

**Anmerkungen**

This is attach\_User, a member of class Contact.

### 1.1.10.3.5 Contact.CreateContact Methode

Erstelle einene neuen Kontakt

**C#**

```
public static Contact CreateContact(string phone, string fax, string mobilePhone, string email, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string phone	Telefon
string fax	Fax (☒ see page 84)
string mobilePhone	Mobil
string email	Mail
DataClasses1DataContext dbContext	Datenbankkontext

**Resultate**

Den neue erstellten Kontakt

### 1.1.10.3.6 Contact.DeleteContact Methode

LÄscht den angegeben Kontakt aus der Datenbank

**C#**

```
public static void DeleteContact(Guid contactId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	
adressId	Id ( <a href="#">↗</a> see page 84) des Kontakts.

### 1.1.10.3.7 Contact.detach\_CarOwner Methode

**C#**

```
private void detach_CarOwner(CarOwner entity);
```

**Anmerkungen**

This is detach\_CarOwner, a member of class Contact.

### 1.1.10.3.8 Contact.detach\_Customer Methode

**C#**

```
private void detach_Customer(Customer entity);
```

**Anmerkungen**

This is detach\_Customer, a member of class Contact.

### 1.1.10.3.9 Contact.detach\_Location Methode

**C#**

```
private void detach_Location(Location entity);
```

**Anmerkungen**

This is detach\_Location, a member of class Contact.

### 1.1.10.3.10 Contact.detach\_User Methode

**C#**

```
private void detach_User(User entity);
```

**Anmerkungen**

This is detach\_User, a member of class Contact.

### 1.1.10.3.11 Contact.OnCreated Methode

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.10.3.12 Contact.OnEmailChanged Methode

**C#**

```
private void OnEmailChanged();
```

**Anmerkungen**

This is OnEmailChanged, a member of class Contact.

### 1.1.10.3.13 Contact.OnEmailChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnEmailChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.10.3.14 Contact.OnFaxChanged Methode

**C#**

```
private void OnFaxChanged();
```

**Anmerkungen**

This is OnFaxChanged, a member of class Contact.

### 1.1.10.3.15 Contact.OnFaxChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnFaxChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.10.3.16 Contact.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Contact.

### 1.1.10.3.17 Contact.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Contact.

### 1.1.10.3.18 Contact.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.10.3.19 Contact.OnMobilePhoneChanged Methode

**C#**

```
private void OnMobilePhoneChanged();
```

**Anmerkungen**

This is OnMobilePhoneChanged, a member of class Contact.

### 1.1.10.3.20 Contact.OnMobilePhoneChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnMobilePhoneChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.10.3.21 Contact.OnPhoneChanged Methode

**C#**

```
private void OnPhoneChanged();
```

**Anmerkungen**

This is OnPhoneChanged, a member of class Contact.

### 1.1.10.3.22 Contact.OnPhoneChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnPhoneChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.10.3.23 Contact.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Contact.

**1.1.10.3.24 Contact.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Contact.

**1.1.10.3.25 Contact.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Contact.

**1.1.10.4 Contact Eigenschaften****1.1.10.4.1 Contact.CarOwner Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_CarOwner",  
Storage="_CarOwner", ThisKey="Id", OtherKey="ContactId")]  
public EntitySet<CarOwner> CarOwner;
```

**Anmerkungen**

This is CarOwner, a member of class Contact.

**1.1.10.4.2 Contact.Customer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_Customer",  
Storage="_Customer", ThisKey="Id", OtherKey="ContactId")]  
public EntitySet<Customer> Customer;
```

**Anmerkungen**

This is Customer, a member of class Contact.

**1.1.10.4.3 Contact.Email Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Email", DbType="VarChar(50)")]  
public string Email;
```

**Anmerkungen**

This is Email, a member of class Contact.

#### 1.1.10.4.4 Contact.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Contact.

#### 1.1.10.4.5 Contact.Fax Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Fax", DbType="VarChar(50)")]  
public string Fax;
```

**Anmerkungen**

This is Fax, a member of class Contact.

#### 1.1.10.4.6 Contact.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Contact.

#### 1.1.10.4.7 Contact.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Contact.

#### 1.1.10.4.8 Contact.Location Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_Location",  
Storage="_Location", ThisKey="Id", OtherKey="ContactId")]  
public EntitySet<Location> Location;
```

**Anmerkungen**

This is Location, a member of class Contact.

#### 1.1.10.4.9 Contact.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Contact.

### 1.1.10.4.10 Contact.MobilePhone Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_MobilePhone",  
DbType="VarChar(50)")]  
public string MobilePhone;
```

#### Anmerkungen

This is MobilePhone, a member of class Contact.

### 1.1.10.4.11 Contact.Phone Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Phone", DbType="VarChar(50)")]  
public string Phone;
```

#### Anmerkungen

This is Phone, a member of class Contact.

### 1.1.10.4.12 Contact.User Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_User",  
Storage="_User", ThisKey="Id", OtherKey="ContactId")]  
public EntitySet<User> User;
```

#### Anmerkungen

This is User, a member of class Contact.

## 1.1.10.5 Contact Ereignisse

### 1.1.10.5.1 Contact.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class Contact.

### 1.1.10.5.2 Contact.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class Contact.

---

## 1.1.11 CostCenter Klasse

Erweiterungsklasse

**Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.CostCenter" )]
public class CostCenter : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

DataClasses1.designer.cs (🔗 see page 695)

**Mitglieder****Methoden**

	Name	Beschreibung
	CostCenter (🔗 see page 88)	This is CostCenter, a member of class CostCenter.

**CostCenter Felder**

	Name	Beschreibung
	_BankAccount (🔗 see page 88)	This is _BankAccount, a member of class CostCenter.
	_BankAccountId (🔗 see page 88)	This is _BankAccountId, a member of class CostCenter.
	_CostcenterNumber (🔗 see page 88)	This is _CostcenterNumber, a member of class CostCenter.
	_CustomerId (🔗 see page 89)	This is _CustomerId, a member of class CostCenter.
	_Id (🔗 see page 89)	This is _Id, a member of class CostCenter.
	_InvoiceItem (🔗 see page 89)	This is _InvoiceItem, a member of class CostCenter.
	_LargeCustomer (🔗 see page 89)	This is _LargeCustomer, a member of class CostCenter.
	_Name (🔗 see page 89)	This is _Name, a member of class CostCenter.
	_OrderItem (🔗 see page 89)	This is _OrderItem, a member of class CostCenter.
	emptyChangingEventArgs (🔗 see page 89)	This is emptyChangingEventArgs, a member of class CostCenter.
	myDbContext (🔗 see page 90)	This is myDbContext, a member of class CostCenter.

**CostCenter Methoden**

	Name	Beschreibung
	attach_InvoiceItem (🔗 see page 90)	This is attach_InvoiceItem, a member of class CostCenter.
	attach_OrderItem (🔗 see page 90)	This is attach_OrderItem, a member of class CostCenter.
	detach_InvoiceItem (🔗 see page 90)	This is detach_InvoiceItem, a member of class CostCenter.
	detach_OrderItem (🔗 see page 90)	This is detach_OrderItem, a member of class CostCenter.
	OnBankAccountIdChanged (🔗 see page 90)	This is OnBankAccountIdChanged, a member of class CostCenter.
	OnBankAccountIdChanging (🔗 see page 91)	Aenderungsevents fÃ¼r die Historie
	OnCostcenterNumberChanged (🔗 see page 91)	This is OnCostcenterNumberChanged, a member of class CostCenter.
	OnCostcenterNumberChanging (🔗 see page 91)	Aenderungsevents fÃ¼r die Historie
	OnCreated (🔗 see page 91)	Aenderungsevents fÃ¼r die Historie
	OnCustomerIdChanged (🔗 see page 92)	This is OnCustomerIdChanged, a member of class CostCenter.
	OnCustomerIdChanging (🔗 see page 92)	This is OnCustomerIdChanging, a member of class CostCenter.
	OnIdChanged (🔗 see page 92)	This is OnIdChanged, a member of class CostCenter.
	OnIdChanging (🔗 see page 92)	This is OnIdChanging, a member of class CostCenter.
	OnLoaded (🔗 see page 92)	Aenderungsevents fÃ¼r die Historie
	OnNameChanged (🔗 see page 92)	This is OnNameChanged, a member of class CostCenter.
	OnNameChanging (🔗 see page 93)	Aenderungsevents fÃ¼r die Historie
	OnValidate (🔗 see page 93)	Validierungs Methode um falsche Eingaben zu verhindern
	RemoveCostCenter (🔗 see page 93)	LÃ¶scht die angegebene Kostenstelle aus der Datenbank.
	SendPropertyChanged (🔗 see page 93)	This is SendPropertyChanged, a member of class CostCenter.
	SendPropertyChanging (🔗 see page 93)	This is SendPropertyChanging, a member of class CostCenter.

**CostCenter Eigenschaften**

	Name	Beschreibung
	_dbContext (🔗 see page 94)	This is _dbContext, a member of class CostCenter.
	BankAccount (🔗 see page 94)	This is BankAccount, a member of class CostCenter.
	BankAccountId (🔗 see page 94)	This is BankAccountId, a member of class CostCenter.

	CostcenterNumber ( <a href="#">↗</a> see page 94)	This is CostcenterNumber, a member of class CostCenter.
	CustomerId ( <a href="#">↗</a> see page 94)	This is CustomerId, a member of class CostCenter.
	EntityState ( <a href="#">↗</a> see page 94)	This is EntityState, a member of class CostCenter.

	_CustomerId ( <a href="#">↗</a> see page 89)	This is _CustomerId, a member of class CostCenter.
	_Id ( <a href="#">↗</a> see page 89)	This is _Id, a member of class CostCenter.
	_Invoiceltem ( <a href="#">↗</a> see page 89)	This is _Invoiceltem, a member of class CostCenter.
	_LargeCustomer ( <a href="#">↗</a> see page 89)	This is _LargeCustomer, a member of class CostCenter.
	_Name ( <a href="#">↗</a> see page 89)	This is _Name, a member of class CostCenter.
	_OrderItem ( <a href="#">↗</a> see page 89)	This is _OrderItem, a member of class CostCenter.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 89)	This is emptyChangingEventArgs, a member of class CostCenter.
	myDbContext ( <a href="#">↗</a> see page 90)	This is myDbContext, a member of class CostCenter.

### CostCenter Methoden

	Name	Beschreibung
	attach_Invoiceltem ( <a href="#">↗</a> see page 90)	This is attach_Invoiceltem, a member of class CostCenter.
	attach_OrderItem ( <a href="#">↗</a> see page 90)	This is attach_OrderItem, a member of class CostCenter.
	detach_Invoiceltem ( <a href="#">↗</a> see page 90)	This is detach_Invoiceltem, a member of class CostCenter.
	detach_OrderItem ( <a href="#">↗</a> see page 90)	This is detach_OrderItem, a member of class CostCenter.
	OnBankAccountIdChanged ( <a href="#">↗</a> see page 90)	This is OnBankAccountIdChanged, a member of class CostCenter.
	OnBankAccountIdChanging ( <a href="#">↗</a> see page 91)	Aenderungsevents fÅ¼r die Historie

	OnCostcenterNumberChanged (  see page 91)	This is OnCostcenterNumberChanged, a member of class CostCenter.
	OnCostcenterNumberChanging (  see page 91)	Aenderungsevents f��r die Historie
	OnCreated (  see page 91)	Aenderungsevents f��r die Historie
	OnCustomerIdChanged (  see page 92)	This is OnCustomerIdChanged, a member of class CostCenter.
	OnCustomerIdChanging (  see page 92)	This is OnCustomerIdChanging, a member of class CostCenter.
	OnIdChanged (  see page 92)	This is OnIdChanged, a member of class CostCenter.
	OnIdChanging (  see page 92)	This is OnIdChanging, a member of class CostCenter.
	OnLoaded (  see page 92)	Aenderungsevents f��r die Historie
	OnNameChanged (  see page 92)	This is OnNameChanged, a member of class CostCenter.
	OnNameChanging (  see page 93)	Aenderungsevents f��r die Historie
	OnValidate (  see page 93)	Validierungs Methode um falsche Eingaben zu verhindern
	RemoveCostCenter (  see page 93)	L��scht die angegebene Kostenstelle aus der Datenbank.
	SendPropertyChanged (  see page 93)	This is SendPropertyChanged, a member of class CostCenter.
	SendPropertyChanging (  see page 93)	This is SendPropertyChanging, a member of class CostCenter.

### 1.1.11.1 CostCenter.CostCenter Konstruktor

**C#**

```
public CostCenter();
```

**Anmerkungen**

This is CostCenter, a member of class CostCenter.

### 1.1.11.2 CostCenter Felder

#### 1.1.11.2.1 CostCenter.\_BankAccount Feld

**C#**

```
private EntityRef<BankAccount> _BankAccount;
```

**Anmerkungen**

This is \_BankAccount, a member of class CostCenter.

#### 1.1.11.2.2 CostCenter.\_BankAccountId Feld

**C#**

```
private System.Nullable<System.Guid> _BankAccountId;
```

**Anmerkungen**

This is \_BankAccountId, a member of class CostCenter.

#### 1.1.11.2.3 CostCenter.\_CostcenterNumber Feld

**C#**

```
private string _CostcenterNumber;
```

**Anmerkungen**

This is \_CostcenterNumber, a member of class CostCenter.

#### 1.1.11.2.4 CostCenter.\_CustomerId Feld

**C#**

```
private System.Guid _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class CostCenter.

#### 1.1.11.2.5 CostCenter.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class CostCenter.

#### 1.1.11.2.6 CostCenter.\_InvoiceItem Feld

**C#**

```
private EntitySet<InvoiceItem> _InvoiceItem;
```

**Anmerkungen**

This is \_InvoiceItem, a member of class CostCenter.

#### 1.1.11.2.7 CostCenter.\_LargeCustomer Feld

**C#**

```
private EntityRef<LargeCustomer> _LargeCustomer;
```

**Anmerkungen**

This is \_LargeCustomer, a member of class CostCenter.

#### 1.1.11.2.8 CostCenter.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class CostCenter.

#### 1.1.11.2.9 CostCenter.\_OrderItem Feld

**C#**

```
private EntitySet<OrderItem> _OrderItem;
```

**Anmerkungen**

This is \_OrderItem, a member of class CostCenter.

#### 1.1.11.2.10 CostCenter.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
```

```
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class CostCenter.

### 1.1.11.2.11 CostCenter.myDbContext Feld

**C#**

```
private DataClasses1DataContext myDbContext;
```

**Anmerkungen**

This is myDbContext, a member of class CostCenter.

## 1.1.11.3 CostCenter Methoden

### 1.1.11.3.1 CostCenter.attach\_InvoiceItem Methode

**C#**

```
private void attach_InvoiceItem(InvoiceItem entity);
```

**Anmerkungen**

This is attach\_InvoiceItem, a member of class CostCenter.

### 1.1.11.3.2 CostCenter.attach\_OrderItem Methode

**C#**

```
private void attach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is attach\_OrderItem, a member of class CostCenter.

### 1.1.11.3.3 CostCenter.detach\_InvoiceItem Methode

**C#**

```
private void detach_InvoiceItem(InvoiceItem entity);
```

**Anmerkungen**

This is detach\_InvoiceItem, a member of class CostCenter.

### 1.1.11.3.4 CostCenter.detach\_OrderItem Methode

**C#**

```
private void detach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is detach\_OrderItem, a member of class CostCenter.

### 1.1.11.3.5 CostCenter.OnBankAccountIdChanged Methode

**C#**

```
private void OnBankAccountIdChanged();
```

**Anmerkungen**

This is OnBankAccountIdChanged, a member of class CostCenter.

**1.1.11.3.6 OnBankAccountIdChanging Methode****1.1.11.3.6.1 CostCenter.OnBankAccountIdChanging Methode (Guid?)**

Änderungsevents für die Historie

**C#**

```
private void OnBankAccountIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.11.3.6.2 CostCenter.OnBankAccountIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnBankAccountIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnBankAccountIdChanging, a member of class CostCenter.

**1.1.11.3.7 CostCenter.OnCostcenterNumberChanged Methode****C#**

```
private void OnCostcenterNumberChanged();
```

**Anmerkungen**

This is OnCostcenterNumberChanged, a member of class CostCenter.

**1.1.11.3.8 CostCenter.OnCostcenterNumberChanging Methode**

Änderungsevents für die Historie

**C#**

```
private void OnCostcenterNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.11.3.9 CostCenter.OnCreated Methode**

Änderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.11.3.10 CostCenter.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class CostCenter.

### 1.1.11.3.11 CostCenter.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class CostCenter.

### 1.1.11.3.12 CostCenter.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class CostCenter.

### 1.1.11.3.13 CostCenter.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class CostCenter.

### 1.1.11.3.14 CostCenter.OnLoaded Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.11.3.15 CostCenter.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class CostCenter.

### 1.1.11.3.16 CostCenter.OnNameChanging Methode

Änderungsevents für die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.11.3.17 CostCenter.OnValidate Methode

Validierungs Methode um falsche Eingaben zu verhindern

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Parameter**

Parameter	Beschreibung
System.Data.Linq.ChangeAction action	

### 1.1.11.3.18 CostCenter.RemoveCostCenter Methode

Löscht die angegebene Kostenstelle aus der Datenbank.

**C#**

```
public static void RemoveCostCenter(Guid costCenterId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	
adressId	Id ( <a href="#">↗</a> see page 95) der Kostenstelle.

### 1.1.11.3.19 CostCenter.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class CostCenter.

### 1.1.11.3.20 CostCenter.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class CostCenter.

## 1.1.11.4 CostCenter Eigenschaften

#### 1.1.11.4.1 CostCenter.\_dbContext Eigenschaft

**C#**

```
public DataClasses1DataContext _dbContext;
```

**Anmerkungen**

This is \_dbContext, a member of class CostCenter.

#### 1.1.11.4.2 CostCenter.BankAccount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="BankAccount_CostCenter",  
Storage="_BankAccount", ThisKey="BankAccountId", OtherKey="Id", IsForeignKey=true)]  
public BankAccount BankAccount;
```

**Anmerkungen**

This is BankAccount, a member of class CostCenter.

#### 1.1.11.4.3 CostCenter.BankAccountId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_BankAccountId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> BankAccountId;
```

**Anmerkungen**

This is BankAccountId, a member of class CostCenter.

#### 1.1.11.4.4 CostCenter.CostcenterNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CostcenterNumber",  
DbType="varchar(20) not null", CanBeNull=false)]  
public string CostcenterNumber;
```

**Anmerkungen**

This is CostcenterNumber, a member of class CostCenter.

#### 1.1.11.4.5 CostCenter.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class CostCenter.

#### 1.1.11.4.6 CostCenter.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class CostCenter.

**1.1.11.4.7 CostCenter.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class CostCenter.

**1.1.11.4.8 CostCenter.InvoiceItem Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="CostCenter_InvoiceItem",  
Storage="_InvoiceItem", ThisKey="Id", OtherKey="CostcenterId")]  
public EntitySet<InvoiceItem> InvoiceItem;
```

**Anmerkungen**

This is InvoiceItem, a member of class CostCenter.

**1.1.11.4.9 CostCenter.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class CostCenter.

**1.1.11.4.10 CostCenter.LargeCustomer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_CostCenter",  
Storage="_LargeCustomer", ThisKey="CustomerId", OtherKey="CustomerId", IsForeignKey=true)]  
public LargeCustomer LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class CostCenter.

**1.1.11.4.11 CostCenter.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class CostCenter.

**1.1.11.4.12 CostCenter.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="varchar(50)",  
CanBeNull=false)]
```

```
public string Name;
```

#### Anmerkungen

This is Name, a member of class CostCenter.

### 1.1.11.4.13 CostCenter.OrderItem Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="CostCenter_OrderItem",
Storage="_OrderItem", ThisKey="Id", OtherKey="CostCenterId")]
public EntitySet<OrderItem> OrderItem;
```

#### Anmerkungen

This is OrderItem, a member of class CostCenter.

## 1.1.11.5 CostCenter Ereignisse

### 1.1.11.5.1 CostCenter.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class CostCenter.

### 1.1.11.5.2 CostCenter.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class CostCenter.

## 1.1.12 Customer Klasse

Erweiterungsklasse für die Kundentabelle

#### Klassen Hierarchie

#### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.Customer")]
public class Customer : INotifyPropertyChanging, INotifyPropertyChanged;
```

#### Datei

DataClasses1.designer.cs (📄 see page 695)

**Mitglieder****Methoden**

	Name	Beschreibung
	Customer ( <a href="#">↗</a> see page 100)	This is Customer, a member of class Customer.

**Customer Felder**

	Name	Beschreibung
	_Adress ( <a href="#">↗</a> see page 101)	This is _Adress, a member of class Customer.
	_AdressId ( <a href="#">↗</a> see page 101)	This is _AdressId, a member of class Customer.
	_Contact ( <a href="#">↗</a> see page 101)	This is _Contact, a member of class Customer.
	_ContactId ( <a href="#">↗</a> see page 101)	This is _ContactId, a member of class Customer.
	_CustomerNumber ( <a href="#">↗</a> see page 101)	This is _CustomerNumber, a member of class Customer.
	_CustomerProduct ( <a href="#">↗</a> see page 101)	This is _CustomerProduct, a member of class Customer.

	OnContactIdChanged ( <a href="#">↗</a> see page 107)	This is OnContactIdChanged, a member of class Customer.
	OnContactIdChanging ( <a href="#">↗</a> see page 107)	This is OnContactIdChanging, a member of class Customer.
	OnCreated ( <a href="#">↗</a> see page 107)	Aenderungsevents fÃ¼r die Historie
	OnCustomerNumberChanged ( <a href="#">↗</a> see page 107)	This is OnCustomerNumberChanged, a member of class Customer.
	OnCustomerNumberChanging ( <a href="#">↗</a> see page 107)	Aenderungsevents fÃ¼r die Historie
	OnDebitornumberChanged ( <a href="#">↗</a> see page 107)	This is OnDebitornumberChanged, a member of class Customer.
	OnDebitornumberChanging ( <a href="#">↗</a> see page 108)	Aenderungsevents fÃ¼r die Historie
	OneVB_NumberChanged ( <a href="#">↗</a> see page 108)	This is OneVB_NumberChanged, a member of class Customer.
	OneVB_NumberChanging ( <a href="#">↗</a> see page 108)	Aenderungsevents fÃ¼r die Historie
	OnIdChanged ( <a href="#">↗</a> see page 108)	This is OnIdChanged, a member of class Customer.
	OnIdChanging ( <a href="#">↗</a> see page 108)	This is OnIdChanging, a member of class Customer.
	OnInternalIdChanged ( <a href="#">↗</a> see page 108)	This is OnInternalIdChanged, a member of class Customer.

	OnInternalIdChanging ( <a href="#">↗</a> see page 109)	This is OnInternalIdChanging, a member of class Customer.
	OnInvoiceAdressIdChanged ( <a href="#">↗</a> see page 109)	This is OnInvoiceAdressIdChanged, a member of class Customer.
	OnInvoiceAdressIdChanging ( <a href="#">↗</a> see page 109)	This is OnInvoiceAdressIdChanging, a member of class Customer.
	OnInvoiceDispatchAdressIdChanged ( <a href="#">↗</a> see page 109)	This is OnInvoiceDispatchAdressIdChanged, a member of class Customer.
	OnInvoiceDispatchAdressIdChanging ( <a href="#">↗</a> see page 109)	This is OnInvoiceDispatchAdressIdChanging, a member of class Customer.
	OnLoaded ( <a href="#">↗</a> see page 109)	Aenderungsevents f��r die Historie
	OnMatchCodeChanged ( <a href="#">↗</a> see page 110)	This is OnMatchCodeChanged, a member of class Customer.
	OnMatchCodeChanging ( <a href="#">↗</a> see page 110)	This is OnMatchCodeChanging, a member of class Customer.
	OnNameChanged ( <a href="#">↗</a> see page 110)	This is OnNameChanged, a member of class Customer.
	OnNameChanging ( <a href="#">↗</a> see page 110)	Aenderungsevents f��r die Historie
	OnTermOfCreditChanged ( <a href="#">↗</a> see page 110)	This is OnTermOfCreditChanged, a member of class Customer.
	OnTermOfCreditChanging ( <a href="#">↗</a> see page 110)	This is OnTermOfCreditChanging, a member of class Customer.
	OnValidate ( <a href="#">↗</a> see page 111)	Validierungs Methode um falsche Eingaben zu verhindern
	OnVATChanged ( <a href="#">↗</a> see page 111)	This is OnVATChanged, a member of class Customer.
	OnVATChanging ( <a href="#">↗</a> see page 111)	Aenderungsevents f��r die Historie
	SendPropertyChanged ( <a href="#">↗</a> see page 111)	This is SendPropertyChanged, a member of class Customer.
	SendPropertyChanging ( <a href="#">↗</a> see page 111)	This is SendPropertyChanging, a member of class Customer.

### Customer Eigenschaften

	Name	Beschreibung
	_dbContext ( <a href="#">↗</a> see page 112)	This is _dbContext, a member of class Customer.
	Adress ( <a href="#">↗</a> see page 112)	This is Adress, a member of class Customer.
	AdressId ( <a href="#">↗</a> see page 112)	This is AdressId, a member of class Customer.
	Contact ( <a href="#">↗</a> see page 112)	This is Contact, a member of class Customer.
	ContactId ( <a href="#">↗</a> see page 112)	This is ContactId, a member of class Customer.
	CustomerNumber ( <a href="#">↗</a> see page 113)	This is CustomerNumber, a member of class Customer.
	CustomerProduct ( <a href="#">↗</a> see page 113)	This is CustomerProduct, a member of class Customer.
	Debitornumber ( <a href="#">↗</a> see page 113)	This is Debitornumber, a member of class Customer.
	EntityState ( <a href="#">↗</a> see page 113)	This is EntityState, a member of class Customer.
	eVB_Number ( <a href="#">↗</a> see page 113)	This is eVB_Number, a member of class Customer.
	Id ( <a href="#">↗</a> see page 113)	This is Id, a member of class Customer.
	InternalId ( <a href="#">↗</a> see page 114)	This is InternalId, a member of class Customer.
	Invoice ( <a href="#">↗</a> see page 114)	This is Invoice, a member of class Customer.
	InvoiceAddress ( <a href="#">↗</a> see page 114)	This is InvoiceAddress, a member of class Customer.
	InvoiceAdressId ( <a href="#">↗</a> see page 114)	This is InvoiceAdressId, a member of class Customer.
	InvoiceDispatchAddress ( <a href="#">↗</a> see page 114)	This is InvoiceDispatchAddress, a member of class Customer.
	InvoiceDispatchAdressId ( <a href="#">↗</a> see page 115)	This is InvoiceDispatchAdressId, a member of class Customer.
	ItemId ( <a href="#">↗</a> see page 115)	This is ItemId, a member of class Customer.
	LargeCustomer ( <a href="#">↗</a> see page 115)	This is LargeCustomer, a member of class Customer.
	LogDbContext ( <a href="#">↗</a> see page 115)	This is LogDbContext, a member of class Customer.
	MatchCode ( <a href="#">↗</a> see page 115)	This is MatchCode, a member of class Customer.
	Name ( <a href="#">↗</a> see page 115)	This is Name, a member of class Customer.
	Order ( <a href="#">↗</a> see page 116)	This is Order, a member of class Customer.
	SmallCustomer ( <a href="#">↗</a> see page 116)	This is SmallCustomer, a member of class Customer.
	TermOfCredit ( <a href="#">↗</a> see page 116)	This is TermOfCredit, a member of class Customer.
	VAT ( <a href="#">↗</a> see page 116)	This is VAT, a member of class Customer.
	WebServiceLoginCustomer ( <a href="#">↗</a> see page 116)	This is WebServiceLoginCustomer, a member of class Customer.

### Customer Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 117)	This is PropertyChanged, a member of class Customer.
	PropertyChanging ( <a href="#">↗</a> see page 117)	This is PropertyChanging, a member of class Customer.

### Customer Eigenschaften

	Name	Beschreibung
	_dbContext ( <a href="#">↗</a> see page 112)	This is _dbContext, a member of class Customer.
	Adress ( <a href="#">↗</a> see page 112)	This is Adress, a member of class Customer.
	AdressId ( <a href="#">↗</a> see page 112)	This is AdressId, a member of class Customer.
	Contact ( <a href="#">↗</a> see page 112)	This is Contact, a member of class Customer.

	ContactId ( <a href="#">see page 112</a> )	This is ContactId, a member of class Customer.
	CustomerNumber ( <a href="#">see page 113</a> )	This is CustomerNumber, a member of class Customer.
	CustomerProduct ( <a href="#">see page 113</a> )	This is CustomerProduct, a member of class Customer.
	Debitornumber ( <a href="#">see page 113</a> )	This is Debitornumber, a member of class Customer.
	EntityState ( <a href="#">see page 113</a> )	This is EntityState, a member of class Customer.
	eVB_Number ( <a href="#">see page 113</a> )	This is eVB_Number, a member of class Customer.
	Id ( <a href="#">see page 113</a> )	This is Id, a member of class Customer.
	InternalId ( <a href="#">see page 114</a> )	This is InternalId, a member of class Customer.
	Invoice ( <a href="#">see page 114</a> )	This is Invoice, a member of class Customer.
	InvoiceAddress ( <a href="#">see page 114</a> )	This is InvoiceAddress, a member of class Customer.
	InvoiceAdressId ( <a href="#">see page 114</a> )	This is InvoiceAdressId, a member of class Customer.
	InvoiceDispatchAddress ( <a href="#">see page 114</a> )	This is InvoiceDispatchAddress, a member of class Customer.
	InvoiceDispatchAdressId ( <a href="#">see page 115</a> )	This is InvoiceDispatchAdressId, a member of class Customer.
	ItemId ( <a href="#">see page 115</a> )	This is ItemId, a member of class Customer.
	LargeCustomer ( <a href="#">see page 115</a> )	This is LargeCustomer, a member of class Customer.
	LogDbContext ( <a href="#">see page 115</a> )	This is LogDbContext, a member of class Customer.
	MatchCode ( <a href="#">see page 115</a> )	This is MatchCode, a member of class Customer.
	Name ( <a href="#">see page 115</a> )	This is Name, a member of class Customer.
	Order ( <a href="#">see page 116</a> )	This is Order, a member of class Customer.
	SmallCustomer ( <a href="#">see page 116</a> )	This is SmallCustomer, a member of class Customer.
	TermOfCredit ( <a href="#">see page 116</a> )	This is TermOfCredit, a member of class Customer.
	VAT ( <a href="#">see page 116</a> )	This is VAT, a member of class Customer.
	WebServiceLoginCustomer ( <a href="#">see page 116</a> )	This is WebServiceLoginCustomer, a member of class Customer.

### Customer Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">see page 117</a> )	This is PropertyChanged, a member of class Customer.
	PropertyChanging ( <a href="#">see page 117</a> )	This is PropertyChanging, a member of class Customer.

### Customer Felder

	Name	Beschreibung
	_Adress ( <a href="#">see page 101</a> )	This is _Adress, a member of class Customer.
	_AdressId ( <a href="#">see page 101</a> )	This is _AdressId, a member of class Customer.
	_Contact ( <a href="#">see page 101</a> )	This is _Contact, a member of class Customer.
	_ContactId ( <a href="#">see page 101</a> )	This is _ContactId, a member of class Customer.
	_CustomerNumber ( <a href="#">see page 101</a> )	This is _CustomerNumber, a member of class Customer.
	_CustomerProduct ( <a href="#">see page 101</a> )	This is _CustomerProduct, a member of class Customer.
	_Debitornumber ( <a href="#">see page 101</a> )	This is _Debitornumber, a member of class Customer.
	_eVB_Number ( <a href="#">see page 102</a> )	This is _eVB_Number, a member of class Customer.
	_Id ( <a href="#">see page 102</a> )	This is _Id, a member of class Customer.
	_InternalId ( <a href="#">see page 102</a> )	This is _InternalId, a member of class Customer.
	_Invoice ( <a href="#">see page 102</a> )	This is _Invoice, a member of class Customer.
	_InvoiceAddress ( <a href="#">see page 102</a> )	This is _InvoiceAddress, a member of class Customer.
	_InvoiceAdressId ( <a href="#">see page 102</a> )	This is _InvoiceAdressId, a member of class Customer.
	_InvoiceDispatchAddress ( <a href="#">see page 103</a> )	This is _InvoiceDispatchAddress, a member of class Customer.
	_InvoiceDispatchAdressId ( <a href="#">see page 103</a> )	This is _InvoiceDispatchAdressId, a member of class Customer.
	_LargeCustomer ( <a href="#">see page 103</a> )	This is _LargeCustomer, a member of class Customer.
	_MatchCode ( <a href="#">see page 103</a> )	This is _MatchCode, a member of class Customer.
	_Name ( <a href="#">see page 103</a> )	This is _Name, a member of class Customer.
	_Order ( <a href="#">see page 103</a> )	This is _Order, a member of class Customer.
	_SmallCustomer ( <a href="#">see page 103</a> )	This is _SmallCustomer, a member of class Customer.
	_TermOfCredit ( <a href="#">see page 104</a> )	This is _TermOfCredit, a member of class Customer.
	_VAT ( <a href="#">see page 104</a> )	This is _VAT, a member of class Customer.
	_WebServiceLoginCustomer ( <a href="#">see page 104</a> )	This is _WebServiceLoginCustomer, a member of class Customer.
	emptyChangingEventArgs ( <a href="#">see page 104</a> )	This is emptyChangingEventArgs, a member of class Customer.
	myDbContext ( <a href="#">see page 104</a> )	This is myDbContext, a member of class Customer.

**Customer Methoden**

	Name	Beschreibung
	attach_CustomerProduct ( <a href="#">↗</a> see page 104)	This is attach_CustomerProduct, a member of class Customer.
	attach_Invoice ( <a href="#">↗</a> see page 105)	This is attach_Invoice, a member of class Customer.
	attach_Order ( <a href="#">↗</a> see page 105)	This is attach_Order, a member of class Customer.
	attach_WebServiceLoginCustomer ( <a href="#">↗</a> see page 105)	This is attach_WebServiceLoginCustomer, a member of class Customer.
 	CreateCustomer ( <a href="#">↗</a> see page 105)	Erstellt einen neuen Kunden.
	detach_CustomerProduct ( <a href="#">↗</a> see page 106)	This is detach_CustomerProduct, a member of class Customer.
	detach_Invoice ( <a href="#">↗</a> see page 106)	This is detach_Invoice, a member of class Customer.
	detach_Order ( <a href="#">↗</a> see page 106)	This is detach_Order, a member of class Customer.
	detach_WebServiceLoginCustomer ( <a href="#">↗</a> see page 106)	This is detach_WebServiceLoginCustomer, a member of class Customer.
	OnAdressIdChanged ( <a href="#">↗</a> see page 106)	This is OnAdressIdChanged, a member of class Customer.
	OnAdressIdChanging ( <a href="#">↗</a> see page 106)	This is OnAdressIdChanging, a member of class Customer.
	OnContactIdChanged ( <a href="#">↗</a> see page 107)	This is OnContactIdChanged, a member of class Customer.
	OnContactIdChanging ( <a href="#">↗</a> see page 107)	This is OnContactIdChanging, a member of class Customer.
	OnCreated ( <a href="#">↗</a> see page 107)	Aenderungsevents fÄ¼r die Historie
	OnCustomerNumberChanged ( <a href="#">↗</a> see page 107)	This is OnCustomerNumberChanged, a member of class Customer.
	OnCustomerNumberChanging ( <a href="#">↗</a> see page 107)	Aenderungsevents fÄ¼r die Historie
	OnDebitornumberChanged ( <a href="#">↗</a> see page 107)	This is OnDebitornumberChanged, a member of class Customer.
	OnDebitornumberChanging ( <a href="#">↗</a> see page 108)	Aenderungsevents fÄ¼r die Historie
	OneVB_NumberChanged ( <a href="#">↗</a> see page 108)	This is OneVB_NumberChanged, a member of class Customer.
	OneVB_NumberChanging ( <a href="#">↗</a> see page 108)	Aenderungsevents fÄ¼r die Historie
	OnIdChanged ( <a href="#">↗</a> see page 108)	This is OnIdChanged, a member of class Customer.
	OnIdChanging ( <a href="#">↗</a> see page 108)	This is OnIdChanging, a member of class Customer.
	OnInternalIdChanged ( <a href="#">↗</a> see page 108)	This is OnInternalIdChanged, a member of class Customer.
	OnInternalIdChanging ( <a href="#">↗</a> see page 109)	This is OnInternalIdChanging, a member of class Customer.
	OnInvoiceAdressIdChanged ( <a href="#">↗</a> see page 109)	This is OnInvoiceAdressIdChanged, a member of class Customer.
	OnInvoiceAdressIdChanging ( <a href="#">↗</a> see page 109)	This is OnInvoiceAdressIdChanging, a member of class Customer.
	OnInvoiceDispatchAdressIdChanged ( <a href="#">↗</a> see page 109)	This is OnInvoiceDispatchAdressIdChanged, a member of class Customer.
	OnInvoiceDispatchAdressIdChanging ( <a href="#">↗</a> see page 109)	This is OnInvoiceDispatchAdressIdChanging, a member of class Customer.
	OnLoaded ( <a href="#">↗</a> see page 109)	Aenderungsevents fÄ¼r die Historie
	OnMatchCodeChanged ( <a href="#">↗</a> see page 110)	This is OnMatchCodeChanged, a member of class Customer.
	OnMatchCodeChanging ( <a href="#">↗</a> see page 110)	This is OnMatchCodeChanging, a member of class Customer.
	OnNameChanged ( <a href="#">↗</a> see page 110)	This is OnNameChanged, a member of class Customer.
	OnNameChanging ( <a href="#">↗</a> see page 110)	Aenderungsevents fÄ¼r die Historie
	OnTermOfCreditChanged ( <a href="#">↗</a> see page 110)	This is OnTermOfCreditChanged, a member of class Customer.
	OnTermOfCreditChanging ( <a href="#">↗</a> see page 110)	This is OnTermOfCreditChanging, a member of class Customer.
	OnValidate ( <a href="#">↗</a> see page 111)	Validierungs Methode um falsche Eingaben zu verhindern
	OnVATChanged ( <a href="#">↗</a> see page 111)	This is OnVATChanged, a member of class Customer.
	OnVATChanging ( <a href="#">↗</a> see page 111)	Aenderungsevents fÄ¼r die Historie
 	SendPropertyChanged ( <a href="#">↗</a> see page 111)	This is SendPropertyChanged, a member of class Customer.
 	SendPropertyChanging ( <a href="#">↗</a> see page 111)	This is SendPropertyChanging, a member of class Customer.

**1.1.12.1 Customer.Customer Konstruktor****C#**

```
public Customer();
```

**Anmerkungen**

This is Customer, a member of class Customer.

**1.1.12.2 Customer Felder**

### 1.1.12.2.1 Customer.\_Adress Feld

**C#**

```
private EntityRef<Address> _Adress;
```

**Anmerkungen**

This is \_Adress, a member of class Customer.

### 1.1.12.2.2 Customer.\_AdressId Feld

**C#**

```
private System.Guid _AdressId;
```

**Anmerkungen**

This is \_AdressId, a member of class Customer.

### 1.1.12.2.3 Customer.\_Contact Feld

**C#**

```
private EntityRef<Contact> _Contact;
```

**Anmerkungen**

This is \_Contact, a member of class Customer.

### 1.1.12.2.4 Customer.\_ContactId Feld

**C#**

```
private System.Nullable<System.Guid> _ContactId;
```

**Anmerkungen**

This is \_ContactId, a member of class Customer.

### 1.1.12.2.5 Customer.\_CustomerNumber Feld

**C#**

```
private string _CustomerNumber;
```

**Anmerkungen**

This is \_CustomerNumber, a member of class Customer.

### 1.1.12.2.6 Customer.\_CustomerProduct Feld

**C#**

```
private EntitySet<CustomerProduct> _CustomerProduct;
```

**Anmerkungen**

This is \_CustomerProduct, a member of class Customer.

### 1.1.12.2.7 Customer.\_Debitornumber Feld

**C#**

```
private string _Debitornumber;
```

**Anmerkungen**

This is \_Debitornumber, a member of class Customer.

**1.1.12.2.8 Customer.\_eVB\_Number Feld****C#**

```
private string _eVB_Number;
```

**Anmerkungen**

This is \_eVB\_Number, a member of class Customer.

**1.1.12.2.9 Customer.\_Id Feld****C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Customer.

**1.1.12.2.10 Customer.\_InternalId Feld****C#**

```
private System.Nullable<System.Guid> _InternalId;
```

**Anmerkungen**

This is \_InternalId, a member of class Customer.

**1.1.12.2.11 Customer.\_Invoice Feld****C#**

```
private EntitySet<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class Customer.

**1.1.12.2.12 Customer.\_InvoiceAdress Feld****C#**

```
private EntityRef<Adress> _InvoiceAdress;
```

**Anmerkungen**

This is \_InvoiceAdress, a member of class Customer.

```
private System.Guid _InvoiceAdressId;
```

**Anmerkungen**

This is \_InvoiceAdressId, a member of class Customer.

### 1.1.12.2.14 Customer.\_InvoiceDispatchAdress Feld

**C#**

```
private EntityRef<Adress> _InvoiceDispatchAdress;
```

**Anmerkungen**

This is \_InvoiceDispatchAdress, a member of class Customer.

### 1.1.12.2.15 Customer.\_InvoiceDispatchAdressId Feld

**C#**

```
private System.Guid _InvoiceDispatchAdressId;
```

**Anmerkungen**

This is \_InvoiceDispatchAdressId, a member of class Customer.

### 1.1.12.2.16 Customer.\_LargeCustomer Feld

**C#**

```
private EntityRef<LargeCustomer> _LargeCustomer;
```

**Anmerkungen**

This is \_LargeCustomer, a member of class Customer.

### 1.1.12.2.17 Customer.\_MatchCode Feld

**C#**

```
private string _MatchCode;
```

**Anmerkungen**

This is \_MatchCode, a member of class Customer.

### 1.1.12.2.18 Customer.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class Customer.

### 1.1.12.2.19 Customer.\_Order Feld

**C#**

```
private EntitySet<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class Customer.

### 1.1.12.2.20 Customer.\_SmallCustomer Feld

**C#**

```
private EntityRef<SmallCustomer> _SmallCustomer;
```

**Anmerkungen**

This is \_SmallCustomer, a member of class Customer.

**1.1.12.2.21 Customer.\_TermOfCredit Feld****C#**

```
private System.Nullable<int> _TermOfCredit;
```

**Anmerkungen**

This is \_TermOfCredit, a member of class Customer.

**1.1.12.2.22 Customer.\_VAT Feld****C#**

```
private decimal _VAT;
```

**Anmerkungen**

This is \_VAT, a member of class Customer.

**1.1.12.2.23 Customer.\_WebServiceLoginCustomer Feld****C#**

```
private EntitySet<WebServiceLoginCustomer> _WebServiceLoginCustomer;
```

**Anmerkungen**

This is \_WebServiceLoginCustomer, a member of class Customer.

**1.1.12.2.24 Customer.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Customer.

**1.1.12.2.25 Customer.myDbContext Feld****C#**

```
private DataClasses1DataContext myDbContext = null;
```

**Anmerkungen**

This is myDbContext, a member of class Customer.

**1.1.12.3 Customer Methoden****1.1.12.3.1 Customer.attach\_CustomerProduct Methode****C#**

```
private void attach_CustomerProduct(CustomerProduct entity);
```

**Anmerkungen**

This is attach\_CustomerProduct, a member of class Customer.

**1.1.12.3.2 Customer.attach\_Invoice Methode****C#**

```
private void attach_Invoice(Invoice entity);
```

**Anmerkungen**

This is attach\_Invoice, a member of class Customer.

**1.1.12.3.3 Customer.attach\_Order Methode****C#**

```
private void attach_Order(Order entity);
```

**Anmerkungen**

This is attach\_Order, a member of class Customer.

**1.1.12.3.4 Customer.attach\_WebServiceLoginCustomer Methode****C#**

```
private void attach_WebServiceLoginCustomer(WebServiceLoginCustomer entity);
```

**Anmerkungen**

This is attach\_WebServiceLoginCustomer, a member of class Customer.

**1.1.12.3.5 Customer.CreateCustomer Methode**

Erstellt einen neuen Kunden.

**C#**

```
internal static Customer CreateCustomer(string name, string street, string streetnumber,
string zipcode, string city, string country, string phone, string fax, string mobilephone,
string email, decimal vat, int? termOfCredit, string customerNumber, string Matchcode,
string Debitornumber, string eVB_Number);
```

**Parameter**

Parameter	Beschreibung
string name	Name (☞ see page 115) des Kunden.
string street	Straße.
string streetnumber	Hausnummer.
string zipcode	Postleitzahl.
string city	Ort.
string country	Land.
string phone	Telefonnummer.
string fax	Faxnummer.
string mobilephone	Mobiltelefonnummer.
string email	E-Mailadresse.
decimal vat	Mehrwertsteuersatz.
int? termOfCredit	Zahlungsziel (in Tagen).
string customerNumber	Kundennummer.

**Resultate**

Den Kunden.

**Anmerkungen**

Methode soll nur für interne Zwecke benutzt werden. Die public Create-Methoden befinden sich in den spezialisierten Kundenklassen.

**1.1.12.3.6 Customer.detach\_CustomerProduct Methode****C#**

```
private void detach_CustomerProduct(CustomerProduct entity);
```

**Anmerkungen**

This is detach\_CustomerProduct, a member of class Customer.

**1.1.12.3.7 Customer.detach\_Invoice Methode****C#**

```
private void detach_Invoice(Invoice entity);
```

**Anmerkungen**

This is detach\_Invoice, a member of class Customer.

**1.1.12.3.8 Customer.detach\_Order Methode****C#**

```
private void detach_Order(Order entity);
```

**Anmerkungen**

This is detach\_Order, a member of class Customer.

**1.1.12.3.9 Customer.detach\_WebServiceLoginCustomer Methode****C#**

```
private void detach_WebServiceLoginCustomer(WebServiceLoginCustomer entity);
```

**Anmerkungen**

This is detach\_WebServiceLoginCustomer, a member of class Customer.

**1.1.12.3.10 Customer.OnAdressIdChanged Methode****C#**

```
private void OnAdressIdChanged();
```

**Anmerkungen**

This is OnAdressIdChanged, a member of class Customer.

**1.1.12.3.11 Customer.OnAdressIdChanging Methode****C#**

```
private void OnAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnAdressIdChanging, a member of class Customer.

### 1.1.12.3.12 Customer.OnContactIdChanged Methode

C#

```
private void OnContactIdChanged();
```

#### Anmerkungen

This is OnContactIdChanged, a member of class Customer.

### 1.1.12.3.13 Customer.OnContactIdChanging Methode

C#

```
private void OnContactIdChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnContactIdChanging, a member of class Customer.

### 1.1.12.3.14 Customer.OnCreated Methode

Aenderungsevents fÃ¼r die Historie

C#

```
private void OnCreated();
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.12.3.15 Customer.OnCustomerNumberChanged Methode

C#

```
private void OnCustomerNumberChanged();
```

#### Anmerkungen

This is OnCustomerNumberChanged, a member of class Customer.

### 1.1.12.3.16 Customer.OnCustomerNumberChanging Methode

Aenderungsevents fÃ¼r die Historie

C#

```
private void OnCustomerNumberChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.12.3.17 Customer.OnDebitornumberChanged Methode

C#

```
private void OnDebitornumberChanged();
```

#### Anmerkungen

This is OnDebitornumberChanged, a member of class Customer.

### 1.1.12.3.18 Customer.OnDebitornumberChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnDebitornumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.12.3.19 Customer.OneVB\_NumberChanged Methode

**C#**

```
private void OneVB_NumberChanged();
```

**Anmerkungen**

This is OneVB\_NumberChanged, a member of class Customer.

### 1.1.12.3.20 Customer.OneVB\_NumberChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OneVB_NumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.12.3.21 Customer.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Customer.

### 1.1.12.3.22 Customer.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Customer.

### 1.1.12.3.23 Customer.OnInternalIdChanged Methode

**C#**

```
private void OnInternalIdChanged();
```

**Anmerkungen**

This is OnInternalIdChanged, a member of class Customer.

### 1.1.12.3.24 Customer.OnInternalIdChanging Methode

**C#**

```
private void OnInternalIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnInternalIdChanging, a member of class Customer.

### 1.1.12.3.25 Customer.OnInvoiceAdressIdChanged Methode

**C#**

```
private void OnInvoiceAdressIdChanged();
```

**Anmerkungen**

This is OnInvoiceAdressIdChanged, a member of class Customer.

### 1.1.12.3.26 Customer.OnInvoiceAdressIdChanging Methode

**C#**

```
private void OnInvoiceAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnInvoiceAdressIdChanging, a member of class Customer.

### 1.1.12.3.27 Customer.OnInvoiceDispatchAdressIdChanged Methode

**C#**

```
private void OnInvoiceDispatchAdressIdChanged();
```

**Anmerkungen**

This is OnInvoiceDispatchAdressIdChanged, a member of class Customer.

### 1.1.12.3.28 Customer.OnInvoiceDispatchAdressIdChanging Methode

**C#**

```
private void OnInvoiceDispatchAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnInvoiceDispatchAdressIdChanging, a member of class Customer.

### 1.1.12.3.29 Customer.OnLoaded Methode

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.12.3.30 Customer.OnMatchCodeChanged Methode

**C#**

```
private void OnMatchCodeChanged();
```

**Anmerkungen**

This is OnMatchCodeChanged, a member of class Customer.

### 1.1.12.3.31 Customer.OnMatchCodeChanging Methode

**C#**

```
private void OnMatchCodeChanging(string value);
```

**Anmerkungen**

This is OnMatchCodeChanging, a member of class Customer.

### 1.1.12.3.32 Customer.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class Customer.

### 1.1.12.3.33 Customer.OnNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.12.3.34 Customer.OnTermOfCreditChanged Methode

**C#**

```
private void OnTermOfCreditChanged();
```

**Anmerkungen**

This is OnTermOfCreditChanged, a member of class Customer.

### 1.1.12.3.35 OnTermOfCreditChanging Methode

#### 1.1.12.3.35.1 Customer.OnTermOfCreditChanging Methode (System.Nullable<int>)

**C#**

```
private void OnTermOfCreditChanging(System.Nullable<int> value);
```

**Anmerkungen**

This is OnTermOfCreditChanging, a member of class Customer.

### 1.1.12.3.35.2 Customer.OnTermOfCreditChanging Methode (int?)

Änderungsereignis für die Historie

**C#**

```
private void OnTermOfCreditChanging(int? value);
```

**Parameter**

Parameter	Beschreibung
int? value	

### 1.1.12.3.36 Customer.OnValidate Methode

Validierungsmethode, um falsche Eingaben zu verhindern

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Parameter**

Parameter	Beschreibung
System.Data.Linq.ChangeAction action	

### 1.1.12.3.37 Customer.OnVATChanged Methode

**C#**

```
private void OnVATChanged();
```

**Anmerkungen**

This is OnVATChanged, a member of class Customer.

### 1.1.12.3.38 Customer.OnVATChanging Methode

Änderungsereignis für die Historie

**C#**

```
private void OnVATChanging(decimal value);
```

**Parameter**

Parameter	Beschreibung
decimal value	

### 1.1.12.3.39 Customer.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Customer.

### 1.1.12.3.40 Customer.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Customer.

## 1.1.12.4 Customer Eigenschaften

### 1.1.12.4.1 Customer.\_dbContext Eigenschaft

**C#**

```
public DataClasses1DataContext _dbContext;
```

**Anmerkungen**

This is \_dbContext, a member of class Customer.

### 1.1.12.4.2 Customer.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Customer",  
Storage="_Adress", ThisKey="AdressId", OtherKey="Id", IsForeignKey=true)]  
public Address Address;
```

**Anmerkungen**

This is Address, a member of class Customer.

### 1.1.12.4.3 Customer.AdressId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AdressId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid AdressId;
```

**Anmerkungen**

This is AdressId, a member of class Customer.

### 1.1.12.4.4 Customer.Contact Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_Customer",  
Storage="_Contact", ThisKey="ContactId", OtherKey="Id", IsForeignKey=true)]  
public Contact Contact;
```

**Anmerkungen**

This is Contact, a member of class Customer.

### 1.1.12.4.5 Customer.ContactId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ContactId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> ContactId;
```

**Anmerkungen**

This is ContactId, a member of class Customer.

### 1.1.12.4.6 Customer.CustomerNumber Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerNumber",
DbType="VarChar(100) NOT NULL", CanBeNull=false)]
public string CustomerNumber;
```

#### Anmerkungen

This is CustomerNumber, a member of class Customer.

### 1.1.12.4.7 Customer.CustomerProduct Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_CustomerProduct",
Storage="_CustomerProduct", ThisKey="Id", OtherKey="CustomerId")]
public EntitySet<CustomerProduct> CustomerProduct;
```

#### Anmerkungen

This is CustomerProduct, a member of class Customer.

### 1.1.12.4.8 Customer.Debitornumber Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Debitornumber",
DbType="varchar(100)")]
public string Debitornumber;
```

#### Anmerkungen

This is Debitornumber, a member of class Customer.

### 1.1.12.4.9 Customer.EntityState Eigenschaft

#### C#

```
public EntityState EntityState;
```

#### Anmerkungen

This is EntityState, a member of class Customer.

### 1.1.12.4.10 Customer.eVB\_Number Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_eVB_Number",
DbType="VarChar(50)")]
public string eVB_Number;
```

#### Anmerkungen

This is eVB\_Number, a member of class Customer.

### 1.1.12.4.11 Customer.Id Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier
NOT NULL", IsPrimaryKey=true)]
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Customer.

**1.1.12.4.12 Customer.InternalId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InternalId")]  
public System.Nullable<System.Guid> InternalId;
```

**Anmerkungen**

This is InternalId, a member of class Customer.

**1.1.12.4.13 Customer.Invoice Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_Invoice",  
Storage="_Invoice", ThisKey="Id", OtherKey="CustomerId")]  
public EntitySet<Invoice> Invoice;
```

**Anmerkungen**

This is Invoice, a member of class Customer.

**1.1.12.4.14 Customer.InvoiceAdress Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Customer1",  
Storage="_InvoiceAdress", ThisKey="InvoiceAdressId", OtherKey="Id", IsForeignKey=true)]  
public Adress InvoiceAdress;
```

**Anmerkungen**

This is InvoiceAdress, a member of class Customer.

**1.1.12.4.15 Customer.InvoiceAdressId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceAdressId",  
DbType="uniqueidentifier not null")]  
public System.Guid InvoiceAdressId;
```

**Anmerkungen**

This is InvoiceAdressId, a member of class Customer.

**1.1.12.4.16 Customer.InvoiceDispatchAdress Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Customer2",  
Storage="_InvoiceDispatchAdress", ThisKey="InvoiceDispatchAdressId", OtherKey="Id",  
IsForeignKey=true)]  
public Adress InvoiceDispatchAdress;
```

**Anmerkungen**

This is InvoiceDispatchAdress, a member of class Customer.

### 1.1.12.4.17 Customer.InvoiceDispatchAdressId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceDispatchAdressId",  
DbType="uniqueidentifier not null")]  
public System.Guid InvoiceDispatchAdressId;
```

**Anmerkungen**

This is InvoiceDispatchAdressId, a member of class Customer.

### 1.1.12.4.18 Customer.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Customer.

### 1.1.12.4.19 Customer.LargeCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_LargeCustomer",  
Storage="_LargeCustomer", ThisKey="Id", OtherKey="CustomerId", IsUnique=true,  
IsForeignKey=false)]  
public LargeCustomer LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class Customer.

### 1.1.12.4.20 Customer.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Customer.

### 1.1.12.4.21 Customer.MatchCode Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_MatchCode",  
DbType="varchar(100)")]  
public string MatchCode;
```

**Anmerkungen**

This is MatchCode, a member of class Customer.

### 1.1.12.4.22 Customer.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(100) NOT  
NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class Customer.

**1.1.12.4.23 Customer.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_Order",
Storage="_Order", ThisKey="Id", OtherKey="CustomerId")]
public EntitySet<Order> Order;
```

**Anmerkungen**

This is Order, a member of class Customer.

**1.1.12.4.24 Customer.SmallCustomer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_SmallCustomer",
Storage="_SmallCustomer", ThisKey="Id", OtherKey="CustomerId", IsUnique=true,
IsForeignKey=false)]
public SmallCustomer SmallCustomer;
```

**Anmerkungen**

This is SmallCustomer, a member of class Customer.

**1.1.12.4.25 Customer.TermOfCredit Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TermOfCredit", DbType="int")]
public System.Nullable<int> TermOfCredit;
```

**Anmerkungen**

This is TermOfCredit, a member of class Customer.

**1.1.12.4.26 Customer.VAT Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VAT", DbType="decimal(4,2) not
null")]
public decimal VAT;
```

**Anmerkungen**

This is VAT, a member of class Customer.

**1.1.12.4.27 Customer.WebServiceLoginCustomer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_WebServiceLoginCustome
r",
Storage="_WebServiceLoginCustomer", ThisKey="Id", OtherKey="CustomerId")]
public EntitySet<WebServiceLoginCustomer> WebServiceLoginCustomer;
```

**Anmerkungen**

This is WebServiceLoginCustomer, a member of class Customer.

# 1.1.12.5 Customer Ereignisse

## 1.1.12.5.1 Customer.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class Customer.

## 1.1.12.5.2 Customer.PropertyChanging Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class Customer.

# 1.1.13 CustomerProduct Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.CustomerProduct")]
public class CustomerProduct : INotifyPropertyChanging, INotifyPropertyChanged;
```

Datei

DataClasses1.designer.cs (see page 695)

Anmerkungen

This is class KVSCCommon.Database.CustomerProduct.

Mitglieder

Methoden

	Name	Beschreibung
	CustomerProduct (see page 118)	This is CustomerProduct, a member of class CustomerProduct.

CustomerProduct Felder

	Name	Beschreibung
	_Customer (see page 119)	This is _Customer, a member of class CustomerProduct.
	_CustomerId (see page 119)	This is _CustomerId, a member of class CustomerProduct.
	_Product (see page 119)	This is _Product, a member of class CustomerProduct.
	_ProductId (see page 119)	This is _ProductId, a member of class CustomerProduct.
	emptyChangingEventArgs (see page 119)	This is emptyChangingEventArgs, a member of class CustomerProduct.

CustomerProduct Methoden

	Name	Beschreibung
	OnCreated (see page 120)	This is OnCreated, a member of class CustomerProduct.
	OnCustomerIdChanged (see page 120)	This is OnCustomerIdChanged, a member of class CustomerProduct.

	OnCustomerIdChanging ( <a href="#">↗</a> see page 120)	This is OnCustomerIdChanging, a member of class CustomerProduct.
	OnLoaded ( <a href="#">↗</a> see page 120)	This is OnLoaded, a member of class CustomerProduct.
	OnProductIdChanged ( <a href="#">↗</a> see page 120)	This is OnProductIdChanged, a member of class CustomerProduct.
	OnProductIdChanging ( <a href="#">↗</a> see page 120)	This is OnProductIdChanging, a member of class CustomerProduct.
	OnValidate ( <a href="#">↗</a> see page 120)	This is OnValidate, a member of class CustomerProduct.
	SendPropertyChanged ( <a href="#">↗</a> see page 121)	This is SendPropertyChanged, a member of class CustomerProduct.
	SendPropertyChanging ( <a href="#">↗</a> see page 121)	This is SendPropertyChanging, a member of class CustomerProduct.

### CustomerProduct Eigenschaften

	Name	Beschreibung
	Customer ( <a href="#">↗</a> see page 121)	This is Customer, a member of class CustomerProduct.
	CustomerId ( <a href="#">↗</a> see page 121)	This is CustomerId, a member of class CustomerProduct.
	Product ( <a href="#">↗</a> see page 121)	This is Product, a member of class CustomerProduct.
	ProductId ( <a href="#">↗</a> see page 122)	This is ProductId, a member of class CustomerProduct.

### CustomerProduct Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 122)	This is PropertyChanged, a member of class CustomerProduct.
	PropertyChanging ( <a href="#">↗</a> see page 122)	This is PropertyChanging, a member of class CustomerProduct.

### CustomerProduct Eigenschaften

	Name	Beschreibung
	Customer ( <a href="#">↗</a> see page 121)	This is Customer, a member of class CustomerProduct.
	CustomerId ( <a href="#">↗</a> see page 121)	This is CustomerId, a member of class CustomerProduct.
	Product ( <a href="#">↗</a> see page 121)	This is Product, a member of class CustomerProduct.
	ProductId ( <a href="#">↗</a> see page 122)	This is ProductId, a member of class CustomerProduct.

### CustomerProduct Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 122)	This is PropertyChanged, a member of class CustomerProduct.
	PropertyChanging ( <a href="#">↗</a> see page 122)	This is PropertyChanging, a member of class CustomerProduct.

	SendPropertyChanged ( <a href="#">↗</a> see page 121)	This is SendPropertyChanged, a member of class CustomerProduct.
	SendPropertyChanging ( <a href="#">↗</a> see page 121)	This is SendPropertyChanging, a member of class CustomerProduct.

## 1.1.13.1 CustomerProduct.CustomerProduct Konstruktor

C#

```
public CustomerProduct();
```

**Anmerkungen**

This is CustomerProduct, a member of class CustomerProduct.

## 1.1.13.2 CustomerProduct Felder

### 1.1.13.2.1 CustomerProduct.\_Customer Feld

**C#**

```
private EntityRef<Customer> _Customer;
```

**Anmerkungen**

This is \_Customer, a member of class CustomerProduct.

### 1.1.13.2.2 CustomerProduct.\_CustomerId Feld

**C#**

```
private System.Nullable<System.Guid> _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class CustomerProduct.

### 1.1.13.2.3 CustomerProduct.\_Product Feld

**C#**

```
private EntityRef<Product> _Product;
```

**Anmerkungen**

This is \_Product, a member of class CustomerProduct.

### 1.1.13.2.4 CustomerProduct.\_ProductId Feld

**C#**

```
private System.Nullable<System.Guid> _ProductId;
```

**Anmerkungen**

This is \_ProductId, a member of class CustomerProduct.

### 1.1.13.2.5 CustomerProduct.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class CustomerProduct.

## 1.1.13.3 CustomerProduct Methoden

### 1.1.13.3.1 CustomerProduct.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class CustomerProduct.

### 1.1.13.3.2 CustomerProduct.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class CustomerProduct.

### 1.1.13.3.3 CustomerProduct.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class CustomerProduct.

### 1.1.13.3.4 CustomerProduct.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class CustomerProduct.

### 1.1.13.3.5 CustomerProduct.OnProductIdChanged Methode

**C#**

```
private void OnProductIdChanged();
```

**Anmerkungen**

This is OnProductIdChanged, a member of class CustomerProduct.

### 1.1.13.3.6 CustomerProduct.OnProductIdChanging Methode

**C#**

```
private void OnProductIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnProductIdChanging, a member of class CustomerProduct.

### 1.1.13.3.7 CustomerProduct.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class CustomerProduct.

**1.1.13.3.8 CustomerProduct.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class CustomerProduct.

**1.1.13.3.9 CustomerProduct.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class CustomerProduct.

**1.1.13.4 CustomerProduct Eigenschaften****1.1.13.4.1 CustomerProduct.Customer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_CustomerProduct",  
Storage="_Customer", ThisKey="CustomerId", OtherKey="Id", IsForeignKey=true)]  
public Customer Customer;
```

**Anmerkungen**

This is Customer, a member of class CustomerProduct.

**1.1.13.4.2 CustomerProduct.CustomerId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier", IsPrimaryKey=true)]  
public System.Nullable<System.Guid> CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class CustomerProduct.

**1.1.13.4.3 CustomerProduct.Product Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Product_CustomerProduct",  
Storage="_Product", ThisKey="ProductId", OtherKey="Id", IsForeignKey=true)]  
public Product Product;
```

**Anmerkungen**

This is Product, a member of class CustomerProduct.

### 1.1.13.4.4 CustomerProduct.ProductId Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ProductId",
DbType="UniqueIdentifier", IsPrimaryKey=true)]
public System.Nullable<System.Guid> ProductId;
```

Anmerkungen

This is ProductId, a member of class CustomerProduct.

### 1.1.13.5 CustomerProduct Ereignisse

#### 1.1.13.5.1 CustomerProduct.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class CustomerProduct.

#### 1.1.13.5.2 CustomerProduct.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class CustomerProduct.

## 1.1.14 DataClasses1DataContext Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.DatabaseAttribute(Name="test_fullservice")]
public class DataClasses1DataContext : System.Data.Linq.DataContext;
```

Datei

DataClasses1.designer.cs (🔗 see page 695)

Anmerkungen

This is class KVSCCommon.Database.DataClasses1DataContext.

	InsertDocketList (🔗 see page 144)	This is InsertDocketList, a member of class DataClasses1DataContext.
	InsertDocument (🔗 see page 144)	This is InsertDocument, a member of class DataClasses1DataContext.
	InsertDocumentConfiguration (🔗 see page 145)	This is InsertDocumentConfiguration, a member of class DataClasses1DataContext.
	InsertDocumentType (🔗 see page 145)	This is InsertDocumentType, a member of class DataClasses1DataContext.
	InsertInvoice (🔗 see page 145)	This is InsertInvoice, a member of class DataClasses1DataContext.
	InsertInvoiceItem (🔗 see page 145)	This is InsertInvoiceItem, a member of class DataClasses1DataContext.
	InsertInvoiceItemAccountItem (🔗 see page 145)	This is InsertInvoiceItemAccountItem, a member of class DataClasses1DataContext.
	InsertInvoiceNumber (🔗 see page 145)	This is InsertInvoiceNumber, a member of class DataClasses1DataContext.
	InsertInvoiceRunReport (🔗 see page 146)	This is InsertInvoiceRunReport, a member of class DataClasses1DataContext.
	InsertInvoiceTypes (🔗 see page 146)	This is InsertInvoiceTypes, a member of class DataClasses1DataContext.
	InsertLargeCustomer (🔗 see page 146)	This is InsertLargeCustomer, a member of class DataClasses1DataContext.
	InsertLargeCustomerRequiredField (🔗 see page 146)	This is InsertLargeCustomerRequiredField, a member of class DataClasses1DataContext.
	InsertLocation (🔗 see page 146)	This is InsertLocation, a member of class DataClasses1DataContext.
	InsertLogType (🔗 see page 146)	This is InsertLogType, a member of class DataClasses1DataContext.
	InsertMailinglist (🔗 see page 147)	This is InsertMailinglist, a member of class DataClasses1DataContext.
	InsertMailinglistType (🔗 see page 147)	This is InsertMailinglistType, a member of class DataClasses1DataContext.
	InsertMake (🔗 see page 147)	This is InsertMake, a member of class DataClasses1DataContext.
	InsertOrder (🔗 see page 147)	This is InsertOrder, a member of class DataClasses1DataContext.
	InsertOrderInvoice (🔗 see page 147)	This is InsertOrderInvoice, a member of class DataClasses1DataContext.
	InsertOrderItem (🔗 see page 147)	This is InsertOrderItem, a member of class DataClasses1DataContext.
	InsertOrderItemStatus (🔗 see page 147)	This is InsertOrderItemStatus, a member of class DataClasses1DataContext.
	InsertOrderStatus (🔗 see page 148)	This is InsertOrderStatus, a member of class DataClasses1DataContext.
	InsertOrderType (🔗 see page 148)	This is InsertOrderType, a member of class DataClasses1DataContext.
	InsertPackingList (🔗 see page 148)	This is InsertPackingList, a member of class DataClasses1DataContext.
	InsertPermission (🔗 see page 148)	This is InsertPermission, a member of class DataClasses1DataContext.
	InsertPermissionProfile (🔗 see page 148)	This is InsertPermissionProfile, a member of class DataClasses1DataContext.
	InsertPermissionProfilePermission (🔗 see page 148)	This is InsertPermissionProfilePermission, a member of class DataClasses1DataContext.
	InsertPerson (🔗 see page 149)	This is InsertPerson, a member of class DataClasses1DataContext.
	InsertPrice (🔗 see page 149)	This is InsertPrice, a member of class DataClasses1DataContext.
	InsertPriceAccount (🔗 see page 149)	This is InsertPriceAccount, a member of class DataClasses1DataContext.
	InsertProduct (🔗 see page 149)	This is InsertProduct, a member of class DataClasses1DataContext.

	InsertProductCategory ( <a href="#">see page 149</a> )	This is InsertProductCategory, a member of class DataClasses1DataContext.
	InsertRegistration ( <a href="#">see page 149</a> )	This is InsertRegistration, a member of class DataClasses1DataContext.
	InsertRegistrationLocation ( <a href="#">see page 149</a> )	This is InsertRegistrationLocation, a member of class DataClasses1DataContext.
	InsertRegistrationOrder ( <a href="#">see page 150</a> )	This is InsertRegistrationOrder, a member of class DataClasses1DataContext.
	InsertRegistrationOrderType ( <a href="#">see page 150</a> )	This is InsertRegistrationOrderType, a member of class DataClasses1DataContext.
	InsertRequiredField ( <a href="#">see page 150</a> )	This is InsertRequiredField, a member of class DataClasses1DataContext.
	InsertRequiredFieldTranslation ( <a href="#">see page 150</a> )	This is InsertRequiredFieldTranslation, a member of class DataClasses1DataContext.
	InsertSmallCustomer ( <a href="#">see page 150</a> )	This is InsertSmallCustomer, a member of class DataClasses1DataContext.
	InsertSystemlog ( <a href="#">see page 150</a> )	This is InsertSystemlog, a member of class DataClasses1DataContext.
	InsertUser ( <a href="#">see page 151</a> )	This is InsertUser, a member of class DataClasses1DataContext.
	InsertUserPermission ( <a href="#">see page 151</a> )	This is InsertUserPermission, a member of class DataClasses1DataContext.
	InsertUserPermissionProfile ( <a href="#">see page 151</a> )	This is InsertUserPermissionProfile, a member of class DataClasses1DataContext.
	InsertVehicle ( <a href="#">see page 151</a> )	This is InsertVehicle, a member of class DataClasses1DataContext.
	InsertWebServiceLogin ( <a href="#">see page 151</a> )	This is InsertWebServiceLogin, a member of class DataClasses1DataContext.
	InsertWebServiceLoginCustomer ( <a href="#">see page 151</a> )	This is InsertWebServiceLoginCustomer, a member of class DataClasses1DataContext.
	OnCreated ( <a href="#">see page 152</a> )	This is OnCreated, a member of class DataClasses1DataContext.
	UpdateAccounts ( <a href="#">see page 152</a> )	This is UpdateAccounts, a member of class DataClasses1DataContext.
	UpdateAdress ( <a href="#">see page 152</a> )	This is UpdateAdress, a member of class DataClasses1DataContext.
	UpdateBankAccount ( <a href="#">see page 152</a> )	This is UpdateBankAccount, a member of class DataClasses1DataContext.
	UpdateCarOwner ( <a href="#">see page 152</a> )	This is UpdateCarOwner, a member of class DataClasses1DataContext.
	UpdateChangeLogColumnNames ( <a href="#">see page 152</a> )	This is UpdateChangeLogColumnNames, a member of class DataClasses1DataContext.
	UpdateContact ( <a href="#">see page 153</a> )	This is UpdateContact, a member of class DataClasses1DataContext.
	UpdateCostCenter ( <a href="#">see page 153</a> )	This is UpdateCostCenter, a member of class DataClasses1DataContext.
	UpdateCustomer ( <a href="#">see page 153</a> )	This is UpdateCustomer, a member of class DataClasses1DataContext.
	UpdateCustomerProduct ( <a href="#">see page 153</a> )	This is UpdateCustomerProduct, a member of class DataClasses1DataContext.
	UpdateDeregistrationOrder ( <a href="#">see page 153</a> )	This is UpdateDeregistrationOrder, a member of class DataClasses1DataContext.
	UpdateDocketList ( <a href="#">see page 153</a> )	This is UpdateDocketList, a member of class DataClasses1DataContext.
	UpdateDocument ( <a href="#">see page 153</a> )	This is UpdateDocument, a member of class DataClasses1DataContext.
	UpdateDocumentConfiguration ( <a href="#">see page 154</a> )	This is UpdateDocumentConfiguration, a member of class DataClasses1DataContext.
	UpdateDocumentType ( <a href="#">see page 154</a> )	This is UpdateDocumentType, a member of class DataClasses1DataContext.
	UpdateInvoice ( <a href="#">see page 154</a> )	This is UpdateInvoice, a member of class DataClasses1DataContext.
	UpdateInvoiceItem ( <a href="#">see page 154</a> )	This is UpdateInvoiceItem, a member of class DataClasses1DataContext.
	UpdateInvoiceItemAccountItem ( <a href="#">see page 154</a> )	This is UpdateInvoiceItemAccountItem, a member of class DataClasses1DataContext.
	UpdateInvoiceNumber ( <a href="#">see page 154</a> )	This is UpdateInvoiceNumber, a member of class DataClasses1DataContext.
	UpdateInvoiceRunReport ( <a href="#">see page 155</a> )	This is UpdateInvoiceRunReport, a member of class DataClasses1DataContext.
	UpdateInvoiceTypes ( <a href="#">see page 155</a> )	This is UpdateInvoiceTypes, a member of class DataClasses1DataContext.
	UpdateLargeCustomer ( <a href="#">see page 155</a> )	This is UpdateLargeCustomer, a member of class DataClasses1DataContext.
	UpdateLargeCustomerRequiredField ( <a href="#">see page 155</a> )	This is UpdateLargeCustomerRequiredField, a member of class DataClasses1DataContext.
	UpdateLocation ( <a href="#">see page 155</a> )	This is UpdateLocation, a member of class DataClasses1DataContext.
	UpdateLogType ( <a href="#">see page 155</a> )	This is UpdateLogType, a member of class DataClasses1DataContext.
	UpdateMailinglist ( <a href="#">see page 156</a> )	This is UpdateMailinglist, a member of class DataClasses1DataContext.
	UpdateMailinglistType ( <a href="#">see page 156</a> )	This is UpdateMailinglistType, a member of class DataClasses1DataContext.
	UpdateMake ( <a href="#">see page 156</a> )	This is UpdateMake, a member of class DataClasses1DataContext.
	UpdateOrder ( <a href="#">see page 156</a> )	This is UpdateOrder, a member of class DataClasses1DataContext.
	UpdateOrderInvoice ( <a href="#">see page 156</a> )	This is UpdateOrderInvoice, a member of class DataClasses1DataContext.
	UpdateOrderItem ( <a href="#">see page 156</a> )	This is UpdateOrderItem, a member of class DataClasses1DataContext.
	UpdateOrderItemStatus ( <a href="#">see page 156</a> )	This is UpdateOrderItemStatus, a member of class DataClasses1DataContext.
	UpdateOrderStatus ( <a href="#">see page 157</a> )	This is UpdateOrderStatus, a member of class DataClasses1DataContext.
	UpdateOrderType ( <a href="#">see page 157</a> )	This is UpdateOrderType, a member of class DataClasses1DataContext.
	UpdatePackingList ( <a href="#">see page 157</a> )	This is UpdatePackingList, a member of class DataClasses1DataContext.

	UpdatePermission ( <a href="#">↗</a> see page 157)	This is UpdatePermission, a member of class DataClasses1DataContext.
	UpdatePermissionProfile ( <a href="#">↗</a> see page 157)	This is UpdatePermissionProfile, a member of class DataClasses1DataContext.
	UpdatePermissionProfilePermission ( <a href="#">↗</a> see page 157)	This is UpdatePermissionProfilePermission, a member of class DataClasses1DataContext.
	UpdatePerson ( <a href="#">↗</a> see page 158)	This is UpdatePerson, a member of class DataClasses1DataContext.
	UpdatePrice ( <a href="#">↗</a> see page 158)	This is UpdatePrice, a member of class DataClasses1DataContext.
	UpdatePriceAccount ( <a href="#">↗</a> see page 158)	This is UpdatePriceAccount, a member of class DataClasses1DataContext.
	UpdateProduct ( <a href="#">↗</a> see page 158)	This is UpdateProduct, a member of class DataClasses1DataContext.
	UpdateProductCategory ( <a href="#">↗</a> see page 158)	This is UpdateProductCategory, a member of class DataClasses1DataContext.
	UpdateRegistration ( <a href="#">↗</a> see page 158)	This is UpdateRegistration, a member of class DataClasses1DataContext.
	UpdateRegistrationLocation ( <a href="#">↗</a> see page 159)	This is UpdateRegistrationLocation, a member of class DataClasses1DataContext.
	UpdateRegistrationOrder ( <a href="#">↗</a> see page 159)	This is UpdateRegistrationOrder, a member of class DataClasses1DataContext.
	UpdateRegistrationOrderType ( <a href="#">↗</a> see page 159)	This is UpdateRegistrationOrderType, a member of class DataClasses1DataContext.
	UpdateRequiredField ( <a href="#">↗</a> see page 159)	This is UpdateRequiredField, a member of class DataClasses1DataContext.
	UpdateRequiredFieldTranslation ( <a href="#">↗</a> see page 159)	This is UpdateRequiredFieldTranslation, a member of class DataClasses1DataContext.
	UpdateSmallCustomer ( <a href="#">↗</a> see page 159)	This is UpdateSmallCustomer, a member of class DataClasses1DataContext.
	UpdateSystemlog ( <a href="#">↗</a> see page 160)	This is UpdateSystemlog, a member of class DataClasses1DataContext.
	UpdateUser ( <a href="#">↗</a> see page 160)	This is UpdateUser, a member of class DataClasses1DataContext.
	UpdateUserPermission ( <a href="#">↗</a> see page 160)	This is UpdateUserPermission, a member of class DataClasses1DataContext.
	UpdateUserPermissionProfile ( <a href="#">↗</a> see page 160)	This is UpdateUserPermissionProfile, a member of class DataClasses1DataContext.
	UpdateVehicle ( <a href="#">↗</a> see page 160)	This is UpdateVehicle, a member of class DataClasses1DataContext.
	UpdateWebServiceLogin ( <a href="#">↗</a> see page 160)	This is UpdateWebServiceLogin, a member of class DataClasses1DataContext.
	UpdateWebServiceLoginCustomer ( <a href="#">↗</a> see page 161)	This is UpdateWebServiceLoginCustomer, a member of class DataClasses1DataContext.
	WriteLogItem ( <a href="#">↗</a> see page 161)	Fügt dem Datenbankkontext einen Logeintrag hinzu.

### DataClasses1DataContext Eigenschaften

	Name	Beschreibung
	Accounts ( <a href="#">↗</a> see page 162)	This is Accounts, a member of class DataClasses1DataContext.
	Adress ( <a href="#">↗</a> see page 163)	This is Adress, a member of class DataClasses1DataContext.
	AuthorativeChargeAccounts ( <a href="#">↗</a> see page 163)	This is AuthorativeChargeAccounts, a member of class DataClasses1DataContext.
	BankAccount ( <a href="#">↗</a> see page 163)	This is BankAccount, a member of class DataClasses1DataContext.
	BIC_DE ( <a href="#">↗</a> see page 163)	This is BIC_DE, a member of class DataClasses1DataContext.
	CarOwner ( <a href="#">↗</a> see page 163)	This is CarOwner, a member of class DataClasses1DataContext.
	ChangelLog ( <a href="#">↗</a> see page 163)	This is ChangeLog, a member of class DataClasses1DataContext.
	ChangelLogColumnNames ( <a href="#">↗</a> see page 164)	This is ChangeLogColumnNames, a member of class DataClasses1DataContext.
	Contact ( <a href="#">↗</a> see page 164)	This is Contact, a member of class DataClasses1DataContext.
	CostCenter ( <a href="#">↗</a> see page 164)	This is CostCenter, a member of class DataClasses1DataContext.
	Customer ( <a href="#">↗</a> see page 164)	This is Customer, a member of class DataClasses1DataContext.
	CustomerProduct ( <a href="#">↗</a> see page 164)	This is CustomerProduct, a member of class DataClasses1DataContext.
	DeregistrationOrder ( <a href="#">↗</a> see page 164)	This is DeregistrationOrder, a member of class DataClasses1DataContext.
	DocketList ( <a href="#">↗</a> see page 164)	This is DocketList, a member of class DataClasses1DataContext.
	Document ( <a href="#">↗</a> see page 165)	This is Document, a member of class DataClasses1DataContext.
	DocumentConfiguration ( <a href="#">↗</a> see page 165)	This is DocumentConfiguration, a member of class DataClasses1DataContext.
	DocumentType ( <a href="#">↗</a> see page 165)	This is DocumentType, a member of class DataClasses1DataContext.
	Invoice ( <a href="#">↗</a> see page 165)	This is Invoice, a member of class DataClasses1DataContext.
	InvoiceIDInvoiceRunID ( <a href="#">↗</a> see page 165)	This is InvoiceIDInvoiceRunID, a member of class DataClasses1DataContext.
	InvoiceItem ( <a href="#">↗</a> see page 165)	This is InvoiceItem, a member of class DataClasses1DataContext.
	InvoiceItemAccountItem ( <a href="#">↗</a> see page 166)	This is InvoiceItemAccountItem, a member of class DataClasses1DataContext.
	InvoiceNumber ( <a href="#">↗</a> see page 166)	This is InvoiceNumber, a member of class DataClasses1DataContext.
	InvoiceRunReport ( <a href="#">↗</a> see page 166)	This is InvoiceRunReport, a member of class DataClasses1DataContext.
	InvoiceTypes ( <a href="#">↗</a> see page 166)	This is InvoiceTypes, a member of class DataClasses1DataContext.
	LargeCustomer ( <a href="#">↗</a> see page 166)	This is LargeCustomer, a member of class DataClasses1DataContext.

	LargeCustomerRequiredField ( <a href="#">↗</a> see page 166)	This is LargeCustomerRequiredField, a member of class DataClasses1DataContext.
	Location ( <a href="#">↗</a> see page 167)	This is Location, a member of class DataClasses1DataContext.
	LogType ( <a href="#">↗</a> see page 167)	This is LogType, a member of class DataClasses1DataContext.
	LogUserId ( <a href="#">↗</a> see page 167)	This is LogUserId, a member of class DataClasses1DataContext.
	Mailinglist ( <a href="#">↗</a> see page 167)	This is Mailinglist, a member of class DataClasses1DataContext.
	MailinglistType ( <a href="#">↗</a> see page 167)	This is MailinglistType, a member of class DataClasses1DataContext.
	Make ( <a href="#">↗</a> see page 167)	This is Make, a member of class DataClasses1DataContext.
	Order ( <a href="#">↗</a> see page 167)	This is Order, a member of class DataClasses1DataContext.
	OrderInvoice ( <a href="#">↗</a> see page 168)	This is OrderInvoice, a member of class DataClasses1DataContext.
	OrderItem ( <a href="#">↗</a> see page 168)	This is OrderItem, a member of class DataClasses1DataContext.
	OrderItemStatus ( <a href="#">↗</a> see page 168)	This is OrderItemStatus, a member of class DataClasses1DataContext.
	OrderStatus ( <a href="#">↗</a> see page 168)	This is OrderStatus, a member of class DataClasses1DataContext.
	OrderType ( <a href="#">↗</a> see page 168)	This is OrderType, a member of class DataClasses1DataContext.
	PackingList ( <a href="#">↗</a> see page 168)	This is PackingList, a member of class DataClasses1DataContext.
	PathPosition ( <a href="#">↗</a> see page 169)	This is PathPosition, a member of class DataClasses1DataContext.
	Permission ( <a href="#">↗</a> see page 169)	This is Permission, a member of class DataClasses1DataContext.
	PermissionProfile ( <a href="#">↗</a> see page 169)	This is PermissionProfile, a member of class DataClasses1DataContext.
	PermissionProfilePermission ( <a href="#">↗</a> see page 169)	This is PermissionProfilePermission, a member of class DataClasses1DataContext.
	Person ( <a href="#">↗</a> see page 169)	This is Person, a member of class DataClasses1DataContext.
	Price ( <a href="#">↗</a> see page 169)	This is Price, a member of class DataClasses1DataContext.
	PriceAccount ( <a href="#">↗</a> see page 170)	This is PriceAccount, a member of class DataClasses1DataContext.
	Product ( <a href="#">↗</a> see page 170)	This is Product, a member of class DataClasses1DataContext.
	ProductCategory ( <a href="#">↗</a> see page 170)	This is ProductCategory, a member of class DataClasses1DataContext.
	Registration ( <a href="#">↗</a> see page 170)	This is Registration, a member of class DataClasses1DataContext.
	RegistrationLocation ( <a href="#">↗</a> see page 170)	This is RegistrationLocation, a member of class DataClasses1DataContext.
	RegistrationOrder ( <a href="#">↗</a> see page 170)	This is RegistrationOrder, a member of class DataClasses1DataContext.
	RegistrationOrderType ( <a href="#">↗</a> see page 170)	This is RegistrationOrderType, a member of class DataClasses1DataContext.
	RequiredField ( <a href="#">↗</a> see page 171)	This is RequiredField, a member of class DataClasses1DataContext.
	RequiredFieldTranslation ( <a href="#">↗</a> see page 171)	This is RequiredFieldTranslation, a member of class DataClasses1DataContext.
	SmallCustomer ( <a href="#">↗</a> see page 171)	This is SmallCustomer, a member of class DataClasses1DataContext.
	Systemlog ( <a href="#">↗</a> see page 171)	This is Systemlog, a member of class DataClasses1DataContext.
	temp_Customers2 ( <a href="#">↗</a> see page 171)	This is temp_Customers2, a member of class DataClasses1DataContext.
	temp_Products ( <a href="#">↗</a> see page 171)	This is temp_Products, a member of class DataClasses1DataContext.
	User ( <a href="#">↗</a> see page 172)	This is User, a member of class DataClasses1DataContext.
	UserPermission ( <a href="#">↗</a> see page 172)	This is UserPermission, a member of class DataClasses1DataContext.
	UserPermissionProfile ( <a href="#">↗</a> see page 172)	This is UserPermissionProfile, a member of class DataClasses1DataContext.
	Vehicle ( <a href="#">↗</a> see page 172)	This is Vehicle, a member of class DataClasses1DataContext.
	WebServiceLogin ( <a href="#">↗</a> see page 172)	This is WebServiceLogin, a member of class DataClasses1DataContext.
	WebServiceLoginCustomer ( <a href="#">↗</a> see page 172)	This is WebServiceLoginCustomer, a member of class DataClasses1DataContext.

### DataClasses1DataContext Eigenschaften

	Name	Beschreibung
	Accounts ( <a href="#">↗</a> see page 162)	This is Accounts, a member of class DataClasses1DataContext.
	Adress ( <a href="#">↗</a> see page 163)	This is Adress, a member of class DataClasses1DataContext.
	AuthorativeChargeAccounts ( <a href="#">↗</a> see page 163)	This is AuthorativeChargeAccounts, a member of class DataClasses1DataContext.
	BankAccount ( <a href="#">↗</a> see page 163)	This is BankAccount, a member of class DataClasses1DataContext.
	BIC_DE ( <a href="#">↗</a> see page 163)	This is BIC_DE, a member of class DataClasses1DataContext.
	CarOwner ( <a href="#">↗</a> see page 163)	This is CarOwner, a member of class DataClasses1DataContext.
	ChangeLog ( <a href="#">↗</a> see page 163)	This is ChangeLog, a member of class DataClasses1DataContext.
	ChangeLogColumnNames ( <a href="#">↗</a> see page 164)	This is ChangeLogColumnNames, a member of class DataClasses1DataContext.
	Contact ( <a href="#">↗</a> see page 164)	This is Contact, a member of class DataClasses1DataContext.
	CostCenter ( <a href="#">↗</a> see page 164)	This is CostCenter, a member of class DataClasses1DataContext.
	Customer ( <a href="#">↗</a> see page 164)	This is Customer, a member of class DataClasses1DataContext.
	CustomerProduct ( <a href="#">↗</a> see page 164)	This is CustomerProduct, a member of class DataClasses1DataContext.
	DeregistrationOrder ( <a href="#">↗</a> see page 164)	This is DeregistrationOrder, a member of class DataClasses1DataContext.

	DocketList ( <a href="#">↗</a> see page 164)	This is DocketList, a member of class DataClasses1DataContext.
	Document ( <a href="#">↗</a> see page 165)	This is Document, a member of class DataClasses1DataContext.
	DocumentConfiguration ( <a href="#">↗</a> see page 165)	This is DocumentConfiguration, a member of class DataClasses1DataContext.
	DocumentType ( <a href="#">↗</a> see page 165)	This is DocumentType, a member of class DataClasses1DataContext.
	Invoice ( <a href="#">↗</a> see page 165)	This is Invoice, a member of class DataClasses1DataContext.
	InvoiceIDInvoiceRunID ( <a href="#">↗</a> see page 165)	This is InvoiceIDInvoiceRunID, a member of class DataClasses1DataContext.
	InvoiceItem ( <a href="#">↗</a> see page 165)	This is InvoiceItem, a member of class DataClasses1DataContext.
	InvoiceItemAccountItem ( <a href="#">↗</a> see page 166)	This is InvoiceItemAccountItem, a member of class DataClasses1DataContext.
	InvoiceNumber ( <a href="#">↗</a> see page 166)	This is InvoiceNumber, a member of class DataClasses1DataContext.
	InvoiceRunReport ( <a href="#">↗</a> see page 166)	This is InvoiceRunReport, a member of class DataClasses1DataContext.
	InvoiceTypes ( <a href="#">↗</a> see page 166)	This is InvoiceTypes, a member of class DataClasses1DataContext.
	LargeCustomer ( <a href="#">↗</a> see page 166)	This is LargeCustomer, a member of class DataClasses1DataContext.
	LargeCustomerRequiredField ( <a href="#">↗</a> see page 166)	This is LargeCustomerRequiredField, a member of class DataClasses1DataContext.
	Location ( <a href="#">↗</a> see page 167)	This is Location, a member of class DataClasses1DataContext.
	LogType ( <a href="#">↗</a> see page 167)	This is LogType, a member of class DataClasses1DataContext.
	LogUserId ( <a href="#">↗</a> see page 167)	This is LogUserId, a member of class DataClasses1DataContext.
	Mailinglist ( <a href="#">↗</a> see page 167)	This is Mailinglist, a member of class DataClasses1DataContext.
	MailinglistType ( <a href="#">↗</a> see page 167)	This is MailinglistType, a member of class DataClasses1DataContext.
	Make ( <a href="#">↗</a> see page 167)	This is Make, a member of class DataClasses1DataContext.
	Order ( <a href="#">↗</a> see page 167)	This is Order, a member of class DataClasses1DataContext.
	OrderInvoice ( <a href="#">↗</a> see page 168)	This is OrderInvoice, a member of class DataClasses1DataContext.
	OrderItem ( <a href="#">↗</a> see page 168)	This is OrderItem, a member of class DataClasses1DataContext.
	OrderItemStatus ( <a href="#">↗</a> see page 168)	This is OrderItemStatus, a member of class DataClasses1DataContext.
	OrderStatus ( <a href="#">↗</a> see page 168)	This is OrderStatus, a member of class DataClasses1DataContext.
	OrderType ( <a href="#">↗</a> see page 168)	This is OrderType, a member of class DataClasses1DataContext.
	PackingList ( <a href="#">↗</a> see page 168)	This is PackingList, a member of class DataClasses1DataContext.
	PathPosition ( <a href="#">↗</a> see page 169)	This is PathPosition, a member of class DataClasses1DataContext.
	Permission ( <a href="#">↗</a> see page 169)	This is Permission, a member of class DataClasses1DataContext.
	PermissionProfile ( <a href="#">↗</a> see page 169)	This is PermissionProfile, a member of class DataClasses1DataContext.
	PermissionProfilePermission ( <a href="#">↗</a> see page 169)	This is PermissionProfilePermission, a member of class DataClasses1DataContext.
	Person ( <a href="#">↗</a> see page 169)	This is Person, a member of class DataClasses1DataContext.
	Price ( <a href="#">↗</a> see page 169)	This is Price, a member of class DataClasses1DataContext.
	PriceAccount ( <a href="#">↗</a> see page 170)	This is PriceAccount, a member of class DataClasses1DataContext.
	Product ( <a href="#">↗</a> see page 170)	This is Product, a member of class DataClasses1DataContext.
	ProductCategory ( <a href="#">↗</a> see page 170)	This is ProductCategory, a member of class DataClasses1DataContext.
	Registration ( <a href="#">↗</a> see page 170)	This is Registration, a member of class DataClasses1DataContext.
	RegistrationLocation ( <a href="#">↗</a> see page 170)	This is RegistrationLocation, a member of class DataClasses1DataContext.
	RegistrationOrder ( <a href="#">↗</a> see page 170)	This is RegistrationOrder, a member of class DataClasses1DataContext.
	RegistrationOrderType ( <a href="#">↗</a> see page 170)	This is RegistrationOrderType, a member of class DataClasses1DataContext.
	RequiredField ( <a href="#">↗</a> see page 171)	This is RequiredField, a member of class DataClasses1DataContext.
	RequiredFieldTranslation ( <a href="#">↗</a> see page 171)	This is RequiredFieldTranslation, a member of class DataClasses1DataContext.
	SmallCustomer ( <a href="#">↗</a> see page 171)	This is SmallCustomer, a member of class DataClasses1DataContext.
	Systemlog ( <a href="#">↗</a> see page 171)	This is Systemlog, a member of class DataClasses1DataContext.
	temp_Customers2 ( <a href="#">↗</a> see page 171)	This is temp_Customers2, a member of class DataClasses1DataContext.
	temp_Products ( <a href="#">↗</a> see page 171)	This is temp_Products, a member of class DataClasses1DataContext.
	User ( <a href="#">↗</a> see page 172)	This is User, a member of class DataClasses1DataContext.
	UserPermission ( <a href="#">↗</a> see page 172)	This is UserPermission, a member of class DataClasses1DataContext.
	UserPermissionProfile ( <a href="#">↗</a> see page 172)	This is UserPermissionProfile, a member of class DataClasses1DataContext.
	Vehicle ( <a href="#">↗</a> see page 172)	This is Vehicle, a member of class DataClasses1DataContext.
	WebServiceLogin ( <a href="#">↗</a> see page 172)	This is WebServiceLogin, a member of class DataClasses1DataContext.
	WebServiceLoginCustomer ( <a href="#">↗</a> see page 172)	This is WebServiceLoginCustomer, a member of class DataClasses1DataContext.

### DataClasses1DataContext Felder

	Name	Beschreibung
	mappingSource ( <a href="#">↗</a> see page 133)	This is mappingSource, a member of class DataClasses1DataContext.

**DataClasses1DataContext Methoden**

	Name	Beschreibung
	DeleteAccounts ( <a href="#">↗</a> see page 133)	This is DeleteAccounts, a member of class DataClasses1DataContext.
	DeleteAddress ( <a href="#">↗</a> see page 134)	This is DeleteAddress, a member of class DataClasses1DataContext.
	DeleteBankAccount ( <a href="#">↗</a> see page 134)	This is DeleteBankAccount, a member of class DataClasses1DataContext.
	DeleteCarOwner ( <a href="#">↗</a> see page 134)	This is DeleteCarOwner, a member of class DataClasses1DataContext.
	DeleteChangeLogColumnNames ( <a href="#">↗</a> see page 134)	This is DeleteChangeLogColumnNames, a member of class DataClasses1DataContext.
	DeleteContact ( <a href="#">↗</a> see page 134)	This is DeleteContact, a member of class DataClasses1DataContext.
	DeleteCostCenter ( <a href="#">↗</a> see page 134)	This is DeleteCostCenter, a member of class DataClasses1DataContext.
	DeleteCustomer ( <a href="#">↗</a> see page 135)	This is DeleteCustomer, a member of class DataClasses1DataContext.
	DeleteCustomerProduct ( <a href="#">↗</a> see page 135)	This is DeleteCustomerProduct, a member of class DataClasses1DataContext.
	DeleteDeregistrationOrder ( <a href="#">↗</a> see page 135)	This is DeleteDeregistrationOrder, a member of class DataClasses1DataContext.
	DeleteDocketList ( <a href="#">↗</a> see page 135)	This is DeleteDocketList, a member of class DataClasses1DataContext.
	DeleteDocument ( <a href="#">↗</a> see page 135)	This is DeleteDocument, a member of class DataClasses1DataContext.
	DeleteDocumentConfiguration ( <a href="#">↗</a> see page 135)	This is DeleteDocumentConfiguration, a member of class DataClasses1DataContext.
	DeleteDocumentType ( <a href="#">↗</a> see page 136)	This is DeleteDocumentType, a member of class DataClasses1DataContext.
	DeleteInvoice ( <a href="#">↗</a> see page 136)	This is DeleteInvoice, a member of class DataClasses1DataContext.
	DeleteInvoiceItem ( <a href="#">↗</a> see page 136)	This is DeleteInvoiceItem, a member of class DataClasses1DataContext.
	DeleteInvoiceItemAccountItem ( <a href="#">↗</a> see page 136)	This is DeleteInvoiceItemAccountItem, a member of class DataClasses1DataContext.
	DeleteInvoiceNumber ( <a href="#">↗</a> see page 136)	This is DeleteInvoiceNumber, a member of class DataClasses1DataContext.
	DeleteInvoiceRunReport ( <a href="#">↗</a> see page 136)	This is DeleteInvoiceRunReport, a member of class DataClasses1DataContext.
	DeleteInvoiceTypes ( <a href="#">↗</a> see page 137)	This is DeleteInvoiceTypes, a member of class DataClasses1DataContext.
	DeleteLargeCustomer ( <a href="#">↗</a> see page 137)	This is DeleteLargeCustomer, a member of class DataClasses1DataContext.
	DeleteLargeCustomerRequiredField ( <a href="#">↗</a> see page 137)	This is DeleteLargeCustomerRequiredField, a member of class DataClasses1DataContext.
	DeleteLocation ( <a href="#">↗</a> see page 137)	This is DeleteLocation, a member of class DataClasses1DataContext.
	DeleteLogType ( <a href="#">↗</a> see page 137)	This is DeleteLogType, a member of class DataClasses1DataContext.
	DeleteMailinglist ( <a href="#">↗</a> see page 137)	This is DeleteMailinglist, a member of class DataClasses1DataContext.
	DeleteMailinglistType ( <a href="#">↗</a> see page 138)	This is DeleteMailinglistType, a member of class DataClasses1DataContext.
	DeleteMake ( <a href="#">↗</a> see page 138)	This is DeleteMake, a member of class DataClasses1DataContext.
	DeleteOrder ( <a href="#">↗</a> see page 138)	This is DeleteOrder, a member of class DataClasses1DataContext.
	DeleteOrderInvoice ( <a href="#">↗</a> see page 138)	This is DeleteOrderInvoice, a member of class DataClasses1DataContext.
	DeleteOrderItem ( <a href="#">↗</a> see page 138)	This is DeleteOrderItem, a member of class DataClasses1DataContext.
	DeleteOrderItemStatus ( <a href="#">↗</a> see page 138)	This is DeleteOrderItemStatus, a member of class DataClasses1DataContext.
	DeleteOrderStatus ( <a href="#">↗</a> see page 138)	This is DeleteOrderStatus, a member of class DataClasses1DataContext.
	DeleteOrderType ( <a href="#">↗</a> see page 139)	This is DeleteOrderType, a member of class DataClasses1DataContext.
	DeletePackingList ( <a href="#">↗</a> see page 139)	This is DeletePackingList, a member of class DataClasses1DataContext.
	DeletePermission ( <a href="#">↗</a> see page 139)	This is DeletePermission, a member of class DataClasses1DataContext.
	DeletePermissionProfile ( <a href="#">↗</a> see page 139)	This is DeletePermissionProfile, a member of class DataClasses1DataContext.
	DeletePermissionProfilePermission ( <a href="#">↗</a> see page 139)	This is DeletePermissionProfilePermission, a member of class DataClasses1DataContext.
	DeletePerson ( <a href="#">↗</a> see page 139)	This is DeletePerson, a member of class DataClasses1DataContext.
	DeletePrice ( <a href="#">↗</a> see page 140)	This is DeletePrice, a member of class DataClasses1DataContext.
	DeletePriceAccount ( <a href="#">↗</a> see page 140)	This is DeletePriceAccount, a member of class DataClasses1DataContext.
	DeleteProduct ( <a href="#">↗</a> see page 140)	This is DeleteProduct, a member of class DataClasses1DataContext.
	DeleteProductCategory ( <a href="#">↗</a> see page 140)	This is DeleteProductCategory, a member of class DataClasses1DataContext.
	DeleteRegistration ( <a href="#">↗</a> see page 140)	This is DeleteRegistration, a member of class DataClasses1DataContext.
	DeleteRegistrationLocation ( <a href="#">↗</a> see page 140)	This is DeleteRegistrationLocation, a member of class DataClasses1DataContext.
	DeleteRegistrationOrder ( <a href="#">↗</a> see page 140)	This is DeleteRegistrationOrder, a member of class DataClasses1DataContext.
	DeleteRegistrationOrderType ( <a href="#">↗</a> see page 141)	This is DeleteRegistrationOrderType, a member of class DataClasses1DataContext.
	DeleteRequiredField ( <a href="#">↗</a> see page 141)	This is DeleteRequiredField, a member of class DataClasses1DataContext.
	DeleteRequiredFieldTranslation ( <a href="#">↗</a> see page 141)	This is DeleteRequiredFieldTranslation, a member of class DataClasses1DataContext.
	DeleteSmallCustomer ( <a href="#">↗</a> see page 141)	This is DeleteSmallCustomer, a member of class DataClasses1DataContext.

	DeleteSystemlog ( <a href="#">↗</a> see page 141)	This is DeleteSystemlog, a member of class DataClasses1DataContext.
	DeleteUser ( <a href="#">↗</a> see page 141)	This is DeleteUser, a member of class DataClasses1DataContext.
	DeleteUserPermission ( <a href="#">↗</a> see page 142)	This is DeleteUserPermission, a member of class DataClasses1DataContext.
	DeleteUserPermissionProfile ( <a href="#">↗</a> see page 142)	This is DeleteUserPermissionProfile, a member of class DataClasses1DataContext.
	DeleteVehicle ( <a href="#">↗</a> see page 142)	This is DeleteVehicle, a member of class DataClasses1DataContext.
	DeleteWebServiceLogin ( <a href="#">↗</a> see page 142)	This is DeleteWebServiceLogin, a member of class DataClasses1DataContext.
	DeleteWebServiceLoginCustomer ( <a href="#">↗</a> see page 142)	This is DeleteWebServiceLoginCustomer, a member of class DataClasses1DataContext.
	GetLogItem ( <a href="#">↗</a> see page 142)	Erstellt einen neuen Logeintrag.
	InsertAccounts ( <a href="#">↗</a> see page 143)	This is InsertAccounts, a member of class DataClasses1DataContext.
	InsertAddress ( <a href="#">↗</a> see page 143)	This is InsertAddress, a member of class DataClasses1DataContext.
	InsertBankAccount ( <a href="#">↗</a> see page 143)	This is InsertBankAccount, a member of class DataClasses1DataContext.
	InsertCarOwner ( <a href="#">↗</a> see page 143)	This is InsertCarOwner, a member of class DataClasses1DataContext.
	InsertChangeLogColumnNames ( <a href="#">↗</a> see page 143)	This is InsertChangeLogColumnNames, a member of class DataClasses1DataContext.
	InsertContact ( <a href="#">↗</a> see page 143)	This is InsertContact, a member of class DataClasses1DataContext.
	InsertCostCenter ( <a href="#">↗</a> see page 144)	This is InsertCostCenter, a member of class DataClasses1DataContext.
	InsertCustomer ( <a href="#">↗</a> see page 144)	This is InsertCustomer, a member of class DataClasses1DataContext.
	InsertCustomerProduct ( <a href="#">↗</a> see page 144)	This is InsertCustomerProduct, a member of class DataClasses1DataContext.
	InsertDeregistrationOrder ( <a href="#">↗</a> see page 144)	This is InsertDeregistrationOrder, a member of class DataClasses1DataContext.
	InsertDocketList ( <a href="#">↗</a> see page 144)	This is InsertDocketList, a member of class DataClasses1DataContext.
	InsertDocument ( <a href="#">↗</a> see page 144)	This is InsertDocument, a member of class DataClasses1DataContext.
	InsertDocumentConfiguration ( <a href="#">↗</a> see page 145)	This is InsertDocumentConfiguration, a member of class DataClasses1DataContext.
	InsertDocumentType ( <a href="#">↗</a> see page 145)	This is InsertDocumentType, a member of class DataClasses1DataContext.
	InsertInvoice ( <a href="#">↗</a> see page 145)	This is InsertInvoice, a member of class DataClasses1DataContext.
	InsertInvoiceItem ( <a href="#">↗</a> see page 145)	This is InsertInvoiceItem, a member of class DataClasses1DataContext.
	InsertInvoiceItemAccountItem ( <a href="#">↗</a> see page 145)	This is InsertInvoiceItemAccountItem, a member of class DataClasses1DataContext.
	InsertInvoiceNumber ( <a href="#">↗</a> see page 145)	This is InsertInvoiceNumber, a member of class DataClasses1DataContext.
	InsertInvoiceRunReport ( <a href="#">↗</a> see page 146)	This is InsertInvoiceRunReport, a member of class DataClasses1DataContext.
	InsertInvoiceTypes ( <a href="#">↗</a> see page 146)	This is InsertInvoiceTypes, a member of class DataClasses1DataContext.
	InsertLargeCustomer ( <a href="#">↗</a> see page 146)	This is InsertLargeCustomer, a member of class DataClasses1DataContext.
	InsertLargeCustomerRequiredField ( <a href="#">↗</a> see page 146)	This is InsertLargeCustomerRequiredField, a member of class DataClasses1DataContext.
	InsertLocation ( <a href="#">↗</a> see page 146)	This is InsertLocation, a member of class DataClasses1DataContext.
	InsertLogType ( <a href="#">↗</a> see page 146)	This is InsertLogType, a member of class DataClasses1DataContext.
	InsertMailinglist ( <a href="#">↗</a> see page 147)	This is InsertMailinglist, a member of class DataClasses1DataContext.
	InsertMailinglistType ( <a href="#">↗</a> see page 147)	This is InsertMailinglistType, a member of class DataClasses1DataContext.
	InsertMake ( <a href="#">↗</a> see page 147)	This is InsertMake, a member of class DataClasses1DataContext.
	InsertOrder ( <a href="#">↗</a> see page 147)	This is InsertOrder, a member of class DataClasses1DataContext.
	InsertOrderInvoice ( <a href="#">↗</a> see page 147)	This is InsertOrderInvoice, a member of class DataClasses1DataContext.
	InsertOrderItem ( <a href="#">↗</a> see page 147)	This is InsertOrderItem, a member of class DataClasses1DataContext.
	InsertOrderItemStatus ( <a href="#">↗</a> see page 147)	This is InsertOrderItemStatus, a member of class DataClasses1DataContext.
	InsertOrderStatus ( <a href="#">↗</a> see page 148)	This is InsertOrderStatus, a member of class DataClasses1DataContext.
	InsertOrderType ( <a href="#">↗</a> see page 148)	This is InsertOrderType, a member of class DataClasses1DataContext.
	InsertPackingList ( <a href="#">↗</a> see page 148)	This is InsertPackingList, a member of class DataClasses1DataContext.
	InsertPermission ( <a href="#">↗</a> see page 148)	This is InsertPermission, a member of class DataClasses1DataContext.
	InsertPermissionProfile ( <a href="#">↗</a> see page 148)	This is InsertPermissionProfile, a member of class DataClasses1DataContext.
	InsertPermissionProfilePermission ( <a href="#">↗</a> see page 148)	This is InsertPermissionProfilePermission, a member of class DataClasses1DataContext.
	InsertPerson ( <a href="#">↗</a> see page 149)	This is InsertPerson, a member of class DataClasses1DataContext.
	InsertPrice ( <a href="#">↗</a> see page 149)	This is InsertPrice, a member of class DataClasses1DataContext.
	InsertPriceAccount ( <a href="#">↗</a> see page 149)	This is InsertPriceAccount, a member of class DataClasses1DataContext.
	InsertProduct ( <a href="#">↗</a> see page 149)	This is InsertProduct, a member of class DataClasses1DataContext.
	InsertProductCategory ( <a href="#">↗</a> see page 149)	This is InsertProductCategory, a member of class DataClasses1DataContext.
	InsertRegistration ( <a href="#">↗</a> see page 149)	This is InsertRegistration, a member of class DataClasses1DataContext.
	InsertRegistrationLocation ( <a href="#">↗</a> see page 149)	This is InsertRegistrationLocation, a member of class DataClasses1DataContext.

	InsertRegistrationOrder ( <a href="#">see page 150</a> )	This is InsertRegistrationOrder, a member of class DataClasses1DataContext.
	InsertRegistrationOrderType ( <a href="#">see page 150</a> )	This is InsertRegistrationOrderType, a member of class DataClasses1DataContext.
	InsertRequiredField ( <a href="#">see page 150</a> )	This is InsertRequiredField, a member of class DataClasses1DataContext.
	InsertRequiredFieldTranslation ( <a href="#">see page 150</a> )	This is InsertRequiredFieldTranslation, a member of class DataClasses1DataContext.
	InsertSmallCustomer ( <a href="#">see page 150</a> )	This is InsertSmallCustomer, a member of class DataClasses1DataContext.
	InsertSystemlog ( <a href="#">see page 150</a> )	This is InsertSystemlog, a member of class DataClasses1DataContext.
	InsertUser ( <a href="#">see page 151</a> )	This is InsertUser, a member of class DataClasses1DataContext.
	InsertUserPermission ( <a href="#">see page 151</a> )	This is InsertUserPermission, a member of class DataClasses1DataContext.
	InsertUserPermissionProfile ( <a href="#">see page 151</a> )	This is InsertUserPermissionProfile, a member of class DataClasses1DataContext.
	InsertVehicle ( <a href="#">see page 151</a> )	This is InsertVehicle, a member of class DataClasses1DataContext.
	InsertWebServiceLogin ( <a href="#">see page 151</a> )	This is InsertWebServiceLogin, a member of class DataClasses1DataContext.
	InsertWebServiceLoginCustomer ( <a href="#">see page 151</a> )	This is InsertWebServiceLoginCustomer, a member of class DataClasses1DataContext.
	OnCreated ( <a href="#">see page 152</a> )	This is OnCreated, a member of class DataClasses1DataContext.
	UpdateAccounts ( <a href="#">see page 152</a> )	This is UpdateAccounts, a member of class DataClasses1DataContext.
	UpdateAdress ( <a href="#">see page 152</a> )	This is UpdateAdress, a member of class DataClasses1DataContext.
	UpdateBankAccount ( <a href="#">see page 152</a> )	This is UpdateBankAccount, a member of class DataClasses1DataContext.
	UpdateCarOwner ( <a href="#">see page 152</a> )	This is UpdateCarOwner, a member of class DataClasses1DataContext.
	UpdateChangeLogColumnNames ( <a href="#">see page 152</a> )	This is UpdateChangeLogColumnNames, a member of class DataClasses1DataContext.
	UpdateContact ( <a href="#">see page 153</a> )	This is UpdateContact, a member of class DataClasses1DataContext.
	UpdateCostCenter ( <a href="#">see page 153</a> )	This is UpdateCostCenter, a member of class DataClasses1DataContext.
	UpdateCustomer ( <a href="#">see page 153</a> )	This is UpdateCustomer, a member of class DataClasses1DataContext.
	UpdateCustomerProduct ( <a href="#">see page 153</a> )	This is UpdateCustomerProduct, a member of class DataClasses1DataContext.
	UpdateDeregistrationOrder ( <a href="#">see page 153</a> )	This is UpdateDeregistrationOrder, a member of class DataClasses1DataContext.
	UpdateDocketList ( <a href="#">see page 153</a> )	This is UpdateDocketList, a member of class DataClasses1DataContext.
	UpdateDocument ( <a href="#">see page 153</a> )	This is UpdateDocument, a member of class DataClasses1DataContext.
	UpdateDocumentConfiguration ( <a href="#">see page 154</a> )	This is UpdateDocumentConfiguration, a member of class DataClasses1DataContext.
	UpdateDocumentType ( <a href="#">see page 154</a> )	This is UpdateDocumentType, a member of class DataClasses1DataContext.
	UpdateInvoice ( <a href="#">see page 154</a> )	This is UpdateInvoice, a member of class DataClasses1DataContext.
	UpdateInvoiceItem ( <a href="#">see page 154</a> )	This is UpdateInvoiceItem, a member of class DataClasses1DataContext.
	UpdateInvoiceItemAccountItem ( <a href="#">see page 154</a> )	This is UpdateInvoiceItemAccountItem, a member of class DataClasses1DataContext.
	UpdateInvoiceNumber ( <a href="#">see page 154</a> )	This is UpdateInvoiceNumber, a member of class DataClasses1DataContext.
	UpdateInvoiceRunReport ( <a href="#">see page 155</a> )	This is UpdateInvoiceRunReport, a member of class DataClasses1DataContext.
	UpdateInvoiceTypes ( <a href="#">see page 155</a> )	This is UpdateInvoiceTypes, a member of class DataClasses1DataContext.
	UpdateLargeCustomer ( <a href="#">see page 155</a> )	This is UpdateLargeCustomer, a member of class DataClasses1DataContext.
	UpdateLargeCustomerRequiredField ( <a href="#">see page 155</a> )	This is UpdateLargeCustomerRequiredField, a member of class DataClasses1DataContext.
	UpdateLocation ( <a href="#">see page 155</a> )	This is UpdateLocation, a member of class DataClasses1DataContext.
	UpdateLogType ( <a href="#">see page 155</a> )	This is UpdateLogType, a member of class DataClasses1DataContext.
	UpdateMailinglist ( <a href="#">see page 156</a> )	This is UpdateMailinglist, a member of class DataClasses1DataContext.
	UpdateMailinglistType ( <a href="#">see page 156</a> )	This is UpdateMailinglistType, a member of class DataClasses1DataContext.
	UpdateMake ( <a href="#">see page 156</a> )	This is UpdateMake, a member of class DataClasses1DataContext.
	UpdateOrder ( <a href="#">see page 156</a> )	This is UpdateOrder, a member of class DataClasses1DataContext.
	UpdateOrderInvoice ( <a href="#">see page 156</a> )	This is UpdateOrderInvoice, a member of class DataClasses1DataContext.
	UpdateOrderItem ( <a href="#">see page 156</a> )	This is UpdateOrderItem, a member of class DataClasses1DataContext.
	UpdateOrderItemStatus ( <a href="#">see page 156</a> )	This is UpdateOrderItemStatus, a member of class DataClasses1DataContext.
	UpdateOrderStatus ( <a href="#">see page 157</a> )	This is UpdateOrderStatus, a member of class DataClasses1DataContext.
	UpdateOrderType ( <a href="#">see page 157</a> )	This is UpdateOrderType, a member of class DataClasses1DataContext.
	UpdatePackingList ( <a href="#">see page 157</a> )	This is UpdatePackingList, a member of class DataClasses1DataContext.
	UpdatePermission ( <a href="#">see page 157</a> )	This is UpdatePermission, a member of class DataClasses1DataContext.
	UpdatePermissionProfile ( <a href="#">see page 157</a> )	This is UpdatePermissionProfile, a member of class DataClasses1DataContext.
	UpdatePermissionProfilePermission ( <a href="#">see page 157</a> )	This is UpdatePermissionProfilePermission, a member of class DataClasses1DataContext.

	UpdatePerson ( <a href="#">↗</a> see page 158)	This is UpdatePerson, a member of class DataClasses1DataContext.
	UpdatePrice ( <a href="#">↗</a> see page 158)	This is UpdatePrice, a member of class DataClasses1DataContext.
	UpdatePriceAccount ( <a href="#">↗</a> see page 158)	This is UpdatePriceAccount, a member of class DataClasses1DataContext.
	UpdateProduct ( <a href="#">↗</a> see page 158)	This is UpdateProduct, a member of class DataClasses1DataContext.
	UpdateProductCategory ( <a href="#">↗</a> see page 158)	This is UpdateProductCategory, a member of class DataClasses1DataContext.
	UpdateRegistration ( <a href="#">↗</a> see page 158)	This is UpdateRegistration, a member of class DataClasses1DataContext.
	UpdateRegistrationLocation ( <a href="#">↗</a> see page 159)	This is UpdateRegistrationLocation, a member of class DataClasses1DataContext.
	UpdateRegistrationOrder ( <a href="#">↗</a> see page 159)	This is UpdateRegistrationOrder, a member of class DataClasses1DataContext.
	UpdateRegistrationOrderType ( <a href="#">↗</a> see page 159)	This is UpdateRegistrationOrderType, a member of class DataClasses1DataContext.
	UpdateRequiredField ( <a href="#">↗</a> see page 159)	This is UpdateRequiredField, a member of class DataClasses1DataContext.
	UpdateRequiredFieldTranslation ( <a href="#">↗</a> see page 159)	This is UpdateRequiredFieldTranslation, a member of class DataClasses1DataContext.
	UpdateSmallCustomer ( <a href="#">↗</a> see page 159)	This is UpdateSmallCustomer, a member of class DataClasses1DataContext.
	UpdateSystemlog ( <a href="#">↗</a> see page 160)	This is UpdateSystemlog, a member of class DataClasses1DataContext.
	UpdateUser ( <a href="#">↗</a> see page 160)	This is UpdateUser, a member of class DataClasses1DataContext.
	UpdateUserPermission ( <a href="#">↗</a> see page 160)	This is UpdateUserPermission, a member of class DataClasses1DataContext.
	UpdateUserPermissionProfile ( <a href="#">↗</a> see page 160)	This is UpdateUserPermissionProfile, a member of class DataClasses1DataContext.
	UpdateVehicle ( <a href="#">↗</a> see page 160)	This is UpdateVehicle, a member of class DataClasses1DataContext.
	UpdateWebServiceLogin ( <a href="#">↗</a> see page 160)	This is UpdateWebServiceLogin, a member of class DataClasses1DataContext.
	UpdateWebServiceLoginCustomer ( <a href="#">↗</a> see page 161)	This is UpdateWebServiceLoginCustomer, a member of class DataClasses1DataContext.
	WriteLogItem ( <a href="#">↗</a> see page 161)	Fügt dem Datenbankkontext einen Logeintrag hinzu.

## 1.1.14.1 DataClasses1DataContext Konstruktor

### 1.1.14.1.1 DataClasses1DataContext.DataClasses1DataContext Konstruktor ()

C#

```
public DataClasses1DataContext();
```

Anmerkungen

This is DataClasses1DataContext, a member of class DataClasses1DataContext.

### 1.1.14.1.2 DataClasses1DataContext.DataClasses1DataContext Konstruktor (Guid)

C#

```
public DataClasses1DataContext(Guid logUserId);
```

Anmerkungen

This is DataClasses1DataContext, a member of class DataClasses1DataContext.

### 1.1.14.1.3 DataClasses1DataContext.DataClasses1DataContext Konstruktor (System.Data.IDbConnection)

C#

```
public DataClasses1DataContext(System.Data.IDbConnection connection);
```

**Anmerkungen**

This is DataClasses1DataContext, a member of class DataClasses1DataContext.

**1.1.14.1.4 DataClasses1DataContext.DataClasses1DataContext Konstruktor (System.Data.IDbConnection, System.Data.Linq.Mapping.MappingSource)****C#**

```
public DataClasses1DataContext(System.Data.IDbConnection connection,  
    System.Data.Linq.Mapping.MappingSource mappingSource);
```

**Anmerkungen**

This is DataClasses1DataContext, a member of class DataClasses1DataContext.

**1.1.14.1.5 DataClasses1DataContext.DataClasses1DataContext Konstruktor (string)****C#**

```
public DataClasses1DataContext(string connection);
```

**Anmerkungen**

This is DataClasses1DataContext, a member of class DataClasses1DataContext.

**1.1.14.1.6 DataClasses1DataContext.DataClasses1DataContext Konstruktor (string, System.Data.Linq.Mapping.MappingSource)****C#**

```
public DataClasses1DataContext(string connection, System.Data.Linq.Mapping.MappingSource  
    mappingSource);
```

**Anmerkungen**

This is DataClasses1DataContext, a member of class DataClasses1DataContext.

**1.1.14.2 DataClasses1DataContext Felder****1.1.14.2.1 DataClasses1DataContext.mappingSource Feld****C#**

```
private static System.Data.Linq.Mapping.MappingSource mappingSource = new  
    AttributeMappingSource();
```

**Anmerkungen**

This is mappingSource, a member of class DataClasses1DataContext.

**1.1.14.3 DataClasses1DataContext Methoden****1.1.14.3.1 DataClasses1DataContext.DeleteAccounts Methode****C#**

```
private void DeleteAccounts(Accounts instance);
```

**Anmerkungen**

This is DeleteAccounts, a member of class DataClasses1DataContext.

**1.1.14.3.2 DataClasses1DataContext.DeleteAdress Methode****C#**

```
private void DeleteAdress(Adress instance);
```

**Anmerkungen**

This is DeleteAdress, a member of class DataClasses1DataContext.

**1.1.14.3.3 DataClasses1DataContext.DeleteBankAccount Methode****C#**

```
private void DeleteBankAccount(BankAccount instance);
```

**Anmerkungen**

This is DeleteBankAccount, a member of class DataClasses1DataContext.

**1.1.14.3.4 DataClasses1DataContext.DeleteCarOwner Methode****C#**

```
private void DeleteCarOwner(CarOwner instance);
```

**Anmerkungen**

This is DeleteCarOwner, a member of class DataClasses1DataContext.

**1.1.14.3.5 DataClasses1DataContext.DeleteChangeLogColumnNames Methode****C#**

```
private void DeleteChangeLogColumnNames(ChangeLogColumnNames instance);
```

**Anmerkungen**

This is DeleteChangeLogColumnNames, a member of class DataClasses1DataContext.

**1.1.14.3.6 DataClasses1DataContext.DeleteContact Methode****C#**

```
private void DeleteContact(Contact instance);
```

**Anmerkungen**

This is DeleteContact, a member of class DataClasses1DataContext.

**1.1.14.3.7 DataClasses1DataContext.DeleteCostCenter Methode****C#**

```
private void DeleteCostCenter(CostCenter instance);
```

**Anmerkungen**

This is DeleteCostCenter, a member of class DataClasses1DataContext.

### 1.1.14.3.8 DataClasses1DataContext.DeleteCustomer Methode

**C#**

```
private void DeleteCustomer(Customer instance);
```

**Anmerkungen**

This is DeleteCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.9 DataClasses1DataContext.DeleteCustomerProduct Methode

**C#**

```
private void DeleteCustomerProduct(CustomerProduct instance);
```

**Anmerkungen**

This is DeleteCustomerProduct, a member of class DataClasses1DataContext.

### 1.1.14.3.10 DataClasses1DataContext.DeleteDeregistrationOrder Methode

**C#**

```
private void DeleteDeregistrationOrder(DeregistrationOrder instance);
```

**Anmerkungen**

This is DeleteDeregistrationOrder, a member of class DataClasses1DataContext.

### 1.1.14.3.11 DataClasses1DataContext.DeleteDocketList Methode

**C#**

```
private void DeleteDocketList(DocketList instance);
```

**Anmerkungen**

This is DeleteDocketList, a member of class DataClasses1DataContext.

### 1.1.14.3.12 DataClasses1DataContext.DeleteDocument Methode

**C#**

```
private void DeleteDocument(Document instance);
```

**Anmerkungen**

This is DeleteDocument, a member of class DataClasses1DataContext.

### 1.1.14.3.13 DataClasses1DataContext.DeleteDocumentConfiguration Methode

**C#**

```
private void DeleteDocumentConfiguration(DocumentConfiguration instance);
```

**Anmerkungen**

This is DeleteDocumentConfiguration, a member of class DataClasses1DataContext.

### 1.1.14.3.14 DataClasses1DataContext.DeleteDocumentType Methode

**C#**

```
private void DeleteDocumentType(DocumentType instance);
```

**Anmerkungen**

This is DeleteDocumentType, a member of class DataClasses1DataContext.

### 1.1.14.3.15 DataClasses1DataContext.DeleteInvoice Methode

**C#**

```
private void DeleteInvoice(Invoice instance);
```

**Anmerkungen**

This is DeleteInvoice, a member of class DataClasses1DataContext.

### 1.1.14.3.16 DataClasses1DataContext.DeleteInvoiceItem Methode

**C#**

```
private void DeleteInvoiceItem(InvoiceItem instance);
```

**Anmerkungen**

This is DeleteInvoiceItem, a member of class DataClasses1DataContext.

### 1.1.14.3.17 DataClasses1DataContext.DeleteInvoiceItemAccountItem Methode

**C#**

```
private void DeleteInvoiceItemAccountItem(InvoiceItemAccountItem instance);
```

**Anmerkungen**

This is DeleteInvoiceItemAccountItem, a member of class DataClasses1DataContext.

### 1.1.14.3.18 DataClasses1DataContext.DeleteInvoiceNumber Methode

**C#**

```
private void DeleteInvoiceNumber(InvoiceNumber instance);
```

**Anmerkungen**

This is DeleteInvoiceNumber, a member of class DataClasses1DataContext.

### 1.1.14.3.19 DataClasses1DataContext.DeleteInvoiceRunReport Methode

**C#**

```
private void DeleteInvoiceRunReport(InvoiceRunReport instance);
```

**Anmerkungen**

This is DeleteInvoiceRunReport, a member of class DataClasses1DataContext.

### 1.1.14.3.20 DataClasses1DataContext.DeleteInvoiceTypes Methode

**C#**

```
private void DeleteInvoiceTypes(InvoiceTypes instance);
```

**Anmerkungen**

This is DeleteInvoiceTypes, a member of class DataClasses1DataContext.

### 1.1.14.3.21 DataClasses1DataContext.DeleteLargeCustomer Methode

**C#**

```
private void DeleteLargeCustomer(LargeCustomer instance);
```

**Anmerkungen**

This is DeleteLargeCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.22 DataClasses1DataContext.DeleteLargeCustomerRequiredField Methode

**C#**

```
private void DeleteLargeCustomerRequiredField(LargeCustomerRequiredField instance);
```

**Anmerkungen**

This is DeleteLargeCustomerRequiredField, a member of class DataClasses1DataContext.

### 1.1.14.3.23 DataClasses1DataContext.DeleteLocation Methode

**C#**

```
private void DeleteLocation(Location instance);
```

**Anmerkungen**

This is DeleteLocation, a member of class DataClasses1DataContext.

### 1.1.14.3.24 DataClasses1DataContext.DeleteLogType Methode

**C#**

```
private void DeleteLogType(LogType instance);
```

**Anmerkungen**

This is DeleteLogType, a member of class DataClasses1DataContext.

### 1.1.14.3.25 DataClasses1DataContext.DeleteMailinglist Methode

**C#**

```
private void DeleteMailinglist(Mailinglist instance);
```

**Anmerkungen**

This is DeleteMailinglist, a member of class DataClasses1DataContext.

### 1.1.14.3.26 DataClasses1DataContext.DeleteMailinglistType Methode

**C#**

```
private void DeleteMailinglistType(MailinglistType instance);
```

**Anmerkungen**

This is DeleteMailinglistType, a member of class DataClasses1DataContext.

### 1.1.14.3.27 DataClasses1DataContext.DeleteMake Methode

**C#**

```
private void DeleteMake(Make instance);
```

**Anmerkungen**

This is DeleteMake, a member of class DataClasses1DataContext.

### 1.1.14.3.28 DataClasses1DataContext.DeleteOrder Methode

**C#**

```
private void DeleteOrder(Order instance);
```

**Anmerkungen**

This is DeleteOrder, a member of class DataClasses1DataContext.

### 1.1.14.3.29 DataClasses1DataContext.DeleteOrderInvoice Methode

**C#**

```
private void DeleteOrderInvoice(OrderInvoice instance);
```

**Anmerkungen**

This is DeleteOrderInvoice, a member of class DataClasses1DataContext.

### 1.1.14.3.30 DataClasses1DataContext.DeleteOrderItem Methode

**C#**

```
private void DeleteOrderItem(OrderItem instance);
```

**Anmerkungen**

This is DeleteOrderItem, a member of class DataClasses1DataContext.

### 1.1.14.3.31 DataClasses1DataContext.DeleteOrderItemStatus Methode

**C#**

```
private void DeleteOrderItemStatus(OrderItemStatus instance);
```

**Anmerkungen**

This is DeleteOrderItemStatus, a member of class DataClasses1DataContext.

### 1.1.14.3.32 DataClasses1DataContext.DeleteOrderStatus Methode

**C#**

```
private void DeleteOrderStatus(OrderStatus instance);
```

**Anmerkungen**

This is DeleteOrderStatus, a member of class DataClasses1DataContext.

**1.1.14.3.33 DataClasses1DataContext.DeleteOrderType Methode****C#**

```
private void DeleteOrderType(OrderType instance);
```

**Anmerkungen**

This is DeleteOrderType, a member of class DataClasses1DataContext.

**1.1.14.3.34 DataClasses1DataContext.DeletePackingList Methode****C#**

```
private void DeletePackingList(PackingList instance);
```

**Anmerkungen**

This is DeletePackingList, a member of class DataClasses1DataContext.

**1.1.14.3.35 DataClasses1DataContext.DeletePermission Methode****C#**

```
private void DeletePermission(Permission instance);
```

**Anmerkungen**

This is DeletePermission, a member of class DataClasses1DataContext.

**1.1.14.3.36 DataClasses1DataContext.DeletePermissionProfile Methode****C#**

```
private void DeletePermissionProfile(PermissionProfile instance);
```

**Anmerkungen**

This is DeletePermissionProfile, a member of class DataClasses1DataContext.

**1.1.14.3.37 DataClasses1DataContext.DeletePermissionProfilePermission Methode****C#**

```
private void DeletePermissionProfilePermission(PermissionProfilePermission instance);
```

**Anmerkungen**

This is DeletePermissionProfilePermission, a member of class DataClasses1DataContext.

**1.1.14.3.38 DataClasses1DataContext.DeletePerson Methode****C#**

```
private void DeletePerson(Person instance);
```

**Anmerkungen**

This is DeletePerson, a member of class DataClasses1DataContext.

### 1.1.14.3.39 DataClasses1DataContext.DeletePrice Methode

**C#**

```
private void DeletePrice(Price instance);
```

**Anmerkungen**

This is DeletePrice, a member of class DataClasses1DataContext.

### 1.1.14.3.40 DataClasses1DataContext.DeletePriceAccount Methode

**C#**

```
private void DeletePriceAccount(PriceAccount instance);
```

**Anmerkungen**

This is DeletePriceAccount, a member of class DataClasses1DataContext.

### 1.1.14.3.41 DataClasses1DataContext.DeleteProduct Methode

**C#**

```
private void DeleteProduct(Product instance);
```

**Anmerkungen**

This is DeleteProduct, a member of class DataClasses1DataContext.

### 1.1.14.3.42 DataClasses1DataContext.DeleteProductCategory Methode

**C#**

```
private void DeleteProductCategory(ProductCategory instance);
```

**Anmerkungen**

This is DeleteProductCategory, a member of class DataClasses1DataContext.

### 1.1.14.3.43 DataClasses1DataContext.DeleteRegistration Methode

**C#**

```
private void DeleteRegistration(Registration instance);
```

**Anmerkungen**

This is DeleteRegistration, a member of class DataClasses1DataContext.

### 1.1.14.3.44 DataClasses1DataContext.DeleteRegistrationLocation Methode

**C#**

```
private void DeleteRegistrationLocation(RegistrationLocation instance);
```

**Anmerkungen**

This is DeleteRegistrationLocation, a member of class DataClasses1DataContext.

### 1.1.14.3.45 DataClasses1DataContext.DeleteRegistrationOrder Methode

**C#**

```
private void DeleteRegistrationOrder(RegistrationOrder instance);
```

**Anmerkungen**

This is DeleteRegistrationOrder, a member of class DataClasses1DataContext.

**1.1.14.3.46 DataClasses1DataContext.DeleteRegistrationOrderType Methode****C#**

```
private void DeleteRegistrationOrderType(RegistrationOrderType instance);
```

**Anmerkungen**

This is DeleteRegistrationOrderType, a member of class DataClasses1DataContext.

**1.1.14.3.47 DataClasses1DataContext.DeleteRequiredField Methode****C#**

```
private void DeleteRequiredField(RequiredField instance);
```

**Anmerkungen**

This is DeleteRequiredField, a member of class DataClasses1DataContext.

**1.1.14.3.48 DataClasses1DataContext.DeleteRequiredFieldTranslation Methode****C#**

```
private void DeleteRequiredFieldTranslation(RequiredFieldTranslation instance);
```

**Anmerkungen**

This is DeleteRequiredFieldTranslation, a member of class DataClasses1DataContext.

**1.1.14.3.49 DataClasses1DataContext.DeleteSmallCustomer Methode****C#**

```
private void DeleteSmallCustomer(SmallCustomer instance);
```

**Anmerkungen**

This is DeleteSmallCustomer, a member of class DataClasses1DataContext.

**1.1.14.3.50 DataClasses1DataContext.DeleteSystemlog Methode****C#**

```
private void DeleteSystemlog(Systemlog instance);
```

**Anmerkungen**

This is DeleteSystemlog, a member of class DataClasses1DataContext.

**1.1.14.3.51 DataClasses1DataContext.DeleteUser Methode****C#**

```
private void DeleteUser(User instance);
```

**Anmerkungen**

This is DeleteUser, a member of class DataClasses1DataContext.

### 1.1.14.3.52 DataClasses1DataContext.DeleteUserPermission Methode

**C#**

```
private void DeleteUserPermission(UserPermission instance);
```

**Anmerkungen**

This is DeleteUserPermission, a member of class DataClasses1DataContext.

### 1.1.14.3.53 DataClasses1DataContext.DeleteUserPermissionProfile Methode

**C#**

```
private void DeleteUserPermissionProfile(UserPermissionProfile instance);
```

**Anmerkungen**

This is DeleteUserPermissionProfile, a member of class DataClasses1DataContext.

### 1.1.14.3.54 DataClasses1DataContext.DeleteVehicle Methode

**C#**

```
private void DeleteVehicle(Vehicle instance);
```

**Anmerkungen**

This is DeleteVehicle, a member of class DataClasses1DataContext.

### 1.1.14.3.55 DataClasses1DataContext.DeleteWebServiceLogin Methode

**C#**

```
private void DeleteWebServiceLogin(WebServiceLogin instance);
```

**Anmerkungen**

This is DeleteWebServiceLogin, a member of class DataClasses1DataContext.

### 1.1.14.3.56 DataClasses1DataContext.DeleteWebServiceLoginCustomer Methode

**C#**

```
private void DeleteWebServiceLoginCustomer(WebServiceLoginCustomer instance);
```

**Anmerkungen**

This is DeleteWebServiceLoginCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.57 DataClasses1DataContext.GetLogItem Methode

Erstellt einen neuen Logeintrag.

**C#**

```
internal Systemlog GetLogItem(string logText, LogTypes type, Guid? referenceId, string  
tableName, string propertyName, Guid? childReferenceId);
```

**Parameter**

Parameter	Beschreibung
string logText	Der Text des Logeintrags.
LogTypes type	Der Typ des Logeintrages.

Guid? referenceId	Id des betroffenen Datensatzes.
string tableName	Name der betroffenen Tabelle.
string propertyName	Name des betroffenen Properties.
Guid? childReferenceId	Id des betroffenen untergeordneten Datensatzes.

**Resultate**

Den Logeintrag.

**1.1.14.3.58 DataClasses1DataContext.InsertAccounts Methode****C#**

```
private void InsertAccounts(Accounts instance);
```

**Anmerkungen**

This is InsertAccounts, a member of class DataClasses1DataContext.

**1.1.14.3.59 DataClasses1DataContext.InsertAdress Methode****C#**

```
private void InsertAdress(Adress instance);
```

**Anmerkungen**

This is InsertAdress, a member of class DataClasses1DataContext.

**1.1.14.3.60 DataClasses1DataContext.InsertBankAccount Methode****C#**

```
private void InsertBankAccount(BankAccount instance);
```

**Anmerkungen**

This is InsertBankAccount, a member of class DataClasses1DataContext.

**1.1.14.3.61 DataClasses1DataContext.InsertCarOwner Methode****C#**

```
private void InsertCarOwner(CarOwner instance);
```

**Anmerkungen**

This is InsertCarOwner, a member of class DataClasses1DataContext.

**1.1.14.3.62 DataClasses1DataContext.InsertChangeLogColumnNames Methode****C#**

```
private void InsertChangeLogColumnNames(ChangeLogColumnNames instance);
```

**Anmerkungen**

This is InsertChangeLogColumnNames, a member of class DataClasses1DataContext.

**1.1.14.3.63 DataClasses1DataContext.InsertContact Methode****C#**

```
private void InsertContact(Contact instance);
```

**Anmerkungen**

This is InsertContact, a member of class DataClasses1DataContext.

**1.1.14.3.64 DataClasses1DataContext.InsertCostCenter Methode****C#**

```
private void InsertCostCenter(CostCenter instance);
```

**Anmerkungen**

This is InsertCostCenter, a member of class DataClasses1DataContext.

**1.1.14.3.65 DataClasses1DataContext.InsertCustomer Methode****C#**

```
private void InsertCustomer(Customer instance);
```

**Anmerkungen**

This is InsertCustomer, a member of class DataClasses1DataContext.

**1.1.14.3.66 DataClasses1DataContext.InsertCustomerProduct Methode****C#**

```
private void InsertCustomerProduct(CustomerProduct instance);
```

**Anmerkungen**

This is InsertCustomerProduct, a member of class DataClasses1DataContext.

**1.1.14.3.67 DataClasses1DataContext.InsertDeregistrationOrder Methode****C#**

```
private void InsertDeregistrationOrder(DeregistrationOrder instance);
```

**Anmerkungen**

This is InsertDeregistrationOrder, a member of class DataClasses1DataContext.

**1.1.14.3.68 DataClasses1DataContext.InsertDocketList Methode****C#**

```
private void InsertDocketList(DocketList instance);
```

**Anmerkungen**

This is InsertDocketList, a member of class DataClasses1DataContext.

**1.1.14.3.69 DataClasses1DataContext.InsertDocument Methode****C#**

```
private void InsertDocument(Document instance);
```

**Anmerkungen**

This is InsertDocument, a member of class DataClasses1DataContext.

### 1.1.14.3.70 DataClasses1DataContext.InsertDocumentConfiguration Methode

**C#**

```
private void InsertDocumentConfiguration(DocumentConfiguration instance);
```

**Anmerkungen**

This is InsertDocumentConfiguration, a member of class DataClasses1DataContext.

### 1.1.14.3.71 DataClasses1DataContext.InsertDocumentType Methode

**C#**

```
private void InsertDocumentType(DocumentType instance);
```

**Anmerkungen**

This is InsertDocumentType, a member of class DataClasses1DataContext.

### 1.1.14.3.72 DataClasses1DataContext.InsertInvoice Methode

**C#**

```
private void InsertInvoice(Invoice instance);
```

**Anmerkungen**

This is InsertInvoice, a member of class DataClasses1DataContext.

### 1.1.14.3.73 DataClasses1DataContext.InsertInvoiceItem Methode

**C#**

```
private void InsertInvoiceItem(InvoiceItem instance);
```

**Anmerkungen**

This is InsertInvoiceItem, a member of class DataClasses1DataContext.

### 1.1.14.3.74 DataClasses1DataContext.InsertInvoiceItemAccountItem Methode

**C#**

```
private void InsertInvoiceItemAccountItem(InvoiceItemAccountItem instance);
```

**Anmerkungen**

This is InsertInvoiceItemAccountItem, a member of class DataClasses1DataContext.

### 1.1.14.3.75 DataClasses1DataContext.InsertInvoiceNumber Methode

**C#**

```
private void InsertInvoiceNumber(InvoiceNumber instance);
```

**Anmerkungen**

This is InsertInvoiceNumber, a member of class DataClasses1DataContext.

### 1.1.14.3.76 DataClasses1DataContext.InsertInvoiceRunReport Methode

**C#**

```
private void InsertInvoiceRunReport(InvoiceRunReport instance);
```

**Anmerkungen**

This is InsertInvoiceRunReport, a member of class DataClasses1DataContext.

### 1.1.14.3.77 DataClasses1DataContext.InsertInvoiceTypes Methode

**C#**

```
private void InsertInvoiceTypes(InvoiceTypes instance);
```

**Anmerkungen**

This is InsertInvoiceTypes, a member of class DataClasses1DataContext.

### 1.1.14.3.78 DataClasses1DataContext.InsertLargeCustomer Methode

**C#**

```
private void InsertLargeCustomer(LargeCustomer instance);
```

**Anmerkungen**

This is InsertLargeCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.79 DataClasses1DataContext.InsertLargeCustomerRequiredField Methode

**C#**

```
private void InsertLargeCustomerRequiredField(LargeCustomerRequiredField instance);
```

**Anmerkungen**

This is InsertLargeCustomerRequiredField, a member of class DataClasses1DataContext.

### 1.1.14.3.80 DataClasses1DataContext.InsertLocation Methode

**C#**

```
private void InsertLocation(Location instance);
```

**Anmerkungen**

This is InsertLocation, a member of class DataClasses1DataContext.

### 1.1.14.3.81 DataClasses1DataContext.InsertLogType Methode

**C#**

```
private void InsertLogType(LogType instance);
```

**Anmerkungen**

This is InsertLogType, a member of class DataClasses1DataContext.

### 1.1.14.3.82 DataClasses1DataContext.InsertMailinglist Methode

**C#**

```
private void InsertMailinglist(Mailinglist instance);
```

**Anmerkungen**

This is InsertMailinglist, a member of class DataClasses1DataContext.

### 1.1.14.3.83 DataClasses1DataContext.InsertMailinglistType Methode

**C#**

```
private void InsertMailinglistType(MailinglistType instance);
```

**Anmerkungen**

This is InsertMailinglistType, a member of class DataClasses1DataContext.

### 1.1.14.3.84 DataClasses1DataContext.InsertMake Methode

**C#**

```
private void InsertMake(Make instance);
```

**Anmerkungen**

This is InsertMake, a member of class DataClasses1DataContext.

### 1.1.14.3.85 DataClasses1DataContext.InsertOrder Methode

**C#**

```
private void InsertOrder(Order instance);
```

**Anmerkungen**

This is InsertOrder, a member of class DataClasses1DataContext.

### 1.1.14.3.86 DataClasses1DataContext.InsertOrderInvoice Methode

**C#**

```
private void InsertOrderInvoice(OrderInvoice instance);
```

**Anmerkungen**

This is InsertOrderInvoice, a member of class DataClasses1DataContext.

### 1.1.14.3.87 DataClasses1DataContext.InsertOrderItem Methode

**C#**

```
private void InsertOrderItem(OrderItem instance);
```

**Anmerkungen**

This is InsertOrderItem, a member of class DataClasses1DataContext.

### 1.1.14.3.88 DataClasses1DataContext.InsertOrderItemStatus Methode

**C#**

```
private void InsertOrderItemStatus(OrderItemStatus instance);
```

**Anmerkungen**

This is InsertOrderItemStatus, a member of class DataClasses1DataContext.

**1.1.14.3.89 DataClasses1DataContext.InsertOrderStatus Methode****C#**

```
private void InsertOrderStatus(OrderStatus instance);
```

**Anmerkungen**

This is InsertOrderStatus, a member of class DataClasses1DataContext.

**1.1.14.3.90 DataClasses1DataContext.InsertOrderType Methode****C#**

```
private void InsertOrderType(OrderType instance);
```

**Anmerkungen**

This is InsertOrderType, a member of class DataClasses1DataContext.

**1.1.14.3.91 DataClasses1DataContext.InsertPackingList Methode****C#**

```
private void InsertPackingList(PackingList instance);
```

**Anmerkungen**

This is InsertPackingList, a member of class DataClasses1DataContext.

**1.1.14.3.92 DataClasses1DataContext.InsertPermission Methode****C#**

```
private void InsertPermission(Permission instance);
```

**Anmerkungen**

This is InsertPermission, a member of class DataClasses1DataContext.

**1.1.14.3.93 DataClasses1DataContext.InsertPermissionProfile Methode****C#**

```
private void InsertPermissionProfile(PermissionProfile instance);
```

**Anmerkungen**

This is InsertPermissionProfile, a member of class DataClasses1DataContext.

**1.1.14.3.94 DataClasses1DataContext.InsertPermissionProfilePermission Methode****C#**

```
private void InsertPermissionProfilePermission(PermissionProfilePermission instance);
```

**Anmerkungen**

This is InsertPermissionProfilePermission, a member of class DataClasses1DataContext.

### 1.1.14.3.95 DataClasses1DataContext.InsertPerson Methode

**C#**

```
private void InsertPerson(Person instance);
```

**Anmerkungen**

This is InsertPerson, a member of class DataClasses1DataContext.

### 1.1.14.3.96 DataClasses1DataContext.InsertPrice Methode

**C#**

```
private void InsertPrice(Price instance);
```

**Anmerkungen**

This is InsertPrice, a member of class DataClasses1DataContext.

### 1.1.14.3.97 DataClasses1DataContext.InsertPriceAccount Methode

**C#**

```
private void InsertPriceAccount(PriceAccount instance);
```

**Anmerkungen**

This is InsertPriceAccount, a member of class DataClasses1DataContext.

### 1.1.14.3.98 DataClasses1DataContext.InsertProduct Methode

**C#**

```
private void InsertProduct(Product instance);
```

**Anmerkungen**

This is InsertProduct, a member of class DataClasses1DataContext.

### 1.1.14.3.99 DataClasses1DataContext.InsertProductCategory Methode

**C#**

```
private void InsertProductCategory(ProductCategory instance);
```

**Anmerkungen**

This is InsertProductCategory, a member of class DataClasses1DataContext.

### 1.1.14.3.100 DataClasses1DataContext.InsertRegistration Methode

**C#**

```
private void InsertRegistration(Registration instance);
```

**Anmerkungen**

This is InsertRegistration, a member of class DataClasses1DataContext.

### 1.1.14.3.101 DataClasses1DataContext.InsertRegistrationLocation Methode

**C#**

```
private void InsertRegistrationLocation(RegistrationLocation instance);
```

**Anmerkungen**

This is InsertRegistrationLocation, a member of class DataClasses1DataContext.

**1.1.14.3.102 DataClasses1DataContext.InsertRegistrationOrder Methode****C#**

```
private void InsertRegistrationOrder(RegistrationOrder instance);
```

**Anmerkungen**

This is InsertRegistrationOrder, a member of class DataClasses1DataContext.

**1.1.14.3.103 DataClasses1DataContext.InsertRegistrationOrderType Methode****C#**

```
private void InsertRegistrationOrderType(RegistrationOrderType instance);
```

**Anmerkungen**

This is InsertRegistrationOrderType, a member of class DataClasses1DataContext.

**1.1.14.3.104 DataClasses1DataContext.InsertRequiredField Methode****C#**

```
private void InsertRequiredField(RequiredField instance);
```

**Anmerkungen**

This is InsertRequiredField, a member of class DataClasses1DataContext.

**1.1.14.3.105 DataClasses1DataContext.InsertRequiredFieldTranslation Methode****C#**

```
private void InsertRequiredFieldTranslation(RequiredFieldTranslation instance);
```

**Anmerkungen**

This is InsertRequiredFieldTranslation, a member of class DataClasses1DataContext.

**1.1.14.3.106 DataClasses1DataContext.InsertSmallCustomer Methode****C#**

```
private void InsertSmallCustomer(SmallCustomer instance);
```

**Anmerkungen**

This is InsertSmallCustomer, a member of class DataClasses1DataContext.

**1.1.14.3.107 DataClasses1DataContext.InsertSystemlog Methode****C#**

```
private void InsertSystemlog(Systemlog instance);
```

**Anmerkungen**

This is InsertSystemlog, a member of class DataClasses1DataContext.

### 1.1.14.3.108 DataClasses1DataContext.InsertUser Methode

**C#**

```
private void InsertUser(User instance);
```

**Anmerkungen**

This is InsertUser, a member of class DataClasses1DataContext.

### 1.1.14.3.109 DataClasses1DataContext.InsertUserPermission Methode

**C#**

```
private void InsertUserPermission(UserPermission instance);
```

**Anmerkungen**

This is InsertUserPermission, a member of class DataClasses1DataContext.

### 1.1.14.3.110 DataClasses1DataContext.InsertUserPermissionProfile Methode

**C#**

```
private void InsertUserPermissionProfile(UserPermissionProfile instance);
```

**Anmerkungen**

This is InsertUserPermissionProfile, a member of class DataClasses1DataContext.

### 1.1.14.3.111 DataClasses1DataContext.InsertVehicle Methode

**C#**

```
private void InsertVehicle(Vehicle instance);
```

**Anmerkungen**

This is InsertVehicle, a member of class DataClasses1DataContext.

### 1.1.14.3.112 DataClasses1DataContext.InsertWebServiceLogin Methode

**C#**

```
private void InsertWebServiceLogin(WebServiceLogin instance);
```

**Anmerkungen**

This is InsertWebServiceLogin, a member of class DataClasses1DataContext.

### 1.1.14.3.113 DataClasses1DataContext.InsertWebServiceLoginCustomer Methode

**C#**

```
private void InsertWebServiceLoginCustomer(WebServiceLoginCustomer instance);
```

**Anmerkungen**

This is InsertWebServiceLoginCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.114 DataClasses1DataContext.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class DataClasses1DataContext.

### 1.1.14.3.115 DataClasses1DataContext.UpdateAccounts Methode

**C#**

```
private void UpdateAccounts(Accounts instance);
```

**Anmerkungen**

This is UpdateAccounts, a member of class DataClasses1DataContext.

### 1.1.14.3.116 DataClasses1DataContext.UpdateAdress Methode

**C#**

```
private void UpdateAdress(Adress instance);
```

**Anmerkungen**

This is UpdateAdress, a member of class DataClasses1DataContext.

### 1.1.14.3.117 DataClasses1DataContext.UpdateBankAccount Methode

**C#**

```
private void UpdateBankAccount(BankAccount instance);
```

**Anmerkungen**

This is UpdateBankAccount, a member of class DataClasses1DataContext.

### 1.1.14.3.118 DataClasses1DataContext.UpdateCarOwner Methode

**C#**

```
private void UpdateCarOwner(CarOwner instance);
```

**Anmerkungen**

This is UpdateCarOwner, a member of class DataClasses1DataContext.

### 1.1.14.3.119 DataClasses1DataContext.UpdateChangeLogColumnNames Methode

**C#**

```
private void UpdateChangeLogColumnNames(ChangeLogColumnNames instance);
```

**Anmerkungen**

This is UpdateChangeLogColumnNames, a member of class DataClasses1DataContext.

### 1.1.14.3.120 DataClasses1DataContext.UpdateContact Methode

**C#**

```
private void UpdateContact(Contact instance);
```

**Anmerkungen**

This is UpdateContact, a member of class DataClasses1DataContext.

### 1.1.14.3.121 DataClasses1DataContext.UpdateCostCenter Methode

**C#**

```
private void UpdateCostCenter(CostCenter instance);
```

**Anmerkungen**

This is UpdateCostCenter, a member of class DataClasses1DataContext.

### 1.1.14.3.122 DataClasses1DataContext.UpdateCustomer Methode

**C#**

```
private void UpdateCustomer(Customer instance);
```

**Anmerkungen**

This is UpdateCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.123 DataClasses1DataContext.UpdateCustomerProduct Methode

**C#**

```
private void UpdateCustomerProduct(CustomerProduct instance);
```

**Anmerkungen**

This is UpdateCustomerProduct, a member of class DataClasses1DataContext.

### 1.1.14.3.124 DataClasses1DataContext.UpdateDeregistrationOrder Methode

**C#**

```
private void UpdateDeregistrationOrder(DeregistrationOrder instance);
```

**Anmerkungen**

This is UpdateDeregistrationOrder, a member of class DataClasses1DataContext.

### 1.1.14.3.125 DataClasses1DataContext.UpdateDocketList Methode

**C#**

```
private void UpdateDocketList(DocketList instance);
```

**Anmerkungen**

This is UpdateDocketList, a member of class DataClasses1DataContext.

### 1.1.14.3.126 DataClasses1DataContext.UpdateDocument Methode

**C#**

```
private void UpdateDocument(Document instance);
```

**Anmerkungen**

This is UpdateDocument, a member of class DataClasses1DataContext.

**1.1.14.3.127 DataClasses1DataContext.UpdateDocumentConfiguration Methode****C#**

```
private void UpdateDocumentConfiguration(DocumentConfiguration instance);
```

**Anmerkungen**

This is UpdateDocumentConfiguration, a member of class DataClasses1DataContext.

**1.1.14.3.128 DataClasses1DataContext.UpdateDocumentType Methode****C#**

```
private void UpdateDocumentType(DocumentType instance);
```

**Anmerkungen**

This is UpdateDocumentType, a member of class DataClasses1DataContext.

**1.1.14.3.129 DataClasses1DataContext.UpdateInvoice Methode****C#**

```
private void UpdateInvoice(Invoice instance);
```

**Anmerkungen**

This is UpdateInvoice, a member of class DataClasses1DataContext.

**1.1.14.3.130 DataClasses1DataContext.UpdateInvoiceItem Methode****C#**

```
private void UpdateInvoiceItem(InvoiceItem instance);
```

**Anmerkungen**

This is UpdateInvoiceItem, a member of class DataClasses1DataContext.

**1.1.14.3.131 DataClasses1DataContext.UpdateInvoiceItemAccountItem Methode****C#**

```
private void UpdateInvoiceItemAccountItem(InvoiceItemAccountItem instance);
```

**Anmerkungen**

This is UpdateInvoiceItemAccountItem, a member of class DataClasses1DataContext.

**1.1.14.3.132 DataClasses1DataContext.UpdateInvoiceNumber Methode****C#**

```
private void UpdateInvoiceNumber(InvoiceNumber instance);
```

**Anmerkungen**

This is UpdateInvoiceNumber, a member of class DataClasses1DataContext.

### 1.1.14.3.133 DataClasses1DataContext.UpdateInvoiceRunReport Methode

**C#**

```
private void UpdateInvoiceRunReport(InvoiceRunReport instance);
```

**Anmerkungen**

This is UpdateInvoiceRunReport, a member of class DataClasses1DataContext.

### 1.1.14.3.134 DataClasses1DataContext.UpdateInvoiceTypes Methode

**C#**

```
private void UpdateInvoiceTypes(InvoiceTypes instance);
```

**Anmerkungen**

This is UpdateInvoiceTypes, a member of class DataClasses1DataContext.

### 1.1.14.3.135 DataClasses1DataContext.UpdateLargeCustomer Methode

**C#**

```
private void UpdateLargeCustomer(LargeCustomer instance);
```

**Anmerkungen**

This is UpdateLargeCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.136 DataClasses1DataContext.UpdateLargeCustomerRequiredField Methode

**C#**

```
private void UpdateLargeCustomerRequiredField(LargeCustomerRequiredField instance);
```

**Anmerkungen**

This is UpdateLargeCustomerRequiredField, a member of class DataClasses1DataContext.

### 1.1.14.3.137 DataClasses1DataContext.UpdateLocation Methode

**C#**

```
private void UpdateLocation(Location instance);
```

**Anmerkungen**

This is UpdateLocation, a member of class DataClasses1DataContext.

### 1.1.14.3.138 DataClasses1DataContext.UpdateLogType Methode

**C#**

```
private void UpdateLogType(LogType instance);
```

**Anmerkungen**

This is UpdateLogType, a member of class DataClasses1DataContext.

### 1.1.14.3.139 DataClasses1DataContext.UpdateMailinglist Methode

**C#**

```
private void UpdateMailinglist(Mailinglist instance);
```

**Anmerkungen**

This is UpdateMailinglist, a member of class DataClasses1DataContext.

### 1.1.14.3.140 DataClasses1DataContext.UpdateMailinglistType Methode

**C#**

```
private void UpdateMailinglistType(MailinglistType instance);
```

**Anmerkungen**

This is UpdateMailinglistType, a member of class DataClasses1DataContext.

### 1.1.14.3.141 DataClasses1DataContext.UpdateMake Methode

**C#**

```
private void UpdateMake(Make instance);
```

**Anmerkungen**

This is UpdateMake, a member of class DataClasses1DataContext.

### 1.1.14.3.142 DataClasses1DataContext.UpdateOrder Methode

**C#**

```
private void UpdateOrder(Order instance);
```

**Anmerkungen**

This is UpdateOrder, a member of class DataClasses1DataContext.

### 1.1.14.3.143 DataClasses1DataContext.UpdateOrderInvoice Methode

**C#**

```
private void UpdateOrderInvoice(OrderInvoice instance);
```

**Anmerkungen**

This is UpdateOrderInvoice, a member of class DataClasses1DataContext.

### 1.1.14.3.144 DataClasses1DataContext.UpdateOrderItem Methode

**C#**

```
private void UpdateOrderItem(OrderItem instance);
```

**Anmerkungen**

This is UpdateOrderItem, a member of class DataClasses1DataContext.

### 1.1.14.3.145 DataClasses1DataContext.UpdateOrderItemStatus Methode

**C#**

```
private void UpdateOrderItemStatus(OrderItemStatus instance);
```

**Anmerkungen**

This is UpdateOrderItemStatus, a member of class DataClasses1DataContext.

**1.1.14.3.146 DataClasses1DataContext.UpdateOrderStatus Methode****C#**

```
private void UpdateOrderStatus(OrderStatus instance);
```

**Anmerkungen**

This is UpdateOrderStatus, a member of class DataClasses1DataContext.

**1.1.14.3.147 DataClasses1DataContext.UpdateOrderType Methode****C#**

```
private void UpdateOrderType(OrderType instance);
```

**Anmerkungen**

This is UpdateOrderType, a member of class DataClasses1DataContext.

**1.1.14.3.148 DataClasses1DataContext.UpdatePackingList Methode****C#**

```
private void UpdatePackingList(PackingList instance);
```

**Anmerkungen**

This is UpdatePackingList, a member of class DataClasses1DataContext.

**1.1.14.3.149 DataClasses1DataContext.UpdatePermission Methode****C#**

```
private void UpdatePermission(Permission instance);
```

**Anmerkungen**

This is UpdatePermission, a member of class DataClasses1DataContext.

**1.1.14.3.150 DataClasses1DataContext.UpdatePermissionProfile Methode****C#**

```
private void UpdatePermissionProfile(PermissionProfile instance);
```

**Anmerkungen**

This is UpdatePermissionProfile, a member of class DataClasses1DataContext.

**1.1.14.3.151 DataClasses1DataContext.UpdatePermissionProfilePermission Methode****C#**

```
private void UpdatePermissionProfilePermission(PermissionProfilePermission instance);
```

**Anmerkungen**

This is UpdatePermissionProfilePermission, a member of class DataClasses1DataContext.

### 1.1.14.3.152 DataClasses1DataContext.UpdatePerson Methode

**C#**

```
private void UpdatePerson(Person instance);
```

**Anmerkungen**

This is UpdatePerson, a member of class DataClasses1DataContext.

### 1.1.14.3.153 DataClasses1DataContext.UpdatePrice Methode

**C#**

```
private void UpdatePrice(Price instance);
```

**Anmerkungen**

This is UpdatePrice, a member of class DataClasses1DataContext.

### 1.1.14.3.154 DataClasses1DataContext.UpdatePriceAccount Methode

**C#**

```
private void UpdatePriceAccount(PriceAccount instance);
```

**Anmerkungen**

This is UpdatePriceAccount, a member of class DataClasses1DataContext.

### 1.1.14.3.155 DataClasses1DataContext.UpdateProduct Methode

**C#**

```
private void UpdateProduct(Product instance);
```

**Anmerkungen**

This is UpdateProduct, a member of class DataClasses1DataContext.

### 1.1.14.3.156 DataClasses1DataContext.UpdateProductCategory Methode

**C#**

```
private void UpdateProductCategory(ProductCategory instance);
```

**Anmerkungen**

This is UpdateProductCategory, a member of class DataClasses1DataContext.

### 1.1.14.3.157 DataClasses1DataContext.UpdateRegistration Methode

**C#**

```
private void UpdateRegistration(Registration instance);
```

**Anmerkungen**

This is UpdateRegistration, a member of class DataClasses1DataContext.

### 1.1.14.3.158 DataClasses1DataContext.UpdateRegistrationLocation Methode

C#

```
private void UpdateRegistrationLocation(RegistrationLocation instance);
```

#### Anmerkungen

This is UpdateRegistrationLocation, a member of class DataClasses1DataContext.

### 1.1.14.3.159 DataClasses1DataContext.UpdateRegistrationOrder Methode

C#

```
private void UpdateRegistrationOrder(RegistrationOrder instance);
```

#### Anmerkungen

This is UpdateRegistrationOrder, a member of class DataClasses1DataContext.

### 1.1.14.3.160 DataClasses1DataContext.UpdateRegistrationOrderType Methode

C#

```
private void UpdateRegistrationOrderType(RegistrationOrderType instance);
```

#### Anmerkungen

This is UpdateRegistrationOrderType, a member of class DataClasses1DataContext.

### 1.1.14.3.161 DataClasses1DataContext.UpdateRequiredField Methode

C#

```
private void UpdateRequiredField(RequiredField instance);
```

#### Anmerkungen

This is UpdateRequiredField, a member of class DataClasses1DataContext.

### 1.1.14.3.162 DataClasses1DataContext.UpdateRequiredFieldTranslation Methode

C#

```
private void UpdateRequiredFieldTranslation(RequiredFieldTranslation instance);
```

#### Anmerkungen

This is UpdateRequiredFieldTranslation, a member of class DataClasses1DataContext.

### 1.1.14.3.163 DataClasses1DataContext.UpdateSmallCustomer Methode

C#

```
private void UpdateSmallCustomer(SmallCustomer instance);
```

#### Anmerkungen

This is UpdateSmallCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.164 DataClasses1DataContext.UpdateSystemlog Methode

**C#**

```
private void UpdateSystemlog(Systemlog instance);
```

**Anmerkungen**

This is UpdateSystemlog, a member of class DataClasses1DataContext.

### 1.1.14.3.165 DataClasses1DataContext.UpdateUser Methode

**C#**

```
private void UpdateUser(User instance);
```

**Anmerkungen**

This is UpdateUser, a member of class DataClasses1DataContext.

### 1.1.14.3.166 DataClasses1DataContext.UpdateUserPermission Methode

**C#**

```
private void UpdateUserPermission(UserPermission instance);
```

**Anmerkungen**

This is UpdateUserPermission, a member of class DataClasses1DataContext.

### 1.1.14.3.167 DataClasses1DataContext.UpdateUserPermissionProfile Methode

**C#**

```
private void UpdateUserPermissionProfile(UserPermissionProfile instance);
```

**Anmerkungen**

This is UpdateUserPermissionProfile, a member of class DataClasses1DataContext.

### 1.1.14.3.168 DataClasses1DataContext.UpdateVehicle Methode

**C#**

```
private void UpdateVehicle(Vehicle instance);
```

**Anmerkungen**

This is UpdateVehicle, a member of class DataClasses1DataContext.

### 1.1.14.3.169 DataClasses1DataContext.UpdateWebServiceLogin Methode

**C#**

```
private void UpdateWebServiceLogin(WebServiceLogin instance);
```

**Anmerkungen**

This is UpdateWebServiceLogin, a member of class DataClasses1DataContext.

### 1.1.14.3.170 DataClasses1DataContext.UpdateWebServiceLoginCustomer Methode

**C#**

```
private void UpdateWebServiceLoginCustomer(WebServiceLoginCustomer instance);
```

#### Anmerkungen

This is UpdateWebServiceLoginCustomer, a member of class DataClasses1DataContext.

### 1.1.14.3.171 WriteLogItem Methode

#### 1.1.14.3.171.1 DataClasses1DataContext.WriteLogItem Methode (string, LogTypes)

Fügt dem Datenbankkontext einen Logeintrag hinzu.

**C#**

```
public void WriteLogItem(string logText, LogTypes type);
```

#### Parameter

Parameter	Beschreibung
string logText	Text für den Logeintrag.
LogTypes type	Typ des Logeintrages.

#### 1.1.14.3.171.2 DataClasses1DataContext.WriteLogItem Methode (string, LogTypes, Guid, string)

Fügt dem Datenbankkontext einen Logeintrag hinzu.

**C#**

```
public void WriteLogItem(string logText, LogTypes type, Guid referenceId, string tableName);
```

#### Parameter

Parameter	Beschreibung
string logText	Text für den Logeintrag.
LogTypes type	Typ des Logeintrages.
Guid referenceId	Id des betroffenen Datensatzes.
string tableName	Tabellenname des betroffenen Datensatzes.

#### 1.1.14.3.171.3 DataClasses1DataContext.WriteLogItem Methode (string, LogTypes, Guid, string, Guid)

Fügt dem Datenbankkontext einen Logeintrag hinzu.

**C#**

```
public void WriteLogItem(string logText, LogTypes type, Guid referenceId, string tableName, Guid childReferenceId);
```

#### Parameter

Parameter	Beschreibung
string logText	Text für den Logeintrag.
LogTypes type	Typ des Logeintrages.
Guid referenceId	Id des betroffenen Datensatzes.
string tableName	Tabellenname des betroffenen Datensatzes.
Guid childReferenceId	Id des untergeordneten Datensatzes.

### 1.1.14.3.171.4 DataClasses1DataContext.WriteLogItem Methode (string, LogTypes, Guid, string, string)

Fügt dem Datenbankkontext einen Logeintrag hinzu.

**C#**

```
public void WriteLogItem(string logText, LogTypes type, Guid referenceId, string tableName, string propertyName);
```

**Parameter**

Parameter	Beschreibung
string logText	Text für den Logeintrag.
LogTypes type	Typ des Logeintrages.
Guid referenceId	Id des betroffenen Datensatzes.
string tableName	Tabellenname des betroffenen Datensatzes.
string propertyName	Name des betroffenen Feldes des Datensatzes.

### 1.1.14.3.171.5 DataClasses1DataContext.WriteLogItem Methode (string, LogTypes, Guid, string, string, Guid)

Fügt dem Datenbankkontext einen Logeintrag hinzu.

**C#**

```
public void WriteLogItem(string logText, LogTypes type, Guid referenceId, string tableName, string propertyName, Guid childReferenceId);
```

**Parameter**

Parameter	Beschreibung
string logText	Text für den Logeintrag.
LogTypes type	Typ des Logeintrages.
Guid referenceId	Id des betroffenen Datensatzes.
string tableName	Tabellenname des betroffenen Datensatzes.
string propertyName	Name des betroffenen Feldes des Datensatzes.
Guid childReferenceId	Id des untergeordneten Datensatzes.

### 1.1.14.3.171.6 DataClasses1DataContext.WriteLogItem Methode (string, LogTypes, string)

Fügt dem Datenbankkontext einen Logeintrag hinzu.

**C#**

```
public void WriteLogItem(string logText, LogTypes type, string tableName);
```

**Parameter**

Parameter	Beschreibung
string logText	Text für den Logeintrag.
LogTypes type	Typ des Logeintrages.
string tableName	Tabellenname des betroffenen Datensatzes.

## 1.1.14.4 DataClasses1DataContext Eigenschaften

### 1.1.14.4.1 DataClasses1DataContext.Accounts Eigenschaft

**C#**

```
public System.Data.Linq.Table<Accounts> Accounts;
```

**Anmerkungen**

This is Accounts, a member of class DataClasses1DataContext.

**1.1.14.4.2 DataClasses1DataContext.Adress Eigenschaft****C#**

```
public System.Data.Linq.Table<Adress> Adress;
```

**Anmerkungen**

This is Adress, a member of class DataClasses1DataContext.

**1.1.14.4.3 DataClasses1DataContext.AuthorativeChargeAccounts Eigenschaft****C#**

```
public System.Data.Linq.Table<AuthorativeChargeAccounts> AuthorativeChargeAccounts;
```

**Anmerkungen**

This is AuthorativeChargeAccounts, a member of class DataClasses1DataContext.

**1.1.14.4.4 DataClasses1DataContext.BankAccount Eigenschaft****C#**

```
public System.Data.Linq.Table<BankAccount> BankAccount;
```

**Anmerkungen**

This is BankAccount, a member of class DataClasses1DataContext.

**1.1.14.4.5 DataClasses1DataContext.BIC\_DE Eigenschaft****C#**

```
public System.Data.Linq.Table<BIC_DE> BIC_DE;
```

**Anmerkungen**

This is BIC\_DE, a member of class DataClasses1DataContext.

**1.1.14.4.6 DataClasses1DataContext.CarOwner Eigenschaft****C#**

```
public System.Data.Linq.Table<CarOwner> CarOwner;
```

**Anmerkungen**

This is CarOwner, a member of class DataClasses1DataContext.

**1.1.14.4.7 DataClasses1DataContext.ChangeLog Eigenschaft****C#**

```
public System.Data.Linq.Table<ChangeLog> ChangeLog;
```

**Anmerkungen**

This is ChangeLog, a member of class DataClasses1DataContext.

#### 1.1.14.4.8 DataClasses1DataContext.ChangeLogColumnNames Eigenschaft

**C#**

```
public System.Data.Linq.Table<ChangeLogColumnNames> ChangeLogColumnNames;
```

**Anmerkungen**

This is ChangeLogColumnNames, a member of class DataClasses1DataContext.

#### 1.1.14.4.9 DataClasses1DataContext.Contact Eigenschaft

**C#**

```
public System.Data.Linq.Table<Contact> Contact;
```

**Anmerkungen**

This is Contact, a member of class DataClasses1DataContext.

#### 1.1.14.4.10 DataClasses1DataContext.CostCenter Eigenschaft

**C#**

```
public System.Data.Linq.Table<CostCenter> CostCenter;
```

**Anmerkungen**

This is CostCenter, a member of class DataClasses1DataContext.

#### 1.1.14.4.11 DataClasses1DataContext.Customer Eigenschaft

**C#**

```
public System.Data.Linq.Table<Customer> Customer;
```

**Anmerkungen**

This is Customer, a member of class DataClasses1DataContext.

#### 1.1.14.4.12 DataClasses1DataContext.CustomerProduct Eigenschaft

**C#**

```
public System.Data.Linq.Table<CustomerProduct> CustomerProduct;
```

**Anmerkungen**

This is CustomerProduct, a member of class DataClasses1DataContext.

#### 1.1.14.4.13 DataClasses1DataContext.DeregistrationOrder Eigenschaft

**C#**

```
public System.Data.Linq.Table<DeregistrationOrder> DeregistrationOrder;
```

**Anmerkungen**

This is DeregistrationOrder, a member of class DataClasses1DataContext.

#### 1.1.14.4.14 DataClasses1DataContext.DocketList Eigenschaft

**C#**

```
public System.Data.Linq.Table<DocketList> DocketList;
```

**Anmerkungen**

This is DocketList, a member of class DataClasses1DataContext.

**1.1.14.4.15 DataClasses1DataContext.Document Eigenschaft****C#**

```
public System.Data.Linq.Table<Document> Document;
```

**Anmerkungen**

This is Document, a member of class DataClasses1DataContext.

**1.1.14.4.16 DataClasses1DataContext.DocumentConfiguration Eigenschaft****C#**

```
public System.Data.Linq.Table<DocumentConfiguration> DocumentConfiguration;
```

**Anmerkungen**

This is DocumentConfiguration, a member of class DataClasses1DataContext.

**1.1.14.4.17 DataClasses1DataContext.DocumentType Eigenschaft****C#**

```
public System.Data.Linq.Table<DocumentType> DocumentType;
```

**Anmerkungen**

This is DocumentType, a member of class DataClasses1DataContext.

**1.1.14.4.18 DataClasses1DataContext.Invoice Eigenschaft****C#**

```
public System.Data.Linq.Table<Invoice> Invoice;
```

**Anmerkungen**

This is Invoice, a member of class DataClasses1DataContext.

**1.1.14.4.19 DataClasses1DataContext.InvoiceIDInvoiceRunID Eigenschaft****C#**

```
public System.Data.Linq.Table<InvoiceIDInvoiceRunID> InvoiceIDInvoiceRunID;
```

**Anmerkungen**

This is InvoiceIDInvoiceRunID, a member of class DataClasses1DataContext.

**1.1.14.4.20 DataClasses1DataContext.InvoiceItem Eigenschaft****C#**

```
public System.Data.Linq.Table<InvoiceItem> InvoiceItem;
```

**Anmerkungen**

This is InvoiceItem, a member of class DataClasses1DataContext.

#### 1.1.14.4.21 DataClasses1DataContext.InvoiceItemAccountItem Eigenschaft

**C#**

```
public System.Data.Linq.Table<InvoiceItemAccountItem> InvoiceItemAccountItem;
```

**Anmerkungen**

This is InvoiceItemAccountItem, a member of class DataClasses1DataContext.

#### 1.1.14.4.22 DataClasses1DataContext.InvoiceNumber Eigenschaft

**C#**

```
public System.Data.Linq.Table<InvoiceNumber> InvoiceNumber;
```

**Anmerkungen**

This is InvoiceNumber, a member of class DataClasses1DataContext.

#### 1.1.14.4.23 DataClasses1DataContext.InvoiceRunReport Eigenschaft

**C#**

```
public System.Data.Linq.Table<InvoiceRunReport> InvoiceRunReport;
```

**Anmerkungen**

This is InvoiceRunReport, a member of class DataClasses1DataContext.

#### 1.1.14.4.24 DataClasses1DataContext.InvoiceTypes Eigenschaft

**C#**

```
public System.Data.Linq.Table<InvoiceTypes> InvoiceTypes;
```

**Anmerkungen**

This is InvoiceTypes, a member of class DataClasses1DataContext.

#### 1.1.14.4.25 DataClasses1DataContext.LargeCustomer Eigenschaft

**C#**

```
public System.Data.Linq.Table<LargeCustomer> LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class DataClasses1DataContext.

#### 1.1.14.4.26 DataClasses1DataContext.LargeCustomerRequiredField Eigenschaft

**C#**

```
public System.Data.Linq.Table<LargeCustomerRequiredField> LargeCustomerRequiredField;
```

**Anmerkungen**

This is LargeCustomerRequiredField, a member of class DataClasses1DataContext.

#### 1.1.14.4.27 DataClasses1DataContext.Location Eigenschaft

**C#**

```
public System.Data.Linq.Table<Location> Location;
```

**Anmerkungen**

This is Location, a member of class DataClasses1DataContext.

#### 1.1.14.4.28 DataClasses1DataContext.LogType Eigenschaft

**C#**

```
public System.Data.Linq.Table<LogType> LogType;
```

**Anmerkungen**

This is LogType, a member of class DataClasses1DataContext.

#### 1.1.14.4.29 DataClasses1DataContext.LogUserId Eigenschaft

**C#**

```
internal Guid? LogUserId;
```

**Anmerkungen**

This is LogUserId, a member of class DataClasses1DataContext.

#### 1.1.14.4.30 DataClasses1DataContext.Mailinglist Eigenschaft

**C#**

```
public System.Data.Linq.Table<Mailinglist> Mailinglist;
```

**Anmerkungen**

This is Mailinglist, a member of class DataClasses1DataContext.

#### 1.1.14.4.31 DataClasses1DataContext.MailinglistType Eigenschaft

**C#**

```
public System.Data.Linq.Table<MailinglistType> MailinglistType;
```

**Anmerkungen**

This is MailinglistType, a member of class DataClasses1DataContext.

#### 1.1.14.4.32 DataClasses1DataContext.Make Eigenschaft

**C#**

```
public System.Data.Linq.Table<Make> Make;
```

**Anmerkungen**

This is Make, a member of class DataClasses1DataContext.

#### 1.1.14.4.33 DataClasses1DataContext.Order Eigenschaft

**C#**

```
public System.Data.Linq.Table<Order> Order;
```

**Anmerkungen**

This is Order, a member of class DataClasses1DataContext.

**1.1.14.4.34 DataClasses1DataContext.OrderInvoice Eigenschaft****C#**

```
public System.Data.Linq.Table<OrderInvoice> OrderInvoice;
```

**Anmerkungen**

This is OrderInvoice, a member of class DataClasses1DataContext.

**1.1.14.4.35 DataClasses1DataContext.OrderItem Eigenschaft****C#**

```
public System.Data.Linq.Table<OrderItem> OrderItem;
```

**Anmerkungen**

This is OrderItem, a member of class DataClasses1DataContext.

**1.1.14.4.36 DataClasses1DataContext.OrderItemStatus Eigenschaft****C#**

```
public System.Data.Linq.Table<OrderItemStatus> OrderItemStatus;
```

**Anmerkungen**

This is OrderItemStatus, a member of class DataClasses1DataContext.

**1.1.14.4.37 DataClasses1DataContext.OrderStatus Eigenschaft****C#**

```
public System.Data.Linq.Table<OrderStatus> OrderStatus;
```

**Anmerkungen**

This is OrderStatus, a member of class DataClasses1DataContext.

**1.1.14.4.38 DataClasses1DataContext.OrderType Eigenschaft****C#**

```
public System.Data.Linq.Table<OrderType> OrderType;
```

**Anmerkungen**

This is OrderType, a member of class DataClasses1DataContext.

**1.1.14.4.39 DataClasses1DataContext.PackingList Eigenschaft****C#**

```
public System.Data.Linq.Table<PackingList> PackingList;
```

**Anmerkungen**

This is PackingList, a member of class DataClasses1DataContext.

#### 1.1.14.4.40 DataClasses1DataContext.PathPosition Eigenschaft

**C#**

```
public System.Data.Linq.Table<PathPosition> PathPosition;
```

**Anmerkungen**

This is PathPosition, a member of class DataClasses1DataContext.

#### 1.1.14.4.41 DataClasses1DataContext.Permission Eigenschaft

**C#**

```
public System.Data.Linq.Table<Permission> Permission;
```

**Anmerkungen**

This is Permission, a member of class DataClasses1DataContext.

#### 1.1.14.4.42 DataClasses1DataContext.PermissionProfile Eigenschaft

**C#**

```
public System.Data.Linq.Table<PermissionProfile> PermissionProfile;
```

**Anmerkungen**

This is PermissionProfile, a member of class DataClasses1DataContext.

#### 1.1.14.4.43 DataClasses1DataContext.PermissionProfilePermission Eigenschaft

**C#**

```
public System.Data.Linq.Table<PermissionProfilePermission> PermissionProfilePermission;
```

**Anmerkungen**

This is PermissionProfilePermission, a member of class DataClasses1DataContext.

#### 1.1.14.4.44 DataClasses1DataContext.Person Eigenschaft

**C#**

```
public System.Data.Linq.Table<Person> Person;
```

**Anmerkungen**

This is Person, a member of class DataClasses1DataContext.

#### 1.1.14.4.45 DataClasses1DataContext.Price Eigenschaft

**C#**

```
public System.Data.Linq.Table<Price> Price;
```

**Anmerkungen**

This is Price, a member of class DataClasses1DataContext.

#### 1.1.14.4.46 DataClasses1DataContext.PriceAccount Eigenschaft

**C#**

```
public System.Data.Linq.Table<PriceAccount> PriceAccount;
```

**Anmerkungen**

This is PriceAccount, a member of class DataClasses1DataContext.

#### 1.1.14.4.47 DataClasses1DataContext.Product Eigenschaft

**C#**

```
public System.Data.Linq.Table<Product> Product;
```

**Anmerkungen**

This is Product, a member of class DataClasses1DataContext.

#### 1.1.14.4.48 DataClasses1DataContext.ProductCategory Eigenschaft

**C#**

```
public System.Data.Linq.Table<ProductCategory> ProductCategory;
```

**Anmerkungen**

This is ProductCategory, a member of class DataClasses1DataContext.

#### 1.1.14.4.49 DataClasses1DataContext.Registration Eigenschaft

**C#**

```
public System.Data.Linq.Table<Registration> Registration;
```

**Anmerkungen**

This is Registration, a member of class DataClasses1DataContext.

#### 1.1.14.4.50 DataClasses1DataContext.RegistrationLocation Eigenschaft

**C#**

```
public System.Data.Linq.Table<RegistrationLocation> RegistrationLocation;
```

**Anmerkungen**

This is RegistrationLocation, a member of class DataClasses1DataContext.

#### 1.1.14.4.51 DataClasses1DataContext.RegistrationOrder Eigenschaft

**C#**

```
public System.Data.Linq.Table<RegistrationOrder> RegistrationOrder;
```

**Anmerkungen**

This is RegistrationOrder, a member of class DataClasses1DataContext.

#### 1.1.14.4.52 DataClasses1DataContext.RegistrationOrderType Eigenschaft

**C#**

```
public System.Data.Linq.Table<RegistrationOrderType> RegistrationOrderType;
```

**Anmerkungen**

This is RegistrationOrderType, a member of class DataClasses1DataContext.

**1.1.14.4.53 DataClasses1DataContext.RequiredField Eigenschaft****C#**

```
public System.Data.Linq.Table<RequiredField> RequiredField;
```

**Anmerkungen**

This is RequiredField, a member of class DataClasses1DataContext.

**1.1.14.4.54 DataClasses1DataContext.RequiredFieldTranslation Eigenschaft****C#**

```
public System.Data.Linq.Table<RequiredFieldTranslation> RequiredFieldTranslation;
```

**Anmerkungen**

This is RequiredFieldTranslation, a member of class DataClasses1DataContext.

**1.1.14.4.55 DataClasses1DataContext.SmallCustomer Eigenschaft****C#**

```
public System.Data.Linq.Table<SmallCustomer> SmallCustomer;
```

**Anmerkungen**

This is SmallCustomer, a member of class DataClasses1DataContext.

**1.1.14.4.56 DataClasses1DataContext.Systemlog Eigenschaft****C#**

```
public System.Data.Linq.Table<Systemlog> Systemlog;
```

**Anmerkungen**

This is Systemlog, a member of class DataClasses1DataContext.

**1.1.14.4.57 DataClasses1DataContext.temp\_Customers2 Eigenschaft****C#**

```
public System.Data.Linq.Table<temp_Customers2> temp_Customers2;
```

**Anmerkungen**

This is temp\_Customers2, a member of class DataClasses1DataContext.

**1.1.14.4.58 DataClasses1DataContext.temp\_Products Eigenschaft****C#**

```
public System.Data.Linq.Table<temp_Products> temp_Products;
```

**Anmerkungen**

This is temp\_Products, a member of class DataClasses1DataContext.

#### 1.1.14.4.59 DataClasses1DataContext.User Eigenschaft

**C#**

```
public System.Data.Linq.Table<User> User;
```

**Anmerkungen**

This is User, a member of class DataClasses1DataContext.

#### 1.1.14.4.60 DataClasses1DataContext.UserPermission Eigenschaft

**C#**

```
public System.Data.Linq.Table<UserPermission> UserPermission;
```

**Anmerkungen**

This is UserPermission, a member of class DataClasses1DataContext.

#### 1.1.14.4.61 DataClasses1DataContext.UserPermissionProfile Eigenschaft

**C#**

```
public System.Data.Linq.Table<UserPermissionProfile> UserPermissionProfile;
```

**Anmerkungen**

This is UserPermissionProfile, a member of class DataClasses1DataContext.

#### 1.1.14.4.62 DataClasses1DataContext.Vehicle Eigenschaft

**C#**

```
public System.Data.Linq.Table<Vehicle> Vehicle;
```

**Anmerkungen**

This is Vehicle, a member of class DataClasses1DataContext.

#### 1.1.14.4.63 DataClasses1DataContext.WebServiceLogin Eigenschaft

**C#**

```
public System.Data.Linq.Table<WebServiceLogin> WebServiceLogin;
```

**Anmerkungen**

This is WebServiceLogin, a member of class DataClasses1DataContext.

#### 1.1.14.4.64 DataClasses1DataContext.WebServiceLoginCustomer Eigenschaft

**C#**

```
public System.Data.Linq.Table<WebServiceLoginCustomer> WebServiceLoginCustomer;
```

**Anmerkungen**

This is WebServiceLoginCustomer, a member of class DataClasses1DataContext.

## 1.1.15 DeregistrationOrder Klasse

Erweiterungsklasse für die DeregistrationOrder Tabelle

### Klassen Hierarchie

### C#

```
public class DeregistrationOrder : ILogging;
```

### Datei

DeregistrationOrder.cs (↗ see page 695)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (↗ see page 658)	This is EntityState, a member of class ILogging.
	ItemId (↗ see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (↗ see page 658)	This is LogDbContext, a member of class ILogging.

#### DeregistrationOrder Klasse

	Name	Beschreibung
	EntityState (↗ see page 178)	This is EntityState, a member of class DeregistrationOrder.
	ItemId (↗ see page 179)	This is ItemId, a member of class DeregistrationOrder.
	LogDbContext (↗ see page 179)	This is LogDbContext, a member of class DeregistrationOrder.
	Order (↗ see page 179)	This is Order, a member of class DeregistrationOrder.
	OrderId (↗ see page 179)	This is OrderId, a member of class DeregistrationOrder.
	Registration (↗ see page 179)	This is Registration, a member of class DeregistrationOrder.
	RegistrationId (↗ see page 179)	This is RegistrationId, a member of class DeregistrationOrder.
	Vehicle (↗ see page 180)	This is Vehicle, a member of class DeregistrationOrder.
	VehicleId (↗ see page 180)	This is VehicleId, a member of class DeregistrationOrder.

### Methoden

#### DeregistrationOrder Klasse

	Name	Beschreibung
	DeregistrationOrder (↗ see page 175)	This is DeregistrationOrder, a member of class DeregistrationOrder.

#### DeregistrationOrder Felder

#### DeregistrationOrder Klasse

	Name	Beschreibung
	_Order (↗ see page 175)	This is _Order, a member of class DeregistrationOrder.
	_OrderId (↗ see page 175)	This is _OrderId, a member of class DeregistrationOrder.
	_Registration (↗ see page 175)	This is _Registration, a member of class DeregistrationOrder.
	_RegistrationId (↗ see page 175)	This is _RegistrationId, a member of class DeregistrationOrder.
	_Vehicle (↗ see page 176)	This is _Vehicle, a member of class DeregistrationOrder.
	_VehicleId (↗ see page 176)	This is _VehicleId, a member of class DeregistrationOrder.
	emptyChangingEventArgs (↗ see page 176)	This is emptyChangingEventArgs, a member of class DeregistrationOrder.

#### DeregistrationOrder Methoden

#### DeregistrationOrder Klasse

	Name	Beschreibung
	CreateDeregistrationOrder (↗ see page 176)	Erstellt einen Abmeldeauftrag.
	OnCreated (↗ see page 177)	Validierungs Methode um falsche Eingaben zu verhindern
	OnLoaded (↗ see page 177)	Validierungs Methode um falsche Eingaben zu verhindern

	OnOrderIdChanged ( <a href="#">↗</a> see page 177)	This is OnOrderIdChanged, a member of class DeregistrationOrder.
	OnOrderIdChanging ( <a href="#">↗</a> see page 177)	This is OnOrderIdChanging, a member of class DeregistrationOrder.
	OnRegistrationIdChanged ( <a href="#">↗</a> see page 177)	This is OnRegistrationIdChanged, a member of class DeregistrationOrder.
	OnRegistrationIdChanging ( <a href="#">↗</a> see page 177)	This is OnRegistrationIdChanging, a member of class DeregistrationOrder.
	OnValidate ( <a href="#">↗</a> see page 178)	This is OnValidate, a member of class DeregistrationOrder.
	OnVehicleIdChanged ( <a href="#">↗</a> see page 178)	This is OnVehicleIdChanged, a member of class DeregistrationOrder.
	OnVehicleIdChanging ( <a href="#">↗</a> see page 178)	This is OnVehicleIdChanging, a member of class DeregistrationOrder.
	SendPropertyChanged ( <a href="#">↗</a> see page 178)	This is SendPropertyChanged, a member of class DeregistrationOrder.
	SendPropertyChanging ( <a href="#">↗</a> see page 178)	This is SendPropertyChanging, a member of class DeregistrationOrder.

## DeregistrationOrder Ereignisse

### DeregistrationOrder Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 180)	This is PropertyChanged, a member of class DeregistrationOrder.
	PropertyChanging ( <a href="#">↗</a> see page 180)	This is PropertyChanging, a member of class DeregistrationOrder.

## ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

### DeregistrationOrder Klasse

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 178)	This is EntityState, a member of class DeregistrationOrder.
	ItemId ( <a href="#">↗</a> see page 179)	This is ItemId, a member of class DeregistrationOrder.
	LogDbContext ( <a href="#">↗</a> see page 179)	This is LogDbContext, a member of class DeregistrationOrder.
	Order ( <a href="#">↗</a> see page 179)	This is Order, a member of class DeregistrationOrder.
	OrderId ( <a href="#">↗</a> see page 179)	This is OrderId, a member of class DeregistrationOrder.
	Registration ( <a href="#">↗</a> see page 179)	This is Registration, a member of class DeregistrationOrder.
	RegistrationId ( <a href="#">↗</a> see page 179)	This is RegistrationId, a member of class DeregistrationOrder.
	Vehicle ( <a href="#">↗</a> see page 180)	This is Vehicle, a member of class DeregistrationOrder.
	VehicleId ( <a href="#">↗</a> see page 180)	This is VehicleId, a member of class DeregistrationOrder.

## DeregistrationOrder Ereignisse

### DeregistrationOrder Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 180)	This is PropertyChanged, a member of class DeregistrationOrder.
	PropertyChanging ( <a href="#">↗</a> see page 180)	This is PropertyChanging, a member of class DeregistrationOrder.

## DeregistrationOrder Felder

### DeregistrationOrder Klasse

	Name	Beschreibung
	_Order ( <a href="#">↗</a> see page 175)	This is _Order, a member of class DeregistrationOrder.
	_OrderId ( <a href="#">↗</a> see page 175)	This is _OrderId, a member of class DeregistrationOrder.
	_Registration ( <a href="#">↗</a> see page 175)	This is _Registration, a member of class DeregistrationOrder.
	_RegistrationId ( <a href="#">↗</a> see page 175)	This is _RegistrationId, a member of class DeregistrationOrder.
	_Vehicle ( <a href="#">↗</a> see page 176)	This is _Vehicle, a member of class DeregistrationOrder.
	_VehicleId ( <a href="#">↗</a> see page 176)	This is _VehicleId, a member of class DeregistrationOrder.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 176)	This is emptyChangingEventArgs, a member of class DeregistrationOrder.

## DeregistrationOrder Methoden

### DeregistrationOrder Klasse

	Name	Beschreibung
	CreateDeregistrationOrder ( <a href="#">↗</a> see page 176)	Erstellt einen Abmeldeauftrag.
	OnCreated ( <a href="#">↗</a> see page 177)	Validierungs Methode um falsche Eingaben zu verhindern
	OnLoaded ( <a href="#">↗</a> see page 177)	Validierungs Methode um falsche Eingaben zu verhindern

	OnOrderIdChanged (  see page 177)	This is OnOrderIdChanged, a member of class DeregistrationOrder.
	OnOrderIdChanging (  see page 177)	This is OnOrderIdChanging, a member of class DeregistrationOrder.
	OnRegistrationIdChanged (  see page 177)	This is OnRegistrationIdChanged, a member of class DeregistrationOrder.
	OnRegistrationIdChanging (  see page 177)	This is OnRegistrationIdChanging, a member of class DeregistrationOrder.
	OnValidate (  see page 178)	This is OnValidate, a member of class DeregistrationOrder.
	OnVehicleIdChanged (  see page 178)	This is OnVehicleIdChanged, a member of class DeregistrationOrder.
	OnVehicleIdChanging (  see page 178)	This is OnVehicleIdChanging, a member of class DeregistrationOrder.
	SendPropertyChanged (  see page 178)	This is SendPropertyChanged, a member of class DeregistrationOrder.
	SendPropertyChanging (  see page 178)	This is SendPropertyChanging, a member of class DeregistrationOrder.

### 1.1.15.1 DeregistrationOrder.DeregistrationOrder Konstruktor

**C#**

```
public DeregistrationOrder();
```

**Anmerkungen**

This is DeregistrationOrder, a member of class DeregistrationOrder.

### 1.1.15.2 DeregistrationOrder Felder

#### 1.1.15.2.1 DeregistrationOrder.\_Order Feld

**C#**

```
private EntityRef<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class DeregistrationOrder.

#### 1.1.15.2.2 DeregistrationOrder.\_OrderId Feld

**C#**

```
private System.Guid _OrderId;
```

**Anmerkungen**

This is \_OrderId, a member of class DeregistrationOrder.

#### 1.1.15.2.3 DeregistrationOrder.\_Registration Feld

**C#**

```
private EntityRef<Registration> _Registration;
```

**Anmerkungen**

This is \_Registration, a member of class DeregistrationOrder.

#### 1.1.15.2.4 DeregistrationOrder.\_RegistrationId Feld

**C#**

```
private System.Guid _RegistrationId;
```

**Anmerkungen**

This is \_RegistrationId, a member of class DeregistrationOrder.

### 1.1.15.2.5 DeregistrationOrder.\_Vehicle Feld

**C#**

```
private EntityRef<Vehicle> _Vehicle;
```

**Anmerkungen**

This is \_Vehicle, a member of class DeregistrationOrder.

### 1.1.15.2.6 DeregistrationOrder.\_VehicleId Feld

**C#**

```
private System.Guid _VehicleId;
```

**Anmerkungen**

This is \_VehicleId, a member of class DeregistrationOrder.

### 1.1.15.2.7 DeregistrationOrder.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class DeregistrationOrder.

## 1.1.15.3 DeregistrationOrder Methoden

### 1.1.15.3.1 DeregistrationOrder.CreateDeregistrationOrder Methode

Erstellt einen Abmeldeauftrag.

**C#**

```
public static DeregistrationOrder CreateDeregistrationOrder(Guid userId, Guid customerId,
Guid vehicleId, Guid registrationId, Guid? locationId, Guid zulassungsstelleId,
DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid userId	Id des Benutzers, der den Auftrag anlegt.
Guid customerId	Id des Kunden.
Guid vehicleId	Id des Fahrzeugs.
Guid registrationId	Id der Zulassung.
Guid? locationId	Id des Kundenstandorts.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Abmeldeauftrag.

**Anmerkungen**

Erstellt auch gleichzeitig den Order (see page 179)-Datensatz.

### 1.1.15.3.2 DeregistrationOrder.OnCreated Methode

Validierungs Methode um falsche Eingaben zu verhindern

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
action	

### 1.1.15.3.3 DeregistrationOrder.OnLoaded Methode

Validierungs Methode um falsche Eingaben zu verhindern

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
action	

### 1.1.15.3.4 DeregistrationOrder.OnOrderIdChanged Methode

**C#**

```
private void OnOrderIdChanged();
```

**Anmerkungen**

This is OnOrderIdChanged, a member of class DeregistrationOrder.

### 1.1.15.3.5 DeregistrationOrder.OnOrderIdChanging Methode

**C#**

```
private void OnOrderIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderIdChanging, a member of class DeregistrationOrder.

### 1.1.15.3.6 DeregistrationOrder.OnRegistrationIdChanged Methode

**C#**

```
private void OnRegistrationIdChanged();
```

**Anmerkungen**

This is OnRegistrationIdChanged, a member of class DeregistrationOrder.

### 1.1.15.3.7 DeregistrationOrder.OnRegistrationIdChanging Methode

**C#**

```
private void OnRegistrationIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRegistrationIdChanging, a member of class DeregistrationOrder.

### 1.1.15.3.8 DeregistrationOrder.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class DeregistrationOrder.

### 1.1.15.3.9 DeregistrationOrder.OnVehicleIdChanged Methode

**C#**

```
private void OnVehicleIdChanged();
```

**Anmerkungen**

This is OnVehicleIdChanged, a member of class DeregistrationOrder.

### 1.1.15.3.10 DeregistrationOrder.OnVehicleIdChanging Methode

**C#**

```
private void OnVehicleIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnVehicleIdChanging, a member of class DeregistrationOrder.

### 1.1.15.3.11 DeregistrationOrder.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class DeregistrationOrder.

### 1.1.15.3.12 DeregistrationOrder.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class DeregistrationOrder.

## 1.1.15.4 DeregistrationOrder Eigenschaften

### 1.1.15.4.1 DeregistrationOrder.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class DeregistrationOrder.

#### 1.1.15.4.2 DeregistrationOrder.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class DeregistrationOrder.

#### 1.1.15.4.3 DeregistrationOrder.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class DeregistrationOrder.

#### 1.1.15.4.4 DeregistrationOrder.Order Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_DeregistrationOrder",  
Storage="_Order", ThisKey="OrderId", OtherKey="Id", IsForeignKey=true)]  
public Order Order;
```

**Anmerkungen**

This is Order, a member of class DeregistrationOrder.

#### 1.1.15.4.5 DeregistrationOrder.OrderId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid OrderId;
```

**Anmerkungen**

This is OrderId, a member of class DeregistrationOrder.

#### 1.1.15.4.6 DeregistrationOrder.Registration Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Registration_DeregistrationOrder",  
Storage="_Registration", ThisKey="RegistrationId", OtherKey="Id", IsForeignKey=true)]  
public Registration Registration;
```

**Anmerkungen**

This is Registration, a member of class DeregistrationOrder.

#### 1.1.15.4.7 DeregistrationOrder.RegistrationId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid RegistrationId;
```

**Anmerkungen**

This is RegistrationId, a member of class DeregistrationOrder.

### 1.1.15.4.8 DeregistrationOrder.Vehicle Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Vehicle_DeregistrationOrder",
Storage="_Vehicle", ThisKey="VehicleId", OtherKey="Id", IsForeignKey=true)]
public Vehicle Vehicle;
```

**Anmerkungen**

This is Vehicle, a member of class DeregistrationOrder.

### 1.1.15.4.9 DeregistrationOrder.VehicleId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VehicleId",
DbType="UniqueIdentifier NOT NULL")]
public System.Guid VehicleId;
```

**Anmerkungen**

This is VehicleId, a member of class DeregistrationOrder.

## 1.1.15.5 DeregistrationOrder Ereignisse

### 1.1.15.5.1 DeregistrationOrder.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class DeregistrationOrder.

### 1.1.15.5.2 DeregistrationOrder.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class DeregistrationOrder.

---

## 1.1.16 DocketList Klasse

Erweiterungsklasse für die DocketList Tabelle (Laufzettelverwaltung)

**Klassen Hierarchie****C#**

```
public class DocketList : ILogging;
```

**Datei**

DocketList.cs (🔗 see page 696)

**Mitglieder****ILogging Eigenschaften**

	Name	Beschreibung
	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

**DocketList Klasse**

	Name	Beschreibung
	Adress (🔗 see page 191)	This is Adress, a member of class DocketList.
	DispatchOrderNumber (🔗 see page 191)	This is DispatchOrderNumber, a member of class DocketList.
	DocketListNumber (🔗 see page 191)	This is DocketListNumber, a member of class DocketList.
	DocumentId (🔗 see page 191)	This is DocumentId, a member of class DocketList.
	EntityState (🔗 see page 192)	This is EntityState, a member of class DocketList.
	Id (🔗 see page 192)	This is Id, a member of class DocketList.
	IsPrinted (🔗 see page 192)	This is IsPrinted, a member of class DocketList.
	IsSelfDispatch (🔗 see page 192)	This is IsSelfDispatch, a member of class DocketList.
	ItemId (🔗 see page 192)	This is ItemId, a member of class DocketList.
	LogDbContext (🔗 see page 192)	This is LogDbContext, a member of class DocketList.
	Order (🔗 see page 193)	This is Order, a member of class DocketList.
	Recipient (🔗 see page 193)	This is Recipient, a member of class DocketList.
	RecipientAdressId (🔗 see page 193)	This is RecipientAdressId, a member of class DocketList.

**Methoden****DocketList Klasse**

	Name	Beschreibung
	DocketList (🔗 see page 183)	This is DocketList, a member of class DocketList.

**DocketList Felder****DocketList Klasse**

	Name	Beschreibung
	_Adress (🔗 see page 184)	This is _Adress, a member of class DocketList.
	_DispatchOrderNumber (🔗 see page 184)	This is _DispatchOrderNumber, a member of class DocketList.
	_DocketListNumber (🔗 see page 184)	This is _DocketListNumber, a member of class DocketList.
	_DocumentId (🔗 see page 184)	This is _DocumentId, a member of class DocketList.
	_Id (🔗 see page 184)	This is _Id, a member of class DocketList.
	_IsPrinted (🔗 see page 184)	This is _IsPrinted, a member of class DocketList.
	_IsSelfDispatch (🔗 see page 185)	This is _IsSelfDispatch, a member of class DocketList.
	_Order (🔗 see page 185)	This is _Order, a member of class DocketList.
	_Recipient (🔗 see page 185)	This is _Recipient, a member of class DocketList.
	_RecipientAdressId (🔗 see page 185)	This is _RecipientAdressId, a member of class DocketList.
	emptyChangingEventArgs (🔗 see page 185)	This is emptyChangingEventArgs, a member of class DocketList.

**DocketList Methoden****DocketList Klasse**

	Name	Beschreibung
	AddOrderByld (🔗 see page 185)	Fügt einen Laufzettel zum Auftrag anhand der AuftragsId hinzu.
	attach_Order (🔗 see page 186)	This is attach_Order, a member of class DocketList.
	CreateDocketList (🔗 see page 186)	Erstellt einen neuen Laufzetteldatensatz.
	detach_Order (🔗 see page 186)	This is detach_Order, a member of class DocketList.
	MergeDocketLists (🔗 see page 186)	Merged PDFs
	OnCreated (🔗 see page 186)	Aenderungsevents für die Historie
	OnDispatchOrderNumberChanged (🔗 see page 187)	This is OnDispatchOrderNumberChanged, a member of class DocketList.
	OnDispatchOrderNumberChanging (🔗 see page 187)	Aenderungsevents für die Historie

	OnDocketListNumberChanged ( <a href="#">↗</a> see page 187)	This is OnDocketListNumberChanged, a member of class DocketList.
	OnDocketListNumberChanging ( <a href="#">↗</a> see page 187)	This is OnDocketListNumberChanging, a member of class DocketList.
	OnDocumentIdChanged ( <a href="#">↗</a> see page 187)	This is OnDocumentIdChanged, a member of class DocketList.
	OnDocumentIdChanging ( <a href="#">↗</a> see page 187)	This is OnDocumentIdChanging, a member of class DocketList.
	OnIdChanged ( <a href="#">↗</a> see page 188)	This is OnIdChanged, a member of class DocketList.
	OnIdChanging ( <a href="#">↗</a> see page 188)	This is OnIdChanging, a member of class DocketList.
	OnIsPrintedChanged ( <a href="#">↗</a> see page 188)	This is OnIsPrintedChanged, a member of class DocketList.
	OnIsPrintedChanging ( <a href="#">↗</a> see page 188)	This is OnIsPrintedChanging, a member of class DocketList.
	OnIsSelfDispatchChanged ( <a href="#">↗</a> see page 188)	This is OnIsSelfDispatchChanged, a member of class DocketList.
	OnIsSelfDispatchChanging ( <a href="#">↗</a> see page 188)	This is OnIsSelfDispatchChanging, a member of class DocketList.
	OnLoaded ( <a href="#">↗</a> see page 189)	Aenderungsevents f��r die Historie
	OnRecipientAdressIdChanged ( <a href="#">↗</a> see page 189)	This is OnRecipientAdressIdChanged, a member of class DocketList.
	OnRecipientAdressIdChanging ( <a href="#">↗</a> see page 189)	This is OnRecipientAdressIdChanging, a member of class DocketList.
	OnRecipientChanged ( <a href="#">↗</a> see page 189)	This is OnRecipientChanged, a member of class DocketList.
	OnRecipientChanging ( <a href="#">↗</a> see page 189)	Aenderungsevents f��r die Historie
	OnValidate ( <a href="#">↗</a> see page 190)	This is OnValidate, a member of class DocketList.
	Print ( <a href="#">↗</a> see page 190)	Erstellt den Laufzettel als PDF und schreibt ihn in den ��bergebenen MemoryStream.
	RemoveOrderByld ( <a href="#">↗</a> see page 190)	Entfernt einen Laufzettel aus dem Auftrag.
	SendByEmail ( <a href="#">↗</a> see page 190)	Versendet den Laufzettel per Email, falls erforderlich.
	SendPropertyChanged ( <a href="#">↗</a> see page 191)	This is SendPropertyChanged, a member of class DocketList.
	SendPropertyChanging ( <a href="#">↗</a> see page 191)	This is SendPropertyChanging, a member of class DocketList.

## DocketList Ereignisse

### DocketList Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 193)	This is PropertyChanged, a member of class DocketList.
	PropertyChanging ( <a href="#">↗</a> see page 193)	This is PropertyChanging, a member of class DocketList.

## ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

### DocketList Klasse

	Name	Beschreibung
	Adress ( <a href="#">↗</a> see page 191)	This is Adress, a member of class DocketList.
	DispatchOrderNumber ( <a href="#">↗</a> see page 191)	This is DispatchOrderNumber, a member of class DocketList.
	DocketListNumber ( <a href="#">↗</a> see page 191)	This is DocketListNumber, a member of class DocketList.
	DocumentId ( <a href="#">↗</a> see page 191)	This is DocumentId, a member of class DocketList.
	EntityState ( <a href="#">↗</a> see page 192)	This is EntityState, a member of class DocketList.
	Id ( <a href="#">↗</a> see page 192)	This is Id, a member of class DocketList.
	IsPrinted ( <a href="#">↗</a> see page 192)	This is IsPrinted, a member of class DocketList.
	IsSelfDispatch ( <a href="#">↗</a> see page 192)	This is IsSelfDispatch, a member of class DocketList.
	ItemId ( <a href="#">↗</a> see page 192)	This is ItemId, a member of class DocketList.
	LogDbContext ( <a href="#">↗</a> see page 192)	This is LogDbContext, a member of class DocketList.
	Order ( <a href="#">↗</a> see page 193)	This is Order, a member of class DocketList.
	Recipient ( <a href="#">↗</a> see page 193)	This is Recipient, a member of class DocketList.
	RecipientAdressId ( <a href="#">↗</a> see page 193)	This is RecipientAdressId, a member of class DocketList.

## DocketList Ereignisse

### DocketList Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 193)	This is PropertyChanged, a member of class DocketList.
	PropertyChanging ( <a href="#">↗</a> see page 193)	This is PropertyChanging, a member of class DocketList.

**DocketList Felder****DocketList Klasse**

	Name	Beschreibung
	_Adress ( <a href="#">↗</a> see page 184)	This is _Adress, a member of class DocketList.
	_DispatchOrderNumber ( <a href="#">↗</a> see page 184)	This is _DispatchOrderNumber, a member of class DocketList.
	_DocketListNumber ( <a href="#">↗</a> see page 184)	This is _DocketListNumber, a member of class DocketList.
	_DocumentId ( <a href="#">↗</a> see page 184)	This is _DocumentId, a member of class DocketList.
	_Id ( <a href="#">↗</a> see page 184)	This is _Id, a member of class DocketList.
	_IsPrinted ( <a href="#">↗</a> see page 184)	This is _IsPrinted, a member of class DocketList.
	_IsSelfDispatch ( <a href="#">↗</a> see page 185)	This is _IsSelfDispatch, a member of class DocketList.
	_Order ( <a href="#">↗</a> see page 185)	This is _Order, a member of class DocketList.
	_Recipient ( <a href="#">↗</a> see page 185)	This is _Recipient, a member of class DocketList.
	_RecipientAdressId ( <a href="#">↗</a> see page 185)	This is _RecipientAdressId, a member of class DocketList.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 185)	This is emptyChangingEventArgs, a member of class DocketList.

**DocketList Methoden****DocketList Klasse**

	Name	Beschreibung
	AddOrderByld ( <a href="#">↗</a> see page 185)	Fügt einen Laufzettel zum Auftrag anhand der AuftragsId hinzu.
	attach_Order ( <a href="#">↗</a> see page 186)	This is attach_Order, a member of class DocketList.
	CreateDocketList ( <a href="#">↗</a> see page 186)	Erstellt einen neuen Laufzetteldatensatz.
	detach_Order ( <a href="#">↗</a> see page 186)	This is detach_Order, a member of class DocketList.
	MergeDocketLists ( <a href="#">↗</a> see page 186)	Merged PDFs
	OnCreated ( <a href="#">↗</a> see page 186)	Aenderungsevents für die Historie
	OnDispatchOrderNumberChanged ( <a href="#">↗</a> see page 187)	This is OnDispatchOrderNumberChanged, a member of class DocketList.
	OnDispatchOrderNumberChanging ( <a href="#">↗</a> see page 187)	Aenderungsevents für die Historie
	OnDocketListNumberChanged ( <a href="#">↗</a> see page 187)	This is OnDocketListNumberChanged, a member of class DocketList.
	OnDocketListNumberChanging ( <a href="#">↗</a> see page 187)	This is OnDocketListNumberChanging, a member of class DocketList.
	OnDocumentIdChanged ( <a href="#">↗</a> see page 187)	This is OnDocumentIdChanged, a member of class DocketList.
	OnDocumentIdChanging ( <a href="#">↗</a> see page 187)	This is OnDocumentIdChanging, a member of class DocketList.
	OnIdChanged ( <a href="#">↗</a> see page 188)	This is OnIdChanged, a member of class DocketList.
	OnIdChanging ( <a href="#">↗</a> see page 188)	This is OnIdChanging, a member of class DocketList.
	OnIsPrintedChanged ( <a href="#">↗</a> see page 188)	This is OnIsPrintedChanged, a member of class DocketList.
	OnIsPrintedChanging ( <a href="#">↗</a> see page 188)	This is OnIsPrintedChanging, a member of class DocketList.
	OnIsSelfDispatchChanged ( <a href="#">↗</a> see page 188)	This is OnIsSelfDispatchChanged, a member of class DocketList.
	OnIsSelfDispatchChanging ( <a href="#">↗</a> see page 188)	This is OnIsSelfDispatchChanging, a member of class DocketList.
	OnLoaded ( <a href="#">↗</a> see page 189)	Aenderungsevents für die Historie
	OnRecipientAdressIdChanged ( <a href="#">↗</a> see page 189)	This is OnRecipientAdressIdChanged, a member of class DocketList.
	OnRecipientAdressIdChanging ( <a href="#">↗</a> see page 189)	This is OnRecipientAdressIdChanging, a member of class DocketList.
	OnRecipientChanged ( <a href="#">↗</a> see page 189)	This is OnRecipientChanged, a member of class DocketList.
	OnRecipientChanging ( <a href="#">↗</a> see page 189)	Aenderungsevents für die Historie
	OnValidate ( <a href="#">↗</a> see page 190)	This is OnValidate, a member of class DocketList.
	Print ( <a href="#">↗</a> see page 190)	Erstellt den Laufzettel als PDF und schreibt ihn in den übergebenen MemoryStream.
	RemoveOrderByld ( <a href="#">↗</a> see page 190)	Entfernt einen Laufzettel aus dem Auftrag.
	SendByEmail ( <a href="#">↗</a> see page 190)	Versendet den Laufzettel per Email, falls erforderlich.
	SendPropertyChanged ( <a href="#">↗</a> see page 191)	This is SendPropertyChanged, a member of class DocketList.
	SendPropertyChanging ( <a href="#">↗</a> see page 191)	This is SendPropertyChanging, a member of class DocketList.

**1.1.16.1 DocketList.DocketList Konstruktor****C#**

```
public DocketList();
```

**Anmerkungen**

This is DocketList, a member of class DocketList.

## 1.1.16.2 DocketList Felder

### 1.1.16.2.1 DocketList.\_Adress Feld

**C#**

```
private EntityRef<Adress> _Adress;
```

**Anmerkungen**

This is \_Adress, a member of class DocketList.

### 1.1.16.2.2 DocketList.\_DispatchOrderNumber Feld

**C#**

```
private string _DispatchOrderNumber;
```

**Anmerkungen**

This is \_DispatchOrderNumber, a member of class DocketList.

### 1.1.16.2.3 DocketList.\_DocketListNumber Feld

**C#**

```
private int _DocketListNumber;
```

**Anmerkungen**

This is \_DocketListNumber, a member of class DocketList.

### 1.1.16.2.4 DocketList.\_DocumentId Feld

**C#**

```
private System.Nullable<System.Guid> _DocumentId;
```

**Anmerkungen**

This is \_DocumentId, a member of class DocketList.

### 1.1.16.2.5 DocketList.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class DocketList.

### 1.1.16.2.6 DocketList.\_IsPrinted Feld

**C#**

```
private System.Nullable<bool> _IsPrinted;
```

**Anmerkungen**

This is \_IsPrinted, a member of class DocketList.

### 1.1.16.2.7 DocketList.\_IsSelfDispatch Feld

**C#**

```
private System.Nullable<bool> _IsSelfDispatch;
```

**Anmerkungen**

This is \_IsSelfDispatch, a member of class DocketList.

### 1.1.16.2.8 DocketList.\_Order Feld

**C#**

```
private EntitySet<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class DocketList.

### 1.1.16.2.9 DocketList.\_Recipient Feld

**C#**

```
private string _Recipient;
```

**Anmerkungen**

This is \_Recipient, a member of class DocketList.

### 1.1.16.2.10 DocketList.\_RecipientAdressId Feld

**C#**

```
private System.Guid _RecipientAdressId;
```

**Anmerkungen**

This is \_RecipientAdressId, a member of class DocketList.

### 1.1.16.2.11 DocketList.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class DocketList.

## 1.1.16.3 DocketList Methoden

### 1.1.16.3.1 DocketList.AddOrderByld Methode

Fügt einen Laufzettel zum Auftrag anhand der AuftragsId hinzu.

**C#**

```
public void AddOrderByld(Guid orderId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid orderId	Id (see page 192) des Auftrags.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**1.1.16.3.2 DocketList.attach\_Order Methode****C#**

```
private void attach_Order(Order entity);
```

**Anmerkungen**

This is attach\_Order, a member of class DocketList.

**1.1.16.3.3 DocketList.CreateDocketList Methode**

Erstellt einen neuen Laufzetteldatensatz.

**C#**

```
public static DocketList CreateDocketList(string recipient, Guid recipientAdressId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string recipient	Empfänger des Laufzettels.
Guid recipientAdressId	Id (see page 192) der Adresse für den Laufzettel.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Lieferscheindatensatz.

**1.1.16.3.4 DocketList.detach\_Order Methode****C#**

```
private void detach_Order(Order entity);
```

**Anmerkungen**

This is detach\_Order, a member of class DocketList.

**1.1.16.3.5 DocketList.MergeDocketLists Methode**

Merged PDFs

**C#**

```
public static void MergeDocketLists(string[] files, string mergedFileName);
```

**Parameter**

Parameter	Beschreibung
orderId	File Array
return	Gemerged PDF

**1.1.16.3.6 DocketList.OnCreated Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.16.3.7 DocketList.OnDispatchOrderNumberChanged Methode

**C#**

```
private void OnDispatchOrderNumberChanged();
```

**Anmerkungen**

This is OnDispatchOrderNumberChanged, a member of class DocketList.

### 1.1.16.3.8 DocketList.OnDispatchOrderNumberChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnDispatchOrderNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.16.3.9 DocketList.OnDocketListNumberChanged Methode

**C#**

```
private void OnDocketListNumberChanged();
```

**Anmerkungen**

This is OnDocketListNumberChanged, a member of class DocketList.

### 1.1.16.3.10 DocketList.OnDocketListNumberChanging Methode

**C#**

```
private void OnDocketListNumberChanging(int value);
```

**Anmerkungen**

This is OnDocketListNumberChanging, a member of class DocketList.

### 1.1.16.3.11 DocketList.OnDocumentIdChanged Methode

**C#**

```
private void OnDocumentIdChanged();
```

**Anmerkungen**

This is OnDocumentIdChanged, a member of class DocketList.

### 1.1.16.3.12 DocketList.OnDocumentIdChanging Methode

**C#**

```
private void OnDocumentIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnDocumentIdChanging, a member of class DocketList.

**1.1.16.3.13 DocketList.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class DocketList.

**1.1.16.3.14 DocketList.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class DocketList.

**1.1.16.3.15 DocketList.OnIsPrintedChanged Methode****C#**

```
private void OnIsPrintedChanged();
```

**Anmerkungen**

This is OnIsPrintedChanged, a member of class DocketList.

**1.1.16.3.16 DocketList.OnIsPrintedChanging Methode****C#**

```
private void OnIsPrintedChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnIsPrintedChanging, a member of class DocketList.

**1.1.16.3.17 DocketList.OnIsSelfDispatchChanged Methode****C#**

```
private void OnIsSelfDispatchChanged();
```

**Anmerkungen**

This is OnIsSelfDispatchChanged, a member of class DocketList.

**1.1.16.3.18 OnIsSelfDispatchChanging Methode****1.1.16.3.18.1 DocketList.OnIsSelfDispatchChanging Methode (System.Nullable<bool>)****C#**

```
private void OnIsSelfDispatchChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnIsSelfDispatchChanging, a member of class DocketList.

### 1.1.16.3.18.2 DocketList.OnIsSelfDispatchChanging Methode (bool?)

Änderungsereignis für die Historie

**C#**

```
private void OnIsSelfDispatchChanging(bool? value);
```

**Parameter**

Parameter	Beschreibung
bool? value	

### 1.1.16.3.19 DocketList.OnLoaded Methode

Änderungsereignis für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.16.3.20 DocketList.OnRecipientAdressIdChanged Methode

**C#**

```
private void OnRecipientAdressIdChanged();
```

**Anmerkungen**

This is OnRecipientAdressIdChanged, a member of class DocketList.

### 1.1.16.3.21 DocketList.OnRecipientAdressIdChanging Methode

**C#**

```
private void OnRecipientAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRecipientAdressIdChanging, a member of class DocketList.

### 1.1.16.3.22 DocketList.OnRecipientChanged Methode

**C#**

```
private void OnRecipientChanged();
```

**Anmerkungen**

This is OnRecipientChanged, a member of class DocketList.

### 1.1.16.3.23 DocketList.OnRecipientChanging Methode

Änderungsereignis für die Historie

**C#**

```
private void OnRecipientChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.16.3.24 DocketList.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class DocketList.

### 1.1.16.3.25 DocketList.Print Methode

Erstellt den Laufzettel als PDF und schreibt ihn in den Ã¼bergebenen MemoryStream.

**C#**

```
public void Print(MemoryStream ms, string headerLogoPath, DataClasses1DataContext dbContext, string fileName, bool isZulassungsStelle);
```

**Parameter**

Parameter	Beschreibung
MemoryStream ms	Der MemoryStream, in den das PDF geschrieben wird.
string headerLogoPath	Der Pfad zum Logo fÃ¼r den Header.
DataClasses1DataContext dbContext	Datenbankkontext fÃ¼r die Transaktion.

**Anmerkungen**

Setzt im Erfolgsfall im Lieferscheindatensatz das Merkmal "IsPrinted (see page 192)" auf "true".

### 1.1.16.3.26 DocketList.RemoveOrderByld Methode

Entfernt einen Laufzettel aus dem Auftrag.

**C#**

```
public void RemoveOrderByld(Guid orderId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid orderId	Id (see page 192) des Auftrags, der entfernt werden soll.
DataClasses1DataContext dbContext	Datenbankkontext fÃ¼r die Transaktion.

### 1.1.16.3.27 DocketList.SendByEmail Methode

Versendet den Laufzettel per Email, falls erforderlich.

**C#**

```
public void SendByEmail(MemoryStream ms, string fromAddress, string smtpServer);
```

**Parameter**

Parameter	Beschreibung
MemoryStream ms	MemoryStream mit dem Lieferschein-PDF.
string fromAddress	Absenderemailadresse.
string smtpServer	SMTP-Server fÃ¼r den Emailversand.

**Resultate**

True, wenn eine Email versendet wurde, sonst false.

### 1.1.16.3.28 DocketList.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class DocketList.

### 1.1.16.3.29 DocketList.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class DocketList.

## 1.1.16.4 DocketList Eigenschaften

### 1.1.16.4.1 DocketList.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_DocketList",  
Storage="_Adress", ThisKey="RecipientAdressId", OtherKey="Id", IsForeignKey=true)]  
public Address Address;
```

**Anmerkungen**

This is Address, a member of class DocketList.

### 1.1.16.4.2 DocketList.DispatchOrderNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DispatchOrderNumber",  
DbType="VarChar(50)")]  
public string DispatchOrderNumber;
```

**Anmerkungen**

This is DispatchOrderNumber, a member of class DocketList.

### 1.1.16.4.3 DocketList.DocketListNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DocketListNumber",  
AutoSync=AutoSync.Always, DbType="Int NOT NULL IDENTITY", IsDbGenerated=true)]  
public int DocketListNumber;
```

**Anmerkungen**

This is DocketListNumber, a member of class DocketList.

### 1.1.16.4.4 DocketList.DocumentId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DocumentId",
```

```
DbType="UniqueIdentifier" )]
public System.Nullable<System.Guid> DocumentId;
```

**Anmerkungen**

This is DocumentId, a member of class DocketList.

### 1.1.16.4.5 DocketList.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class DocketList.

### 1.1.16.4.6 DocketList.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier
NOT NULL", IsPrimaryKey=true)]
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class DocketList.

### 1.1.16.4.7 DocketList.IsPrinted Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsPrinted", DbType="Bit")]
public System.Nullable<bool> IsPrinted;
```

**Anmerkungen**

This is IsPrinted, a member of class DocketList.

### 1.1.16.4.8 DocketList.IsSelfDispatch Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsSelfDispatch", DbType="Bit")]
public System.Nullable<bool> IsSelfDispatch;
```

**Anmerkungen**

This is IsSelfDispatch, a member of class DocketList.

### 1.1.16.4.9 DocketList.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class DocketList.

### 1.1.16.4.10 DocketList.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDbContext, a member of class DocketList.

**1.1.16.4.11 DocketList.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="DocketList_Order",  
Storage="_Order", ThisKey="Id", OtherKey="DocketListId")]  
public EntitySet<Order> Order;
```

**Anmerkungen**

This is Order, a member of class DocketList.

**1.1.16.4.12 DocketList.Recipient Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Recipient", DbType="VarChar(50)  
NOT NULL", CanBeNull=false)]  
public string Recipient;
```

**Anmerkungen**

This is Recipient, a member of class DocketList.

**1.1.16.4.13 DocketList.RecipientAdressId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RecipientAdressId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid RecipientAdressId;
```

**Anmerkungen**

This is RecipientAdressId, a member of class DocketList.

**1.1.16.5 DocketList Ereignisse****1.1.16.5.1 DocketList.PropertyChanged Ereignis****C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class DocketList.

**1.1.16.5.2 DocketList.PropertyChanging Ereignis****C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class DocketList.

## 1.1.17 Document Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.Document" ) ]
public class Document : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([see page 695](#))

### Anmerkungen

This is class KVSCCommon.Database.Document.

### Mitglieder

#### Methoden

	Name	Beschreibung
	Document ( <a href="#">see page 196</a> )	This is Document, a member of class Document.

#### Document Felder

	Name	Beschreibung
	_Data ( <a href="#">see page 196</a> )	This is _Data, a member of class Document.
	_DocumentType ( <a href="#">see page 196</a> )	This is _DocumentType, a member of class Document.
	_DokumentTypeld ( <a href="#">see page 196</a> )	This is _DokumentTypeld, a member of class Document.
	_FileName ( <a href="#">see page 196</a> )	This is _FileName, a member of class Document.
	_Id ( <a href="#">see page 197</a> )	This is _Id, a member of class Document.
	_Invoice ( <a href="#">see page 197</a> )	This is _Invoice, a member of class Document.

	OnValidate (  see page 200)	This is OnValidate, a member of class Document.
	SendPropertyChanged (  see page 200)	This is SendPropertyChanged, a member of class Document.
	SendPropertyChanging (  see page 200)	This is SendPropertyChanging, a member of class Document.

## 1.1.17.1 Document.Document Konstruktor

**C#**

```
public Document();
```

**Anmerkungen**

This is Document, a member of class Document.

## 1.1.17.2 Document Felder

### 1.1.17.2.1 Document.\_Data Feld

**C#**

```
private System.Data.Linq.Binary _Data;
```

**Anmerkungen**

This is \_Data, a member of class Document.

### 1.1.17.2.2 Document.\_DocumentType Feld

**C#**

```
private EntityRef<DocumentType> _DocumentType;
```

**Anmerkungen**

This is \_DocumentType, a member of class Document.

### 1.1.17.2.3 Document.\_DokumentTypeld Feld

**C#**

```
private System.Guid _DokumentTypeId;
```

**Anmerkungen**

This is \_DokumentTypeld, a member of class Document.

### 1.1.17.2.4 Document.\_FileName Feld

**C#**

```
private string _FileName;
```

**Anmerkungen**

This is \_FileName, a member of class Document.

### 1.1.17.2.5 Document.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Document.

### 1.1.17.2.6 Document.\_Invoice Feld

**C#**

```
private EntitySet<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class Document.

### 1.1.17.2.7 Document.\_MimeType Feld

**C#**

```
private string _MimeType;
```

**Anmerkungen**

This is \_MimeType, a member of class Document.

### 1.1.17.2.8 Document.\_PackingList Feld

**C#**

```
private EntitySet<PackingList> _PackingList;
```

**Anmerkungen**

This is \_PackingList, a member of class Document.

### 1.1.17.2.9 Document.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Document.

## 1.1.17.3 Document Methoden

### 1.1.17.3.1 Document.attach\_Invoice Methode

**C#**

```
private void attach_Invoice(Invoice entity);
```

**Anmerkungen**

This is attach\_Invoice, a member of class Document.

### 1.1.17.3.2 Document.attach\_PackingList Methode

**C#**

```
private void attach_PackingList(PackingList entity);
```

**Anmerkungen**

This is attach\_PackingList, a member of class Document.

### 1.1.17.3.3 Document.detach\_Invoice Methode

**C#**

```
private void detach_Invoice(Invoice entity);
```

**Anmerkungen**

This is detach\_Invoice, a member of class Document.

### 1.1.17.3.4 Document.detach\_PackingList Methode

**C#**

```
private void detach_PackingList(PackingList entity);
```

**Anmerkungen**

This is detach\_PackingList, a member of class Document.

### 1.1.17.3.5 Document.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class Document.

### 1.1.17.3.6 Document.OnDataChanged Methode

**C#**

```
private void OnDataChanged();
```

**Anmerkungen**

This is OnDataChanged, a member of class Document.

### 1.1.17.3.7 Document.OnDataChanging Methode

**C#**

```
private void OnDataChanging(System.Data.Linq.Binary value);
```

**Anmerkungen**

This is OnDataChanging, a member of class Document.

### 1.1.17.3.8 Document.OnDokumentTypeIdChanged Methode

**C#**

```
private void OnDokumentTypeIdChanged();
```

**Anmerkungen**

This is OnDokumentTypeldChanged, a member of class Document.

**1.1.17.3.9 Document.OnDokumentTypeldChanging Methode****C#**

```
private void OnDokumentTypeIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnDokumentTypeldChanging, a member of class Document.

**1.1.17.3.10 Document.OnFileNameChanged Methode****C#**

```
private void OnFileNameChanged();
```

**Anmerkungen**

This is OnFileNameChanged, a member of class Document.

**1.1.17.3.11 Document.OnFileNameChanging Methode****C#**

```
private void OnFileNameChanging(string value);
```

**Anmerkungen**

This is OnFileNameChanging, a member of class Document.

**1.1.17.3.12 Document.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Document.

**1.1.17.3.13 Document.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Document.

**1.1.17.3.14 Document.OnLoaded Methode****C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class Document.

### 1.1.17.3.15 Document.OnMimeTypeChanged Methode

**C#**

```
private void OnMimeTypeChanged();
```

**Anmerkungen**

This is OnMimeTypeChanged, a member of class Document.

### 1.1.17.3.16 Document.OnMimeTypeChanging Methode

**C#**

```
private void OnMimeTypeChanging(string value);
```

**Anmerkungen**

This is OnMimeTypeChanging, a member of class Document.

### 1.1.17.3.17 Document.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Document.

### 1.1.17.3.18 Document.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Document.

### 1.1.17.3.19 Document.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Document.

## 1.1.17.4 Document Eigenschaften

### 1.1.17.4.1 Document.Data Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Data", DbType="VarBinary(MAX)  
NOT NULL", CanBeNull=false, UpdateCheck=UpdateCheck.Never)]  
public System.Data.Linq.Binary Data;
```

**Anmerkungen**

This is Data, a member of class Document.

### 1.1.17.4.2 Document.DocumentType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="DocumentType_Document",  
Storage="_DocumentType", ThisKey="DokumentTypeId", OtherKey="Id", IsForeignKey=true)]  
public DocumentType DocumentType;
```

**Anmerkungen**

This is DocumentType, a member of class Document.

### 1.1.17.4.3 Document.DokumentTypeId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DokumentTypeId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid DokumentTypeId;
```

**Anmerkungen**

This is DokumentTypeId, a member of class Document.

### 1.1.17.4.4 Document.FileName Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FileName", DbType="VarChar(50)  
NOT NULL", CanBeNull=false)]  
public string FileName;
```

**Anmerkungen**

This is FileName, a member of class Document.

### 1.1.17.4.5 Document.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Document.

### 1.1.17.4.6 Document.Invoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Document_Invoice",  
Storage="_Invoice", ThisKey="Id", OtherKey="DocumentId")]  
public EntitySet<Invoice> Invoice;
```

**Anmerkungen**

This is Invoice, a member of class Document.

### 1.1.17.4.7 Document.MimeType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_MimeType", DbType="VarChar(50)  
NOT NULL", CanBeNull=false)]
```

```
public string MimeType;
```

**Anmerkungen**

This is MimeType, a member of class Document.

### 1.1.17.4.8 Document.PackingList Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Document_PackingList",  
Storage="_PackingList", ThisKey="Id", OtherKey="DocumentId")]  
public EntitySet<PackingList> PackingList;
```

**Anmerkungen**

This is PackingList, a member of class Document.

## 1.1.17.5 Document Ereignisse

### 1.1.17.5.1 Document.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Document.

### 1.1.17.5.2 Document.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Document.

---

## 1.1.18 DocumentConfiguration Klasse

**Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute()]  
public class DocumentConfiguration : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

DataClasses1.designer.cs (📄 see page 695)

**Anmerkungen**

This is class KVSCCommon.Database.DocumentConfiguration.

**Mitglieder****Methoden**

	Name	Beschreibung
	DocumentConfiguration ( <a href="#">↗</a> see page 204)	This is DocumentConfiguration, a member of class DocumentConfiguration.

**DocumentConfiguration Felder**

	Name	Beschreibung
	_Id ( <a href="#">↗</a> see page 204)	This is _Id, a member of class DocumentConfiguration.

## 1.1.18.1 DocumentConfiguration.DocumentConfiguration Konstruktor

C#

```
public DocumentConfiguration();
```

Anmerkungen

This is DocumentConfiguration, a member of class DocumentConfiguration.

## 1.1.18.2 DocumentConfiguration Felder

### 1.1.18.2.1 DocumentConfiguration.\_Id Feld

C#

```
private string _Id;
```

Anmerkungen

This is \_Id, a member of class DocumentConfiguration.

### 1.1.18.2.2 DocumentConfiguration.\_Text Feld

C#

```
private string _Text;
```

Anmerkungen

This is \_Text, a member of class DocumentConfiguration.

### 1.1.18.2.3 DocumentConfiguration.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

Anmerkungen

This is emptyChangingEventArgs, a member of class DocumentConfiguration.

## 1.1.18.3 DocumentConfiguration Methoden

### 1.1.18.3.1 DocumentConfiguration.OnCreated Methode

C#

```
private void OnCreated();
```

Anmerkungen

This is OnCreated, a member of class DocumentConfiguration.

### 1.1.18.3.2 DocumentConfiguration.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class DocumentConfiguration.

### 1.1.18.3.3 DocumentConfiguration.OnIdChanging Methode

**C#**

```
private void OnIdChanging(string value);
```

**Anmerkungen**

This is OnIdChanging, a member of class DocumentConfiguration.

### 1.1.18.3.4 DocumentConfiguration.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class DocumentConfiguration.

### 1.1.18.3.5 DocumentConfiguration.OnTextChanged Methode

**C#**

```
private void OnTextChanged();
```

**Anmerkungen**

This is OnTextChanged, a member of class DocumentConfiguration.

### 1.1.18.3.6 DocumentConfiguration.OnTextChanging Methode

**C#**

```
private void OnTextChanging(string value);
```

**Anmerkungen**

This is OnTextChanging, a member of class DocumentConfiguration.

### 1.1.18.3.7 DocumentConfiguration.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class DocumentConfiguration.

### 1.1.18.3.8 DocumentConfiguration.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class DocumentConfiguration.

**1.1.18.3.9 DocumentConfiguration.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class DocumentConfiguration.

**1.1.18.4 DocumentConfiguration Eigenschaften****1.1.18.4.1 DocumentConfiguration.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="varchar(50)",  
CanBeNull=false, IsPrimaryKey=true)]  
public string Id;
```

**Anmerkungen**

This is Id, a member of class DocumentConfiguration.

**1.1.18.4.2 DocumentConfiguration.Text Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Text", DbType="varchar(500)",  
CanBeNull=false)]  
public string Text;
```

**Anmerkungen**

This is Text, a member of class DocumentConfiguration.

**1.1.18.5 DocumentConfiguration Ereignisse****1.1.18.5.1 DocumentConfiguration.PropertyChanged Ereignis****C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class DocumentConfiguration.

**1.1.18.5.2 DocumentConfiguration.PropertyChanging Ereignis****C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class DocumentConfiguration.

## 1.1.19 DocumentType Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.DocumentType")]
public class DocumentType : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([see page 695](#))

### Anmerkungen

This is class KVSCCommon.Database.DocumentType.

### Mitglieder

#### Methoden

	Name	Beschreibung
	DocumentType ( <a href="#">see page 208</a> )	This is DocumentType, a member of class DocumentType.

**1.1.19.2 DocumentType Felder****1.1.19.2.1 DocumentType.\_Document Feld****C#**

```
private EntitySet<Document> _Document;
```

**Anmerkungen**

This is \_Document, a member of class DocumentType.

### 1.1.19.2.2 DocumentType.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class DocumentType.

### 1.1.19.2.3 DocumentType.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class DocumentType.

### 1.1.19.2.4 DocumentType.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class DocumentType.

## 1.1.19.3 DocumentType Methoden

### 1.1.19.3.1 DocumentType.attach\_Document Methode

**C#**

```
private void attach_Document(Document entity);
```

**Anmerkungen**

This is attach\_Document, a member of class DocumentType.

### 1.1.19.3.2 DocumentType.detach\_Document Methode

**C#**

```
private void detach_Document(Document entity);
```

**Anmerkungen**

This is detach\_Document, a member of class DocumentType.

### 1.1.19.3.3 DocumentType.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class DocumentType.

### 1.1.19.3.4 DocumentType.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class DocumentType.

### 1.1.19.3.5 DocumentType.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class DocumentType.

### 1.1.19.3.6 DocumentType.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class DocumentType.

### 1.1.19.3.7 DocumentType.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class DocumentType.

### 1.1.19.3.8 DocumentType.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class DocumentType.

### 1.1.19.3.9 DocumentType.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class DocumentType.

### 1.1.19.3.10 DocumentType.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class DocumentType.

**1.1.19.3.11 DocumentType.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class DocumentType.

**1.1.19.4 DocumentType Eigenschaften****1.1.19.4.1 DocumentType.Document Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="DocumentType_Document",  
Storage="_Document", ThisKey="Id", OtherKey="DokumentTypeId")]  
public EntitySet<Document> Document;
```

**Anmerkungen**

This is Document, a member of class DocumentType.

**1.1.19.4.2 DocumentType.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class DocumentType.

**1.1.19.4.3 DocumentType.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class DocumentType.

**1.1.19.5 DocumentType Ereignisse****1.1.19.5.1 DocumentType.PropertyChanged Ereignis****C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class DocumentType.

**1.1.19.5.2 DocumentType.PropertyChanging Ereignis****C#**

```
public event PropertyChangedEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class DocumentType.

**1.1.20 EmptyStringIfNull Klasse**

Hilfklasse um eingegebene Felder zu pruefen

**Klassen Hierarchie**

`KVSCCommon.Database.EmptyStringIfNull`

**C#**

```
public static class EmptyStringIfNull;
```

**Datei**

EmptyStringIfNull.cs (see page 696)

**Mitglieder****EmptyStringIfNull Methoden**

	Name	Beschreibung
	IsGuid (see page 213)	Prueft ob die eingegebene Zahl auch eine Guid ist
	IsNumber (see page 213)	Prueft ob die eingegebene Zahl auch eine nummer ist
	ReturnEmptyStringIfNull (see page 213)	Gibt einen Leeren String zurueck, wenn das Objekt null ist
	ReturnNullableInteger (see page 213)	Gibt ein null zurueck, wenn das Objekt auch null ist (Gedacht fuer die Zahlungsziele) Wenn keine Null und keine Zahl, dann wirft eine Exception Wenn Eine Zahl, dann gibt ein Int zurueck
	ReturnZeroDecimalIfNullEditVat (see page 213)	Gibt eine 0 zurueck, wenn die Eingabe ein null ist Wenn die Eingabe nicht als Zahl geparkt werden kann, dann wird eine Exception geworfen (Gedacht fuer MwSt)
	ReturnZeroStringIfNull (see page 214)	Gibt eine 0 zurueck, wenn das Objekt null ist
	ReturnZeroStringIfNullObject (see page 214)	Gibt 0 zurueck, wenn der eingegebene Wert null ist

**EmptyStringIfNull Methoden**

	Name	Beschreibung
	IsGuid (see page 213)	Prueft ob die eingegebene Zahl auch eine Guid ist
	IsNumber (see page 213)	Prueft ob die eingegebene Zahl auch eine nummer ist
	ReturnEmptyStringIfNull (see page 213)	Gibt einen Leeren String zurueck, wenn das Objekt null ist
	ReturnNullableInteger (see page 213)	Gibt ein null zurueck, wenn das Objekt auch null ist (Gedacht fuer die Zahlungsziele) Wenn keine Null und keine Zahl, dann wirft eine Exception Wenn Eine Zahl, dann gibt ein Int zurueck
	ReturnZeroDecimalIfNullEditVat (see page 213)	Gibt eine 0 zurueck, wenn die Eingabe ein null ist Wenn die Eingabe nicht als Zahl geparkt werden kann, dann wird eine Exception geworfen (Gedacht fuer MwSt)
	ReturnZeroStringIfNull (see page 214)	Gibt eine 0 zurueck, wenn das Objekt null ist
	ReturnZeroStringIfNullObject (see page 214)	Gibt 0 zurueck, wenn der eingegebene Wert null ist

**1.1.20.1 EmptyStringIfNull Methoden**

### 1.1.20.1.1 EmptyStringIfNull.IsGuid Methode

Prueft ob die eingegebene Zahl auch eine Guid ist

**C#**

```
public static bool IsGuid(string myValue);
```

**Parameter**

Parameter	Beschreibung
string myValue	

### 1.1.20.1.2 EmptyStringIfNull.IsNumber Methode

Prueft ob die eingegebene Zahl auch eine nummer ist

**C#**

```
public static bool IsNumber(string myValue);
```

**Parameter**

Parameter	Beschreibung
string myValue	

### 1.1.20.1.3 EmptyStringIfNull.ReturnEmptyStringIfNull Methode

Gibt einen Leeren String zurueck, wenn das Objekt null ist

**C#**

```
public static string ReturnEmptyStringIfNull(object myValue);
```

**Parameter**

Parameter	Beschreibung
object myValue	

### 1.1.20.1.4 EmptyStringIfNull.ReturnNullableInteger Methode

Gibt ein null zurueck, wenn das Objekt auch null ist (Gedacht fuer die Zahlungsziele) Wenn keine Null und keine Zahl, dann wirft eine Exception Wenn Eine Zahl, dann gibt ein Int zurueck

**C#**

```
public static int? ReturnNullableInteger(object myValue);
```

**Parameter**

Parameter	Beschreibung
object myValue	

### 1.1.20.1.5 EmptyStringIfNull.ReturnZeroDecimalIfNullEditVat Methode

Gibt eine 0 zurueck, wenn die Eingabe ein null ist Wenn die Eingabe nicht als Zahl geparkt werden kann, dann wird eine Exception geworfen (Gedacht fuer MwSt)

**C#**

```
public static decimal ReturnZeroDecimalIfNullEditVat(object myValue);
```

**Parameter**

Parameter	Beschreibung
object myValue	

### 1.1.20.1.6 EmptyStringIfNull.ReturnZeroStringIfNull Methode

Gibt eine 0 zurueck, wenn das Objekt null ist

**C#**

```
public static string ReturnZeroStringIfNull(string myValue);
```

**Parameter**

Parameter	Beschreibung
string myValue	

### 1.1.20.1.7 EmptyStringIfNull.ReturnZeroStringIfNullObject Methode

Gibt 0 zurueck, wenn der eingegebene Wert null ist

**C#**

```
public static string ReturnZeroStringIfNullObject(object myValue);
```

**Parameter**

Parameter	Beschreibung
object myValue	

## 1.1.21 ILoggingExtensions Klasse

Schnittstelle fuer das Logging

**Klassen Hierarchie**

`KVSCCommon.Database.ILoggingExtensions`

**C#**

```
public static class ILoggingExtensions;
```

**Datei**

ILogging.cs ([🔗](#) see page 696)

**Mitglieder**

**ILoggingExtensions Methoden**

	Name	Beschreibung
	CheckLoggingPossible ( <a href="#">🔗</a> see page 214)	Prueft ob ein Logging möglich ist
	WriteUpdateLogItem ( <a href="#">🔗</a> see page 215)	Schreibt einen Logeintrag für ein Update eines Properties.

**ILoggingExtensions Methoden**

	Name	Beschreibung
	CheckLoggingPossible ( <a href="#">🔗</a> see page 214)	Prueft ob ein Logging möglich ist
	WriteUpdateLogItem ( <a href="#">🔗</a> see page 215)	Schreibt einen Logeintrag für ein Update eines Properties.

### 1.1.21.1 ILoggingExtensions Methoden

#### 1.1.21.1.1 ILoggingExtensions.CheckLoggingPossible Methode

Prueft ob ein Logging möglich ist

**C#**

```
public static void CheckLoggingPossible(this ILogging item);
```

**Parameter**

Parameter	Beschreibung
this ILogging item	

**1.1.21.1.2 ILoggingExtensions.WriteUpdateLogItem Methode**

Schreibt einen Logeintrag für ein Update eines Properties.

**C#**

```
public static void WriteUpdateLogItem(this ILogging item, string fieldName, object valueBefore, object valueAfter);
```

**Parameter**

Parameter	Beschreibung
this ILogging item	Datensatz, der geändert wird.
string fieldName	Name des Properties, das geändert wird.
object valueBefore	Wert vor der Änderung.
object valueAfter	Wert nach der Änderung.

**1.1.22 Invoice Klasse**

Erweiterungsklasse für die Tabelle Invoice

**Klassen Hierarchie****C#**

```
public class Invoice : ILogging;
```

**Datei**

Invoice.cs (see page 697)

**Mitglieder****ILogging Eigenschaften**

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (see page 658)	This is LogDbContext, a member of class ILogging.

**Invoice Klasse**

	Name	Beschreibung
	Adress (see page 233)	This is Adress, a member of class Invoice.
	AuthorativeChargeSum (see page 233)	Summe der amtlichen Gebuehren
	canceled (see page 233)	This is canceled, a member of class Invoice.
	CreateDate (see page 233)	This is CreateDate, a member of class Invoice.
	Customer (see page 233)	This is Customer, a member of class Invoice.
	CustomerId (see page 234)	This is CustomerId, a member of class Invoice.
	discount (see page 234)	This is discount, a member of class Invoice.
	Document (see page 234)	This is Document, a member of class Invoice.
	DocumentId (see page 234)	This is DocumentId, a member of class Invoice.
	EntityState (see page 234)	This is EntityState, a member of class Invoice.
	GrandTotal (see page 234)	Endbetrag

	Id (  see page 235)	This is Id, a member of class Invoice.
	InvoiceItem (  see page 235)	This is InvoiceItem, a member of class Invoice.
	InvoiceNumber (  see page 235)	This is InvoiceNumber, a member of class Invoice.
	InvoiceRecipient (  see page 235)	This is InvoiceRecipient, a member of class Invoice.
	InvoiceRecipientAdressId (  see page 235)	This is InvoiceRecipientAdressId, a member of class Invoice.
	InvoiceText (  see page 235)	This is InvoiceText, a member of class Invoice.
	InvoiceType (  see page 236)	This is InvoiceType, a member of class Invoice.
	InvoiceTypes (  see page 236)	This is InvoiceTypes, a member of class Invoice.
	IsPrinted (  see page 236)	This is IsPrinted, a member of class Invoice.
	ItemId (  see page 236)	This is ItemId, a member of class Invoice.
	LogDbContext (  see page 236)	This is LogDbContext, a member of class Invoice.
	NetSum (  see page 237)	Nettobetrag
	OrderInvoice (  see page 237)	This is OrderInvoice, a member of class Invoice.
	PrintDate (  see page 237)	This is PrintDate, a member of class Invoice.
	TaxFreeItemsGrouped (  see page 237)	Gruppe der Steuerfreien Rechnungspositionen
	TaxValue (  see page 237)	MwSt
	User (  see page 237)	This is User, a member of class Invoice.
	UserId (  see page 237)	This is UserId, a member of class Invoice.

## Methoden

### Invoice Klasse

	Name	Beschreibung
	Invoice (  see page 220)	This is Invoice, a member of class Invoice.

### Invoice Felder

### Invoice Klasse

	Name	Beschreibung
	_Adress (  see page 220)	This is _Adress, a member of class Invoice.
	_canceled (  see page 220)	This is _canceled, a member of class Invoice.
	_CreateDate (  see page 220)	This is _CreateDate, a member of class Invoice.
	_Customer (  see page 220)	This is _Customer, a member of class Invoice.
	_CustomerId (  see page 220)	This is _CustomerId, a member of class Invoice.
	_discount (  see page 221)	This is _discount, a member of class Invoice.
	_Document (  see page 221)	This is _Document, a member of class Invoice.
	_DocumentId (  see page 221)	This is _DocumentId, a member of class Invoice.
	_Id (  see page 221)	This is _Id, a member of class Invoice.
	_InvoiceItem (  see page 221)	This is _InvoiceItem, a member of class Invoice.
	_InvoiceNumber (  see page 221)	This is _InvoiceNumber, a member of class Invoice.
	_InvoiceRecipient (  see page 221)	This is _InvoiceRecipient, a member of class Invoice.
	_InvoiceRecipientAdressId (  see page 222)	This is _InvoiceRecipientAdressId, a member of class Invoice.
	_InvoiceText (  see page 222)	This is _InvoiceText, a member of class Invoice.
	_InvoiceType (  see page 222)	This is _InvoiceType, a member of class Invoice.
	_InvoiceTypes (  see page 222)	This is _InvoiceTypes, a member of class Invoice.
	_IsPrinted (  see page 222)	This is _IsPrinted, a member of class Invoice.
	_OrderInvoice (  see page 222)	This is _OrderInvoice, a member of class Invoice.
	_PrintDate (  see page 223)	This is _PrintDate, a member of class Invoice.
	_User (  see page 223)	This is _User, a member of class Invoice.
	_UserId (  see page 223)	This is _UserId, a member of class Invoice.
	emptyChangingEventArgs (  see page 223)	This is emptyChangingEventArgs, a member of class Invoice.

## Invoice Methoden

### Invoice Klasse

	Name	Beschreibung
	AddInvoiceItem (  see page 223)	Fügt der Rechnung eine neue Rechnungsposition hinzu.
	attach_InvoiceItem (  see page 224)	This is attach_InvoiceItem, a member of class Invoice.
	attach_OrderInvoice (  see page 224)	This is attach_OrderInvoice, a member of class Invoice.
	Cancel (  see page 224)	Storniert eine Rechnung.
	CreateInvoice (  see page 224)	Erstellt eine neue Rechnung.

	detach_InvoiceItem (  see page 224)	This is detach_InvoiceItem, a member of class Invoice.
	detach_OrderInvoice (  see page 225)	This is detach_OrderInvoice, a member of class Invoice.
	GetDefaultInvoiceText (  see page 225)	Gibt den Standart Rechnungstext zurÃ¼ck, abhaengig vom Kunden
	GetInitialInvoiceAddress (  see page 225)	Gibt die initiale Rechnungsadresse anhand der Kundendaten und des Standorts der AuftrÃ¤ge in der Rechnung zurÃ¼ck.
	GetInvoiceDispatchAddress (  see page 225)	Gibt die Rechnungsversandadresse anhand der Kundendaten und des Standorts der AuftrÃ¤ge in der Rechnung zurÃ¼ck.
	GetInvoiceTypeld (  see page 226)	Gibt die Guid des Rechnungstyps zurÃ¼ck
	OnCanceledChanged (  see page 226)	This is OnCanceledChanged, a member of class Invoice.
	OnCanceledChanging (  see page 226)	This is OnCanceledChanging, a member of class Invoice.
	OnCreated (  see page 226)	Aenderungsevents fÃ¼r die Historie
	OnCreateDateChanged (  see page 226)	This is OnCreateDateChanged, a member of class Invoice.
	OnCreateDateChanging (  see page 227)	Aenderungsevents fÃ¼r die Historie
	OnCustomerIdChanged (  see page 227)	This is OnCustomerIdChanged, a member of class Invoice.
	OnCustomerIdChanging (  see page 227)	Aenderungsevents fÃ¼r die Historie
	OnDiscountChanged (  see page 227)	This is OnDiscountChanged, a member of class Invoice.
	OnDiscountChanging (  see page 228)	This is OnDiscountChanging, a member of class Invoice.
	OnDocumentIdChanged (  see page 228)	This is OnDocumentIdChanged, a member of class Invoice.
	OnDocumentIdChanging (  see page 228)	This is OnDocumentIdChanging, a member of class Invoice.
	OnIdChanged (  see page 228)	This is OnIdChanged, a member of class Invoice.
	OnIdChanging (  see page 228)	This is OnIdChanging, a member of class Invoice.
	OnInvoiceRecipientAdressIdChanged (  see page 228)	This is OnInvoiceRecipientAdressIdChanged, a member of class Invoice.
	OnInvoiceRecipientAdressIdChanging (  see page 228)	This is OnInvoiceRecipientAdressIdChanging, a member of class Invoice.
	OnInvoiceRecipientChanged (  see page 229)	This is OnInvoiceRecipientChanged, a member of class Invoice.
	OnInvoiceRecipientChanging (  see page 229)	Aenderungsevents fÃ¼r die Historie
	OnInvoiceTextChanged (  see page 229)	This is OnInvoiceTextChanged, a member of class Invoice.
	OnInvoiceTextChanging (  see page 229)	Aenderungsevents fÃ¼r die Historie
	OnInvoiceTypeChanged (  see page 229)	This is OnInvoiceTypeChanged, a member of class Invoice.
	OnInvoiceTypeChanging (  see page 229)	Aenderungsevents fÃ¼r die Historie
	OnIsPrintedChanged (  see page 230)	This is OnIsPrintedChanged, a member of class Invoice.
	OnIsPrintedChanging (  see page 230)	Aenderungsevents fÃ¼r die Historie
	OnLoaded (  see page 230)	Aenderungsevents fÃ¼r die Historie
	OnPrintDateChanged (  see page 230)	This is OnPrintDateChanged, a member of class Invoice.
	OnPrintDateChanging (  see page 231)	Aenderungsevents fÃ¼r die Historie
	OnUserIdChanged (  see page 231)	This is OnUserIdChanged, a member of class Invoice.
	OnUserIdChanging (  see page 231)	This is OnUserIdChanging, a member of class Invoice.
	OnValidate (  see page 231)	This is OnValidate, a member of class Invoice.
	Print (  see page 231)	Druckt die Rechnung im Original als PDF erstellt einen Datensatz zum Speichern des PDF in der Datenbank.
	PrintCopy (  see page 232)	Erstellt eine Kopie der Original-Rechnung, falls diese bereits gedruckt wurde.
	PrintPreview (  see page 232)	Erstellt eine Vorschau des Rechnungs-PDF.
	SendByMail (  see page 232)	Generiert und versendet die Rechnung per Email
	SendPropertyChanged (  see page 232)	This is SendPropertyChanged, a member of class Invoice.
	SendPropertyChanging (  see page 232)	This is SendPropertyChanging, a member of class Invoice.

## Invoice Ereignisse

### Invoice Klasse

	Name	Beschreibung
	PropertyChanged (  see page 238)	This is PropertyChanged, a member of class Invoice.
	PropertyChanging (  see page 238)	This is PropertyChanging, a member of class Invoice.

### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (  see page 658)	This is EntityState, a member of class ILogging.
	ItemId (  see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (  see page 658)	This is LogDbContext, a member of class ILogging.

## Invoice Klasse

	Name	Beschreibung

### Invoice Klasse

	Name	Beschreibung
	AddInvoiceItem ( <a href="#">↗</a> see page 223)	Fügt der Rechnung eine neue Rechnungsposition hinzu.
	attach_InvoiceItem ( <a href="#">↗</a> see page 224)	This is attach_InvoiceItem, a member of class Invoice.
	attach_OrderInvoice ( <a href="#">↗</a> see page 224)	This is attach_OrderInvoice, a member of class Invoice.
	Cancel ( <a href="#">↗</a> see page 224)	Storniert eine Rechnung.
	CreateInvoice ( <a href="#">↗</a> see page 224)	Erstellt eine neue Rechnung.
	detach_InvoiceItem ( <a href="#">↗</a> see page 224)	This is detach_InvoiceItem, a member of class Invoice.
	detach_OrderInvoice ( <a href="#">↗</a> see page 225)	This is detach_OrderInvoice, a member of class Invoice.
	GetDefaultInvoiceText ( <a href="#">↗</a> see page 225)	Gibt den Standard Rechnungstext zurück, abhängig vom Kunden
	GetInitialInvoiceAddress ( <a href="#">↗</a> see page 225)	Gibt die initiale Rechnungsadresse anhand der Kundendaten und des Standorts der Auftraggeber in der Rechnung zurück.
	GetInvoiceDispatchAddress ( <a href="#">↗</a> see page 225)	Gibt die Rechnungsversandadresse anhand der Kundendaten und des Standorts der Auftraggeber in der Rechnung zurück.
	GetInvoiceTypeId ( <a href="#">↗</a> see page 226)	Gibt die Guid des Rechnungstyps zurück
	OnCanceledChanged ( <a href="#">↗</a> see page 226)	This is OnCanceledChanged, a member of class Invoice.
	OnCanceledChanging ( <a href="#">↗</a> see page 226)	This is OnCanceledChanging, a member of class Invoice.
	OnCreated ( <a href="#">↗</a> see page 226)	Aenderungsereignis für die Historie
	OnCreateDateChanged ( <a href="#">↗</a> see page 226)	This is OnCreateDateChanged, a member of class Invoice.
	OnCreateDateChanging ( <a href="#">↗</a> see page 227)	Aenderungsereignis für die Historie
	OnCustomerIdChanged ( <a href="#">↗</a> see page 227)	This is OnCustomerIdChanged, a member of class Invoice.
	OnCustomerIdChanging ( <a href="#">↗</a> see page 227)	Aenderungsereignis für die Historie
	OnDiscountChanged ( <a href="#">↗</a> see page 227)	This is OnDiscountChanged, a member of class Invoice.
	OnDiscountChanging ( <a href="#">↗</a> see page 228)	This is OnDiscountChanging, a member of class Invoice.
	OnDocumentIdChanged ( <a href="#">↗</a> see page 228)	This is OnDocumentIdChanged, a member of class Invoice.
	OnDocumentIdChanging ( <a href="#">↗</a> see page 228)	This is OnDocumentIdChanging, a member of class Invoice.
	OnIdChanged ( <a href="#">↗</a> see page 228)	This is OnIdChanged, a member of class Invoice.
	OnIdChanging ( <a href="#">↗</a> see page 228)	This is OnIdChanging, a member of class Invoice.
	OnInvoiceRecipientAddressIdChanged ( <a href="#">↗</a> see page 228)	This is OnInvoiceRecipientAddressIdChanged, a member of class Invoice.
	OnInvoiceRecipientAddressIdChanging ( <a href="#">↗</a> see page 228)	This is OnInvoiceRecipientAddressIdChanging, a member of class Invoice.
	OnInvoiceRecipientChanged ( <a href="#">↗</a> see page 229)	This is OnInvoiceRecipientChanged, a member of class Invoice.
	OnInvoiceRecipientChanging ( <a href="#">↗</a> see page 229)	Aenderungsereignis für die Historie
	OnInvoiceTextChanged ( <a href="#">↗</a> see page 229)	This is OnInvoiceTextChanged, a member of class Invoice.
	OnInvoiceTextChanging ( <a href="#">↗</a> see page 229)	Aenderungsereignis für die Historie
	OnInvoiceTypeChanged ( <a href="#">↗</a> see page 229)	This is OnInvoiceTypeChanged, a member of class Invoice.
	OnInvoiceTypeChanging ( <a href="#">↗</a> see page 229)	Aenderungsereignis für die Historie
	OnIsPrintedChanged ( <a href="#">↗</a> see page 230)	This is OnIsPrintedChanged, a member of class Invoice.
	OnIsPrintedChanging ( <a href="#">↗</a> see page 230)	Aenderungsereignis für die Historie
	OnLoaded ( <a href="#">↗</a> see page 230)	Aenderungsereignis für die Historie
	OnPrintDateChanged ( <a href="#">↗</a> see page 230)	This is OnPrintDateChanged, a member of class Invoice.
	OnPrintDateChanging ( <a href="#">↗</a> see page 231)	Aenderungsereignis für die Historie
	OnUserIdChanged ( <a href="#">↗</a> see page 231)	This is OnUserIdChanged, a member of class Invoice.
	OnUserIdChanging ( <a href="#">↗</a> see page 231)	This is OnUserIdChanging, a member of class Invoice.
	OnValidate ( <a href="#">↗</a> see page 231)	This is OnValidate, a member of class Invoice.
	Print ( <a href="#">↗</a> see page 231)	Druckt die Rechnung im Original als PDF erstellt einen Datensatz zum Speichern des PDF in der Datenbank.
	PrintCopy ( <a href="#">↗</a> see page 232)	Erstellt eine Kopie der Original-Rechnung, falls diese bereits gedruckt wurde.
	PrintPreview ( <a href="#">↗</a> see page 232)	Erstellt eine Vorschau des Rechnungs-PDF.
	SendByMail ( <a href="#">↗</a> see page 232)	Generiert und versendet die Rechnung per Email
	SendPropertyChanged ( <a href="#">↗</a> see page 232)	This is SendPropertyChanged, a member of class Invoice.
	SendPropertyChanging ( <a href="#">↗</a> see page 232)	This is SendPropertyChanging, a member of class Invoice.

## 1.1.22.1 Invoice.Invoice Konstruktor

**C#**

```
public Invoice();
```

### Anmerkungen

This is Invoice, a member of class Invoice.

## 1.1.22.2 Invoice Felder

### 1.1.22.2.1 Invoice.\_Adress Feld

**C#**

```
private EntityRef<Address> _Adress;
```

### Anmerkungen

This is \_Adress, a member of class Invoice.

### 1.1.22.2.2 Invoice.\_canceled Feld

**C#**

```
private System.Nullable<bool> _canceled;
```

### Anmerkungen

This is \_canceled, a member of class Invoice.

### 1.1.22.2.3 Invoice.\_CreateDate Feld

**C#**

```
private System.DateTime _CreateDate;
```

### Anmerkungen

This is \_CreateDate, a member of class Invoice.

### 1.1.22.2.4 Invoice.\_Customer Feld

**C#**

```
private EntityRef<Customer> _Customer;
```

### Anmerkungen

This is \_Customer, a member of class Invoice.

### 1.1.22.2.5 Invoice.\_CustomerId Feld

**C#**

```
private System.Guid _CustomerId;
```

### Anmerkungen

This is \_CustomerId, a member of class Invoice.

### 1.1.22.2.6 Invoice.\_discount Feld

**C#**

```
private System.Nullable<decimal> _discount;
```

**Anmerkungen**

This is \_discount, a member of class Invoice.

### 1.1.22.2.7 Invoice.\_Document Feld

**C#**

```
private EntityRef<Document> _Document;
```

**Anmerkungen**

This is \_Document, a member of class Invoice.

### 1.1.22.2.8 Invoice.\_DocumentId Feld

**C#**

```
private System.Nullable<System.Guid> _DocumentId;
```

**Anmerkungen**

This is \_DocumentId, a member of class Invoice.

### 1.1.22.2.9 Invoice.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Invoice.

### 1.1.22.2.10 Invoice.\_InvoiceItem Feld

**C#**

```
private EntitySet<InvoiceItem> _InvoiceItem;
```

**Anmerkungen**

This is \_InvoiceItem, a member of class Invoice.

### 1.1.22.2.11 Invoice.\_InvoiceNumber Feld

**C#**

```
private EntityRef<InvoiceNumber> _InvoiceNumber;
```

**Anmerkungen**

This is \_InvoiceNumber, a member of class Invoice.

### 1.1.22.2.12 Invoice.\_InvoiceRecipient Feld

**C#**

```
private string _InvoiceRecipient;
```

**Anmerkungen**

This is \_InvoiceRecipient, a member of class Invoice.

**1.1.22.2.13 Invoice.\_InvoiceRecipientAdressId Feld****C#**

```
private System.Guid _InvoiceRecipientAdressId;
```

**Anmerkungen**

This is \_InvoiceRecipientAdressId, a member of class Invoice.

**1.1.22.2.14 Invoice.\_InvoiceText Feld****C#**

```
private string _InvoiceText;
```

**Anmerkungen**

This is \_InvoiceText, a member of class Invoice.

**1.1.22.2.15 Invoice.\_InvoiceType Feld****C#**

```
private System.Nullable<System.Guid> _InvoiceType;
```

**Anmerkungen**

This is \_InvoiceType, a member of class Invoice.

**1.1.22.2.16 Invoice.\_InvoiceTypes Feld****C#**

```
private EntityRef<InvoiceTypes> _InvoiceTypes;
```

**Anmerkungen**

This is \_InvoiceTypes, a member of class Invoice.

**1.1.22.2.17 Invoice.\_IsPrinted Feld****C#**

```
private bool _IsPrinted;
```

**Anmerkungen**

This is \_IsPrinted, a member of class Invoice.

**1.1.22.2.18 Invoice.\_OrderInvoice Feld****C#**

```
private EntitySet<OrderInvoice> _OrderInvoice;
```

**Anmerkungen**

This is \_OrderInvoice, a member of class Invoice.

### 1.1.22.2.19 Invoice.\_PrintDate Feld

**C#**

```
private System.Nullable<System.DateTime> _PrintDate;
```

**Anmerkungen**

This is \_PrintDate, a member of class Invoice.

### 1.1.22.2.20 Invoice.\_User Feld

**C#**

```
private EntityRef<User> _User;
```

**Anmerkungen**

This is \_User, a member of class Invoice.

### 1.1.22.2.21 Invoice.\_UserId Feld

**C#**

```
private System.Nullable<System.Guid> _UserId;
```

**Anmerkungen**

This is \_UserId, a member of class Invoice.

### 1.1.22.2.22 Invoice.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Invoice.

## 1.1.22.3 Invoice Methoden

### 1.1.22.3.1 Invoice.AddInvoiceItem Methode

Fügt der Rechnung eine neue Rechnungsposition hinzu.

**C#**

```
public InvoiceItem AddInvoiceItem(string name, decimal amount, int count, Guid?  
orderItemId, Guid? costCenterId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string name	Bezeichnung für die Rechnungsposition.
decimal amount	Betrag der Rechnungsposition.
int count	Anzahl für die Position.
Guid? orderItemId	Id (see page 235) der Auftragsposition, falls vorhande.
Guid? costCenterId	Id (see page 235) der Kostenstelle, falls benötigt.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Die neue Rechnungsposition.

**1.1.22.3.2 Invoice.attach\_InvoiceItem Methode****C#**

```
private void attach_InvoiceItem(InvoiceItem entity);
```

**Anmerkungen**

This is attach\_InvoiceItem, a member of class Invoice.

**1.1.22.3.3 Invoice.attach\_OrderInvoice Methode****C#**

```
private void attach_OrderInvoice(OrderInvoice entity);
```

**Anmerkungen**

This is attach\_OrderInvoice, a member of class Invoice.

**1.1.22.3.4 Invoice.Cancel Methode**

Storniert eine Rechnung.

**C#**

```
public void Cancel(DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	

**1.1.22.3.5 Invoice.CreateInvoice Methode**

Erstellt eine neue Rechnung.

**C#**

```
public static Invoice CreateInvoice(DataClasses1DataContext dbContext, Guid userId, string invoiceRecipient, Guid invoiceRecipientAdressId, Guid customerId, double? discount, string invTypeId);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.
Guid userId	Id (see page 235) des Benutzers.
string invoiceRecipient	Rechnungsempfänger.
Guid invoiceRecipientAdressId	Adresse des Rechnungsempfängers.
Guid customerId	Id (see page 235) des Kunden.

**Resultate**

Die neue Rechnung.

**1.1.22.3.6 Invoice.detach\_InvoiceItem Methode****C#**

```
private void detach_InvoiceItem(InvoiceItem entity);
```

**Anmerkungen**

This is detach\_InvoiceItem, a member of class Invoice.

**1.1.22.3.7 Invoice.detach\_OrderInvoice Methode****C#**

```
private void detach_OrderInvoice(OrderInvoice entity);
```

**Anmerkungen**

This is detach\_OrderInvoice, a member of class Invoice.

**1.1.22.3.8 Invoice.GetDefaultInvoiceText Methode**

Gibt den Standart Rechnungstext zurÃ¼ck, abhaengig vom Kunden

**C#**

```
public static string GetDefaultInvoiceText(DataClasses1DataContext dbContext, Guid customerId, Guid userId);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbank Kontext
Guid customerId	Kundenid
Guid userId	Benutzerid

**Resultate**

Rechnungstext

**1.1.22.3.9 Invoice.GetInitialInvoiceAdress Methode**

Gibt die initiale Rechnungsadresse anhand der Kundendaten und des Standorts der AuftrÃ¤ge in der Rechnung zurÃ¼ck.

**C#**

```
public static Address GetInitialInvoiceAddress(Guid customerId, Guid? locationId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid customerId	Id (see page 235) des Kunden.
Guid? locationId	Id (see page 235) des Standorts, falls vorhanden.
DataClasses1DataContext dbContext	Datenbankkontext fÃ¼r die Abfrage.

**Resultate**

Die Rechnungsadresse.

**1.1.22.3.10 Invoice.GetInvoiceDispatchAdress Methode**

Gibt die Rechnungsversandadresse anhand der Kundendaten und des Standorts der AuftrÃ¤ge in der Rechnung zurÃ¼ck.

**C#**

```
public static Address GetInvoiceDispatchAddress(Guid customerId, Guid? locationId, DataClasses1DataContext dbContext);
```

**Resultate**

Die Rechnungsversandadresse.

### 1.1.22.3.11 Invoice.GetInvoiceTypeId Methode

Gibt die Guid des Rechnungstyps zurück

**C#**

```
public static Guid? GetInvoiceTypeId(DataClasses1DataContext dbContext, string myWhere);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbank Kontext
string myWhere	Rechnungstyp

**Resultate**

Rechnungstyp ID

### 1.1.22.3.12 Invoice.OnCanceledChanged Methode

**C#**

```
private void OnCanceledChanged();
```

**Anmerkungen**

This is OnCanceledChanged, a member of class Invoice.

### 1.1.22.3.13 Invoice.OnCanceledChanging Methode

**C#**

```
private void OnCanceledChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnCanceledChanging, a member of class Invoice.

### 1.1.22.3.14 Invoice.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.22.3.15 Invoice.OnCreateDateChanged Methode

**C#**

```
private void OnCreateDateChanged();
```

**Anmerkungen**

This is OnCreateDateChanged, a member of class Invoice.

### 1.1.22.3.16 OnCreateDateChanging Methode

### 1.1.22.3.16.1 Invoice.OnCreateDateChanging Methode (DateTime)

Aenderungsevents für die Historie

**C#**

```
private void OnCreateDateChanging(DateTime value);
```

**Parameter**

Parameter	Beschreibung
DateTime value	

### 1.1.22.3.16.2 Invoice.OnCreateDateChanging Methode (System.DateTime)

**C#**

```
private void OnCreateDateChanging(System.DateTime value);
```

**Anmerkungen**

This is OnCreateDateChanging, a member of class Invoice.

### 1.1.22.3.17 Invoice.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class Invoice.

### 1.1.22.3.18 OnCustomerIdChanging Methode

#### 1.1.22.3.18.1 Invoice.OnCustomerIdChanging Methode (Guid)

Aenderungsevents für die Historie

**C#**

```
private void OnCustomerIdChanging(Guid value);
```

**Parameter**

Parameter	Beschreibung
Guid value	

#### 1.1.22.3.18.2 Invoice.OnCustomerIdChanging Methode (System.Guid)

**C#**

```
private void OnCustomerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class Invoice.

### 1.1.22.3.19 Invoice.OnDiscountChanged Methode

**C#**

```
private void OnDiscountChanged();
```

**Anmerkungen**

This is OnDiscountChanged, a member of class Invoice.

### 1.1.22.3.20 Invoice.OnDiscountChanging Methode

**C#**

```
private void OnDiscountChanging(System.Nullable<decimal> value);
```

**Anmerkungen**

This is OnDiscountChanging, a member of class Invoice.

### 1.1.22.3.21 Invoice.OnDocumentIdChanged Methode

**C#**

```
private void OnDocumentIdChanged();
```

**Anmerkungen**

This is OnDocumentIdChanged, a member of class Invoice.

### 1.1.22.3.22 Invoice.OnDocumentIdChanging Methode

**C#**

```
private void OnDocumentIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnDocumentIdChanging, a member of class Invoice.

### 1.1.22.3.23 Invoice.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Invoice.

### 1.1.22.3.24 Invoice.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Invoice.

### 1.1.22.3.25 Invoice.OnInvoiceRecipientAdressIdChanged Methode

**C#**

```
private void OnInvoiceRecipientAdressIdChanged();
```

**Anmerkungen**

This is OnInvoiceRecipientAdressIdChanged, a member of class Invoice.

### 1.1.22.3.26 Invoice.OnInvoiceRecipientAdressIdChanging Methode

**C#**

```
private void OnInvoiceRecipientAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnInvoiceRecipientAdressIdChanging, a member of class Invoice.

**1.1.22.3.27 Invoice.OnInvoiceRecipientChanged Methode****C#**

```
private void OnInvoiceRecipientChanged();
```

**Anmerkungen**

This is OnInvoiceRecipientChanged, a member of class Invoice.

**1.1.22.3.28 Invoice.OnInvoiceRecipientChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnInvoiceRecipientChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.22.3.29 Invoice.OnInvoiceTextChanged Methode****C#**

```
private void OnInvoiceTextChanged();
```

**Anmerkungen**

This is OnInvoiceTextChanged, a member of class Invoice.

**1.1.22.3.30 Invoice.OnInvoiceTextChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnInvoiceTextChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.22.3.31 Invoice.OnInvoiceTypeChanged Methode****C#**

```
private void OnInvoiceTypeChanged();
```

**Anmerkungen**

This is OnInvoiceTypeChanged, a member of class Invoice.

**1.1.22.3.32 OnInvoiceTypeChanging Methode****1.1.22.3.32.1 Invoice.OnInvoiceTypeChanging Methode (Guid?)**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnInvoiceTypeChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.22.3.32.2 Invoice.OnInvoiceTypeChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnInvoiceTypeChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnInvoiceTypeChanging, a member of class Invoice.

**1.1.22.3.33 Invoice.OnIsPrintedChanged Methode****C#**

```
private void OnIsPrintedChanged();
```

**Anmerkungen**

This is OnIsPrintedChanged, a member of class Invoice.

**1.1.22.3.34 Invoice.OnIsPrintedChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnIsPrintedChanging(bool value);
```

**Parameter**

Parameter	Beschreibung
bool value	

**1.1.22.3.35 Invoice.OnLoaded Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.22.3.36 Invoice.OnPrintDateChanged Methode****C#**

```
private void OnPrintDateChanged();
```

**Anmerkungen**

This is OnPrintDateChanged, a member of class Invoice.

**1.1.22.3.37 OnPrintDateChanging Methode**

### 1.1.22.3.37.1 Invoice.OnPrintDateChanging Methode (DateTime?)

Änderungsereignis für die Historie

**C#**

```
private void OnPrintDateChanging(DateTime? value);
```

**Parameter**

Parameter	Beschreibung
DateTime? value	

### 1.1.22.3.37.2 Invoice.OnPrintDateChanging Methode (System.Nullable<System.DateTime>)

**C#**

```
private void OnPrintDateChanging(System.Nullable<System.DateTime> value);
```

**Anmerkungen**

This is OnPrintDateChanging, a member of class Invoice.

### 1.1.22.3.38 Invoice.OnUserIdChanged Methode

**C#**

```
private void OnUserIdChanged();
```

**Anmerkungen**

This is OnUserIdChanged, a member of class Invoice.

### 1.1.22.3.39 Invoice.OnUserIdChanging Methode

**C#**

```
private void OnUserIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnUserIdChanging, a member of class Invoice.

### 1.1.22.3.40 Invoice.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Invoice.

### 1.1.22.3.41 Invoice.Print Methode

Druckt die Rechnung im Original als PDF erstellt einen Datensatz zum Speichern des PDF in der Datenbank.

**C#**

```
public void Print(DataClasses1DataContext dbContext, MemoryStream ms, string logoFilePath, bool defaultAccountNumber);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

MemoryStream ms	MemoryStream, in den das PDF geschrieben wird.
string logoFilePath	Dateipfad zum Logo f��r das PDF.
bool defaultAccountNumber	Das Standart definierte Konto

### 1.1.22.3.42 Invoice.PrintCopy Methode

Erstellt eine Kopie der Original-Rechnung, falls diese bereits gedruckt wurde.

**C#**

```
public void PrintCopy(MemoryStream ms);
```

**Parameter**

Parameter	Beschreibung
MemoryStream ms	MemoryStream, in den die PDF-Daten geschrieben werden.

### 1.1.22.3.43 Invoice.PrintPreview Methode

Erstellt eine Vorschau des Rechnungs-PDF.

**C#**

```
public void PrintPreview(DataClasses1DataContext dbContext, MemoryStream ms, string logoFilePath);
```

**Parameter**

Parameter	Beschreibung
MemoryStream ms	MemoryStream, in den die PDF-Daten geschrieben werden.
string logoFilePath	Dateipfad zum Logo f��r das PDF.

### 1.1.22.3.44 Invoice.SendByMail Methode

Generiert und versendet die Rechnung per Email

**C#**

```
public static void SendByMail(DataClasses1DataContext dbContext, Guid invoiceId, string smtpServer, string fromAddress, List<string> toAdresses);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbank Kontext
Guid invoiceId	Rechnungsid
string smtpServer	SMTP
string fromAddress	Absender
List<string> toAdresses	Empf��nger

### 1.1.22.3.45 Invoice.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Invoice.

### 1.1.22.3.46 Invoice.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Invoice.

## 1.1.22.4 Invoice Eigenschaften

### 1.1.22.4.1 Invoice.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Invoice",  
Storage="_Adress", ThisKey="InvoiceRecipientAdressId", OtherKey="Id", IsForeignKey=true)]  
public Address Adress;
```

**Anmerkungen**

This is Adress, a member of class Invoice.

### 1.1.22.4.2 Invoice.AuthorativeChargeSum Eigenschaft

Summe der amtlichen Gebuehren

**C#**

```
public decimal AuthorativeChargeSum;
```

### 1.1.22.4.3 Invoice.canceled Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_canceled", DbType="Bit")]  
public System.Nullable<bool> canceled;
```

**Anmerkungen**

This is canceled, a member of class Invoice.

### 1.1.22.4.4 Invoice.CreateDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CreateDate", DbType="DateTime  
NOT NULL")]  
public System.DateTime CreateDate;
```

**Anmerkungen**

This is CreateDate, a member of class Invoice.

### 1.1.22.4.5 Invoice.Customer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_Invoice",  
Storage="_Customer", ThisKey="CustomerId", OtherKey="Id", IsForeignKey=true)]  
public Customer Customer;
```

**Anmerkungen**

This is Customer, a member of class Invoice.

### 1.1.22.4.6 Invoice.CustomerId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",
DbType="UniqueIdentifier NOT NULL")]
public System.Guid CustomerId;
```

#### Anmerkungen

This is CustomerId, a member of class Invoice.

### 1.1.22.4.7 Invoice.discount Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_discount",
DbType="Decimal(18,0)")]
public System.Nullable<decimal> discount;
```

#### Anmerkungen

This is discount, a member of class Invoice.

### 1.1.22.4.8 Invoice.Document Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Document_Invoice",
Storage="_Document", ThisKey="DocumentId", OtherKey="Id", IsForeignKey=true)]
public Document Document;
```

#### Anmerkungen

This is Document, a member of class Invoice.

### 1.1.22.4.9 Invoice.DocumentId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DocumentId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> DocumentId;
```

#### Anmerkungen

This is DocumentId, a member of class Invoice.

### 1.1.22.4.10 Invoice.EntityState Eigenschaft

#### C#

```
public EntityState EntityState;
```

#### Anmerkungen

This is EntityState, a member of class Invoice.

### 1.1.22.4.11 Invoice.GrandTotal Eigenschaft

Endbetrag

#### C#

```
public decimal GrandTotal;
```

### 1.1.22.4.12 Invoice.Id Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

#### Anmerkungen

This is Id, a member of class Invoice.

### 1.1.22.4.13 Invoice.InvoiceItem Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Invoice_InvoiceItem",  
Storage="_InvoiceItem", ThisKey="Id", OtherKey="InvoiceId")]  
public EntitySet<InvoiceItem> InvoiceItem;
```

#### Anmerkungen

This is InvoiceItem, a member of class Invoice.

### 1.1.22.4.14 Invoice.InvoiceNumber Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Invoice_InvoiceNumber",  
Storage="_InvoiceNumber", ThisKey="Id", OtherKey="InvoiceId", IsUnique=true,  
IsForeignKey=false)]  
public InvoiceNumber InvoiceNumber;
```

#### Anmerkungen

This is InvoiceNumber, a member of class Invoice.

### 1.1.22.4.15 Invoice.InvoiceRecipient Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceRecipient",  
DbType="VarChar(100) NOT NULL", CanBeNull=false)]  
public string InvoiceRecipient;
```

#### Anmerkungen

This is InvoiceRecipient, a member of class Invoice.

### 1.1.22.4.16 Invoice.InvoiceRecipientAdressId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceRecipientAdressId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid InvoiceRecipientAdressId;
```

#### Anmerkungen

This is InvoiceRecipientAdressId, a member of class Invoice.

### 1.1.22.4.17 Invoice.InvoiceText Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceText",
```

```
DbType="varchar(500)")]
public string InvoiceText;
```

**Anmerkungen**

This is InvoiceText, a member of class Invoice.

### 1.1.22.4.18 Invoice.InvoiceType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceType",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> InvoiceType;
```

**Anmerkungen**

This is InvoiceType, a member of class Invoice.

### 1.1.22.4.19 Invoice.InvoiceTypes Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="InvoiceTypes_Invoice",
Storage="_InvoiceTypes", ThisKey="InvoiceType", OtherKey="ID", IsForeignKey=true,
DeleteRule="CASCADE")]
public InvoiceTypes InvoiceTypes;
```

**Anmerkungen**

This is InvoiceTypes, a member of class Invoice.

### 1.1.22.4.20 Invoice.IsPrinted Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsPrinted", DbType="Bit NOT
NULL")]
public bool IsPrinted;
```

**Anmerkungen**

This is IsPrinted, a member of class Invoice.

### 1.1.22.4.21 Invoice.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Invoice.

### 1.1.22.4.22 Invoice.LogDbContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDbContext;
```

**Anmerkungen**

This is LogDbContext, a member of class Invoice.

### 1.1.22.4.23 Invoice.NetSum Eigenschaft

Nettobetrag

**C#**

```
public decimal NetSum;
```

### 1.1.22.4.24 Invoice.OrderInvoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Invoice_OrderInvoice",  
Storage="_OrderInvoice", ThisKey="Id", OtherKey="InvoiceId")]  
public EntitySet<OrderInvoice> OrderInvoice;
```

#### Anmerkungen

This is OrderInvoice, a member of class Invoice.

### 1.1.22.4.25 Invoice.PrintDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PrintDate", DbType="DateTime")]  
public System.Nullable<System.DateTime> PrintDate;
```

#### Anmerkungen

This is PrintDate, a member of class Invoice.

### 1.1.22.4.26 Invoice.TaxFreeItemsGrouped Eigenschaft

Gruppe der Steuerfreien Rechnungspositionen

**C#**

```
public List<KeyValuePair<string, decimal>> TaxFreeItemsGrouped;
```

### 1.1.22.4.27 Invoice.TaxValue Eigenschaft

MwSt

**C#**

```
public decimal TaxValue;
```

### 1.1.22.4.28 Invoice.User Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_Invoice",  
Storage="_User", ThisKey="UserId", OtherKey="Id", IsForeignKey=true)]  
public User User;
```

#### Anmerkungen

This is User, a member of class Invoice.

### 1.1.22.4.29 Invoice.UserId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_UserId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> UserId;
```

Anmerkungen

This is UserId, a member of class Invoice.

1.1.22.5 Invoice Ereignisse

1.1.22.5.1 Invoice.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class Invoice.

1.1.22.5.2 Invoice.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class Invoice.

1.1.23 InvoiceHelper Klasse

Klassen Hierarchie

C#

```
public class InvoiceHelper;
```

Datei

InvoiceHelper.cs (🔗 see page 697)

Anmerkungen

This is class KVSCCommon.Database.InvoiceHelper.

Mitglieder

InvoiceHelper Methoden

	Name	Beschreibung
🔗📄	CreateAccounts (🔗 see page 239)	Erstelle zu der jeweiligen Rechnung ein neues ErlÄßskonto

```

Anmerkungen

This is \_InvoiceId, a member of class InvoiceIDInvoiceRunID.

## 1.1.24.2.3 InvoiceIDInvoiceRunID.\_InvoiceRunId Feld

C#

```
private System.Nullable<System.Guid> _InvoiceRunId;
```

Anmerkungen

This is \_InvoiceRunId, a member of class InvoiceIDInvoiceRunID.

## 1.1.24.2.4 InvoiceIDInvoiceRunID.\_Updated Feld

C#

```
private System.Nullable<System.DateTime> _Updated;
```

Anmerkungen

This is \_Updated, a member of class InvoiceIDInvoiceRunID.

## 1.1.24.3 InvoiceIDInvoiceRunID Eigenschaften

### 1.1.24.3.1 InvoiceIDInvoiceRunID.Complete Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Complete", DbType="Bit")]
public System.Nullable<bool> Complete;
```

**Anmerkungen**

This is Complete, a member of class InvoiceIDInvoiceRunID.

### 1.1.24.3.2 InvoiceIDInvoiceRunID.InvoiceId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> InvoiceId;
```

**Anmerkungen**

This is InvoiceId, a member of class InvoiceIDInvoiceRunID.

### 1.1.24.3.3 InvoiceIDInvoiceRunID.InvoiceRunId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceRunId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> InvoiceRunId;
```

**Anmerkungen**

This is InvoiceRunId, a member of class InvoiceIDInvoiceRunID.

### 1.1.24.3.4 InvoiceIDInvoiceRunID.Updated Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Updated", DbType="DateTime")]
public System.Nullable<System.DateTime> Updated;
```

**Anmerkungen**

This is Updated, a member of class InvoiceIDInvoiceRunID.

## 1.1.25 InvoiceItem Klasse

Erweiterungsklasse für die Rechnungspositionen

**Klassen Hierarchie**

**C#**

```
public class InvoiceItem : ILogging;
```

	OnVATChanged ( <a href="#">↗</a> see page 251)	This is OnVATChanged, a member of class Invoiceltem.
	OnVATChanging ( <a href="#">↗</a> see page 251)	Aenderungsevents fÄ¼r die Historie
	SendPropertyChanged ( <a href="#">↗</a> see page 251)	This is SendPropertyChanged, a member of class Invoiceltem.
	SendPropertyChanging ( <a href="#">↗</a> see page 251)	This is SendPropertyChanging, a member of class Invoiceltem.

## 1.1.25.1 InvoiceItem.InvoiceItem Konstruktor

**C#**

```
public InvoiceItem();
```

**Anmerkungen**

This is InvoiceItem, a member of class InvoiceItem.

## 1.1.25.2 InvoiceItem Felder

### 1.1.25.2.1 InvoiceItem.\_AccountNumber Feld

**C#**

```
private string _AccountNumber;
```

**Anmerkungen**

This is \_AccountNumber, a member of class InvoiceItem.

### 1.1.25.2.2 InvoiceItem.\_Amount Feld

**C#**

```
private decimal _Amount;
```

**Anmerkungen**

This is \_Amount, a member of class InvoiceItem.

### 1.1.25.2.3 InvoiceItem.\_CostCenter Feld

**C#**

```
private EntityRef<CostCenter> _CostCenter;
```

**Anmerkungen**

This is \_CostCenter, a member of class InvoiceItem.

### 1.1.25.2.4 InvoiceItem.\_CostcenterId Feld

**C#**

```
private System.Nullable<System.Guid> _CostcenterId;
```

**Anmerkungen**

This is \_CostcenterId, a member of class InvoiceItem.

### 1.1.25.2.5 InvoiceItem.\_Count Feld

**C#**

```
private int _Count;
```

**Anmerkungen**

This is \_Count, a member of class InvoiceItem.

### 1.1.25.2.6 Invoiceltem.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Invoiceltem.

### 1.1.25.2.7 Invoiceltem.\_Invoice Feld

**C#**

```
private EntityRef<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class Invoiceltem.

### 1.1.25.2.8 Invoiceltem.\_Invoiceld Feld

**C#**

```
private System.Guid _InvoiceId;
```

**Anmerkungen**

This is \_Invoiceld, a member of class Invoiceltem.

### 1.1.25.2.9 Invoiceltem.\_InvoiceltemAccountItem Feld

**C#**

```
private EntitySet<InvoiceItemAccountItem> _InvoiceItemAccountItem;
```

**Anmerkungen**

This is \_InvoiceltemAccountItem, a member of class Invoiceltem.

### 1.1.25.2.10 Invoiceltem.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class Invoiceltem.

### 1.1.25.2.11 Invoiceltem.\_OrderItem Feld

**C#**

```
private EntityRef<OrderItem> _OrderItem;
```

**Anmerkungen**

This is \_OrderItem, a member of class Invoiceltem.

### 1.1.25.2.12 Invoiceltem.\_OrderItemId Feld

**C#**

```
private System.Nullable<System.Guid> _OrderItemId;
```

**Anmerkungen**

This is \_OrderItemId, a member of class Invoiceltem.

**1.1.25.2.13 Invoiceltem.\_VAT Feld****C#**

```
private decimal _VAT;
```

**Anmerkungen**

This is \_VAT, a member of class Invoiceltem.

**1.1.25.2.14 Invoiceltem.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Invoiceltem.

**1.1.25.3 Invoiceltem Methoden****1.1.25.3.1 Invoiceltem.attach\_InvoiceltemAccountItem Methode****C#**

```
private void attach_InvoiceItemAccountItem(InvoiceItemAccountItem entity);
```

**Anmerkungen**

This is attach\_InvoiceltemAccountItem, a member of class Invoiceltem.

**1.1.25.3.2 Invoiceltem.detach\_InvoiceltemAccountItem Methode****C#**

```
private void detach_InvoiceItemAccountItem(InvoiceItemAccountItem entity);
```

**Anmerkungen**

This is detach\_InvoiceltemAccountItem, a member of class Invoiceltem.

**1.1.25.3.3 Invoiceltem.OnAccountNumberChanged Methode****C#**

```
private void OnAccountNumberChanged();
```

**Anmerkungen**

This is OnAccountNumberChanged, a member of class Invoiceltem.

**1.1.25.3.4 Invoiceltem.OnAccountNumberChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnAccountNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.25.3.5 Invoiceltem.OnAmountChanged Methode

**C#**

```
private void OnAmountChanged();
```

**Anmerkungen**

This is OnAmountChanged, a member of class Invoiceltem.

### 1.1.25.3.6 Invoiceltem.OnAmountChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnAmountChanging(decimal value);
```

**Parameter**

Parameter	Beschreibung
decimal value	

### 1.1.25.3.7 Invoiceltem.OnCostcenterIdChanged Methode

**C#**

```
private void OnCostcenterIdChanged();
```

**Anmerkungen**

This is OnCostcenterIdChanged, a member of class Invoiceltem.

### 1.1.25.3.8 OnCostcenterIdChanging Methode

#### 1.1.25.3.8.1 Invoiceltem.OnCostcenterIdChanging Methode (Guid?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnCostcenterIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

#### 1.1.25.3.8.2 Invoiceltem.OnCostcenterIdChanging Methode (System.Nullable<System.Guid>)

**C#**

```
private void OnCostcenterIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnCostcenterIdChanging, a member of class Invoiceltem.

### 1.1.25.3.9 Invoiceltem.OnCountChanged Methode

**C#**

```
private void OnCountChanged();
```

**Anmerkungen**

This is OnCountChanged, a member of class Invoiceltem.

### 1.1.25.3.10 Invoiceltem.OnCountChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCountChanging(int value);
```

**Parameter**

Parameter	Beschreibung
int value	

### 1.1.25.3.11 Invoiceltem.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.25.3.12 Invoiceltem.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Invoiceltem.

### 1.1.25.3.13 Invoiceltem.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Invoiceltem.

### 1.1.25.3.14 Invoiceltem.OnInvoiceIdChanged Methode

**C#**

```
private void OnInvoiceIdChanged();
```

**Anmerkungen**

This is OnInvoiceIdChanged, a member of class Invoiceltem.

### 1.1.25.3.15 Invoiceltem.OnInvoiceIdChanging Methode

**C#**

```
private void OnInvoiceIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnInvoiceIdChanging, a member of class Invoiceltem.

### 1.1.25.3.16 Invoiceltem.OnLoaded Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnLoaded();
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.25.3.17 Invoiceltem.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

#### Anmerkungen

This is OnNameChanged, a member of class Invoiceltem.

### 1.1.25.3.18 Invoiceltem.OnNameChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnNameChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.25.3.19 Invoiceltem.OnOrderItemIdChanged Methode

**C#**

```
private void OnOrderItemIdChanged();
```

#### Anmerkungen

This is OnOrderItemIdChanged, a member of class Invoiceltem.

### 1.1.25.3.20 OnOrderItemIdChanging Methode

#### 1.1.25.3.20.1 Invoiceltem.OnOrderItemIdChanging Methode (Guid?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnOrderItemIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.25.3.20.2 Invoiceltem.OnOrderItemIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnOrderItemIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnOrderItemIdChanging, a member of class Invoiceltem.

**1.1.25.3.21 Invoiceltem.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Invoiceltem.

**1.1.25.3.22 Invoiceltem.OnVATChanged Methode****C#**

```
private void OnVATChanged();
```

**Anmerkungen**

This is OnVATChanged, a member of class Invoiceltem.

**1.1.25.3.23 Invoiceltem.OnVATChanging Methode**

Aenderungsevents f r die Historie

**C#**

```
private void OnVATChanging(decimal value);
```

**Parameter**

Parameter	Beschreibung
decimal value	

**1.1.25.3.24 Invoiceltem.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Invoiceltem.

**1.1.25.3.25 Invoiceltem.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Invoiceltem.

## 1.1.25.4 Invoiceltem Eigenschaften

### 1.1.25.4.1 Invoiceltem.AccountNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AccountNumber",  
DbType="VarChar(50)")]  
public string AccountNumber;
```

**Anmerkungen**

This is AccountNumber, a member of class Invoiceltem.

### 1.1.25.4.2 Invoiceltem.Amount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Amount", DbType="Money NOT  
NULL")]  
public decimal Amount;
```

**Anmerkungen**

This is Amount, a member of class Invoiceltem.

### 1.1.25.4.3 Invoiceltem.CostCenter Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="CostCenter_InvoiceItem",  
Storage="_CostCenter", ThisKey="CostcenterId", OtherKey="Id", IsForeignKey=true)]  
public CostCenter CostCenter;
```

**Anmerkungen**

This is CostCenter, a member of class Invoiceltem.

### 1.1.25.4.4 Invoiceltem.CostcenterId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CostcenterId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> CostcenterId;
```

**Anmerkungen**

This is CostcenterId, a member of class Invoiceltem.

### 1.1.25.4.5 Invoiceltem.Count Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Count", DbType="Int NOT NULL")]  
public int Count;
```

**Anmerkungen**

This is Count, a member of class Invoiceltem.

### 1.1.25.4.6 Invoiceltem.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

#### Anmerkungen

This is EntityState, a member of class Invoiceltem.

### 1.1.25.4.7 Invoiceltem.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

#### Anmerkungen

This is Id, a member of class Invoiceltem.

### 1.1.25.4.8 Invoiceltem.Invoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Invoice_InvoiceItem",  
Storage="_Invoice", ThisKey="InvoiceId", OtherKey="Id", IsForeignKey=true)]  
public Invoice Invoice;
```

#### Anmerkungen

This is Invoice, a member of class Invoiceltem.

### 1.1.25.4.9 Invoiceltem.Invoiceld Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid InvoiceId;
```

#### Anmerkungen

This is Invoiceld, a member of class Invoiceltem.

### 1.1.25.4.10 Invoiceltem.InvoiceltemAccountItem Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="InvoiceItem_InvoiceItemAccountItem",  
Storage="_InvoiceItemAccountItem", ThisKey="Id", OtherKey="InvoiceItemId")]  
public EntitySet<InvoiceItemAccountItem> InvoiceItemAccountItem;
```

#### Anmerkungen

This is InvoiceltemAccountItem, a member of class Invoiceltem.

### 1.1.25.4.11 Invoiceltem.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class InvoiceItem.

**1.1.25.4.12 InvoiceItem.LogDbContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDbContext;
```

**Anmerkungen**

This is LogDbContext, a member of class InvoiceItem.

**1.1.25.4.13 InvoiceItem.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class InvoiceItem.

**1.1.25.4.14 InvoiceItem.OrderItem Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderItem_InvoiceItem",  
Storage="_OrderItem", ThisKey="OrderItemId", OtherKey="Id", IsForeignKey=true)]  
public OrderItem OrderItem;
```

**Anmerkungen**

This is OrderItem, a member of class InvoiceItem.

**1.1.25.4.15 InvoiceItem.OrderItemId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderItemId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> OrderItemId;
```

**Anmerkungen**

This is OrderItemId, a member of class InvoiceItem.

**1.1.25.4.16 InvoiceItem.VAT Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VAT", DbType="Decimal(4,2) NOT NULL")]  
public decimal VAT;
```

**Anmerkungen**

This is VAT, a member of class InvoiceItem.

**1.1.25.5 InvoiceItem Ereignisse**

1.1.25.5.1 InvoiceItem.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class InvoiceItem.

1.1.25.5.2 InvoiceItem.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class InvoiceItem.

1.1.26 InvoiceItemAccountItem Klasse

Erweiterungsklasse für die Rechnungspositionen/Erloeskonten

Klassen Hierarchie

C#

```
public class InvoiceItemAccountItem : ILogging;
```

Datei

InvoiceItemAccountItem.cs (see page 697)

Mitglieder

ILogging Eigenschaften

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (see page 658)	This is LogDbContext, a member of class ILogging.

InvoiceItemAccountItem Klasse

	Name	Beschreibung
	EntityState (see page 261)	This is EntityState, a member of class InvoiceItemAccountItem.

## 1.1.26.1 InvoiceItemAccountItem.InvoiceItemAccountItem Konstruktor

### C#

```
public InvoiceItemAccountItem();
```

### Anmerkungen

This is InvoiceItemAccountItem, a member of class InvoiceItemAccountItem.

## 1.1.26.2 InvoiceItemAccountItem Felder

### 1.1.26.2.1 InvoiceItemAccountItem.\_IIACCID Feld

### C#

```
private System.Guid _IIACCID;
```

### Anmerkungen

This is \_IIACCID, a member of class InvoiceItemAccountItem.

### 1.1.26.2.2 InvoiceItemAccountItem.\_InvoiceItem Feld

### C#

```
private EntityRef<InvoiceItem> _InvoiceItem;
```

### Anmerkungen

This is \_InvoiceItem, a member of class InvoiceItemAccountItem.

### 1.1.26.2.3 InvoiceItemAccountItem.\_InvoiceItemId Feld

**C#**

```
private System.Guid _InvoiceItemId;
```

**Anmerkungen**

This is \_InvoiceItemId, a member of class InvoiceItemAccountItem.

### 1.1.26.2.4 InvoiceItemAccountItem.\_RevenueAccountText Feld

**C#**

```
private string _RevenueAccountText;
```

**Anmerkungen**

This is \_RevenueAccountText, a member of class InvoiceItemAccountItem.

### 1.1.26.2.5 InvoiceItemAccountItem.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class InvoiceItemAccountItem.

## 1.1.26.3 InvoiceItemAccountItem Methoden

### 1.1.26.3.1 InvoiceItemAccountItem.OnCreated Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.26.3.2 InvoiceItemAccountItem.OnIACCIDChanged Methode

**C#**

```
private void OnIACCIDChanged();
```

**Anmerkungen**

This is OnIACCIDChanged, a member of class InvoiceItemAccountItem.

### 1.1.26.3.3 OnIACCIDChanging Methode

#### 1.1.26.3.3.1 InvoiceItemAccountItem.OnIACCIDChanging Methode (Guid)

Aenderungsevents f  r die Historie

**C#**

```
private void OnIIACCIDChanging(Guid value);
```

**Parameter**

Parameter	Beschreibung
Guid value	

**1.1.26.3.3.2 InvoiceItemAccountItem.OnIIACCIDChanging Methode (System.Guid)****C#**

```
private void OnIIACCIDChanging(System.Guid value);
```

**Anmerkungen**

This is OnIIACCIDChanging, a member of class InvoiceItemAccountItem.

**1.1.26.3.4 InvoiceItemAccountItem.OnInvoiceItemIdChanged Methode****C#**

```
private void OnInvoiceItemIdChanged();
```

**Anmerkungen**

This is OnInvoiceItemIdChanged, a member of class InvoiceItemAccountItem.

**1.1.26.3.5 OnInvoiceItemIdChanging Methode****1.1.26.3.5.1 InvoiceItemAccountItem.OnInvoiceItemIdChanging Methode (Guid)**

Aenderungsevents für die Historie

**C#**

```
private void OnInvoiceItemIdChanging(Guid value);
```

**Parameter**

Parameter	Beschreibung
Guid value	

**1.1.26.3.5.2 InvoiceItemAccountItem.OnInvoiceItemIdChanging Methode (System.Guid)****C#**

```
private void OnInvoiceItemIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnInvoiceItemIdChanging, a member of class InvoiceItemAccountItem.

**1.1.26.3.6 InvoiceItemAccountItem.OnLoaded Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.26.3.7 InvoiceltemAccountltem.OnRevenueAccountTextChanged Methode

**C#**

```
private void OnRevenueAccountTextChanged();
```

**Anmerkungen**

This is OnRevenueAccountTextChanged, a member of class InvoiceltemAccountltem.

### 1.1.26.3.8 InvoiceltemAccountltem.OnRevenueAccountTextChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnRevenueAccountTextChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.26.3.9 InvoiceltemAccountltem.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class InvoiceltemAccountltem.

### 1.1.26.3.10 InvoiceltemAccountltem.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class InvoiceltemAccountltem.

### 1.1.26.3.11 InvoiceltemAccountltem.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class InvoiceltemAccountltem.

### 1.1.26.3.12 InvoiceltemAccountltem.UpdateAuthorativeAccounts Methode

  ndert das Erloeskonto f  r alle Amtlichen Geb  hren

**C#**

```
public static void UpdateAuthorativeAccounts(DataClasses1DataContext dbContext, Invoice inv, string newAccountNumber);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Invoice inv	Rechnungsobjekt
string newAccountNumber	neues Erloeskonto

## 1.1.26.4 InvoiceItemAccountItem Eigenschaften

### 1.1.26.4.1 InvoiceItemAccountItem.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class InvoiceItemAccountItem.

### 1.1.26.4.2 InvoiceItemAccountItem.IIACCID Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IIACCID",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid IIACCID;
```

**Anmerkungen**

This is IIACCID, a member of class InvoiceItemAccountItem.

### 1.1.26.4.3 InvoiceItemAccountItem.InvoiceItem Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="InvoiceItem_InvoiceItemAccountI  
tem",  
Storage="_InvoiceItem", ThisKey="InvoiceItemId", OtherKey="Id", IsForeignKey=true,  
DeleteOnNull=true, DeleteRule="CASCADE")]  
public InvoiceItem InvoiceItem;
```

**Anmerkungen**

This is InvoiceItem, a member of class InvoiceItemAccountItem.

### 1.1.26.4.4 InvoiceItemAccountItem.InvoiceItemId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceItemId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid InvoiceItemId;
```

**Anmerkungen**

This is InvoiceItemId, a member of class InvoiceItemAccountItem.

### 1.1.26.4.5 InvoiceItemAccountItem.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class InvoiceItemAccountItem.

**1.1.26.4.6 InvoiceItemAccountItem.LogDbContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDbContext;
```

**Anmerkungen**

This is LogDbContext, a member of class InvoiceItemAccountItem.

**1.1.26.4.7 InvoiceItemAccountItem.RevenueAccountText Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RevenueAccountText",  
DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string RevenueAccountText;
```

**Anmerkungen**

This is RevenueAccountText, a member of class InvoiceItemAccountItem.

**1.1.26.5 InvoiceItemAccountItem Ereignisse****1.1.26.5.1 InvoiceItemAccountItem.PropertyChanged Ereignis****C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class InvoiceItemAccountItem.

**1.1.26.5.2 InvoiceItemAccountItem.PropertyChanging Ereignis****C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class InvoiceItemAccountItem.

---

**1.1.27 InvoiceNumber Klasse****Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.InvoiceNumber")]  
public class InvoiceNumber : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

DataClasses1.designer.cs ( see page 695)

**Anmerkungen**

This is class KVSCCommon.Database.InvoiceNumber.

**Mitglieder****Methoden**

	Name	Beschreibung
	InvoiceNumber (  see page 264)	This is InvoiceNumber, a member of class InvoiceNumber.

**InvoiceNumber Felder**

	Name	Beschreibung

**1.1.27.1 InvoiceNumber.InvoiceNumber Konstruktor****C#**

```
public InvoiceNumber();
```

**Anmerkungen**

This is InvoiceNumber, a member of class InvoiceNumber.

**1.1.27.2 InvoiceNumber Felder****1.1.27.2.1 InvoiceNumber.\_Invoice Feld****C#**

```
private EntityRef<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class InvoiceNumber.

**1.1.27.2.2 InvoiceNumber.\_InvoiceId Feld****C#**

```
private System.Guid _InvoiceId;
```

**Anmerkungen**

This is \_InvoiceId, a member of class InvoiceNumber.

**1.1.27.2.3 InvoiceNumber.\_Number Feld****C#**

```
private int _Number;
```

**Anmerkungen**

This is \_Number, a member of class InvoiceNumber.

**1.1.27.2.4 InvoiceNumber.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class InvoiceNumber.

## 1.1.27.3 InvoiceNumber Methoden

### 1.1.27.3.1 InvoiceNumber.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class InvoiceNumber.

### 1.1.27.3.2 InvoiceNumber.OnInvoiceIdChanged Methode

**C#**

```
private void OnInvoiceIdChanged();
```

**Anmerkungen**

This is OnInvoiceIdChanged, a member of class InvoiceNumber.

### 1.1.27.3.3 InvoiceNumber.OnInvoiceIdChanging Methode

**C#**

```
private void OnInvoiceIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnInvoiceIdChanging, a member of class InvoiceNumber.

### 1.1.27.3.4 InvoiceNumber.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class InvoiceNumber.

### 1.1.27.3.5 InvoiceNumber.OnNumberChanged Methode

**C#**

```
private void OnNumberChanged();
```

**Anmerkungen**

This is OnNumberChanged, a member of class InvoiceNumber.

### 1.1.27.3.6 InvoiceNumber.OnNumberChanging Methode

**C#**

```
private void OnNumberChanging(int value);
```

**Anmerkungen**

This is OnNumberChanging, a member of class InvoiceNumber.

**1.1.27.3.7 InvoiceNumber.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class InvoiceNumber.

**1.1.27.3.8 InvoiceNumber.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class InvoiceNumber.

**1.1.27.3.9 InvoiceNumber.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class InvoiceNumber.

**1.1.27.4 InvoiceNumber Eigenschaften****1.1.27.4.1 InvoiceNumber.Invoice Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Invoice_InvoiceNumber",  
Storage="_Invoice", ThisKey="InvoiceId", OtherKey="Id", IsForeignKey=true)]  
public Invoice Invoice;
```

**Anmerkungen**

This is Invoice, a member of class InvoiceNumber.

**1.1.27.4.2 InvoiceNumber.InvoiceId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid InvoiceId;
```

**Anmerkungen**

This is InvoiceId, a member of class InvoiceNumber.

### 1.1.27.4.3 InvoiceNumber.Number Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Number",
AutoSync=AutoSync.Always, DbType="Int NOT NULL IDENTITY", IsDbGenerated=true)]
public int Number;
```

Anmerkungen

This is Number, a member of class InvoiceNumber.

### 1.1.27.5 InvoiceNumber Ereignisse

#### 1.1.27.5.1 InvoiceNumber.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class InvoiceNumber.

#### 1.1.27.5.2 InvoiceNumber.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class InvoiceNumber.

## 1.1.28 InvoiceRunReport Klasse

Klassen Hierarchie

C#

```
public class InvoiceRunReport : ILogging;
```

Datei

InvoiceRunReport.cs (🔗 see page 698)

Anmerkungen

This is class KVSCCommon.Database.InvoiceRunReport.

Mitglieder

ILogging Eigenschaften

## 1.1.28.1 InvoiceRunReport.InvoiceRunReport Konstruktor

**C#**

```
public InvoiceRunReport();
```

**Anmerkungen**

This is InvoiceRunReport, a member of class InvoiceRunReport.

## 1.1.28.2 InvoiceRunReport Felder

### 1.1.28.2.1 InvoiceRunReport.\_CreateDate Feld

**C#**

```
private System.Nullable<System.DateTime> _CreateDate;
```

**Anmerkungen**

This is \_CreateDate, a member of class InvoiceRunReport.

### 1.1.28.2.2 InvoiceRunReport.\_CustomerId Feld

**C#**

```
private System.Nullable<System.Guid> _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class InvoiceRunReport.

### 1.1.28.2.3 InvoiceRunReport.\_FinishedDate Feld

**C#**

```
private System.Nullable<System.DateTime> _FinishedDate;
```

**Anmerkungen**

This is \_FinishedDate, a member of class InvoiceRunReport.

### 1.1.28.2.4 InvoiceRunReport.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class InvoiceRunReport.

### 1.1.28.2.5 InvoiceRunReport.\_InvoiceRunProgress Feld

**C#**

```
private System.Nullable<int> _InvoiceRunProgress;
```

**Anmerkungen**

This is \_InvoiceRunProgress, a member of class InvoiceRunReport.

### 1.1.28.2.6 InvoiceRunReport.\_InvoiceTypeld Feld

**C#**

```
private System.Nullable<System.Guid> _InvoiceTypeId;
```

**Anmerkungen**

This is \_InvoiceTypeld, a member of class InvoiceRunReport.

### 1.1.28.2.7 InvoiceRunReport.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class InvoiceRunReport.

## 1.1.28.3 InvoiceRunReport Methoden

### 1.1.28.3.1 InvoiceRunReport.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class InvoiceRunReport.

### 1.1.28.3.2 InvoiceRunReport.OnCreateDateChanged Methode

**C#**

```
private void OnCreateDateChanged();
```

**Anmerkungen**

This is OnCreateDateChanged, a member of class InvoiceRunReport.

### 1.1.28.3.3 OnCreateDateChanging Methode

#### 1.1.28.3.3.1 InvoiceRunReport.OnCreateDateChanging Methode (DateTime?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnCreateDateChanging(DateTime? value);
```

**Parameter**

Parameter	Beschreibung
DateTime? value	

### 1.1.28.3.3.2 InvoiceRunReport.OnCreateDateChanging Methode (System.Nullable<System.DateTime>)

C#

```
private void OnCreateDateChanging(System.Nullable<System.DateTime> value);
```

#### Anmerkungen

This is OnCreateDateChanging, a member of class InvoiceRunReport.

### 1.1.28.3.4 InvoiceRunReport.OnCustomerIdChanged Methode

C#

```
private void OnCustomerIdChanged();
```

#### Anmerkungen

This is OnCustomerIdChanged, a member of class InvoiceRunReport.

### 1.1.28.3.5 OnCustomerIdChanging Methode

#### 1.1.28.3.5.1 InvoiceRunReport.OnCustomerIdChanging Methode (Guid?)

Aenderungsevents f  r die Historie

C#

```
private void OnCustomerIdChanging(Guid? value);
```

#### Parameter

Parameter	Beschreibung
Guid? value	

#### 1.1.28.3.5.2 InvoiceRunReport.OnCustomerIdChanging Methode (System.Nullable<System.Guid>)

C#

```
private void OnCustomerIdChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnCustomerIdChanging, a member of class InvoiceRunReport.

### 1.1.28.3.6 InvoiceRunReport.OnFinishedDateChanged Methode

C#

```
private void OnFinishedDateChanged();
```

#### Anmerkungen

This is OnFinishedDateChanged, a member of class InvoiceRunReport.

### 1.1.28.3.7 OnFinishedDateChanging Methode

#### 1.1.28.3.7.1 InvoiceRunReport.OnFinishedDateChanging Methode (DateTime?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnFinishedDateChanging(DateTime? value);
```

**Parameter**

Parameter	Beschreibung
DateTime? value	

### 1.1.28.3.7.2 InvoiceRunReport.OnFinishedDateChanging Methode (System.Nullable<System.DateTime>)

**C#**

```
private void OnFinishedDateChanging(System.Nullable<System.DateTime> value);
```

**Anmerkungen**

This is OnFinishedDateChanging, a member of class InvoiceRunReport.

### 1.1.28.3.8 InvoiceRunReport.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class InvoiceRunReport.

### 1.1.28.3.9 InvoiceRunReport.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class InvoiceRunReport.

### 1.1.28.3.10 InvoiceRunReport.OnInvoiceRunProgressChanged Methode

**C#**

```
private void OnInvoiceRunProgressChanged();
```

**Anmerkungen**

This is OnInvoiceRunProgressChanged, a member of class InvoiceRunReport.

### 1.1.28.3.11 InvoiceRunReport.OnInvoiceRunProgressChanging Methode

**C#**

```
private void OnInvoiceRunProgressChanging(System.Nullable<int> value);
```

**Anmerkungen**

This is OnInvoiceRunProgressChanging, a member of class InvoiceRunReport.

### 1.1.28.3.12 InvoiceRunReport.OnInvoiceTypeIdChanged Methode

**C#**

```
private void OnInvoiceTypeIdChanged();
```

**Anmerkungen**

This is OnInvoiceTypeIdChanging, a member of class InvoiceRunReport.

**1.1.28.3.13 OnInvoiceTypeIdChanging Methode****1.1.28.3.13.1 InvoiceRunReport.OnInvoiceTypeIdChanging Methode (Guid?)**

Änderungsevents für die Historie

**C#**

```
private void OnInvoiceTypeIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.28.3.13.2 InvoiceRunReport.OnInvoiceTypeIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnInvoiceTypeIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnInvoiceTypeIdChanging, a member of class InvoiceRunReport.

**1.1.28.3.14 InvoiceRunReport.OnLoaded Methode**

Änderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.28.3.15 InvoiceRunReport.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class InvoiceRunReport.

**1.1.28.3.16 InvoiceRunReport.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class InvoiceRunReport.

### 1.1.28.3.17 InvoiceRunReport.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class InvoiceRunReport.

### 1.1.28.4 InvoiceRunReport Eigenschaften

#### 1.1.28.4.1 InvoiceRunReport.CreateDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CreateDate", DbType="DateTime")]  
public System.Nullable<System.DateTime> CreateDate;
```

**Anmerkungen**

This is CreateDate, a member of class InvoiceRunReport.

#### 1.1.28.4.2 InvoiceRunReport.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class InvoiceRunReport.

#### 1.1.28.4.3 InvoiceRunReport.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class InvoiceRunReport.

#### 1.1.28.4.4 InvoiceRunReport.FinishedDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FinishedDate",  
DbType="DateTime")]  
public System.Nullable<System.DateTime> FinishedDate;
```

**Anmerkungen**

This is FinishedDate, a member of class InvoiceRunReport.

#### 1.1.28.4.5 InvoiceRunReport.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]
```

```
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class InvoiceRunReport.

### 1.1.28.4.6 InvoiceRunReport.InvoiceRunProgress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceRunProgress",  
DbType="Int")]  
public System.Nullable<int> InvoiceRunProgress;
```

**Anmerkungen**

This is InvoiceRunProgress, a member of class InvoiceRunReport.

### 1.1.28.4.7 InvoiceRunReport.InvoiceTypeId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceTypeId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> InvoiceTypeId;
```

**Anmerkungen**

This is InvoiceTypeId, a member of class InvoiceRunReport.

### 1.1.28.4.8 InvoiceRunReport.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class InvoiceRunReport.

### 1.1.28.4.9 InvoiceRunReport.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class InvoiceRunReport.

## 1.1.28.5 InvoiceRunReport Ereignisse

### 1.1.28.5.1 InvoiceRunReport.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class InvoiceRunReport.

## 1.1.28.5.2 InvoiceRunReport.PropertyChanging Ereignis

### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

### Anmerkungen

This is PropertyChanged, a member of class InvoiceRunReport.

## 1.1.29 InvoiceTypes Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.InvoiceTypes")]
public class InvoiceTypes : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs (🔗 see page 695)

### Anmerkungen

This is class KVSCCommon.Database.InvoiceTypes.

### Mitglieder

## 1.1.29.1 InvoiceTypes.InvoiceTypes Konstruktor

**C#**

```
public InvoiceTypes();
```

**Anmerkungen**

This is InvoiceTypes, a member of class InvoiceTypes.

## 1.1.29.2 InvoiceTypes Felder

### 1.1.29.2.1 InvoiceTypes.\_contraction Feld

**C#**

```
private string _contraction;
```

**Anmerkungen**

This is \_contraction, a member of class InvoiceTypes.

### 1.1.29.2.2 InvoiceTypes.\_ID Feld

**C#**

```
private System.Guid _ID;
```

**Anmerkungen**

This is \_ID, a member of class InvoiceTypes.

### 1.1.29.2.3 InvoiceTypes.\_Invoice Feld

**C#**

```
private EntitySet<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class InvoiceTypes.

### 1.1.29.2.4 InvoiceTypes.\_InvoiceTypeName Feld

**C#**

```
private string _InvoiceTypeName;
```

**Anmerkungen**

This is \_InvoiceTypeName, a member of class InvoiceTypes.

### 1.1.29.2.5 InvoiceTypes.\_LargeCustomer Feld

**C#**

```
private EntitySet<LargeCustomer> _LargeCustomer;
```

**Anmerkungen**

This is \_LargeCustomer, a member of class InvoiceTypes.

### 1.1.29.2.6 InvoiceTypes.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class InvoiceTypes.

## 1.1.29.3 InvoiceTypes Methoden

### 1.1.29.3.1 InvoiceTypes.attach\_Invoice Methode

**C#**

```
private void attach_Invoice(Invoice entity);
```

**Anmerkungen**

This is attach\_Invoice, a member of class InvoiceTypes.

### 1.1.29.3.2 InvoiceTypes.attach\_LargeCustomer Methode

**C#**

```
private void attach_LargeCustomer(LargeCustomer entity);
```

**Anmerkungen**

This is attach\_LargeCustomer, a member of class InvoiceTypes.

### 1.1.29.3.3 InvoiceTypes.detach\_Invoice Methode

**C#**

```
private void detach_Invoice(Invoice entity);
```

**Anmerkungen**

This is detach\_Invoice, a member of class InvoiceTypes.

### 1.1.29.3.4 InvoiceTypes.detach\_LargeCustomer Methode

**C#**

```
private void detach_LargeCustomer(LargeCustomer entity);
```

**Anmerkungen**

This is detach\_LargeCustomer, a member of class InvoiceTypes.

### 1.1.29.3.5 InvoiceTypes.OncontractionChanged Methode

**C#**

```
private void OncontractionChanged();
```

**Anmerkungen**

This is OncontractionChanged, a member of class InvoiceTypes.

### 1.1.29.3.6 InvoiceTypes.OncontractionChanging Methode

**C#**

```
private void OncontractionChanging(string value);
```

**Anmerkungen**

This is OncontractionChanging, a member of class InvoiceTypes.

### 1.1.29.3.7 InvoiceTypes.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class InvoiceTypes.

### 1.1.29.3.8 InvoiceTypes.OnIDChanged Methode

**C#**

```
private void OnIDChanged();
```

**Anmerkungen**

This is OnIDChanged, a member of class InvoiceTypes.

### 1.1.29.3.9 InvoiceTypes.OnIDChanging Methode

**C#**

```
private void OnIDChanging(System.Guid value);
```

**Anmerkungen**

This is OnIDChanging, a member of class InvoiceTypes.

### 1.1.29.3.10 InvoiceTypes.OnInvoiceTypeNameChanged Methode

**C#**

```
private void OnInvoiceTypeNameChanged();
```

**Anmerkungen**

This is OnInvoiceTypeNameChanged, a member of class InvoiceTypes.

### 1.1.29.3.11 InvoiceTypes.OnInvoiceTypeNameChanging Methode

**C#**

```
private void OnInvoiceTypeNameChanging(string value);
```

**Anmerkungen**

This is OnInvoiceTypeNameChanging, a member of class InvoiceTypes.

### 1.1.29.3.12 InvoiceTypes.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class InvoiceTypes.

**1.1.29.3.13 InvoiceTypes.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class InvoiceTypes.

**1.1.29.3.14 InvoiceTypes.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class InvoiceTypes.

**1.1.29.3.15 InvoiceTypes.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class InvoiceTypes.

**1.1.29.4 InvoiceTypes Eigenschaften****1.1.29.4.1 InvoiceTypes.contraction Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_contraction",  
DbType="VarChar(50)")]  
public string contraction;
```

**Anmerkungen**

This is contraction, a member of class InvoiceTypes.

**1.1.29.4.2 InvoiceTypes.ID Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ID", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid ID;
```

**Anmerkungen**

This is ID, a member of class InvoiceTypes.

### 1.1.29.4.3 InvoiceTypes.Invoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="InvoiceTypes_Invoice",  
Storage="_Invoice", ThisKey="ID", OtherKey="InvoiceType")]  
public EntitySet<Invoice> Invoice;
```

**Anmerkungen**

This is Invoice, a member of class InvoiceTypes.

### 1.1.29.4.4 InvoiceTypes.InvoiceTypeName Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceTypeName",  
DbType="VarChar(255)")]  
public string InvoiceTypeName;
```

**Anmerkungen**

This is InvoiceTypeName, a member of class InvoiceTypes.

### 1.1.29.4.5 InvoiceTypes.LargeCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="InvoiceTypes_LargeCustomer",  
Storage="_LargeCustomer", ThisKey="ID", OtherKey="InvoiceTypesID")]  
public EntitySet<LargeCustomer> LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class InvoiceTypes.

## 1.1.29.5 InvoiceTypes Ereignisse

### 1.1.29.5.1 InvoiceTypes.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class InvoiceTypes.

### 1.1.29.5.2 InvoiceTypes.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class InvoiceTypes.

## 1.1.30 LargeCustomer Klasse

Erweiterungsklasse der Grosskunden DB

### Klassen Hierarchie

### C#

```
public class LargeCustomer : ILogging;
```

### Datei

LargeCustomer.cs (🔗 see page 698)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

#### LargeCustomer Klasse

	Name	Beschreibung
	CostCenter (🔗 see page 302)	This is CostCenter, a member of class LargeCustomer.
	Customer (🔗 see page 302)	This is Customer, a member of class LargeCustomer.
	CustomerId (🔗 see page 302)	This is CustomerId, a member of class LargeCustomer.
	EntityState (🔗 see page 302)	This is EntityState, a member of class LargeCustomer.
	InvoiceTypes (🔗 see page 303)	This is InvoiceTypes, a member of class LargeCustomer.
	InvoiceTypesID (🔗 see page 303)	This is InvoiceTypesID, a member of class LargeCustomer.
	ItemId (🔗 see page 303)	This is ItemId, a member of class LargeCustomer.
	LargeCustomerRequiredField (🔗 see page 303)	This is LargeCustomerRequiredField, a member of class LargeCustomer.
	Location (🔗 see page 303)	This is Location, a member of class LargeCustomer.
	Location1 (🔗 see page 304)	This is Location1, a member of class LargeCustomer.
	LogDbContext (🔗 see page 304)	This is LogDbContext, a member of class LargeCustomer.
	Mailinglist (🔗 see page 304)	This is Mailinglist, a member of class LargeCustomer.
	MainLocation (🔗 see page 304)	This is MainLocation, a member of class LargeCustomer.
	MainLocationId (🔗 see page 304)	This is MainLocationId, a member of class LargeCustomer.
	OrderFinishedNoteSendType (🔗 see page 304)	This is OrderFinishedNoteSendType, a member of class LargeCustomer.
	Person (🔗 see page 305)	This is Person, a member of class LargeCustomer.
	PersonId (🔗 see page 305)	This is PersonId, a member of class LargeCustomer.
	SendInvoiceByEmail (🔗 see page 305)	This is SendInvoiceByEmail, a member of class LargeCustomer.
	SendInvoiceToMainLocation (🔗 see page 305)	This is SendInvoiceToMainLocation, a member of class LargeCustomer.
	SendOrderFinishedNoteToCustomer (🔗 see page 305)	This is SendOrderFinishedNoteToCustomer, a member of class LargeCustomer.
	SendOrderFinishedNoteToLocation (🔗 see page 306)	This is SendOrderFinishedNoteToLocation, a member of class LargeCustomer.
	SendPackingListToCustomer (🔗 see page 306)	This is SendPackingListToCustomer, a member of class LargeCustomer.
	SendPackingListToLocation (🔗 see page 306)	This is SendPackingListToLocation, a member of class LargeCustomer.

### Methoden

#### LargeCustomer Klasse

	Name	Beschreibung
	LargeCustomer (🔗 see page 288)	This is LargeCustomer, a member of class LargeCustomer.

#### LargeCustomer Felder

**LargeCustomer Klasse**

	Name	Beschreibung
	_CostCenter ( <a href="#">↗</a> see page 289)	This is _CostCenter, a member of class LargeCustomer.

	_OrderFinishedNoteSendType ( <a href="#">↗</a> see page 290)	This is _OrderFinishedNoteSendType, a member of class LargeCustomer.
	_Person ( <a href="#">↗</a> see page 290)	This is _Person, a member of class LargeCustomer.
	_PersonId ( <a href="#">↗</a> see page 291)	This is _PersonId, a member of class LargeCustomer.
	_SendInvoiceByEmail ( <a href="#">↗</a> see page 291)	This is _SendInvoiceByEmail, a member of class LargeCustomer.
	_SendInvoiceToMainLocation ( <a href="#">↗</a> see page 291)	This is _SendInvoiceToMainLocation, a member of class LargeCustomer.
	_SendOrderFinishedNoteToCustomer ( <a href="#">↗</a> see page 291)	This is _SendOrderFinishedNoteToCustomer, a member of class LargeCustomer.
	_SendOrderFinishedNoteToLocation ( <a href="#">↗</a> see page 291)	This is _SendOrderFinishedNoteToLocation, a member of class LargeCustomer.
	_SendPackingListToCustomer ( <a href="#">↗</a> see page 291)	This is _SendPackingListToCustomer, a member of class LargeCustomer.
	_SendPackingListToLocation ( <a href="#">↗</a> see page 291)	This is _SendPackingListToLocation, a member of class LargeCustomer.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 292)	This is emptyChangingEventArgs, a member of class LargeCustomer.

**LargeCustomer Methoden****LargeCustomer Klasse**

	Name	Beschreibung
	AddNewCostCenter ( <a href="#">↗</a> see page 292)	Fügt dem Grosskunden eine neue Kostenstelle hinzu.
	AddNewLocation ( <a href="#">↗</a> see page 292)	Fügt dem Grosskunden einen neuen Standort hinzu.
	AddNewMailinglistItem ( <a href="#">↗</a> see page 293)	Fügt einem Emailverteiler des Kunden einen Eintrag hinzu.
	AddRequiredField ( <a href="#">↗</a> see page 293)	Fügt beim Grosskunden ein Feld zur den Pflichtfeldern bei der Auftragsanlage hinzu.
	attach_CostCenter ( <a href="#">↗</a> see page 293)	This is attach_CostCenter, a member of class LargeCustomer.
	attach_LargeCustomerRequiredField ( <a href="#">↗</a> see page 293)	This is attach_LargeCustomerRequiredField, a member of class LargeCustomer.
	attach_Location ( <a href="#">↗</a> see page 293)	This is attach_Location, a member of class LargeCustomer.
	attach_Mailinglist ( <a href="#">↗</a> see page 294)	This is attach_Mailinglist, a member of class LargeCustomer.
	CreateLargeCustomer ( <a href="#">↗</a> see page 294)	Trägt einen neuen Großkunden in die Datenbank ein.
	detach_CostCenter ( <a href="#">↗</a> see page 294)	This is detach_CostCenter, a member of class LargeCustomer.
	detach_LargeCustomerRequiredField ( <a href="#">↗</a> see page 295)	This is detach_LargeCustomerRequiredField, a member of class LargeCustomer.
	detach_Location ( <a href="#">↗</a> see page 295)	This is detach_Location, a member of class LargeCustomer.
	detach_Mailinglist ( <a href="#">↗</a> see page 295)	This is detach_Mailinglist, a member of class LargeCustomer.
	GetMailinglistAdresses ( <a href="#">↗</a> see page 295)	Gibt die Liste der Emailadressen aus dem angegebenen Verteiler zurück.
	GetRequiredFieldNames ( <a href="#">↗</a> see page 295)	Gibt eine Liste mit den für die Auftragsanlage benötigten Feldern zurück.
	OnCreated ( <a href="#">↗</a> see page 296)	Aenderungsereignis für die Historie
	OnCustomerIdChanged ( <a href="#">↗</a> see page 296)	This is OnCustomerIdChanged, a member of class LargeCustomer.
	OnCustomerIdChanging ( <a href="#">↗</a> see page 296)	This is OnCustomerIdChanging, a member of class LargeCustomer.
	OnInvoiceTypesIDChanged ( <a href="#">↗</a> see page 296)	This is OnInvoiceTypesIDChanged, a member of class LargeCustomer.
	OnInvoiceTypesIDChanging ( <a href="#">↗</a> see page 296)	This is OnInvoiceTypesIDChanging, a member of class LargeCustomer.
	OnLoaded ( <a href="#">↗</a> see page 296)	Aenderungsereignis für die Historie
	OnMainLocationIdChanged ( <a href="#">↗</a> see page 297)	This is OnMainLocationIdChanged, a member of class LargeCustomer.
	OnMainLocationIdChanging ( <a href="#">↗</a> see page 297)	This is OnMainLocationIdChanging, a member of class LargeCustomer.
	OnOrderFinishedNoteSendTypeChanged ( <a href="#">↗</a> see page 297)	This is OnOrderFinishedNoteSendTypeChanged, a member of class LargeCustomer.
	OnOrderFinishedNoteSendTypeChanging ( <a href="#">↗</a> see page 297)	Aenderungsereignis für die Historie
	OnPersonIdChanged ( <a href="#">↗</a> see page 297)	This is OnPersonIdChanged, a member of class LargeCustomer.

	OnPersonIdChanging ( <a href="#">↗</a> see page 297)	This is OnPersonIdChanging, a member of class LargeCustomer.
	OnSendInvoiceByEmailChanged ( <a href="#">↗</a> see page 298)	This is OnSendInvoiceByEmailChanged, a member of class LargeCustomer.
	OnSendInvoiceByEmailChanging ( <a href="#">↗</a> see page 298)	Aenderungsevents f��r die Historie
	OnSendInvoiceToMainLocationChanged ( <a href="#">↗</a> see page 298)	This is OnSendInvoiceToMainLocationChanged, a member of class LargeCustomer.
	OnSendInvoiceToMainLocationChanging ( <a href="#">↗</a> see page 298)	This is OnSendInvoiceToMainLocationChanging, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToCustomerChanged ( <a href="#">↗</a> see page 298)	This is OnSendOrderFinishedNoteToCustomerChanged, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToCustomerChanging ( <a href="#">↗</a> see page 299)	This is OnSendOrderFinishedNoteToCustomerChanging, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToLocationChanged ( <a href="#">↗</a> see page 299)	This is OnSendOrderFinishedNoteToLocationChanged, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToLocationChanging ( <a href="#">↗</a> see page 299)	This is OnSendOrderFinishedNoteToLocationChanging, a member of class LargeCustomer.
	OnSendPackingListToCustomerChanged ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToCustomerChanged, a member of class LargeCustomer.
	OnSendPackingListToCustomerChanging ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToCustomerChanging, a member of class LargeCustomer.
	OnSendPackingListToLocationChanged ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToLocationChanged, a member of class LargeCustomer.
	OnSendPackingListToLocationChanging ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToLocationChanging, a member of class LargeCustomer.
	OnValidate ( <a href="#">↗</a> see page 301)	This is OnValidate, a member of class LargeCustomer.
	RemoveLargeCutmter ( <a href="#">↗</a> see page 301)	Loescht einen Gro��kunden, aber nur wenn der Kunde mit keinen Auftr��gen und Rechnungen verkn��pft ist
	RemoveMailinglistItem ( <a href="#">↗</a> see page 301)	Entfernt einen Eintrag aus dem Emailverteiler des Kunden.
	RemoveRequiredField ( <a href="#">↗</a> see page 301)	Entfernt beim Grosskunden ein Feld aus den Pflichtfeldern f��r die Auftragsanlage.
	SendPropertyChanged ( <a href="#">↗</a> see page 302)	This is SendPropertyChanged, a member of class LargeCustomer.
	SendPropertyChanging ( <a href="#">↗</a> see page 302)	This is SendPropertyChanging, a member of class LargeCustomer.

## LargeCustomer Ereignisse

### LargeCustomer Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 306)	This is PropertyChanged, a member of class LargeCustomer.
	PropertyChanging ( <a href="#">↗</a> see page 306)	This is PropertyChanging, a member of class LargeCustomer.

### ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

### LargeCustomer Klasse

	Name	Beschreibung
	CostCenter ( <a href="#">↗</a> see page 302)	This is CostCenter, a member of class LargeCustomer.
	Customer ( <a href="#">↗</a> see page 302)	This is Customer, a member of class LargeCustomer.
	CustomerId ( <a href="#">↗</a> see page 302)	This is CustomerId, a member of class LargeCustomer.
	EntityState ( <a href="#">↗</a> see page 302)	This is EntityState, a member of class LargeCustomer.
	InvoiceTypes ( <a href="#">↗</a> see page 303)	This is InvoiceTypes, a member of class LargeCustomer.
	InvoiceTypesID ( <a href="#">↗</a> see page 303)	This is InvoiceTypesID, a member of class LargeCustomer.

	_SendPackingListToLocation ( <a href="#">↗</a> see page 291)	This is _SendPackingListToLocation, a member of class LargeCustomer.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 292)	This is emptyChangingEventArgs, a member of class LargeCustomer.

## LargeCustomer Methoden

### LargeCustomer Klasse

	Name	Beschreibung
	AddNewCostCenter ( <a href="#">↗</a> see page 292)	Fügt dem Grosskunden eine neue Kostenstelle hinzu.
	AddNewLocation ( <a href="#">↗</a> see page 292)	Fügt dem Grosskunden einen neuen Standort hinzu.
	AddNewMailinglistItem ( <a href="#">↗</a> see page 293)	Fügt einem Emailverteiler des Kunden einen Eintrag hinzu.
	AddRequiredField ( <a href="#">↗</a> see page 293)	Fügt beim Grosskunden ein Feld zur den Pflichtfeldern bei der Auftragsanlage hinzu.
	attach_CostCenter ( <a href="#">↗</a> see page 293)	This is attach_CostCenter, a member of class LargeCustomer.
	attach_LargeCustomerRequiredField ( <a href="#">↗</a> see page 293)	This is attach_LargeCustomerRequiredField, a member of class LargeCustomer.
	attach_Location ( <a href="#">↗</a> see page 293)	This is attach_Location, a member of class LargeCustomer.
	attach_Mailinglist ( <a href="#">↗</a> see page 294)	This is attach_Mailinglist, a member of class LargeCustomer.
	CreateLargeCustomer ( <a href="#">↗</a> see page 294)	Trägt einen neuen Großkunden in die Datenbank ein.
	detach_CostCenter ( <a href="#">↗</a> see page 294)	This is detach_CostCenter, a member of class LargeCustomer.
	detach_LargeCustomerRequiredField ( <a href="#">↗</a> see page 295)	This is detach_LargeCustomerRequiredField, a member of class LargeCustomer.

	detach_Location ( <a href="#">↗</a> see page 295)	This is detach_Location, a member of class LargeCustomer.
	detach_Mailinglist ( <a href="#">↗</a> see page 295)	This is detach_Mailinglist, a member of class LargeCustomer.
	GetMailinglistAdresses ( <a href="#">↗</a> see page 295)	Gibt die Liste der Emailadressen aus dem angegebenen Verteiler zurück.
	GetRequiredFieldNames ( <a href="#">↗</a> see page 295)	Gibt eine Liste mit den benötigten Feldern zurück.
	OnCreated ( <a href="#">↗</a> see page 296)	Aenderungsereignis für die Historie
	OnCustomerIdChanged ( <a href="#">↗</a> see page 296)	This is OnCustomerIdChanged, a member of class LargeCustomer.
	OnCustomerIdChanging ( <a href="#">↗</a> see page 296)	This is OnCustomerIdChanging, a member of class LargeCustomer.
	OnInvoiceTypesIDChanged ( <a href="#">↗</a> see page 296)	This is OnInvoiceTypesIDChanged, a member of class LargeCustomer.
	OnInvoiceTypesIDChanging ( <a href="#">↗</a> see page 296)	This is OnInvoiceTypesIDChanging, a member of class LargeCustomer.
	OnLoaded ( <a href="#">↗</a> see page 296)	Aenderungsereignis für die Historie
	OnMainLocationIdChanged ( <a href="#">↗</a> see page 297)	This is OnMainLocationIdChanged, a member of class LargeCustomer.
	OnMainLocationIdChanging ( <a href="#">↗</a> see page 297)	This is OnMainLocationIdChanging, a member of class LargeCustomer.
	OnOrderFinishedNoteSendTypeChanged ( <a href="#">↗</a> see page 297)	This is OnOrderFinishedNoteSendTypeChanged, a member of class LargeCustomer.
	OnOrderFinishedNoteSendTypeChanging ( <a href="#">↗</a> see page 297)	Aenderungsereignis für die Historie
	OnPersonIdChanged ( <a href="#">↗</a> see page 297)	This is OnPersonIdChanged, a member of class LargeCustomer.
	OnPersonIdChanging ( <a href="#">↗</a> see page 297)	This is OnPersonIdChanging, a member of class LargeCustomer.
	OnSendInvoiceByEmailChanged ( <a href="#">↗</a> see page 298)	This is OnSendInvoiceByEmailChanged, a member of class LargeCustomer.
	OnSendInvoiceByEmailChanging ( <a href="#">↗</a> see page 298)	Aenderungsereignis für die Historie
	OnSendInvoiceToMainLocationChanged ( <a href="#">↗</a> see page 298)	This is OnSendInvoiceToMainLocationChanged, a member of class LargeCustomer.
	OnSendInvoiceToMainLocationChanging ( <a href="#">↗</a> see page 298)	This is OnSendInvoiceToMainLocationChanging, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToCustomerChanged ( <a href="#">↗</a> see page 298)	This is OnSendOrderFinishedNoteToCustomerChanged, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToCustomerChanging ( <a href="#">↗</a> see page 299)	This is OnSendOrderFinishedNoteToCustomerChanging, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToLocationChanged ( <a href="#">↗</a> see page 299)	This is OnSendOrderFinishedNoteToLocationChanged, a member of class LargeCustomer.
	OnSendOrderFinishedNoteToLocationChanging ( <a href="#">↗</a> see page 299)	This is OnSendOrderFinishedNoteToLocationChanging, a member of class LargeCustomer.
	OnSendPackingListToCustomerChanged ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToCustomerChanged, a member of class LargeCustomer.
	OnSendPackingListToCustomerChanging ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToCustomerChanging, a member of class LargeCustomer.
	OnSendPackingListToLocationChanged ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToLocationChanged, a member of class LargeCustomer.
	OnSendPackingListToLocationChanging ( <a href="#">↗</a> see page 300)	This is OnSendPackingListToLocationChanging, a member of class LargeCustomer.
	OnValidate ( <a href="#">↗</a> see page 301)	This is OnValidate, a member of class LargeCustomer.
	RemoveLargeCustomer ( <a href="#">↗</a> see page 301)	Löscht einen Großkunden, aber nur wenn der Kunde mit keinen Aufträgen und Rechnungen verknüpft ist
	RemoveMailinglistItem ( <a href="#">↗</a> see page 301)	Entfernt einen Eintrag aus dem Emailverteiler des Kunden.
	RemoveRequiredField ( <a href="#">↗</a> see page 301)	Entfernt beim Großkunden ein Feld aus den Pflichtfeldern für die Auftragsanlage.
	SendPropertyChanged ( <a href="#">↗</a> see page 302)	This is SendPropertyChanged, a member of class LargeCustomer.
	SendPropertyChanging ( <a href="#">↗</a> see page 302)	This is SendPropertyChanging, a member of class LargeCustomer.

### 1.1.30.1 LargeCustomer.LargeCustomer Konstruktor

C#

```
public LargeCustomer();
```

Anmerkungen

This is LargeCustomer, a member of class LargeCustomer.

### 1.1.30.2 LargeCustomer Felder

### 1.1.30.2.1 LargeCustomer.\_CostCenter Feld

**C#**

```
private EntitySet<CostCenter> _CostCenter;
```

**Anmerkungen**

This is \_CostCenter, a member of class LargeCustomer.

### 1.1.30.2.2 LargeCustomer.\_Customer Feld

**C#**

```
private EntityRef<Customer> _Customer;
```

**Anmerkungen**

This is \_Customer, a member of class LargeCustomer.

### 1.1.30.2.3 LargeCustomer.\_CustomerId Feld

**C#**

```
private System.Guid _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class LargeCustomer.

### 1.1.30.2.4 LargeCustomer.\_InvoiceTypes Feld

**C#**

```
private EntityRef<InvoiceTypes> _InvoiceTypes;
```

**Anmerkungen**

This is \_InvoiceTypes, a member of class LargeCustomer.

### 1.1.30.2.5 LargeCustomer.\_InvoiceTypesID Feld

**C#**

```
private System.Nullable<System.Guid> _InvoiceTypesID;
```

**Anmerkungen**

This is \_InvoiceTypesID, a member of class LargeCustomer.

### 1.1.30.2.6 LargeCustomer.\_LargeCustomerRequiredField Feld

**C#**

```
private EntitySet<LargeCustomerRequiredField> _LargeCustomerRequiredField;
```

**Anmerkungen**

This is \_LargeCustomerRequiredField, a member of class LargeCustomer.

### 1.1.30.2.7 LargeCustomer.\_Location Feld

**C#**

```
private EntitySet<Location> _Location;
```

**Anmerkungen**

This is \_Location, a member of class LargeCustomer.

**1.1.30.2.8 LargeCustomer.\_Location1 Feld****C#**

```
private EntityRef<Location> _Location1;
```

**Anmerkungen**

This is \_Location1, a member of class LargeCustomer.

**1.1.30.2.9 LargeCustomer.\_Mailinglist Feld****C#**

```
private EntitySet<Mailinglist> _Mailinglist;
```

**Anmerkungen**

This is \_Mailinglist, a member of class LargeCustomer.

**1.1.30.2.10 LargeCustomer.\_MainLocation Feld****C#**

```
private EntityRef<Location> _MainLocation;
```

**Anmerkungen**

This is \_MainLocation, a member of class LargeCustomer.

**1.1.30.2.11 LargeCustomer.\_MainLocationId Feld****C#**

```
private System.Nullable<System.Guid> _MainLocationId;
```

**Anmerkungen**

This is \_MainLocationId, a member of class LargeCustomer.

**1.1.30.2.12 LargeCustomer.\_OrderFinishedNoteSendType Feld****C#**

```
private byte _OrderFinishedNoteSendType;
```

**Anmerkungen**

This is \_OrderFinishedNoteSendType, a member of class LargeCustomer.

**1.1.30.2.13 LargeCustomer.\_Person Feld****C#**

```
private EntityRef<Person> _Person;
```

**Anmerkungen**

This is \_Person, a member of class LargeCustomer.

### 1.1.30.2.14 LargeCustomer.\_PersonId Feld

**C#**

```
private System.Nullable<System.Guid> _PersonId;
```

**Anmerkungen**

This is \_PersonId, a member of class LargeCustomer.

### 1.1.30.2.15 LargeCustomer.\_SendInvoiceByEmail Feld

**C#**

```
private bool _SendInvoiceByEmail;
```

**Anmerkungen**

This is \_SendInvoiceByEmail, a member of class LargeCustomer.

### 1.1.30.2.16 LargeCustomer.\_SendInvoiceToMainLocation Feld

**C#**

```
private bool _SendInvoiceToMainLocation;
```

**Anmerkungen**

This is \_SendInvoiceToMainLocation, a member of class LargeCustomer.

### 1.1.30.2.17 LargeCustomer.\_SendOrderFinishedNoteToCustomer Feld

**C#**

```
private System.Nullable<bool> _SendOrderFinishedNoteToCustomer;
```

**Anmerkungen**

This is \_SendOrderFinishedNoteToCustomer, a member of class LargeCustomer.

### 1.1.30.2.18 LargeCustomer.\_SendOrderFinishedNoteToLocation Feld

**C#**

```
private System.Nullable<bool> _SendOrderFinishedNoteToLocation;
```

**Anmerkungen**

This is \_SendOrderFinishedNoteToLocation, a member of class LargeCustomer.

### 1.1.30.2.19 LargeCustomer.\_SendPackingListToCustomer Feld

**C#**

```
private System.Nullable<bool> _SendPackingListToCustomer;
```

**Anmerkungen**

This is \_SendPackingListToCustomer, a member of class LargeCustomer.

### 1.1.30.2.20 LargeCustomer.\_SendPackingListToLocation Feld

**C#**

```
private System.Nullable<bool> _SendPackingListToLocation;
```

## Anmerkungen

This is \_SendPackingListToLocation, a member of class LargeCustomer.

### 1.1.30.2.21 LargeCustomer.emptyChangingEventArgs Feld

#### C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

## Anmerkungen

This is emptyChangingEventArgs, a member of class LargeCustomer.

## 1.1.30.3 LargeCustomer Methoden

### 1.1.30.3.1 LargeCustomer.AddNewCostCenter Methode

Fügt dem Grosskunden eine neue Kostenstelle hinzu,

#### C#

```
public CostCenter AddNewCostCenter(string name, string costcenterNumber,
DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string name	Name der Kostenstelle.
string costcenterNumber	Kostenstellennummer.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

#### Resultate

Die neue Kostenstelle.

### 1.1.30.3.2 LargeCustomer.AddNewLocation Methode

Fügt dem Grosskunden einen neuen Standort hinzu.

#### C#

```
public Location AddNewLocation(string name, string street, string streetnumber, string
zipcode, string city, string country, string phone, string fax, string mobilephone, string
email, decimal? vat, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string name	Name des Standorts.
string street	Straße des Standorts.
string streetnumber	Hausnummer des Standorts.
string zipcode	Postleitzahl des Standorts.
string city	Ort des Standorts.
string country	Land des Standorts.
string phone	Telefonnummer des Standorts.
string fax	Faxnummer des Standorts.
string mobilephone	Mobiltelefonnummer des Standorts.
string email	Emailadresse des Standorts.
decimal? vat	Mehrwertsteuersatz für den Standort.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Standort.

### 1.1.30.3.3 LargeCustomer.AddNewMailingListItem Methode

Fügt einem Emailverteiler des Kunden einen Eintrag hinzu.

**C#**

```
public Mailinglist AddNewMailingListItem(string email, Guid typeId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string email	Emailadresse.
Guid typeId	Id des Typs des Verteilers.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Eintrag.

### 1.1.30.3.4 LargeCustomer.AddRequiredField Methode

Fügt beim Grosskunden ein Feld zur den Pflichtfeldern bei der Auftragsanlage hinzu.

**C#**

```
public void AddRequiredField(Guid requiredFieldId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid requiredFieldId	Id des Felds.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### 1.1.30.3.5 LargeCustomer.attach\_CostCenter Methode

**C#**

```
private void attach_CostCenter(CostCenter entity);
```

**Anmerkungen**

This is attach\_CostCenter, a member of class LargeCustomer.

### 1.1.30.3.6 LargeCustomer.attach\_LargeCustomerRequiredField Methode

**C#**

```
private void attach_LargeCustomerRequiredField(LargeCustomerRequiredField entity);
```

**Anmerkungen**

This is attach\_LargeCustomerRequiredField, a member of class LargeCustomer.

### 1.1.30.3.7 LargeCustomer.attach\_Location Methode

**C#**

```
private void attach_Location(Location entity);
```

**Anmerkungen**

This is attach\_Location, a member of class LargeCustomer.

### 1.1.30.3.8 LargeCustomer.attach\_Mailinglist Methode

**C#**

```
private void attach_Mailinglist(Mailinglist entity);
```

#### Anmerkungen

This is attach\_Mailinglist, a member of class LargeCustomer.

### 1.1.30.3.9 LargeCustomer.CreateLargeCustomer Methode

Trägt einen neuen Großkunden in die Datenbank ein.

**C#**

```
public static LargeCustomer CreateLargeCustomer(DataClasses1DataContext dbContext, string name, string street, string streetnumber, string zipcode, string city, string country, string phone, string fax, string mobilephone, string email, decimal vat, bool sendInvoiceToMainLocation, bool sendInvoiceByEmail, int? termOfCredit, string customerNumber, string matchcode, string Debitornumber, Guid? PersonId, Guid? InvoiceType, string evbNumber);
```

#### Parameter

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.
string name	Name des Kunden.
string street	Straße des Kunden.
string streetnumber	Hausnummer des Kunden.
string zipcode	Postleitzahl des Kunden.
string city	Ort des Kunden.
string country	Land des Kunden.
string phone	Telefonnummer des Kunden.
string fax	Faxnummer des Kunden.
string mobilephone	Mobilnummer des Kunden.
string email	Emailadresse des Kunden.
decimal vat	Mehrwertsteuersatz für diesen Kunden.
bool sendInvoiceToMainLocation	Gibt an, ob für den Rechnungsversand der Hauptstandort verwendet werden soll.
bool sendInvoiceByEmail	Gibt an, ob die Rechnungen per Email versendet werden sollen.
int? termOfCredit	Zahlungsziel (in Tagen).
string customerNumber	Kundennummer.

#### Resultate

Den neuen Großkunden.

#### Anmerkungen

Innerhalb des Aufrufs wird bereits dbContext.SubmitChanges() aufgerufen!

### 1.1.30.3.10 LargeCustomer.detach\_CostCenter Methode

**C#**

```
private void detach_CostCenter(CostCenter entity);
```

#### Anmerkungen

This is detach\_CostCenter, a member of class LargeCustomer.

### 1.1.30.3.11 LargeCustomer.detach\_LargeCustomerRequiredField Methode

**C#**

```
private void detach_LargeCustomerRequiredField(LargeCustomerRequiredField entity);
```

#### Anmerkungen

This is detach\_LargeCustomerRequiredField, a member of class LargeCustomer.

### 1.1.30.3.12 LargeCustomer.detach\_Location Methode

**C#**

```
private void detach_Location(Location entity);
```

#### Anmerkungen

This is detach\_Location, a member of class LargeCustomer.

### 1.1.30.3.13 LargeCustomer.detach\_Mailinglist Methode

**C#**

```
private void detach_Mailinglist(Mailinglist entity);
```

#### Anmerkungen

This is detach\_Mailinglist, a member of class LargeCustomer.

### 1.1.30.3.14 LargeCustomer.GetMailinglistAdresses Methode

Gibt die Liste der Emailadressen aus dem angegebenen Verteiler zurÃ¼ck.

**C#**

```
public List<string> GetMailinglistAdresses(DataClasses1DataContext dbContext, Guid? locationId, string type);
```

#### Parameter

Parameter	Beschreibung
Guid? locationId	Id des Standortes, falls gewÃ¼nscht.
string type	Art des Verteilers.

#### Resultate

Liste mit Emailadressen.

#### Anmerkungen

Wenn der Verteiler eines Standorts abgefragt wird, und dieser leer ist, werden die Adressen aus dem Verteiler des Kunden zurÃ¼ckgegeben.

### 1.1.30.3.15 LargeCustomer.GetRequiredFieldNames Methode

Gibt eine Liste mit den fÃ¼r die Auftragsanlage benÃ¶tigten Feldern zurÃ¼ck.

**C#**

```
public List<string> GetRequiredFieldNames(Guid orderTypeId);
```

#### Parameter

Parameter	Beschreibung
Guid orderTypeId	Id der Auftragsart.

### 1.1.30.3.16 LargeCustomer.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.30.3.17 LargeCustomer.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class LargeCustomer.

### 1.1.30.3.18 LargeCustomer.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class LargeCustomer.

### 1.1.30.3.19 LargeCustomer.OnInvoiceTypesIDChanged Methode

**C#**

```
private void OnInvoiceTypesIDChanged();
```

**Anmerkungen**

This is OnInvoiceTypesIDChanged, a member of class LargeCustomer.

### 1.1.30.3.20 LargeCustomer.OnInvoiceTypesIDChanging Methode

**C#**

```
private void OnInvoiceTypesIDChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnInvoiceTypesIDChanging, a member of class LargeCustomer.

### 1.1.30.3.21 LargeCustomer.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.30.3.22 LargeCustomer.OnMainLocationIdChanged Methode

**C#**

```
private void OnMainLocationIdChanged();
```

**Anmerkungen**

This is OnMainLocationIdChanged, a member of class LargeCustomer.

### 1.1.30.3.23 LargeCustomer.OnMainLocationIdChanging Methode

**C#**

```
private void OnMainLocationIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnMainLocationIdChanging, a member of class LargeCustomer.

### 1.1.30.3.24 LargeCustomer.OnOrderFinishedNoteSendTypeChanged Methode

**C#**

```
private void OnOrderFinishedNoteSendTypeChanged();
```

**Anmerkungen**

This is OnOrderFinishedNoteSendTypeChanged, a member of class LargeCustomer.

### 1.1.30.3.25 LargeCustomer.OnOrderFinishedNoteSendTypeChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnOrderFinishedNoteSendTypeChanging(byte value);
```

**Parameter**

Parameter	Beschreibung
byte value	

### 1.1.30.3.26 LargeCustomer.OnPersonIdChanged Methode

**C#**

```
private void OnPersonIdChanged();
```

**Anmerkungen**

This is OnPersonIdChanged, a member of class LargeCustomer.

### 1.1.30.3.27 LargeCustomer.OnPersonIdChanging Methode

**C#**

```
private void OnPersonIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnPersonIdChanging, a member of class LargeCustomer.

### 1.1.30.3.28 LargeCustomer.OnSendInvoiceByEmailChanged Methode

C#

```
private void OnSendInvoiceByEmailChanged();
```

#### Anmerkungen

This is OnSendInvoiceByEmailChanged, a member of class LargeCustomer.

### 1.1.30.3.29 LargeCustomer.OnSendInvoiceByEmailChanging Methode

Aenderungsevents für die Historie

C#

```
private void OnSendInvoiceByEmailChanging(bool value);
```

#### Parameter

Parameter	Beschreibung
bool value	

### 1.1.30.3.30 LargeCustomer.OnSendInvoiceToMainLocationChanged Methode

C#

```
private void OnSendInvoiceToMainLocationChanged();
```

#### Anmerkungen

This is OnSendInvoiceToMainLocationChanged, a member of class LargeCustomer.

### 1.1.30.3.31 LargeCustomer.OnSendInvoiceToMainLocationChanging Methode

C#

```
private void OnSendInvoiceToMainLocationChanging(bool value);
```

#### Anmerkungen

This is OnSendInvoiceToMainLocationChanging, a member of class LargeCustomer.

### 1.1.30.3.32 LargeCustomer.OnSendOrderFinishedNoteToCustomerChanged Methode

C#

```
private void OnSendOrderFinishedNoteToCustomerChanged();
```

#### Anmerkungen

This is OnSendOrderFinishedNoteToCustomerChanged, a member of class LargeCustomer.

### 1.1.30.3.33 OnSendOrderFinishedNoteToCustomerChanging Methode

### 1.1.30.3.33.1 LargeCustomer.OnSendOrderFinishedNoteToCustomerChanging Methode (System.Nullable<bool>)

C#

```
private void OnSendOrderFinishedNoteToCustomerChanging(System.Nullable<bool> value);
```

#### Anmerkungen

This is OnSendOrderFinishedNoteToCustomerChanging, a member of class LargeCustomer.

### 1.1.30.3.33.2 LargeCustomer.OnSendOrderFinishedNoteToCustomerChanging Methode (bool?)

Aenderungsevents fÃ¼r die Historie

C#

```
private void OnSendOrderFinishedNoteToCustomerChanging(bool? value);
```

#### Parameter

Parameter	Beschreibung
bool? value	

### 1.1.30.3.34 LargeCustomer.OnSendOrderFinishedNoteToLocationChanged Methode

C#

```
private void OnSendOrderFinishedNoteToLocationChanged();
```

#### Anmerkungen

This is OnSendOrderFinishedNoteToLocationChanged, a member of class LargeCustomer.

### 1.1.30.3.35 OnSendOrderFinishedNoteToLocationChanging Methode

#### 1.1.30.3.35.1 LargeCustomer.OnSendOrderFinishedNoteToLocationChanging Methode (System.Nullable<bool>)

C#

```
private void OnSendOrderFinishedNoteToLocationChanging(System.Nullable<bool> value);
```

#### Anmerkungen

This is OnSendOrderFinishedNoteToLocationChanging, a member of class LargeCustomer.

#### 1.1.30.3.35.2 LargeCustomer.OnSendOrderFinishedNoteToLocationChanging Methode (bool?)

Aenderungsevents fÃ¼r die Historie

C#

```
private void OnSendOrderFinishedNoteToLocationChanging(bool? value);
```

#### Parameter

Parameter	Beschreibung
bool? value	

### 1.1.30.3.36 LargeCustomer.OnSendPackingListToCustomerChanged Methode

C#

```
private void OnSendPackingListToCustomerChanged();
```

Anmerkungen

This is OnSendPackingListToCustomerChanged, a member of class LargeCustomer.

### 1.1.30.3.37 OnSendPackingListToCustomerChanging Methode

#### 1.1.30.3.37.1 LargeCustomer.OnSendPackingListToCustomerChanging Methode (System.Nullable<bool>)

C#

```
private void OnSendPackingListToCustomerChanging(System.Nullable<bool> value);
```

Anmerkungen

This is OnSendPackingListToCustomerChanging, a member of class LargeCustomer.

#### 1.1.30.3.37.2 LargeCustomer.OnSendPackingListToCustomerChanging Methode (bool?)

Aenderungsevents f r die Historie

C#

```
private void OnSendPackingListToCustomerChanging(bool? value);
```

Parameter

Parameter	Beschreibung
bool? value	

### 1.1.30.3.38 LargeCustomer.OnSendPackingListToLocationChanged Methode

C#

```
private void OnSendPackingListToLocationChanged();
```

Anmerkungen

This is OnSendPackingListToLocationChanged, a member of class LargeCustomer.

### 1.1.30.3.39 OnSendPackingListToLocationChanging Methode

#### 1.1.30.3.39.1 LargeCustomer.OnSendPackingListToLocationChanging Methode (System.Nullable<bool>)

C#

```
private void OnSendPackingListToLocationChanging(System.Nullable<bool> value);
```

Anmerkungen

This is OnSendPackingListToLocationChanging, a member of class LargeCustomer.

### 1.1.30.3.39.2 LargeCustomer.OnSendPackingListToLocationChanging Methode (bool?)

Aenderungsevents für die Historie

**C#**

```
private void OnSendPackingListToLocationChanging(bool? value);
```

**Parameter**

Parameter	Beschreibung
bool? value	

### 1.1.30.3.40 LargeCustomer.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class LargeCustomer.

### 1.1.30.3.41 LargeCustomer.RemoveLargeCutomer Methode

Loescht einen Großkunden, aber nur wenn der Kunde mit keinen Aufträgen und Rechnungen verknüpft ist

**C#**

```
public static void RemoveLargeCutomer(DataClasses1DataContext dbContext, Guid smallCustomerId);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Guid smallCustomerId	Laufkundenid

### 1.1.30.3.42 LargeCustomer.RemoveMailingListItem Methode

Entfernt einen Eintrag aus dem Emailverteiler des Kunden.

**C#**

```
public void RemoveMailingListItem(Guid mailinglistId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid mailinglistId	Id des Eintrags.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### 1.1.30.3.43 LargeCustomer.RemoveRequiredField Methode

Entfernt beim Grosskunden ein Feld aus den Pflichtfeldern für die Auftragsanlage.

**C#**

```
public void RemoveRequiredField(Guid requiredFieldId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid requiredFieldId	Id des Felds.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### 1.1.30.3.44 LargeCustomer.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class LargeCustomer.

### 1.1.30.3.45 LargeCustomer.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class LargeCustomer.

## 1.1.30.4 LargeCustomer Eigenschaften

### 1.1.30.4.1 LargeCustomer.CostCenter Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_CostCenter",  
Storage="_CostCenter", ThisKey="CustomerId", OtherKey="CustomerId")]  
public EntitySet<CostCenter> CostCenter;
```

**Anmerkungen**

This is CostCenter, a member of class LargeCustomer.

### 1.1.30.4.2 LargeCustomer.Customer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_LargeCustomer",  
Storage="_Customer", ThisKey="CustomerId", OtherKey="Id", IsForeignKey=true)]  
public Customer Customer;
```

**Anmerkungen**

This is Customer, a member of class LargeCustomer.

### 1.1.30.4.3 LargeCustomer.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class LargeCustomer.

### 1.1.30.4.4 LargeCustomer.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class LargeCustomer.

### 1.1.30.4.5 LargeCustomer.InvoiceTypes Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="InvoiceTypes_LargeCustomer",
Storage="_InvoiceTypes", ThisKey="InvoiceTypesID", OtherKey="ID", IsForeignKey=true)]
public InvoiceTypes InvoiceTypes;
```

**Anmerkungen**

This is InvoiceTypes, a member of class LargeCustomer.

### 1.1.30.4.6 LargeCustomer.InvoiceTypesID Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceTypesID",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> InvoiceTypesID;
```

**Anmerkungen**

This is InvoiceTypesID, a member of class LargeCustomer.

### 1.1.30.4.7 LargeCustomer.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class LargeCustomer.

### 1.1.30.4.8 LargeCustomer.LargeCustomerRequiredField Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_LargeCustomerRequiredField",
Storage="_LargeCustomerRequiredField", ThisKey="CustomerId", OtherKey="LargeCustomerId")]
public EntitySet<LargeCustomerRequiredField> LargeCustomerRequiredField;
```

**Anmerkungen**

This is LargeCustomerRequiredField, a member of class LargeCustomer.

### 1.1.30.4.9 LargeCustomer.Location Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_Location",
Storage="_Location", ThisKey="CustomerId", OtherKey="CustomerId")]
public EntitySet<Location> Location;
```

**Anmerkungen**

This is Location, a member of class LargeCustomer.

### 1.1.30.4.10 LargeCustomer.Location1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_LargeCustomer",
Storage="_Location1", ThisKey="MainLocationId", OtherKey="Id", IsForeignKey=true)]
public Location Location1;
```

**Anmerkungen**

This is Location1, a member of class LargeCustomer.

### 1.1.30.4.11 LargeCustomer.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class LargeCustomer.

### 1.1.30.4.12 LargeCustomer.Mailinglist Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_Mailinglist",
Storage="_Mailinglist", ThisKey="CustomerId", OtherKey="CustomerId")]
public EntitySet<Mailinglist> Mailinglist;
```

**Anmerkungen**

This is Mailinglist, a member of class LargeCustomer.

### 1.1.30.4.13 LargeCustomer.MainLocation Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_LargeCustomer1",
Storage="_MainLocation", ThisKey="MainLocationId", OtherKey="Id", IsForeignKey=true)]
public Location MainLocation;
```

**Anmerkungen**

This is MainLocation, a member of class LargeCustomer.

### 1.1.30.4.14 LargeCustomer.MainLocationId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_MainLocationId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> MainLocationId;
```

**Anmerkungen**

This is MainLocationId, a member of class LargeCustomer.

### 1.1.30.4.15 LargeCustomer.OrderFinishedNoteSendType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderFinishedNoteSendType",
DbType="TinyInt NOT NULL")]
public byte OrderFinishedNoteSendType;
```

**Anmerkungen**

This is OrderFinishedNoteSendType, a member of class LargeCustomer.

**1.1.30.4.16 LargeCustomer.Person Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Person_LargeCustomer",
Storage="_Person", ThisKey="PersonId", OtherKey="Id", IsForeignKey=true,
DeleteRule="CASCADE")]
public Person Person;
```

**Anmerkungen**

This is Person, a member of class LargeCustomer.

**1.1.30.4.17 LargeCustomer.PersonId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PersonId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> PersonId;
```

**Anmerkungen**

This is PersonId, a member of class LargeCustomer.

**1.1.30.4.18 LargeCustomer.SendInvoiceByEmail Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SendInvoiceByEmail",
DbType="Bit NOT NULL")]
public bool SendInvoiceByEmail;
```

**Anmerkungen**

This is SendInvoiceByEmail, a member of class LargeCustomer.

**1.1.30.4.19 LargeCustomer.SendInvoiceToMainLocation Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SendInvoiceToMainLocation",
DbType="Bit NOT NULL")]
public bool SendInvoiceToMainLocation;
```

**Anmerkungen**

This is SendInvoiceToMainLocation, a member of class LargeCustomer.

**1.1.30.4.20 LargeCustomer.SendOrderFinishedNoteToCustomer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SendOrderFinishedNoteToCustomer",
DbType="Bit")]
public System.Nullable<bool> SendOrderFinishedNoteToCustomer;
```

**Anmerkungen**

This is SendOrderFinishedNoteToCustomer, a member of class LargeCustomer.

### 1.1.30.4.21 LargeCustomer.SendOrderFinishedNoteToLocation Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SendOrderFinishedNoteToLocation",
DbType="Bit")]
public System.Nullable<bool> SendOrderFinishedNoteToLocation;
```

#### Anmerkungen

This is SendOrderFinishedNoteToLocation, a member of class LargeCustomer.

### 1.1.30.4.22 LargeCustomer.SendPackingListToCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SendPackingListToCustomer",
DbType="Bit")]
public System.Nullable<bool> SendPackingListToCustomer;
```

#### Anmerkungen

This is SendPackingListToCustomer, a member of class LargeCustomer.

### 1.1.30.4.23 LargeCustomer.SendPackingListToLocation Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SendPackingListToLocation",
DbType="Bit")]
public System.Nullable<bool> SendPackingListToLocation;
```

#### Anmerkungen

This is SendPackingListToLocation, a member of class LargeCustomer.

## 1.1.30.5 LargeCustomer Ereignisse

### 1.1.30.5.1 LargeCustomer.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class LargeCustomer.

### 1.1.30.5.2 LargeCustomer.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class LargeCustomer.

## 1.1.31 LargeCustomerRequiredField Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.LargeCustomerRequiredField")]
public class LargeCustomerRequiredField : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([see page 695](#))

### Anmerkungen

This is class KVSCCommon.Database.LargeCustomerRequiredField.

### Mitglieder

#### Methoden

	Name	Beschreibung
	LargeCustomerRequiredField ( <a href="#">see page 308</a> )	This is LargeCustomerRequiredField, a member of class LargeCustomerRequiredField.

#### LargeCustomerRequiredField Felder

	Name	Beschreibung
	_LargeCustomer ( <a href="#">see page 309</a> )	This is _LargeCustomer, a member of class LargeCustomerRequiredField.
	_LargeCustomerId ( <a href="#">see page 309</a> )	This is _LargeCustomerId, a member of class LargeCustomerRequiredField.
	_RequiredField ( <a href="#">see page 309</a> )	This is _RequiredField, a member of class LargeCustomerRequiredField.

**1.1.31.1****LargeCustomerRequiredField.LargeCustomerRequiredField Konstruktor****C#**

```
public LargeCustomerRequiredField();
```

**Anmerkungen**

This is LargeCustomerRequiredField, a member of class LargeCustomerRequiredField.

**1.1.31.2 LargeCustomerRequiredField Felder**

### 1.1.31.2.1 LargeCustomerRequiredField.\_LargeCustomer Feld

**C#**

```
private EntityRef<LargeCustomer> _LargeCustomer;
```

**Anmerkungen**

This is \_LargeCustomer, a member of class LargeCustomerRequiredField.

### 1.1.31.2.2 LargeCustomerRequiredField.\_LargeCustomerId Feld

**C#**

```
private System.Guid _LargeCustomerId;
```

**Anmerkungen**

This is \_LargeCustomerId, a member of class LargeCustomerRequiredField.

### 1.1.31.2.3 LargeCustomerRequiredField.\_RequiredField Feld

**C#**

```
private EntityRef<RequiredField> _RequiredField;
```

**Anmerkungen**

This is \_RequiredField, a member of class LargeCustomerRequiredField.

### 1.1.31.2.4 LargeCustomerRequiredField.\_RequiredFieldId Feld

**C#**

```
private System.Guid _RequiredFieldId;
```

**Anmerkungen**

This is \_RequiredFieldId, a member of class LargeCustomerRequiredField.

### 1.1.31.2.5 LargeCustomerRequiredField.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class LargeCustomerRequiredField.

## 1.1.31.3 LargeCustomerRequiredField Methoden

### 1.1.31.3.1 LargeCustomerRequiredField.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class LargeCustomerRequiredField.

### 1.1.31.3.2 LargeCustomerRequiredField.OnLargeCustomerIdChanged Methode

**C#**

```
private void OnLargeCustomerIdChanged();
```

**Anmerkungen**

This is OnLargeCustomerIdChanged, a member of class LargeCustomerRequiredField.

### 1.1.31.3.3 LargeCustomerRequiredField.OnLargeCustomerIdChanging Methode

**C#**

```
private void OnLargeCustomerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnLargeCustomerIdChanging, a member of class LargeCustomerRequiredField.

### 1.1.31.3.4 LargeCustomerRequiredField.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class LargeCustomerRequiredField.

### 1.1.31.3.5 LargeCustomerRequiredField.OnRequiredFieldIdChanged Methode

**C#**

```
private void OnRequiredFieldIdChanged();
```

**Anmerkungen**

This is OnRequiredFieldIdChanged, a member of class LargeCustomerRequiredField.

### 1.1.31.3.6 LargeCustomerRequiredField.OnRequiredFieldIdChanging Methode

**C#**

```
private void OnRequiredFieldIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRequiredFieldIdChanging, a member of class LargeCustomerRequiredField.

### 1.1.31.3.7 LargeCustomerRequiredField.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class LargeCustomerRequiredField.

### 1.1.31.3.8 LargeCustomerRequiredField.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class LargeCustomerRequiredField.

### 1.1.31.3.9 LargeCustomerRequiredField.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class LargeCustomerRequiredField.

## 1.1.31.4 LargeCustomerRequiredField Eigenschaften

### 1.1.31.4.1 LargeCustomerRequiredField.LargeCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_LargeCustomerRequiredField",  
Storage="_LargeCustomer", ThisKey="LargeCustomerId", OtherKey="CustomerId",  
IsForeignKey=true)]  
public LargeCustomer LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class LargeCustomerRequiredField.

### 1.1.31.4.2 LargeCustomerRequiredField.LargeCustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LargeCustomerId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid LargeCustomerId;
```

**Anmerkungen**

This is LargeCustomerId, a member of class LargeCustomerRequiredField.

### 1.1.31.4.3 LargeCustomerRequiredField.RequiredField Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RequiredField_LargeCustomerRequiredField",  
Storage="_RequiredField", ThisKey="RequiredFieldId", OtherKey="Id", IsForeignKey=true)]  
public RequiredField RequiredField;
```

**Anmerkungen**

This is RequiredField, a member of class LargeCustomerRequiredField.

#### 1.1.31.4.4 LargeCustomerRequiredField.RequiredFieldId Eigenschaft

##### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RequiredFieldId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid RequiredFieldId;
```

##### Anmerkungen

This is RequiredFieldId, a member of class LargeCustomerRequiredField.

#### 1.1.31.5 LargeCustomerRequiredField Ereignisse

##### 1.1.31.5.1 LargeCustomerRequiredField.PropertyChanged Ereignis

##### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

##### Anmerkungen

This is PropertyChanged, a member of class LargeCustomerRequiredField.

##### 1.1.31.5.2 LargeCustomerRequiredField.PropertyChanging Ereignis

##### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

##### Anmerkungen

This is PropertyChanging, a member of class LargeCustomerRequiredField.

### 1.1.32 Location Klasse

Erweiterungsklasse der Location DB

##### Klassen Hierarchie

##### C#

```
public class Location : ILogging;
```

##### Datei

Location.cs (🔗 see page 698)

##### Mitglieder

##### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

##### Location Klasse

	Name	Beschreibung
	_dbContext (🔗 see page 327)	This is _dbContext, a member of class Location.

	Adress ( <a href="#">↗</a> see page 327)	This is Adress, a member of class Location.
	AdressId ( <a href="#">↗</a> see page 327)	This is AdressId, a member of class Location.
	Contact ( <a href="#">↗</a> see page 328)	This is Contact, a member of class Location.
	ContactId ( <a href="#">↗</a> see page 328)	This is ContactId, a member of class Location.
	CustomerId ( <a href="#">↗</a> see page 328)	This is CustomerId, a member of class Location.
	EntityState ( <a href="#">↗</a> see page 328)	This is EntityState, a member of class Location.
	Id ( <a href="#">↗</a> see page 328)	This is Id, a member of class Location.
	InvoiceAddress ( <a href="#">↗</a> see page 328)	This is InvoiceAddress, a member of class Location.
	InvoiceAdressId ( <a href="#">↗</a> see page 329)	This is InvoiceAdressId, a member of class Location.
	InvoiceDispatchAddress ( <a href="#">↗</a> see page 329)	This is InvoiceDispatchAddress, a member of class Location.
	InvoiceDispatchAdressId ( <a href="#">↗</a> see page 329)	This is InvoiceDispatchAdressId, a member of class Location.
	ItemId ( <a href="#">↗</a> see page 329)	This is ItemId, a member of class Location.
	LargeCustomer ( <a href="#">↗</a> see page 329)	This is LargeCustomer, a member of class Location.
	LargeCustomer1 ( <a href="#">↗</a> see page 330)	This is LargeCustomer1, a member of class Location.
	LargeCustomer2 ( <a href="#">↗</a> see page 330)	This is LargeCustomer2, a member of class Location.
	Location1 ( <a href="#">↗</a> see page 330)	This is Location1, a member of class Location.
	Location2 ( <a href="#">↗</a> see page 330)	This is Location2, a member of class Location.
	LogDbContext ( <a href="#">↗</a> see page 330)	This is LogDbContext, a member of class Location.
	Mailinglist ( <a href="#">↗</a> see page 330)	This is Mailinglist, a member of class Location.
	Name ( <a href="#">↗</a> see page 331)	This is Name, a member of class Location.
	Order ( <a href="#">↗</a> see page 331)	This is Order, a member of class Location.
	Price ( <a href="#">↗</a> see page 331)	This is Price, a member of class Location.
	SuperLocationId ( <a href="#">↗</a> see page 331)	This is SuperLocationId, a member of class Location.
	VAT ( <a href="#">↗</a> see page 331)	This is VAT, a member of class Location.

## Methoden

### Location Klasse

	Name	Beschreibung
	Location ( <a href="#">↗</a> see page 316)	This is Location, a member of class Location.

### Location Felder

### Location Klasse

	Name	Beschreibung
	_Adress ( <a href="#">↗</a> see page 317)	This is _Adress, a member of class Location.

	myDbContext ( <a href="#">↗</a> see page 320)	This is myDbContext, a member of class Location.

### Location Methoden

**Location Klasse**

	Name	Beschreibung
	AddNewMailinglistItem ( <a href="#">↗</a> see page 320)	Fügt dem Verteiler des angegebenen Typs des Standorts einen neuen Eintrag hinzu.
	attach_LargeCustomer1 ( <a href="#">↗</a> see page 320)	This is attach_LargeCustomer1, a member of class Location.
	attach_LargeCustomer2 ( <a href="#">↗</a> see page 321)	This is attach_LargeCustomer2, a member of class Location.
	attach_Location2 ( <a href="#">↗</a> see page 321)	This is attach_Location2, a member of class Location.
	attach_Mailinglist ( <a href="#">↗</a> see page 321)	This is attach_Mailinglist, a member of class Location.
	attach_Order ( <a href="#">↗</a> see page 321)	This is attach_Order, a member of class Location.
	attach_Price ( <a href="#">↗</a> see page 321)	This is attach_Price, a member of class Location.
	ChangeLocations ( <a href="#">↗</a> see page 321)	Loescht den aktuellen Standort
	detach_LargeCustomer1 ( <a href="#">↗</a> see page 322)	This is detach_LargeCustomer1, a member of class Location.
	detach_LargeCustomer2 ( <a href="#">↗</a> see page 322)	This is detach_LargeCustomer2, a member of class Location.
	detach_Location2 ( <a href="#">↗</a> see page 322)	This is detach_Location2, a member of class Location.
	detach_Mailinglist ( <a href="#">↗</a> see page 322)	This is detach_Mailinglist, a member of class Location.
	detach_Order ( <a href="#">↗</a> see page 322)	This is detach_Order, a member of class Location.
	detach_Price ( <a href="#">↗</a> see page 322)	This is detach_Price, a member of class Location.
	OnAdressIdChanged ( <a href="#">↗</a> see page 323)	This is OnAdressIdChanged, a member of class Location.
	OnAdressIdChanging ( <a href="#">↗</a> see page 323)	This is OnAdressIdChanging, a member of class Location.
	OnContactIdChanged ( <a href="#">↗</a> see page 323)	This is OnContactIdChanged, a member of class Location.
	OnContactIdChanging ( <a href="#">↗</a> see page 323)	This is OnContactIdChanging, a member of class Location.
	OnCreated ( <a href="#">↗</a> see page 323)	Aenderungsevents für die Historie
	OnCustomerIdChanged ( <a href="#">↗</a> see page 323)	This is OnCustomerIdChanged, a member of class Location.
	OnCustomerIdChanging ( <a href="#">↗</a> see page 324)	This is OnCustomerIdChanging, a member of class Location.
	OnIdChanged ( <a href="#">↗</a> see page 324)	This is OnIdChanged, a member of class Location.
	OnIdChanging ( <a href="#">↗</a> see page 324)	This is OnIdChanging, a member of class Location.
	OnInvoiceAdressIdChanged ( <a href="#">↗</a> see page 324)	This is OnInvoiceAdressIdChanged, a member of class Location.
	OnInvoiceAdressIdChanging ( <a href="#">↗</a> see page 324)	This is OnInvoiceAdressIdChanging, a member of class Location.
	OnInvoiceDispatchAdressIdChanged ( <a href="#">↗</a> see page 324)	This is OnInvoiceDispatchAdressIdChanged, a member of class Location.
	OnInvoiceDispatchAdressIdChanging ( <a href="#">↗</a> see page 324)	This is OnInvoiceDispatchAdressIdChanging, a member of class Location.
	OnLoaded ( <a href="#">↗</a> see page 325)	Aenderungsevents für die Historie
	OnNameChanged ( <a href="#">↗</a> see page 325)	This is OnNameChanged, a member of class Location.
	OnNameChanging ( <a href="#">↗</a> see page 325)	Aenderungsevents für die Historie
	OnSuperLocationIdChanged ( <a href="#">↗</a> see page 325)	This is OnSuperLocationIdChanged, a member of class Location.
	OnSuperLocationIdChanging ( <a href="#">↗</a> see page 325)	Aenderungsevents für die Historie
	OnValidate ( <a href="#">↗</a> see page 326)	Aenderungsevents für die Historie
	OnVATChanged ( <a href="#">↗</a> see page 326)	This is OnVATChanged, a member of class Location.
	OnVATChanging ( <a href="#">↗</a> see page 326)	This is OnVATChanging, a member of class Location.
	RemoveLocation ( <a href="#">↗</a> see page 326)	Löscht die angegebenen Standort aus der Datenbank.
	RemoveMailinglistItem ( <a href="#">↗</a> see page 326)	Entfernt einen Eintrag aus dem Emailverteiler des Standorts.
	SendPropertyChanged ( <a href="#">↗</a> see page 327)	This is SendPropertyChanged, a member of class Location.
	SendPropertyChanging ( <a href="#">↗</a> see page 327)	This is SendPropertyChanging, a member of class Location.

**Location Ereignisse****Location Klasse**

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 332)	This is PropertyChanged, a member of class Location.
	PropertyChanging ( <a href="#">↗</a> see page 332)	This is PropertyChanging, a member of class Location.

**ILogging Eigenschaften**

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

## 1.1.32.1 Location.Location Konstruktor

### C#

```
public Location();
```

### Anmerkungen

This is Location, a member of class Location.

## 1.1.32.2 Location Felder

### 1.1.32.2.1 Location.\_Adress Feld

**C#**

```
private EntityRef<Adress> _Adress;
```

**Anmerkungen**

This is \_Adress, a member of class Location.

### 1.1.32.2.2 Location.\_AdressId Feld

**C#**

```
private System.Guid _AdressId;
```

**Anmerkungen**

This is \_AdressId, a member of class Location.

### 1.1.32.2.3 Location.\_Contact Feld

**C#**

```
private EntityRef<Contact> _Contact;
```

**Anmerkungen**

This is \_Contact, a member of class Location.

### 1.1.32.2.4 Location.\_ContactId Feld

**C#**

```
private System.Nullable<System.Guid> _ContactId;
```

**Anmerkungen**

This is \_ContactId, a member of class Location.

### 1.1.32.2.5 Location.\_CustomerId Feld

**C#**

```
private System.Nullable<System.Guid> _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class Location.

### 1.1.32.2.6 Location.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Location.

### 1.1.32.2.7 Location.\_InvoiceAdress Feld

**C#**

```
private EntityRef<Adress> _InvoiceAdress;
```

**Anmerkungen**

This is \_InvoiceAdress, a member of class Location.

**1.1.32.2.8 Location.\_InvoiceAdressId Feld****C#**

```
private System.Nullable<System.Guid> _InvoiceAdressId;
```

**Anmerkungen**

This is \_InvoiceAdressId, a member of class Location.

```
private System.Nullable<System.Guid> _InvoiceDispatchAdressId;
```

**Anmerkungen**

This is \_InvoiceDispatchAdressId, a member of class Location.

**1.1.32.2.11 Location.\_LargeCustomer Feld****C#**

```
private EntityRef<LargeCustomer> _LargeCustomer;
```

**Anmerkungen**

This is \_LargeCustomer, a member of class Location.

**1.1.32.2.12 Location.\_LargeCustomer1 Feld****C#**

```
private EntitySet<LargeCustomer> _LargeCustomer1;
```

**Anmerkungen**

This is \_LargeCustomer1, a member of class Location.

**1.1.32.2.13 Location.\_LargeCustomer2 Feld****C#**

```
private EntitySet<LargeCustomer> _LargeCustomer2;
```

**Anmerkungen**

This is \_LargeCustomer2, a member of class Location.

### 1.1.32.2.14 Location.\_Location1 Feld

**C#**

```
private EntityRef<Location> _Location1;
```

**Anmerkungen**

This is \_Location1, a member of class Location.

### 1.1.32.2.15 Location.\_Location2 Feld

**C#**

```
private EntitySet<Location> _Location2;
```

**Anmerkungen**

This is \_Location2, a member of class Location.

### 1.1.32.2.16 Location.\_Mailinglist Feld

**C#**

```
private EntitySet<Mailinglist> _Mailinglist;
```

**Anmerkungen**

This is \_Mailinglist, a member of class Location.

### 1.1.32.2.17 Location.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class Location.

### 1.1.32.2.18 Location.\_Order Feld

**C#**

```
private EntitySet<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class Location.

### 1.1.32.2.19 Location.\_Price Feld

**C#**

```
private EntitySet<Price> _Price;
```

**Anmerkungen**

This is \_Price, a member of class Location.

### 1.1.32.2.20 Location.\_SuperLocationId Feld

**C#**

```
private System.Nullable<System.Guid> _SuperLocationId;
```

**Anmerkungen**

This is \_SuperLocationId, a member of class Location.

**1.1.32.2.21 Location.\_VAT Feld****C#**

```
private System.Nullable<decimal> _VAT;
```

**Anmerkungen**

This is \_VAT, a member of class Location.

**1.1.32.2.22 Location.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Location.

**1.1.32.2.23 Location.myDbContext Feld****C#**

```
private DataClasses1DataContext myDbContext;
```

**Anmerkungen**

This is myDbContext, a member of class Location.

**1.1.32.3 Location Methoden****1.1.32.3.1 Location.AddNewMailinglistItem Methode**

Fügt dem Verteiler des angegebenen Typs des Standorts einen neuen Eintrag hinzu.

**C#**

```
public Mailinglist AddNewMailinglistItem(string email, Guid typeId, DataClasses1DataContext  
dbContext);
```

**Parameter**

Parameter	Beschreibung
string email	Emailadresse.
Guid typeId	Id (see page 328) des Verteilertyps.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Verteilereintrag.

**1.1.32.3.2 Location.attach\_LargeCustomer1 Methode****C#**

```
private void attach_LargeCustomer1(LargeCustomer entity);
```

**Anmerkungen**

This is attach\_LargeCustomer1, a member of class Location.

**1.1.32.3.3 Location.attach\_LargeCustomer2 Methode****C#**

```
private void attach_LargeCustomer2(LargeCustomer entity);
```

**Anmerkungen**

This is attach\_LargeCustomer2, a member of class Location.

**1.1.32.3.4 Location.attach\_Location2 Methode****C#**

```
private void attach_Location2(Location entity);
```

**Anmerkungen**

This is attach\_Location2, a member of class Location.

**1.1.32.3.5 Location.attach\_Mailinglist Methode****C#**

```
private void attach_Mailinglist(Mailinglist entity);
```

**Anmerkungen**

This is attach\_Mailinglist, a member of class Location.

**1.1.32.3.6 Location.attach\_Order Methode****C#**

```
private void attach_Order(Order entity);
```

**Anmerkungen**

This is attach\_Order, a member of class Location.

**1.1.32.3.7 Location.attach\_Price Methode****C#**

```
private void attach_Price(Price entity);
```

**Anmerkungen**

This is attach\_Price, a member of class Location.

**1.1.32.3.8 Location.ChangeLocations Methode**

Loescht den aktuellen Standort

**C#**

```
public static void ChangeLocations(DataClasses1DataContext dbContext, Location lc);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext

Location lc	Standort Objekt
-------------	-----------------

### 1.1.32.3.9 Location.detach\_LargeCustomer1 Methode

**C#**

```
private void detach_LargeCustomer1(LargeCustomer entity);
```

**Anmerkungen**

This is detach\_LargeCustomer1, a member of class Location.

### 1.1.32.3.10 Location.detach\_LargeCustomer2 Methode

**C#**

```
private void detach_LargeCustomer2(LargeCustomer entity);
```

**Anmerkungen**

This is detach\_LargeCustomer2, a member of class Location.

### 1.1.32.3.11 Location.detach\_Location2 Methode

**C#**

```
private void detach_Location2(Location entity);
```

**Anmerkungen**

This is detach\_Location2, a member of class Location.

### 1.1.32.3.12 Location.detach\_Mailinglist Methode

**C#**

```
private void detach_Mailinglist(Mailinglist entity);
```

**Anmerkungen**

This is detach\_Mailinglist, a member of class Location.

### 1.1.32.3.13 Location.detach\_Order Methode

**C#**

```
private void detach_Order(Order entity);
```

**Anmerkungen**

This is detach\_Order, a member of class Location.

### 1.1.32.3.14 Location.detach\_Price Methode

**C#**

```
private void detach_Price(Price entity);
```

**Anmerkungen**

This is detach\_Price, a member of class Location.

### 1.1.32.3.15 Location.OnAdressIdChanged Methode

**C#**

```
private void OnAdressIdChanged();
```

**Anmerkungen**

This is OnAdressIdChanged, a member of class Location.

### 1.1.32.3.16 Location.OnAdressIdChanging Methode

**C#**

```
private void OnAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnAdressIdChanging, a member of class Location.

### 1.1.32.3.17 Location.OnContactIdChanged Methode

**C#**

```
private void OnContactIdChanged();
```

**Anmerkungen**

This is OnContactIdChanged, a member of class Location.

### 1.1.32.3.18 Location.OnContactIdChanging Methode

**C#**

```
private void OnContactIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnContactIdChanging, a member of class Location.

### 1.1.32.3.19 Location.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.32.3.20 Location.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class Location.

### 1.1.32.3.21 Location.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class Location.

### 1.1.32.3.22 Location.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Location.

### 1.1.32.3.23 Location.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Location.

### 1.1.32.3.24 Location.OnInvoiceAdressIdChanged Methode

**C#**

```
private void OnInvoiceAdressIdChanged();
```

**Anmerkungen**

This is OnInvoiceAdressIdChanged, a member of class Location.

### 1.1.32.3.25 Location.OnInvoiceAdressIdChanging Methode

**C#**

```
private void OnInvoiceAdressIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnInvoiceAdressIdChanging, a member of class Location.

### 1.1.32.3.26 Location.OnInvoiceDispatchAdressIdChanged Methode

**C#**

```
private void OnInvoiceDispatchAdressIdChanged();
```

**Anmerkungen**

This is OnInvoiceDispatchAdressIdChanged, a member of class Location.

### 1.1.32.3.27 Location.OnInvoiceDispatchAdressIdChanging Methode

**C#**

```
private void OnInvoiceDispatchAdressIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnInvoiceDispatchAdressIdChanging, a member of class Location.

**1.1.32.3.28 Location.OnLoaded Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.32.3.29 Location.OnNameChanged Methode****C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class Location.

**1.1.32.3.30 Location.OnNameChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.32.3.31 Location.OnSuperLocationIdChanged Methode****C#**

```
private void OnSuperLocationIdChanged();
```

**Anmerkungen**

This is OnSuperLocationIdChanged, a member of class Location.

**1.1.32.3.32 OnSuperLocationIdChanging Methode****1.1.32.3.32.1 Location.OnSuperLocationIdChanging Methode (Guid?)**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnSuperLocationIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

### 1.1.32.3.32.2 Location.OnSuperLocationIdChanging Methode (System.Nullable<System.Guid>)

C#

```
private void OnSuperLocationIdChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnSuperLocationIdChanging, a member of class Location.

### 1.1.32.3.33 Location.OnValidate Methode

Aenderungsevents für die Historie

C#

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.32.3.34 Location.OnVATChanged Methode

C#

```
private void OnVATChanged();
```

#### Anmerkungen

This is OnVATChanged, a member of class Location.

### 1.1.32.3.35 Location.OnVATChanging Methode

C#

```
private void OnVATChanging(System.Nullable<decimal> value);
```

#### Anmerkungen

This is OnVATChanging, a member of class Location.

### 1.1.32.3.36 Location.RemoveLocation Methode

Löscht die angegebenen Standort aus der Datenbank.

C#

```
public static void RemoveLocation(Guid locationId, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbankkontext
adressId	Id (see page 328) des Standorts.

### 1.1.32.3.37 Location.RemoveMailingListItem Methode

Entfernt einen Eintrag aus dem Emailverteiler des Standorts.

C#

```
public void RemoveMailingListItem(Guid mailinglistId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid mailinglistId	Id (see page 328) des Eintrags.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### 1.1.32.3.38 Location.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Location.

### 1.1.32.3.39 Location.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Location.

## 1.1.32.4 Location Eigenschaften

### 1.1.32.4.1 Location.\_dbContext Eigenschaft

**C#**

```
public DataClasses1DataContext _dbContext;
```

**Anmerkungen**

This is \_dbContext, a member of class Location.

### 1.1.32.4.2 Location.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Location",  
Storage="_Adress", ThisKey="AdressId", OtherKey="Id", IsForeignKey=true)]  
public Address Adress;
```

**Anmerkungen**

This is Adress, a member of class Location.

### 1.1.32.4.3 Location.AdressId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AdressId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid AdressId;
```

**Anmerkungen**

This is AdressId, a member of class Location.

### 1.1.32.4.4 Location.Contact Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_Location",
Storage="_Contact", ThisKey="ContactId", OtherKey="Id", IsForeignKey=true)]
public Contact Contact;
```

**Anmerkungen**

This is Contact, a member of class Location.

### 1.1.32.4.5 Location.ContactId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ContactId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> ContactId;
```

**Anmerkungen**

This is ContactId, a member of class Location.

### 1.1.32.4.6 Location.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",
DbType="UniqueIdentifier NOT NULL")]
public System.Nullable<System.Guid> CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class Location.

### 1.1.32.4.7 Location.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Location.

### 1.1.32.4.8 Location.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier
NOT NULL", IsPrimaryKey=true)]
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Location.

### 1.1.32.4.9 Location.InvoiceAdress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Location1",
Storage="_InvoiceAdress", ThisKey="InvoiceAdressId", OtherKey="Id", IsForeignKey=true)]
public Address InvoiceAdress;
```

**Anmerkungen**

This is InvoiceAdress, a member of class Location.

**1.1.32.4.10 Location.InvoiceAdressId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceAdressId",
DbType="uniqueidentifier")]
public System.Nullable<System.Guid> InvoiceAdressId;
```

**Anmerkungen**

This is InvoiceAdressId, a member of class Location.

**1.1.32.4.11 Location.InvoiceDispatchAdress Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_Location2",
Storage="_InvoiceDispatchAdress", ThisKey="InvoiceDispatchAdressId", OtherKey="Id",
IsForeignKey=true)]
public Address InvoiceDispatchAdress;
```

**Anmerkungen**

This is InvoiceDispatchAdress, a member of class Location.

**1.1.32.4.12 Location.InvoiceDispatchAdressId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceDispatchAdressId",
DbType="uniqueidentifier")]
public System.Nullable<System.Guid> InvoiceDispatchAdressId;
```

**Anmerkungen**

This is InvoiceDispatchAdressId, a member of class Location.

**1.1.32.4.13 Location.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Location.

**1.1.32.4.14 Location.LargeCustomer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_Location",
Storage="_LargeCustomer", ThisKey="CustomerId", OtherKey="CustomerId", IsForeignKey=true)]
public LargeCustomer LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class Location.

### 1.1.32.4.15 Location.LargeCustomer1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_LargeCustomer",  
Storage="_LargeCustomer1", ThisKey="Id", OtherKey="MainLocationId")]  
public EntitySet<LargeCustomer> LargeCustomer1;
```

**Anmerkungen**

This is LargeCustomer1, a member of class Location.

### 1.1.32.4.16 Location.LargeCustomer2 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_LargeCustomer1",  
Storage="_LargeCustomer2", ThisKey="Id", OtherKey="MainLocationId")]  
public EntitySet<LargeCustomer> LargeCustomer2;
```

**Anmerkungen**

This is LargeCustomer2, a member of class Location.

### 1.1.32.4.17 Location.Location1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Location",  
Storage="_Location1", ThisKey="SuperLocationId", OtherKey="Id", IsForeignKey=true)]  
public Location Location1;
```

**Anmerkungen**

This is Location1, a member of class Location.

### 1.1.32.4.18 Location.Location2 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Location",  
Storage="_Location2", ThisKey="Id", OtherKey="SuperLocationId")]  
public EntitySet<Location> Location2;
```

**Anmerkungen**

This is Location2, a member of class Location.

### 1.1.32.4.19 Location.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Location.

### 1.1.32.4.20 Location.Mailinglist Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Mailinglist",  
Storage="_Mailinglist", ThisKey="Id", OtherKey="LocationId")]  
public EntitySet<Mailinglist> Mailinglist;
```

**Anmerkungen**

This is Mailinglist, a member of class Location.

**1.1.32.4.21 Location.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="NVarChar(500)
NOT NULL", CanBeNull=false)]
public string Name;
```

**Anmerkungen**

This is Name, a member of class Location.

**1.1.32.4.22 Location.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Order",
Storage="_Order", ThisKey="Id", OtherKey="LocationId")]
public EntitySet<Order> Order;
```

**Anmerkungen**

This is Order, a member of class Location.

**1.1.32.4.23 Location.Price Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Price",
Storage="_Price", ThisKey="Id", OtherKey="LocationId")]
public EntitySet<Price> Price;
```

**Anmerkungen**

This is Price, a member of class Location.

**1.1.32.4.24 Location.SuperLocationId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SuperLocationId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> SuperLocationId;
```

**Anmerkungen**

This is SuperLocationId, a member of class Location.

**1.1.32.4.25 Location.VAT Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VAT", DbType="Decimal(4,2)")]
public System.Nullable<decimal> VAT;
```

**Anmerkungen**

This is VAT, a member of class Location.

**1.1.32.5 Location Ereignisse**

### 1.1.32.5.1 Location.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class Location.

### 1.1.32.5.2 Location.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class Location.

## 1.1.33 LocationOrderJoins Klasse

Hilfklasse für die Standort Auftrags Verknuepfungen

Klassen Hierarchie

C#

```
public class LocationOrderJoins;
```

Datei

LocationOrderJoins.cs (see page 698)

**Anmerkungen**

This is emptyChangingEventArgs, a member of class LogType.

**1.1.34.3 LogType Methoden****1.1.34.3.1 LogType.attach\_Log Methode****C#**

```
private void attach_Log(Systemlog entity);
```

**Anmerkungen**

This is attach\_Log, a member of class LogType.

**1.1.34.3.2 LogType.detach\_Log Methode****C#**

```
private void detach_Log(Systemlog entity);
```

**Anmerkungen**

This is detach\_Log, a member of class LogType.

**1.1.34.3.3 LogType.OnCreated Methode****C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class LogType.

**1.1.34.3.4 LogType.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class LogType.

**1.1.34.3.5 LogType.OnIdChanging Methode****C#**

```
private void OnIdChanging(int value);
```

**Anmerkungen**

This is OnIdChanging, a member of class LogType.

**1.1.34.3.6 LogType.OnLoaded Methode****C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class LogType.

**1.1.34.3.7 LogType.OnNameChanged Methode****C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class LogType.

**1.1.34.3.8 LogType.OnNameChanging Methode****C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class LogType.

**1.1.34.3.9 LogType.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class LogType.

### 1.1.34.3.10 LogType.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class LogType.

### 1.1.34.3.11 LogType.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class LogType.

## 1.1.34.4 LogType Eigenschaften

### 1.1.34.4.1 LogType.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="Int NOT NULL",  
IsPrimaryKey=true)]  
public int Id;
```

**Anmerkungen**

This is Id, a member of class LogType.

### 1.1.34.4.2 LogType.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class LogType.

### 1.1.34.4.3 LogType.Systemlog Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LogType_Systemlog",  
Storage="_Log", ThisKey="Id", OtherKey="LogTypeId")]  
public EntitySet<Systemlog> Systemlog;
```

**Anmerkungen**

This is Systemlog, a member of class LogType.

## 1.1.34.5 LogType Ereignisse

1.1.34.5.1 LogType.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class LogType.

1.1.34.5.2 LogType.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class LogType.

1.1.35 Mailinglist Klasse

Erweiterungsklasse fuer die Mailinglist DB Tabelle

Klassen Hierarchie

C#

```
public class Mailinglist : ILogging;
```

## 1.1.35.1 Mailinglist.Mailinglist Konstruktor

### C#

```
public Mailinglist();
```

### Anmerkungen

This is Mailinglist, a member of class Mailinglist.

## 1.1.35.2 Mailinglist Felder

### 1.1.35.2.1 Mailinglist.\_CustomerId Feld

**C#**

```
private System.Nullable<System.Guid> _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class Mailinglist.

### 1.1.35.2.2 Mailinglist.\_Email Feld

**C#**

```
private string _Email;
```

**Anmerkungen**

This is \_Email, a member of class Mailinglist.

### 1.1.35.2.3 Mailinglist.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Mailinglist.

### 1.1.35.2.4 Mailinglist.\_LargeCustomer Feld

**C#**

```
private EntityRef<LargeCustomer> _LargeCustomer;
```

**Anmerkungen**

This is \_LargeCustomer, a member of class Mailinglist.

### 1.1.35.2.5 Mailinglist.\_Location Feld

**C#**

```
private EntityRef<Location> _Location;
```

**Anmerkungen**

This is \_Location, a member of class Mailinglist.

### 1.1.35.2.6 Mailinglist.\_LocationId Feld

**C#**

```
private System.Nullable<System.Guid> _LocationId;
```

**Anmerkungen**

This is \_LocationId, a member of class Mailinglist.

### 1.1.35.2.7 Mailinglist.\_MailinglistType Feld

**C#**

```
private EntityRef<MailinglistType> _MailinglistType;
```

**Anmerkungen**

This is \_MailinglistType, a member of class Mailinglist.

**1.1.35.2.8 Mailinglist.\_MailinglistTypeId Feld****C#**

```
private System.Guid _MailinglistTypeId;
```

**Anmerkungen**

This is \_MailinglistTypeid, a member of class Mailinglist.

**1.1.35.2.9 Mailinglist.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Mailinglist.

**1.1.35.3 Mailinglist Methoden****1.1.35.3.1 Mailinglist.CreateMailinglistItem Methode**

Erstellt die Mailing Liste

**C#**

```
internal static Mailinglist CreateMailinglistItem(string email, Guid typeId, Guid?  
customerId, Guid? locationId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string email	Email (see page 345) Adresse
Guid typeId	Email (see page 345) Typ (Rechnung, Laufzettel, Lieferschein)
Guid? customerId	Kundenid
Guid? locationId	StandortID
DataClasses1DataContext dbContext	DB Kontext

**Resultate**

Mailinglist (see page 338) Objekt

**1.1.35.3.2 Mailinglist.OnCreated Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.35.3.3 Mailinglist.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class Mailinglist.

### 1.1.35.3.4 Mailinglist.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class Mailinglist.

### 1.1.35.3.5 Mailinglist.OnEmailChanged Methode

**C#**

```
private void OnEmailChanged();
```

**Anmerkungen**

This is OnEmailChanged, a member of class Mailinglist.

### 1.1.35.3.6 Mailinglist.OnEmailChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnEmailChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.35.3.7 Mailinglist.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Mailinglist.

### 1.1.35.3.8 Mailinglist.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Mailinglist.

### 1.1.35.3.9 Mailinglist.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.35.3.10 Mailinglist.OnLocationIdChanged Methode

**C#**

```
private void OnLocationIdChanged();
```

**Anmerkungen**

This is OnLocationIdChanged, a member of class Mailinglist.

### 1.1.35.3.11 Mailinglist.OnLocationIdChanging Methode

**C#**

```
private void OnLocationIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnLocationIdChanging, a member of class Mailinglist.

### 1.1.35.3.12 Mailinglist.OnMailinglistTypeIdChanged Methode

**C#**

```
private void OnMailinglistTypeIdChanged();
```

**Anmerkungen**

This is OnMailinglistTypeIdChanged, a member of class Mailinglist.

### 1.1.35.3.13 Mailinglist.OnMailinglistTypeIdChanging Methode

**C#**

```
private void OnMailinglistTypeIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnMailinglistTypeIdChanging, a member of class Mailinglist.

### 1.1.35.3.14 Mailinglist.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Mailinglist.

### 1.1.35.3.15 Mailinglist.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Mailinglist.

### 1.1.35.3.16 Mailinglist.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Mailinglist.

## 1.1.35.4 Mailinglist Eigenschaften

### 1.1.35.4.1 Mailinglist.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class Mailinglist.

### 1.1.35.4.2 Mailinglist.Email Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Email", DbType="VarChar(150)  
NOT NULL", CanBeNull=false)]  
public string Email;
```

**Anmerkungen**

This is Email, a member of class Mailinglist.

### 1.1.35.4.3 Mailinglist.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Mailinglist.

### 1.1.35.4.4 Mailinglist.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Mailinglist.

**1.1.35.4.5 Mailinglist.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Mailinglist.

**1.1.35.4.6 Mailinglist.LargeCustomer Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LargeCustomer_Mailinglist",  
Storage="_LargeCustomer", ThisKey="CustomerId", OtherKey="CustomerId", IsForeignKey=true)]  
public LargeCustomer LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class Mailinglist.

**1.1.35.4.7 Mailinglist.Location Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Mailinglist",  
Storage="_Location", ThisKey="LocationId", OtherKey="Id", IsForeignKey=true)]  
public Location Location;
```

**Anmerkungen**

This is Location, a member of class Mailinglist.

**1.1.35.4.8 Mailinglist.LocationId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LocationId",  
DbType="uniqueidentifier")]  
public System.Nullable<System.Guid> LocationId;
```

**Anmerkungen**

This is LocationId, a member of class Mailinglist.

**1.1.35.4.9 Mailinglist.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Mailinglist.

**1.1.35.4.10 Mailinglist.MailinglistType Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="MailinglistType_Mailinglist",  
Storage="_MailinglistType", ThisKey="MailinglistTypeId", OtherKey="Id", IsForeignKey=true)]
```

```
public MailinglistType MailinglistType;
```

**Anmerkungen**

This is MailinglistType, a member of class Mailinglist.

### 1.1.35.4.11 Mailinglist.MailinglistTypeId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_MailinglistTypeId",  
DbType="uniqueidentifier not null")]  
public System.Guid MailinglistTypeId;
```

**Anmerkungen**

This is MailinglistTypeid, a member of class Mailinglist.

## 1.1.35.5 Mailinglist Ereignisse

### 1.1.35.5.1 Mailinglist.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Mailinglist.

### 1.1.35.5.2 Mailinglist.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Mailinglist.

---

## 1.1.36 MailinglistType Klasse

**Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.MailinglistType")]  
public class MailinglistType : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

DataClasses1.designer.cs (📄 see page 695)

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 352)	This is PropertyChanged, a member of class MailinglistType.
	PropertyChanging ( <a href="#">↗</a> see page 352)	This is PropertyChanging, a member of class MailinglistType.

**MailinglistType Eigenschaften**

	Name	Beschreibung
	Id ( <a href="#">↗</a> see page 351)	This is Id, a member of class MailinglistType.
	Mailinglist ( <a href="#">↗</a> see page 352)	This is Mailinglist, a member of class MailinglistType.
	Name ( <a href="#">↗</a> see page 352)	This is Name, a member of class MailinglistType.

**MailinglistType Ereignisse**

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 352)	This is PropertyChanged, a member of class MailinglistType.
	PropertyChanging ( <a href="#">↗</a> see page 352)	This is PropertyChanging, a member of class MailinglistType.

**MailinglistType Felder**

	Name	Beschreibung
	_Id ( <a href="#">↗</a> see page 349)	This is _Id, a member of class MailinglistType.
	_Mailinglist ( <a href="#">↗</a> see page 349)	This is _Mailinglist, a member of class MailinglistType.
	_Name ( <a href="#">↗</a> see page 349)	This is _Name, a member of class MailinglistType.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 349)	This is emptyChangingEventArgs, a member of class MailinglistType.

**MailinglistType Methoden**

	Name	Beschreibung
	attach_Mailinglist ( <a href="#">↗</a> see page 350)	This is attach_Mailinglist, a member of class MailinglistType.

	detach_Mailinglist (  see page 350)	This is detach_Mailinglist, a member of class MailinglistType.
	OnCreated (  see page 350)	This is OnCreated, a member of class MailinglistType.
	OnIdChanged (  see page 350)	This is OnIdChanged, a member of class MailinglistType.
	OnIdChanging (  see page 350)	This is OnIdChanging, a member of class MailinglistType.
	OnLoaded (  see page 350)	This is OnLoaded, a member of class MailinglistType.
	OnNameChanged (  see page 351)	This is OnNameChanged, a member of class MailinglistType.
	OnNameChanging (  see page 351)	This is OnNameChanging, a member of class MailinglistType.
	OnValidate (  see page 351)	This is OnValidate, a member of class MailinglistType.
	SendPropertyChanged (  see page 351)	This is SendPropertyChanged, a member of class MailinglistType.
	SendPropertyChanging (  see page 351)	This is SendPropertyChanging, a member of class MailinglistType.

### 1.1.36.1 MailinglistType.MailinglistType Konstruktor

C#

```
public MailinglistType();
```

Anmerkungen

This is MailinglistType, a member of class MailinglistType.

### 1.1.36.2 MailinglistType Felder

#### 1.1.36.2.1 MailinglistType.\_Id Feld

C#

```
private System.Guid _Id;
```

Anmerkungen

This is \_Id, a member of class MailinglistType.

#### 1.1.36.2.2 MailinglistType.\_Mailinglist Feld

C#

```
private EntitySet<Mailinglist> _Mailinglist;
```

Anmerkungen

This is \_Mailinglist, a member of class MailinglistType.

#### 1.1.36.2.3 MailinglistType.\_Name Feld

C#

```
private string _Name;
```

Anmerkungen

This is \_Name, a member of class MailinglistType.

#### 1.1.36.2.4 MailinglistType.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class MailinglistType.

## 1.1.36.3 MailinglistType Methoden

### 1.1.36.3.1 MailinglistType.attach\_Mailinglist Methode

**C#**

```
private void attach_Mailinglist(Mailinglist entity);
```

**Anmerkungen**

This is attach\_Mailinglist, a member of class MailinglistType.

### 1.1.36.3.2 MailinglistType.detach\_Mailinglist Methode

**C#**

```
private void detach_Mailinglist(Mailinglist entity);
```

**Anmerkungen**

This is detach\_Mailinglist, a member of class MailinglistType.

### 1.1.36.3.3 MailinglistType.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class MailinglistType.

### 1.1.36.3.4 MailinglistType.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class MailinglistType.

### 1.1.36.3.5 MailinglistType.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class MailinglistType.

### 1.1.36.3.6 MailinglistType.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class MailinglistType.

**1.1.36.3.7 MailinglistType.OnNameChanged Methode****C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class MailinglistType.

**1.1.36.3.8 MailinglistType.OnNameChanging Methode****C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class MailinglistType.

**1.1.36.3.9 MailinglistType.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class MailinglistType.

**1.1.36.3.10 MailinglistType.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class MailinglistType.

**1.1.36.3.11 MailinglistType.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class MailinglistType.

**1.1.36.4 MailinglistType Eigenschaften****1.1.36.4.1 MailinglistType.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="uniqueidentifier  
not null", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class MailinglistType.

### 1.1.36.4.2 MailinglistType.Mailinglist Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="MailinglistType_Mailinglist",  
Storage="_Mailinglist", ThisKey="Id", OtherKey="MailinglistTypeId")]  
public EntitySet<Mailinglist> Mailinglist;
```

**Anmerkungen**

This is Mailinglist, a member of class MailinglistType.

### 1.1.36.4.3 MailinglistType.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="varchar(50)",  
CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class MailinglistType.

## 1.1.36.5 MailinglistType Ereignisse

### 1.1.36.5.1 MailinglistType.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class MailinglistType.

### 1.1.36.5.2 MailinglistType.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class MailinglistType.

---

## 1.1.37 Make Klasse

Erweiterungsklasse fue die DB Tabelle Make

**Klassen Hierarchie****C#**

```
public class Make : ILogging;
```

**Datei**

Make.cs ( see page 699)

**Mitglieder****ILogging Eigenschaften**

	Name	Beschreibung
	EntityState (  see page 658)	This is EntityState, a member of class ILogging.
	ItemId (  see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (  see page 658)	This is LogDbContext, a member of class ILogging.

**1.1.37.1 Make.Make Konstruktor****C#**

```
public Make ( ) ;
```

**Anmerkungen**

This is Make, a member of class Make.

# 1.1.37.2 Make Felder

## 1.1.37.2.1 Make.\_HSN Feld

**C#**

```
private string _HSN;
```

**Anmerkungen**

This is \_HSN, a member of class Make.

## 1.1.37.2.2 Make.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Make.

## 1.1.37.2.3 Make.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class Make.

## 1.1.37.2.4 Make.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Make.

# 1.1.37.3 Make Methoden

## 1.1.37.3.1 Make.CreateMake Methode

Erstellt einen neuen Fahrzeughersteller.

**C#**

```
public static Make CreateMake(string name, string hsn, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string name	Name (see page 359) des Herstellers.
string hsn	HSN (see page 358) des Herstellers.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Hersteller.

### 1.1.37.3.2 Make.GetMakeByHSN Methode

Gibt alle Herstellern by HSN (see page 358) zurÃ¼ck

**C#**

```
public static string GetMakeByHSN(string hsn);
```

**Parameter**

Parameter	Beschreibung
string hsn	HSN (see page 358) des Herstellers.
dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Herstellers

### 1.1.37.3.3 Make.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.37.3.4 Make.OnHSNChanged Methode

**C#**

```
private void OnHSNChanged();
```

**Anmerkungen**

This is OnHSNChanged, a member of class Make.

### 1.1.37.3.5 Make.OnHSNChanging Methode

**C#**

```
private void OnHSNChanging(string value);
```

**Anmerkungen**

This is OnHSNChanging, a member of class Make.

### 1.1.37.3.6 Make.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Make.

### 1.1.37.3.7 Make.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Make.

### 1.1.37.3.8 Make.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.37.3.9 Make.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class Make.

### 1.1.37.3.10 Make.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class Make.

### 1.1.37.3.11 Make.OnValidate Methode

Aenderungsevents für die Historie

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.37.3.12 Make.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Make.

### 1.1.37.3.13 Make.SendPropertyChanging Methode

C#

```
protected virtual void SendPropertyChanging();
```

#### Anmerkungen

This is SendPropertyChanging, a member of class Make.

## 1.1.37.4 Make Eigenschaften

### 1.1.37.4.1 Make.EntityState Eigenschaft

C#

```
public EntityState EntityState;
```

#### Anmerkungen

This is EntityState, a member of class Make.

### 1.1.37.4.2 Make.HSN Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_HSN", DbType="VarChar(4) NOT  
NULL", CanBeNull=false)]  
public string HSN;
```

#### Anmerkungen

This is HSN, a member of class Make.

### 1.1.37.4.3 Make.Id Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

#### Anmerkungen

This is Id, a member of class Make.

### 1.1.37.4.4 Make.ItemId Eigenschaft

C#

```
public object ItemId;
```

#### Anmerkungen

This is ItemId, a member of class Make.

### 1.1.37.4.5 Make.LogDbContext Eigenschaft

C#

```
public DataClasses1DataContext LogDbContext;
```

Anmerkungen

This is LogDBContext, a member of class Make.

1.1.37.4.6 Make.Name Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]
public string Name;
```

Anmerkungen

This is Name, a member of class Make.

1.1.37.5 Make Ereignisse

1.1.37.5.1 Make.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class Make.

1.1.37.5.2 Make.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class Make.

1.1.38 Order Klasse

Erweiterungsklasse für die DB Tabelle Order

Klassen Hierarchie

C#

```
public class Order : ILogging;
```

Datei

Order.cs (see page 699)

Mitglieder

ILogging Eigenschaften

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDBContext (see page 658)	This is LogDBContext, a member of class ILogging.

## Order Klasse

	Name	Beschreibung
	CreateDate (  see page 382)	This is CreateDate, a member of class Order.
	Customer (  see page 382)	This is Customer, a member of class Order.
	CustomerId (  see page 382)	This is CustomerId, a member of class Order.
	DeregistrationOrder (  see page 382)	This is DeregistrationOrder, a member of class Order.
	DocketList (  see page 383)	This is DocketList, a member of class Order.
	DocketListId (  see page 383)	This is DocketListId, a member of class Order.
	EntityState (  see page 383)	This is EntityState, a member of class Order.
	ErrorReason (  see page 383)	This is ErrorReason, a member of class Order.
	ExecutionDate (  see page 383)	This is ExecutionDate, a member of class Order.
	FinishDate (  see page 384)	This is FinishDate, a member of class Order.
	FreeText (  see page 384)	This is FreeText, a member of class Order.
	Geprueft (  see page 384)	This is Geprueft, a member of class Order.
	HasError (  see page 384)	This is HasError, a member of class Order.
	HasFinishedNoteBeenSent (  see page 384)	This is HasFinishedNoteBeenSent, a member of class Order.
	Id (  see page 384)	This is Id, a member of class Order.
	ItemId (  see page 385)	This is ItemId, a member of class Order.
	Location (  see page 385)	This is Location, a member of class Order.
	LocationId (  see page 385)	This is LocationId, a member of class Order.
	LogDBContext (  see page 385)	This is LogDBContext, a member of class Order.
	OrderInvoice (  see page 385)	This is OrderInvoice, a member of class Order.

	_PackingList2 ( <a href="#">↗</a> see page 369)	This is _PackingList2, a member of class Order.
	_PackingListId ( <a href="#">↗</a> see page 369)	This is _PackingListId, a member of class Order.
	_ReadyToSend ( <a href="#">↗</a> see page 369)	This is _ReadyToSend, a member of class Order.
	_RegistrationLocation ( <a href="#">↗</a> see page 369)	This is _RegistrationLocation, a member of class Order.
	_RegistrationOrder ( <a href="#">↗</a> see page 369)	This is _RegistrationOrder, a member of class Order.
	_Status ( <a href="#">↗</a> see page 369)	This is _Status, a member of class Order.
	_User ( <a href="#">↗</a> see page 369)	This is _User, a member of class Order.
	_UserId ( <a href="#">↗</a> see page 370)	This is _UserId, a member of class Order.
	_Zulassungsstelle ( <a href="#">↗</a> see page 370)	This is _Zulassungsstelle, a member of class Order.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 370)	This is emptyChangingEventArgs, a member of class Order.

## Order Methoden

### Order Klasse

	Name	Beschreibung
	AddOrderItem ( <a href="#">↗</a> see page 370)	Fügt dem Auftrag eine neue Position hinzu.
	attach_OrderInvoice ( <a href="#">↗</a> see page 371)	This is attach_OrderInvoice, a member of class Order.
	attach_OrderItem ( <a href="#">↗</a> see page 371)	This is attach_OrderItem, a member of class Order.
	attach_PackingList2 ( <a href="#">↗</a> see page 371)	This is attach_PackingList2, a member of class Order.
	CreateOrder ( <a href="#">↗</a> see page 371)	Erstellt einen Auftrag.
	detach_OrderInvoice ( <a href="#">↗</a> see page 371)	This is detach_OrderInvoice, a member of class Order.
	detach_OrderItem ( <a href="#">↗</a> see page 371)	This is detach_OrderItem, a member of class Order.
	detach_PackingList2 ( <a href="#">↗</a> see page 372)	This is detach_PackingList2, a member of class Order.
	GenerateAuthCharge ( <a href="#">↗</a> see page 372)	Erstellt die amtlichen Gebühren
	getUnfinishedOrdersCount ( <a href="#">↗</a> see page 372)	Gibt die Anzahl der noch Offenen Aufträge zurück
	Main ( <a href="#">↗</a> see page 372)	This is Main, a member of class Order.
	OnCreated ( <a href="#">↗</a> see page 373)	Aenderungsereignis für die Historie
	OnCreateDateChanged ( <a href="#">↗</a> see page 373)	This is OnCreateDateChanged, a member of class Order.
	OnCreateDateChanging ( <a href="#">↗</a> see page 373)	Aenderungsereignis für die Historie
	OnCustomerIdChanged ( <a href="#">↗</a> see page 373)	This is OnCustomerIdChanged, a member of class Order.
	OnCustomerIdChanging ( <a href="#">↗</a> see page 373)	This is OnCustomerIdChanging, a member of class Order.
	OnDocketListIdChanged ( <a href="#">↗</a> see page 374)	This is OnDocketListIdChanged, a member of class Order.
	OnDocketListIdChanging ( <a href="#">↗</a> see page 374)	This is OnDocketListIdChanging, a member of class Order.
	OnErrorReasonChanged ( <a href="#">↗</a> see page 374)	This is OnErrorReasonChanged, a member of class Order.
	OnErrorReasonChanging ( <a href="#">↗</a> see page 374)	Aenderungsereignis für die Historie
	OnExecutionDateChanged ( <a href="#">↗</a> see page 374)	This is OnExecutionDateChanged, a member of class Order.
	OnExecutionDateChanging ( <a href="#">↗</a> see page 374)	Aenderungsereignis für die Historie
	OnFinishDateChanged ( <a href="#">↗</a> see page 375)	This is OnFinishDateChanged, a member of class Order.
	OnFinishDateChanging ( <a href="#">↗</a> see page 375)	This is OnFinishDateChanging, a member of class Order.
	OnFreeTextChanged ( <a href="#">↗</a> see page 375)	This is OnFreeTextChanged, a member of class Order.
	OnFreeTextChanging ( <a href="#">↗</a> see page 375)	Aenderungsereignis für die Historie
	OnGeprueftChanged ( <a href="#">↗</a> see page 375)	This is OnGeprueftChanged, a member of class Order.
	OnGeprueftChanging ( <a href="#">↗</a> see page 376)	This is OnGeprueftChanging, a member of class Order.
	OnHasErrorChanged ( <a href="#">↗</a> see page 376)	This is OnHasErrorChanged, a member of class Order.
	OnHasErrorChanging ( <a href="#">↗</a> see page 376)	This is OnHasErrorChanging, a member of class Order.
	OnHasFinishedNoteBeenSentChanged ( <a href="#">↗</a> see page 376)	This is OnHasFinishedNoteBeenSentChanged, a member of class Order.
	OnHasFinishedNoteBeenSentChanging ( <a href="#">↗</a> see page 377)	This is OnHasFinishedNoteBeenSentChanging, a member of class Order.

	OnIdChanged ( <a href="#">↗</a> see page 377)	This is OnIdChanged, a member of class Order.
	OnIdChanging ( <a href="#">↗</a> see page 377)	This is OnIdChanging, a member of class Order.
	OnLoaded ( <a href="#">↗</a> see page 377)	Aenderungsevents f��r die Historie
	OnLocationIdChanged ( <a href="#">↗</a> see page 377)	This is OnLocationIdChanged, a member of class Order.
	OnLocationIdChanging ( <a href="#">↗</a> see page 378)	This is OnLocationIdChanging, a member of class Order.
	OnOrdernumberChanged ( <a href="#">↗</a> see page 378)	This is OnOrdernumberChanged, a member of class Order.
	OnOrdernumberChanging ( <a href="#">↗</a> see page 378)	This is OnOrdernumberChanging, a member of class Order.
	OnOrderTypeldChanged ( <a href="#">↗</a> see page 378)	This is OnOrderTypeldChanged, a member of class Order.
	OnOrderTypeldChanging ( <a href="#">↗</a> see page 378)	This is OnOrderTypeldChanging, a member of class Order.
	OnPackingListIdChanged ( <a href="#">↗</a> see page 378)	This is OnPackingListIdChanged, a member of class Order.
	OnPackingListIdChanging ( <a href="#">↗</a> see page 378)	This is OnPackingListIdChanging, a member of class Order.
	OnReadyToSendChanged ( <a href="#">↗</a> see page 379)	This is OnReadyToSendChanged, a member of class Order.
	OnReadyToSendChanging ( <a href="#">↗</a> see page 379)	This is OnReadyToSendChanging, a member of class Order.
	OnStatusChanged ( <a href="#">↗</a> see page 379)	This is OnStatusChanged, a member of class Order.
	OnStatusChanging ( <a href="#">↗</a> see page 379)	Aenderungsevents f��r die Historie
	OnUserIdChanged ( <a href="#">↗</a> see page 379)	This is OnUserIdChanged, a member of class Order.
	OnUserIdChanging ( <a href="#">↗</a> see page 379)	This is OnUserIdChanging, a member of class Order.
	OnValidate ( <a href="#">↗</a> see page 380)	This is OnValidate, a member of class Order.
	OnZulassungsstelleChanged ( <a href="#">↗</a> see page 380)	This is OnZulassungsstelleChanged, a member of class Order.
	OnZulassungsstelleChanging ( <a href="#">↗</a> see page 380)	This is OnZulassungsstelleChanging, a member of class Order.
	SendOrderFinishedNote ( <a href="#">↗</a> see page 380)	Sendet eine Email mit einer Auflistung der in orders ��bergebenen Auftr��ge.
	SendOrderFinishedNotes ( <a href="#">↗</a> see page 381)	Sendet Benachrichtigungsemails f��r alle erledigten Auftr��ge ohne Benachrichtigungsemail.
	SendOrderStatusPerEmail ( <a href="#">↗</a> see page 381)	Sendet das Auftragsstatus per Email
	SendPropertyChanged ( <a href="#">↗</a> see page 381)	This is SendPropertyChanged, a member of class Order.
	SendPropertyChanging ( <a href="#">↗</a> see page 381)	This is SendPropertyChanging, a member of class Order.
	TryToRemovePackingListIdAndSetStateToRegistration ( <a href="#">↗</a> see page 381)	Entfernt die Lieferscheind und versetzt den Auftrag in den Status ( <a href="#">↗</a> see page 387) Zulassungsstelle ( <a href="#">↗</a> see page 388)
	UpdateOrderStates ( <a href="#">↗</a> see page 382)	Aktualisiert den Auftragsstatus

## Order Ereignisse

### Order Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 388)	This is PropertyChanged, a member of class Order.
	PropertyChanging ( <a href="#">↗</a> see page 388)	This is PropertyChanging, a member of class Order.

### ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

### Order Klasse

	Name	Beschreibung
	CreateDate ( <a href="#">↗</a> see page 382)	This is CreateDate, a member of class Order.
	Customer ( <a href="#">↗</a> see page 382)	This is Customer, a member of class Order.
	CustomerId ( <a href="#">↗</a> see page 382)	This is CustomerId, a member of class Order.
	DeregistrationOrder ( <a href="#">↗</a> see page 382)	This is DeregistrationOrder, a member of class Order.
	DocketList ( <a href="#">↗</a> see page 383)	This is DocketList, a member of class Order.
	DocketListId ( <a href="#">↗</a> see page 383)	This is DocketListId, a member of class Order.
	EntityState ( <a href="#">↗</a> see page 383)	This is EntityState, a member of class Order.
	ErrorMessage ( <a href="#">↗</a> see page 383)	This is ErrorMessage, a member of class Order.
	ExecutionDate ( <a href="#">↗</a> see page 383)	This is ExecutionDate, a member of class Order.
	FinishDate ( <a href="#">↗</a> see page 384)	This is FinishDate, a member of class Order.
	FreeText ( <a href="#">↗</a> see page 384)	This is FreeText, a member of class Order.
	Geprueft ( <a href="#">↗</a> see page 384)	This is Geprueft, a member of class Order.
	HasError ( <a href="#">↗</a> see page 384)	This is HasError, a member of class Order.
	HasFinishedNoteBeenSent ( <a href="#">↗</a> see page 384)	This is HasFinishedNoteBeenSent, a member of class Order.

	Id (  see page 384)	This is Id, a member of class Order.
	ItemId (  see page 385)	This is ItemId, a member of class Order.
	Location (  see page 385)	This is Location, a member of class Order.
	LocationId (  see page 385)	This is LocationId, a member of class Order.
	LogDBContext (  see page 385)	This is LogDBContext, a member of class Order.
	OrderInvoice (  see page 385)	This is OrderInvoice, a member of class Order.
	OrderItem (  see page 385)	This is OrderItem, a member of class Order.
	Ordernumber (  see page 386)	This is Ordernumber, a member of class Order.
	OrderStatus (  see page 386)	This is OrderStatus, a member of class Order.
	OrderType (  see page 386)	This is OrderType, a member of class Order.
	OrderTypeld (  see page 386)	This is OrderTypeld, a member of class Order.
	PackingList (  see page 386)	This is PackingList, a member of class Order.
	PackingList2 (  see page 387)	This is PackingList2, a member of class Order.
	PackingListId (  see page 387)	This is PackingListId, a member of class Order.
	ReadyToSend (  see page 387)	This is ReadyToSend, a member of class Order.
	RegistrationLocation (  see page 387)	This is RegistrationLocation, a member of class Order.
	RegistrationOrder (  see page 387)	This is RegistrationOrder, a member of class Order.
	Status (  see page 387)	This is Status, a member of class Order.
	User (  see page 388)	This is User, a member of class Order.
	UserId (  see page 388)	This is UserId, a member of class Order.
	Zulassungsstelle (  see page 388)	This is Zulassungsstelle, a member of class Order.

	OnUserIdChanging (  see page 379)	This is OnUserIdChanging, a member of class Order.
	OnValidate (  see page 380)	This is OnValidate, a member of class Order.
	OnZulassungsstelleChanged (  see page 380)	This is OnZulassungsstelleChanged, a member of class Order.
	OnZulassungsstelleChanging (  see page 380)	This is OnZulassungsstelleChanging, a member of class Order.
	SendOrderFinishedNote (  see page 380)	Sendet eine Email mit einer Auflistung der in orders Ã¼bergebenen Aufträge.
	SendOrderFinishedNotes (  see page 381)	Sendet Benachrichtigungsemails für alle erledigten Aufträge ohne Benachrichtigungsemail.
	SendOrderStatusPerEmail (  see page 381)	Sendet das Auftragsstatus per Email
	SendPropertyChanged (  see page 381)	This is SendPropertyChanged, a member of class Order.
	SendPropertyChanging (  see page 381)	This is SendPropertyChanging, a member of class Order.
	TryToRemovePackingListIdAndSetStateToRegistration (  see page 381)	Entfernt die LieferscheinId und versetzt den Auftrag in den Status (  see page 387) Zulassungsstelle (  see page 388)
	UpdateOrderStates (  see page 382)	Aktualisiert den Auftragsstatus

## 1.1.38.1 Order.Order Konstruktor

**C#**

```
public Order();
```

**Anmerkungen**

This is Order, a member of class Order.

## 1.1.38.2 Order Felder

### 1.1.38.2.1 Order.\_CreateDate Feld

**C#**

```
private System.DateTime _CreateDate;
```

**Anmerkungen**

This is \_CreateDate, a member of class Order.

### 1.1.38.2.2 Order.\_Customer Feld

**C#**

```
private EntityRef<Customer> _Customer;
```

**Anmerkungen**

This is \_Customer, a member of class Order.

### 1.1.38.2.3 Order.\_CustomerId Feld

**C#**

```
private System.Guid _CustomerId;
```

**Anmerkungen**

This is \_CustomerId, a member of class Order.

### 1.1.38.2.4 Order.\_DeregistrationOrder Feld

**C#**

```
private EntityRef<DeregistrationOrder> _DeregistrationOrder;
```

**Anmerkungen**

This is \_DeregistrationOrder, a member of class Order.

**1.1.38.2.5 Order.\_DocketList Feld****C#**

```
private EntityRef<DocketList> _DocketList;
```

**Anmerkungen**

This is \_DocketList, a member of class Order.

**1.1.38.2.6 Order.\_DocketListId Feld****C#**

```
private System.Nullable<System.Guid> _DocketListId;
```

**Anmerkungen**

This is \_DocketListId, a member of class Order.

**1.1.38.2.7 Order.\_ErrorReason Feld****C#**

```
private string _ErrorReason;
```

**Anmerkungen**

This is \_ErrorReason, a member of class Order.

**1.1.38.2.8 Order.\_ExecutionDate Feld****C#**

```
private System.Nullable<System.DateTime> _ExecutionDate;
```

**Anmerkungen**

This is \_ExecutionDate, a member of class Order.

**1.1.38.2.9 Order.\_FinishDate Feld****C#**

```
private System.Nullable<System.DateTime> _FinishDate;
```

**Anmerkungen**

This is \_FinishDate, a member of class Order.

**1.1.38.2.10 Order.\_FreeText Feld****C#**

```
private string _FreeText;
```

**Anmerkungen**

This is \_FreeText, a member of class Order.

### 1.1.38.2.11 Order.\_Geprueft Feld

**C#**

```
private System.Nullable<bool> _Geprueft;
```

**Anmerkungen**

This is \_Geprueft, a member of class Order.

### 1.1.38.2.12 Order.\_HasError Feld

**C#**

```
private System.Nullable<bool> _HasError;
```

**Anmerkungen**

This is \_HasError, a member of class Order.

### 1.1.38.2.13 Order.\_HasFinishedNoteBeenSent Feld

**C#**

```
private System.Nullable<bool> _HasFinishedNoteBeenSent;
```

**Anmerkungen**

This is \_HasFinishedNoteBeenSent, a member of class Order.

### 1.1.38.2.14 Order.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Order.

### 1.1.38.2.15 Order.\_Location Feld

**C#**

```
private EntityRef<Location> _Location;
```

**Anmerkungen**

This is \_Location, a member of class Order.

### 1.1.38.2.16 Order.\_LocationId Feld

**C#**

```
private System.Nullable<System.Guid> _LocationId;
```

**Anmerkungen**

This is \_LocationId, a member of class Order.

### 1.1.38.2.17 Order.\_OrderInvoice Feld

**C#**

```
private EntitySet<OrderInvoice> _OrderInvoice;
```

**Anmerkungen**

This is \_OrderInvoice, a member of class Order.

**1.1.38.2.18 Order.\_OrderItem Feld****C#**

```
private EntitySet<OrderItem> _OrderItem;
```

**Anmerkungen**

This is \_OrderItem, a member of class Order.

**1.1.38.2.19 Order.\_Ordernumber Feld****C#**

```
private int _Ordernumber;
```

**Anmerkungen**

This is \_Ordernumber, a member of class Order.

**1.1.38.2.20 Order.\_OrderStatus Feld****C#**

```
private EntityRef<OrderStatus> _OrderStatus;
```

**Anmerkungen**

This is \_OrderStatus, a member of class Order.

**1.1.38.2.21 Order.\_OrderType Feld****C#**

```
private EntityRef<OrderType> _OrderType;
```

**Anmerkungen**

This is \_OrderType, a member of class Order.

**1.1.38.2.22 Order.\_OrderTypeId Feld****C#**

```
private System.Guid _OrderTypeId;
```

**Anmerkungen**

This is \_OrderTypeId, a member of class Order.

**1.1.38.2.23 Order.\_PackingList Feld****C#**

```
private EntityRef<PackingList> _PackingList;
```

**Anmerkungen**

This is \_PackingList, a member of class Order.

### 1.1.38.2.24 Order.\_PackingList2 Feld

**C#**

```
private EntitySet<PackingList> _PackingList2;
```

**Anmerkungen**

This is \_PackingList2, a member of class Order.

### 1.1.38.2.25 Order.\_PackingListId Feld

**C#**

```
private System.Nullable<System.Guid> _PackingListId;
```

**Anmerkungen**

This is \_PackingListId, a member of class Order.

### 1.1.38.2.26 Order.\_ReadyToSend Feld

**C#**

```
private System.Nullable<bool> _ReadyToSend;
```

**Anmerkungen**

This is \_ReadyToSend, a member of class Order.

### 1.1.38.2.27 Order.\_RegistrationLocation Feld

**C#**

```
private EntityRef<RegistrationLocation> _RegistrationLocation;
```

**Anmerkungen**

This is \_RegistrationLocation, a member of class Order.

### 1.1.38.2.28 Order.\_RegistrationOrder Feld

**C#**

```
private EntityRef<RegistrationOrder> _RegistrationOrder;
```

**Anmerkungen**

This is \_RegistrationOrder, a member of class Order.

### 1.1.38.2.29 Order.\_Status Feld

**C#**

```
private int _Status;
```

**Anmerkungen**

This is \_Status, a member of class Order.

### 1.1.38.2.30 Order.\_User Feld

**C#**

```
private EntityRef<User> _User;
```

**Anmerkungen**

This is \_User, a member of class Order.

**1.1.38.2.31 Order.\_UserId Feld****C#**

```
private System.Nullable<System.Guid> _UserId;
```

**Anmerkungen**

This is \_UserId, a member of class Order.

**1.1.38.2.32 Order.\_Zulassungsstelle Feld****C#**

```
private System.Nullable<System.Guid> _Zulassungsstelle;
```

**Anmerkungen**

This is \_Zulassungsstelle, a member of class Order.

**1.1.38.2.33 Order.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Order.

**1.1.38.3 Order Methoden****1.1.38.3.1 Order.AddOrderItem Methode**

Fügt dem Auftrag eine neue Position hinzu.

**C#**

```
public OrderItem AddOrderItem(Guid productId, decimal priceAmount, int count, Guid?  
costCenterId, Guid? superOrderItemId, bool isAuthorativeCharge, DataClasses1DataContext  
dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid productId	Id (see page 384) des Produkts.
decimal priceAmount	Preis für die Position.
int count	Anzahl für die Position.
Guid? costCenterId	Id (see page 384) der Kostenstelle, falls benötigt.
Guid? superOrderItemId	Id (see page 384) der übergeordneten Auftragsposition, falls benötigt.
bool isAuthorativeCharge	Gibt an, ob es sich um eine behördliche Gebühr handelt oder nicht.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Die neue Auftragsposition.

### 1.1.38.3.2 Order.attach\_OrderInvoice Methode

**C#**

```
private void attach_OrderInvoice(OrderInvoice entity);
```

**Anmerkungen**

This is attach\_OrderInvoice, a member of class Order.

### 1.1.38.3.3 Order.attach\_OrderItem Methode

**C#**

```
private void attach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is attach\_OrderItem, a member of class Order.

### 1.1.38.3.4 Order.attach\_PackingList2 Methode

**C#**

```
private void attach_PackingList2(PackingList entity);
```

**Anmerkungen**

This is attach\_PackingList2, a member of class Order.

### 1.1.38.3.5 Order.CreateOrder Methode

Erstellt einen Auftrag.

**C#**

```
public static Order CreateOrder(Guid userId, Guid customerId, Guid orderTypeId, Guid  
zulassungsstelleId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid userId	Id (see page 384) des Benutzers.
Guid customerId	Id (see page 384) des Kunden.
Guid orderTypeId	Id (see page 384) der Auftragsart.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Auftrag.

### 1.1.38.3.6 Order.detach\_OrderInvoice Methode

**C#**

```
private void detach_OrderInvoice(OrderInvoice entity);
```

**Anmerkungen**

This is detach\_OrderInvoice, a member of class Order.

### 1.1.38.3.7 Order.detach\_OrderItem Methode

**C#**

```
private void detach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is detach\_OrderItem, a member of class Order.

**1.1.38.3.8 Order.detach\_PackingList2 Methode****C#**

```
private void detach_PackingList2(PackingList entity);
```

**Anmerkungen**

This is detach\_PackingList2, a member of class Order.

**1.1.38.3.9 Order.GenerateAuthCharge Methode**

Erstellt die amtlichen Gebuehren

**C#**

```
public static bool GenerateAuthCharge(DataClasses1DataContext dbContext, Guid authId,  
string itemId, string amount);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Guid authId	Amtliche Gebuehr ID
string itemId	Auftragspositionen Id ( <a href="#">?</a> see page 384)
string amount	Betrag

**Resultate**

bool

**1.1.38.3.10 Order.getUnfinishedOrdersCount Methode**

Gibt die Anzahl der noch Offenen Aufträge zurück

**C#**

```
public static int getUnfinishedOrdersCount(DataClasses1DataContext dbContext, string  
OrdertypeName, int orderstate);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	
string OrdertypeName	z. B Zulassung

**Resultate**

Int

**1.1.38.3.11 Order.Main Methode****C#**

```
private static void Main(string[] args);
```

**Anmerkungen**

This is Main, a member of class Order.

### 1.1.38.3.12 Order.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.38.3.13 Order.OnCreateDateChanged Methode

**C#**

```
private void OnCreateDateChanged();
```

**Anmerkungen**

This is OnCreateDateChanged, a member of class Order.

### 1.1.38.3.14 OnCreateDateChanging Methode

#### 1.1.38.3.14.1 Order.OnCreateDateChanging Methode (DateTime)

Aenderungsevents für die Historie

**C#**

```
private void OnCreateDateChanging(DateTime value);
```

**Parameter**

Parameter	Beschreibung
DateTime value	

#### 1.1.38.3.14.2 Order.OnCreateDateChanging Methode (System.DateTime)

**C#**

```
private void OnCreateDateChanging(System.DateTime value);
```

**Anmerkungen**

This is OnCreateDateChanging, a member of class Order.

### 1.1.38.3.15 Order.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class Order.

### 1.1.38.3.16 Order.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class Order.

### 1.1.38.3.17 Order.OnDocketListIdChanged Methode

**C#**

```
private void OnDocketListIdChanged();
```

**Anmerkungen**

This is OnDocketListIdChanged, a member of class Order.

### 1.1.38.3.18 Order.OnDocketListIdChanging Methode

**C#**

```
private void OnDocketListIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnDocketListIdChanging, a member of class Order.

### 1.1.38.3.19 Order.OnErrorReasonChanged Methode

**C#**

```
private void OnErrorReasonChanged();
```

**Anmerkungen**

This is OnErrorReasonChanged, a member of class Order.

### 1.1.38.3.20 Order.OnErrorReasonChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnErrorReasonChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.38.3.21 Order.OnExecutionDateChanged Methode

**C#**

```
private void OnExecutionDateChanged();
```

**Anmerkungen**

This is OnExecutionDateChanged, a member of class Order.

### 1.1.38.3.22 OnExecutionDateChanging Methode

#### 1.1.38.3.22.1 Order.OnExecutionDateChanging Methode (DateTime?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnExecutionDateChanging(DateTime? value);
```

**Parameter**

Parameter	Beschreibung
DateTime? value	

**1.1.38.3.22.2 Order.OnExecutionDateChanging Methode (System.Nullable<System.DateTime>)****C#**

```
private void OnExecutionDateChanging(System.Nullable<System.DateTime> value);
```

**Anmerkungen**

This is OnExecutionDateChanging, a member of class Order.

**1.1.38.3.23 Order.OnFinishDateChanged Methode****C#**

```
private void OnFinishDateChanged();
```

**Anmerkungen**

This is OnFinishDateChanged, a member of class Order.

**1.1.38.3.24 Order.OnFinishDateChanging Methode****C#**

```
private void OnFinishDateChanging(System.Nullable<System.DateTime> value);
```

**Anmerkungen**

This is OnFinishDateChanging, a member of class Order.

**1.1.38.3.25 Order.OnFreeTextChanged Methode****C#**

```
private void OnFreeTextChanged();
```

**Anmerkungen**

This is OnFreeTextChanged, a member of class Order.

**1.1.38.3.26 Order.OnFreeTextChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnFreeTextChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.38.3.27 Order.OnGeprueftChanged Methode****C#**

```
private void OnGeprueftChanged();
```

**Anmerkungen**

This is OnGeprueftChanged, a member of class Order.

**1.1.38.3.28 Order.OnGeprueftChanging Methode****C#**

```
private void OnGeprueftChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnGeprueftChanging, a member of class Order.

**1.1.38.3.29 Order.OnHasErrorChanged Methode****C#**

```
private void OnHasErrorChanged();
```

**Anmerkungen**

This is OnHasErrorChanged, a member of class Order.

**1.1.38.3.30 OnHasErrorChanging Methode****1.1.38.3.30.1 Order.OnHasErrorChanging Methode (System.Nullable<bool>)****C#**

```
private void OnHasErrorChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnHasErrorChanging, a member of class Order.

**1.1.38.3.30.2 Order.OnHasErrorChanging Methode (bool?)**

Aenderungsevents für die Historie

**C#**

```
private void OnHasErrorChanging(bool? value);
```

**Parameter**

Parameter	Beschreibung
bool? value	

**1.1.38.3.31 Order.OnHasFinishedNoteBeenSentChanged Methode****C#**

```
private void OnHasFinishedNoteBeenSentChanged();
```

**Anmerkungen**

This is OnHasFinishedNoteBeenSentChanged, a member of class Order.

**1.1.38.3.32 OnHasFinishedNoteBeenSentChanging Methode**

### 1.1.38.3.32.1 Order.OnHasFinishedNoteBeenSentChanging Methode (System.Nullable<bool>)

C#

```
private void OnHasFinishedNoteBeenSentChanging(System.Nullable<bool> value);
```

#### Anmerkungen

This is OnHasFinishedNoteBeenSentChanging, a member of class Order.

### 1.1.38.3.32.2 Order.OnHasFinishedNoteBeenSentChanging Methode (bool?)

Änderungsevents für die Historie

C#

```
private void OnHasFinishedNoteBeenSentChanging(bool? value);
```

#### Parameter

Parameter	Beschreibung
bool? value	

### 1.1.38.3.33 Order.OnIdChanged Methode

C#

```
private void OnIdChanged();
```

#### Anmerkungen

This is OnIdChanged, a member of class Order.

### 1.1.38.3.34 Order.OnIdChanging Methode

C#

```
private void OnIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnIdChanging, a member of class Order.

### 1.1.38.3.35 Order.OnLoaded Methode

Änderungsevents für die Historie

C#

```
private void OnLoaded();
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.38.3.36 Order.OnLocationIdChanged Methode

C#

```
private void OnLocationIdChanged();
```

#### Anmerkungen

This is OnLocationIdChanged, a member of class Order.

### 1.1.38.3.37 Order.OnLocationIdChanging Methode

**C#**

```
private void OnLocationIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnLocationIdChanging, a member of class Order.

### 1.1.38.3.38 Order.OnOrdernumberChanged Methode

**C#**

```
private void OnOrdernumberChanged();
```

**Anmerkungen**

This is OnOrdernumberChanged, a member of class Order.

### 1.1.38.3.39 Order.OnOrdernumberChanging Methode

**C#**

```
private void OnOrdernumberChanging(int value);
```

**Anmerkungen**

This is OnOrdernumberChanging, a member of class Order.

### 1.1.38.3.40 Order.OnOrderTypeIdChanged Methode

**C#**

```
private void OnOrderTypeIdChanged();
```

**Anmerkungen**

This is OnOrderTypeIdChanged, a member of class Order.

### 1.1.38.3.41 Order.OnOrderTypeIdChanging Methode

**C#**

```
private void OnOrderTypeIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderTypeIdChanging, a member of class Order.

### 1.1.38.3.42 Order.OnPackingListIdChanged Methode

**C#**

```
private void OnPackingListIdChanged();
```

**Anmerkungen**

This is OnPackingListIdChanged, a member of class Order.

### 1.1.38.3.43 Order.OnPackingListIdChanging Methode

**C#**

```
private void OnPackingListIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnPackingListIdChanging, a member of class Order.

**1.1.38.3.44 Order.OnReadyToSendChanged Methode****C#**

```
private void OnReadyToSendChanged();
```

**Anmerkungen**

This is OnReadyToSendChanged, a member of class Order.

**1.1.38.3.45 Order.OnReadyToSendChanging Methode****C#**

```
private void OnReadyToSendChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnReadyToSendChanging, a member of class Order.

**1.1.38.3.46 Order.OnStatusChanged Methode****C#**

```
private void OnStatusChanged();
```

**Anmerkungen**

This is OnStatusChanged, a member of class Order.

**1.1.38.3.47 Order.OnStatusChanging Methode**

Änderungsevents für die Historie

**C#**

```
private void OnStatusChanging(int value);
```

**Parameter**

Parameter	Beschreibung
int value	

**1.1.38.3.48 Order.OnUserIdChanged Methode****C#**

```
private void OnUserIdChanged();
```

**Anmerkungen**

This is OnUserIdChanged, a member of class Order.

**1.1.38.3.49 Order.OnUserIdChanging Methode****C#**

```
private void OnUserIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnUserIdChanging, a member of class Order.

### 1.1.38.3.50 Order.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

#### Anmerkungen

This is OnValidate, a member of class Order.

### 1.1.38.3.51 Order.OnZulassungsstelleChanged Methode

**C#**

```
private void OnZulassungsstelleChanged();
```

#### Anmerkungen

This is OnZulassungsstelleChanged, a member of class Order.

### 1.1.38.3.52 Order.OnZulassungsstelleChanging Methode

**C#**

```
private void OnZulassungsstelleChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnZulassungsstelleChanging, a member of class Order.

### 1.1.38.3.53 SendOrderFinishedNote Methode

#### 1.1.38.3.53.1 Order.SendOrderFinishedNote Methode (IEnumerable<Order>, List<string>, string, string)

Sendet eine Email mit einer Auflistung der in orders Ã¼bergebenen AuftrÃ¤ge.

**C#**

```
private static void SendOrderFinishedNote(IEnumerable<Order> orders, List<string> toEmailAddresses, string fromEmailAddress, string smtpServer);
```

#### Parameter

Parameter	Beschreibung
<code>IEnumerable&lt;Order&gt; orders</code>	AuftrÃ¤ge, deren Daten versendet werden sollen.
<code>List&lt;string&gt; toEmailAddresses</code>	Liste der EmpfÃ¤ngeremailadressen.
<code>string fromEmailAddress</code>	Absenderemailadresse.
<code>string smtpServer</code>	SMTP-Server fÃ¼r den Emailversand.

#### 1.1.38.3.53.2 Order.SendOrderFinishedNote Methode (Order, string, string, DataClasses1DataContext)

Sendet eine Benachrichtigungsemail Ã¼ber den Abschluss des angegebenen Auftrag.

**C#**

```
public static void SendOrderFinishedNote(Order order, string fromEmailAddress, string smtpServer, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
<code>Order order</code>	Der Auftrag.
<code>string fromEmailAddress</code>	Absenderemailadresse.

string smtpServer	SMTP-Server fÃ¼r den Emailversand.
DataClasses1DataContext dbContext	Datenbankkontext fÃ¼r die Transaktion.

#### Anmerkungen

Die Methode ruft dbContext.SubmitChanges() auf, um den Status (see page 387) der Versendung zu speichern.

### 1.1.38.3.54 Order.SendOrderFinishedNotes Methode

Sendet Benachrichtigungsemails fÃ¼r alle erledigten AuftrÃ¤ge ohne Benachrichtigungsemail.

#### C#

```
public static void SendOrderFinishedNotes(bool sendDailyMails, Guid userId, string fromEmailAddress, string smtpServer);
```

#### Parameter

Parameter	Beschreibung
bool sendDailyMails	Gibt an, ob beim Durchlauf auch die tÃ¤glichen Emails mit abgearbeitet werden sollen.
Guid userId	UserId (see page 388) fÃ¼r den Datenbankzugriff.
string fromEmailAddress	Emailadresse des Absenders.
string smtpServer	SMTP-Server fÃ¼r den Emailversand.

### 1.1.38.3.55 Order.SendOrderStatusPerEmail Methode

Sendet das Auftragsstatus per Email

#### C#

```
public static void SendOrderStatusPerEmail(bool daily);
```

### 1.1.38.3.56 Order.SendPropertyChanged Methode

#### C#

```
protected virtual void SendPropertyChanged(String propertyName);
```

#### Anmerkungen

This is SendPropertyChanged, a member of class Order.

### 1.1.38.3.57 Order.SendPropertyChanging Methode

#### C#

```
protected virtual void SendPropertyChanging();
```

#### Anmerkungen

This is SendPropertyChanging, a member of class Order.

### 1.1.38.3.58 Order.TryToRemovePackingListIdAndSetStateToRegistration Methode

Entfernt die LieferscheinId und versetzt den Auftrag in den Status (see page 387) Zulassungsstelle (see page 388)

#### C#

```
public static void TryToRemovePackingListIdAndSetStateToRegistration(DataClasses1DataContext dbContext, Guid packingListId);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Guid packingListId	Lieferschein ID

### 1.1.38.3.59 Order.UpdateOrderStates Methode

Aktualisiert den Auftragsstatus

**C#**

```
public static void UpdateOrderStates(List<Guid> orderIds, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
List<Guid> orderIds	List mit OrderIds
DataClasses1DataContext dbContext	DB Kontext

## 1.1.38.4 Order Eigenschaften

### 1.1.38.4.1 Order.CreateDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CreateDate", DbType="DateTime NOT NULL")]  
public System.DateTime CreateDate;
```

**Anmerkungen**

This is CreateDate, a member of class Order.

### 1.1.38.4.2 Order.Customer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_Order",  
Storage="_Customer", ThisKey="CustomerId", OtherKey="Id", IsForeignKey=true)]  
public Customer Customer;
```

**Anmerkungen**

This is Customer, a member of class Order.

### 1.1.38.4.3 Order.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class Order.

### 1.1.38.4.4 Order.DeregistrationOrder Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_DeregistrationOrder",
```

```
Storage="_DeregistrationOrder", ThisKey="Id", OtherKey="OrderId", IsUnique=true,  
IsForeignKey=false)]  
public DeregistrationOrder DeregistrationOrder;
```

#### Anmerkungen

This is DeregistrationOrder, a member of class Order.

### 1.1.38.4.5 Order.DocketList Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="DocketList_Order",  
Storage="_DocketList", ThisKey="DocketListId", OtherKey="Id", IsForeignKey=true)]  
public DocketList DocketList;
```

#### Anmerkungen

This is DocketList, a member of class Order.

### 1.1.38.4.6 Order.DocketListId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DocketListId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> DocketListId;
```

#### Anmerkungen

This is DocketListId, a member of class Order.

### 1.1.38.4.7 Order.EntityState Eigenschaft

#### C#

```
public EntityState EntityState;
```

#### Anmerkungen

This is EntityState, a member of class Order.

### 1.1.38.4.8 Order.ErrorReason Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ErrorReason",  
DbType="VarChar(100)")]  
public string ErrorReason;
```

#### Anmerkungen

This is ErrorReason, a member of class Order.

### 1.1.38.4.9 Order.ExecutionDate Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ExecutionDate",  
DbType="DateTime")]  
public System.Nullable<System.DateTime> ExecutionDate;
```

#### Anmerkungen

This is ExecutionDate, a member of class Order.

### 1.1.38.4.10 Order.FinishDate Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FinishDate", DbType="datetime")]  
public System.Nullable<System.DateTime> FinishDate;
```

#### Anmerkungen

This is FinishDate, a member of class Order.

### 1.1.38.4.11 Order.FreeText Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FreeText",  
DbType="varchar(200)")]  
public string FreeText;
```

#### Anmerkungen

This is FreeText, a member of class Order.

### 1.1.38.4.12 Order.Geprueft Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Geprueft")]  
public System.Nullable<bool> Geprueft;
```

#### Anmerkungen

This is Geprueft, a member of class Order.

### 1.1.38.4.13 Order.HasError Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_HasError", DbType="Bit")]  
public System.Nullable<bool> HasError;
```

#### Anmerkungen

This is HasError, a member of class Order.

### 1.1.38.4.14 Order.HasFinishedNoteBeenSent Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_HasFinishedNoteBeenSent",  
DbType="bit")]  
public System.Nullable<bool> HasFinishedNoteBeenSent;
```

#### Anmerkungen

This is HasFinishedNoteBeenSent, a member of class Order.

### 1.1.38.4.15 Order.Id Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Order.

**1.1.38.4.16 Order.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Order.

**1.1.38.4.17 Order.Location Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Order",  
Storage="_Location", ThisKey="LocationId", OtherKey="Id", IsForeignKey=true)]  
public Location Location;
```

**Anmerkungen**

This is Location, a member of class Order.

**1.1.38.4.18 Order.LocationId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LocationId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> LocationId;
```

**Anmerkungen**

This is LocationId, a member of class Order.

**1.1.38.4.19 Order.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Order.

**1.1.38.4.20 Order.OrderInvoice Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_OrderInvoice",  
Storage="_OrderInvoice", ThisKey="Id", OtherKey="OrderId")]  
public EntitySet<OrderInvoice> OrderInvoice;
```

**Anmerkungen**

This is OrderInvoice, a member of class Order.

**1.1.38.4.21 Order.OrderItem Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_OrderItem",  
Storage="_OrderItem", ThisKey="Id", OtherKey="OrderId")]
```

```
public EntitySet<OrderItem> OrderItem;
```

#### Anmerkungen

This is OrderItem, a member of class Order.

### 1.1.38.4.22 Order.Ordernumber Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Ordernumber",  
AutoSync=AutoSync.Always, DbType="Int NOT NULL IDENTITY", IsDbGenerated=true)]  
public int Ordernumber;
```

#### Anmerkungen

This is Ordernumber, a member of class Order.

### 1.1.38.4.23 Order.OrderStatus Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderStatus_Order",  
Storage="_OrderStatus", ThisKey="Status", OtherKey="Id", IsForeignKey=true)]  
public OrderStatus OrderStatus;
```

#### Anmerkungen

This is OrderStatus, a member of class Order.

### 1.1.38.4.24 Order.OrderType Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderType_Order",  
Storage="_OrderType", ThisKey="OrderTypeId", OtherKey="Id", IsForeignKey=true)]  
public OrderType OrderType;
```

#### Anmerkungen

This is OrderType, a member of class Order.

### 1.1.38.4.25 Order.OrderTypeId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderTypeId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid OrderTypeId;
```

#### Anmerkungen

This is OrderTypeId, a member of class Order.

### 1.1.38.4.26 Order.PackingList Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="PackingList_Order",  
Storage="_PackingList", ThisKey="PackingListId", OtherKey="Id", IsForeignKey=true)]  
public PackingList PackingList;
```

#### Anmerkungen

This is PackingList, a member of class Order.

### 1.1.38.4.27 Order.PackingList2 Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_PackingList",  
Storage="_PackingList2", ThisKey="Id", OtherKey="OldOrderId")]  
public EntitySet<PackingList> PackingList2;
```

#### Anmerkungen

This is PackingList2, a member of class Order.

### 1.1.38.4.28 Order.PackingListId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PackingListId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> PackingListId;
```

#### Anmerkungen

This is PackingListId, a member of class Order.

### 1.1.38.4.29 Order.ReadyToSend Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ReadyToSend", DbType="Bit")]  
public System.Nullable<bool> ReadyToSend;
```

#### Anmerkungen

This is ReadyToSend, a member of class Order.

### 1.1.38.4.30 Order.RegistrationLocation Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RegistrationLocation_Order",  
Storage="_RegistrationLocation", ThisKey="Zulassungsstelle", OtherKey="ID",  
IsForeignKey=true)]  
public RegistrationLocation RegistrationLocation;
```

#### Anmerkungen

This is RegistrationLocation, a member of class Order.

### 1.1.38.4.31 Order.RegistrationOrder Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_RegistrationOrder",  
Storage="_RegistrationOrder", ThisKey="Id", OtherKey="OrderId", IsUnique=true,  
IsForeignKey=false)]  
public RegistrationOrder RegistrationOrder;
```

#### Anmerkungen

This is RegistrationOrder, a member of class Order.

### 1.1.38.4.32 Order.Status Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Status", DbType="Int NOT NULL")]
```

```
public int Status;
```

**Anmerkungen**

This is Status, a member of class Order.

### 1.1.38.4.33 Order.User Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_Order", Storage="_User",  
ThisKey="UserId", OtherKey="Id", IsForeignKey=true)]  
public User User;
```

**Anmerkungen**

This is User, a member of class Order.

### 1.1.38.4.34 Order.UserId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_UserId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> UserId;
```

**Anmerkungen**

This is UserId, a member of class Order.

### 1.1.38.4.35 Order.Zulassungsstelle Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Zulassungsstelle")]  
public System.Nullable<System.Guid> Zulassungsstelle;
```

**Anmerkungen**

This is Zulassungsstelle, a member of class Order.

## 1.1.38.5 Order Ereignisse

### 1.1.38.5.1 Order.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Order.

### 1.1.38.5.2 Order.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Order.

## 1.1.39 OrderInvoice Klasse

Erweiterungsklasse für die OrderInvoice Tabelle

### Klassen Hierarchie

### C#

```
public class OrderInvoice : ILogging;
```

### Datei

OrderInvoice.cs (see page 699)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (see page 658)	This is LogDbContext, a member of class ILogging.

#### OrderInvoice Klasse

	Name	Beschreibung
	EntityState (see page 394)	This is EntityState, a member of class OrderInvoice.
	Invoice (see page 394)	This is Invoice, a member of class OrderInvoice.
	InvoiceId (see page 394)	This is InvoiceId, a member of class OrderInvoice.
	ItemId (see page 394)	This is ItemId, a member of class OrderInvoice.
	LogDbContext (see page 394)	This is LogDbContext, a member of class OrderInvoice.
	Order (see page 395)	This is Order, a member of class OrderInvoice.
	OrderId (see page 395)	This is OrderId, a member of class OrderInvoice.

### Methoden

#### OrderInvoice Klasse

	Name	Beschreibung
	OrderInvoice (see page 391)	This is OrderInvoice, a member of class OrderInvoice.

#### OrderInvoice Felder

#### OrderInvoice Klasse

	Name	Beschreibung
	_Invoice (see page 391)	This is _Invoice, a member of class OrderInvoice.
	_InvoiceId (see page 391)	This is _InvoiceId, a member of class OrderInvoice.
	_Order (see page 391)	This is _Order, a member of class OrderInvoice.
	_OrderId (see page 391)	This is _OrderId, a member of class OrderInvoice.
	emptyChangingEventArgs (see page 391)	This is emptyChangingEventArgs, a member of class OrderInvoice.

### OrderInvoice Methoden

#### OrderInvoice Klasse

	Name	Beschreibung
	CreateOrderInvoice (see page 392)	Erstellt eine Verknuepfung zwischen einem Auftrag und einer Rechnung.
	DeleteOrderInvoice (see page 392)	Loescht eine Auftrags/Rechnungsverknuepfung
	OnCreated (see page 392)	Aenderungsevents für die Historie
	OnInvoiceIdChanged (see page 392)	This is OnInvoiceIdChanged, a member of class OrderInvoice.
	OnInvoiceIdChanging (see page 393)	This is OnInvoiceIdChanging, a member of class OrderInvoice.
	OnLoaded (see page 393)	Aenderungsevents für die Historie
	OnOrderIdChanged (see page 393)	This is OnOrderIdChanged, a member of class OrderInvoice.

	OnOrderIdChanging ( <a href="#">↗</a> see page 393)	This is OnOrderIdChanging, a member of class OrderInvoice.
	OnValidate ( <a href="#">↗</a> see page 393)	This is OnValidate, a member of class OrderInvoice.
	SendPropertyChanged ( <a href="#">↗</a> see page 393)	This is SendPropertyChanged, a member of class OrderInvoice.
	SendPropertyChanging ( <a href="#">↗</a> see page 394)	This is SendPropertyChanging, a member of class OrderInvoice.

## OrderInvoice Ereignisse

### OrderInvoice Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 395)	This is PropertyChanged, a member of class OrderInvoice.

	SendPropertyChanged ( <a href="#">↗</a> see page 393)	This is SendPropertyChanged, a member of class OrderInvoice.
	SendPropertyChanging ( <a href="#">↗</a> see page 394)	This is SendPropertyChanging, a member of class OrderInvoice.

## 1.1.39.1 OrderInvoice.OrderInvoice Konstruktor

**C#**

```
public OrderInvoice();
```

**Anmerkungen**

This is OrderInvoice, a member of class OrderInvoice.

## 1.1.39.2 OrderInvoice Felder

### 1.1.39.2.1 OrderInvoice.\_Invoice Feld

**C#**

```
private EntityRef<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class OrderInvoice.

### 1.1.39.2.2 OrderInvoice.\_InvoiceId Feld

**C#**

```
private System.Guid _InvoiceId;
```

**Anmerkungen**

This is \_InvoiceId, a member of class OrderInvoice.

### 1.1.39.2.3 OrderInvoice.\_Order Feld

**C#**

```
private EntityRef<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class OrderInvoice.

### 1.1.39.2.4 OrderInvoice.\_OrderId Feld

**C#**

```
private System.Guid _OrderId;
```

**Anmerkungen**

This is \_OrderId, a member of class OrderInvoice.

### 1.1.39.2.5 OrderInvoice.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class OrderInvoice.

## 1.1.39.3 OrderInvoice Methoden

### 1.1.39.3.1 OrderInvoice.CreateOrderInvoice Methode

Erstellt eine Verknuepfung zwischen einem Auftrag und einer Rechnung.

**C#**

```
public static OrderInvoice CreateOrderInvoice(Guid orderId, Guid invoiceId,
DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid orderId	Id des Auftrags.
Guid invoiceId	Id der Rechnung.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Die neue Verknüpfung.

### 1.1.39.3.2 OrderInvoice.DeleteOrderInvoice Methode

Loescht eine Auftrags/Rechnungsverknuepfung

**C#**

```
public static void DeleteOrderInvoice(Guid orderId, Guid invoiceId, DataClasses1DataContext
dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid orderId	AuftragsID
Guid invoiceId	RechnungsID
DataClasses1DataContext dbContext	DB Kontext

### 1.1.39.3.3 OrderInvoice.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.39.3.4 OrderInvoice.OnInvoiceIdChanged Methode

**C#**

```
private void OnInvoiceIdChanged();
```

**Anmerkungen**

This is OnInvoiceIdChanged, a member of class OrderInvoice.

### 1.1.39.3.5 OrderInvoice.OnInvoiceIdChanging Methode

**C#**

```
private void OnInvoiceIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnInvoiceIdChanging, a member of class OrderInvoice.

### 1.1.39.3.6 OrderInvoice.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.39.3.7 OrderInvoice.OnOrderIdChanged Methode

**C#**

```
private void OnOrderIdChanged();
```

**Anmerkungen**

This is OnOrderIdChanged, a member of class OrderInvoice.

### 1.1.39.3.8 OrderInvoice.OnOrderIdChanging Methode

**C#**

```
private void OnOrderIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderIdChanging, a member of class OrderInvoice.

### 1.1.39.3.9 OrderInvoice.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class OrderInvoice.

### 1.1.39.3.10 OrderInvoice.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class OrderInvoice.

### 1.1.39.3.11 OrderInvoice.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class OrderInvoice.

## 1.1.39.4 OrderInvoice Eigenschaften

### 1.1.39.4.1 OrderInvoice.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class OrderInvoice.

### 1.1.39.4.2 OrderInvoice.Invoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Invoice_OrderInvoice",  
Storage="_Invoice", ThisKey="InvoiceId", OtherKey="Id", IsForeignKey=true)]  
public Invoice Invoice;
```

**Anmerkungen**

This is Invoice, a member of class OrderInvoice.

### 1.1.39.4.3 OrderInvoice.InvoiceId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_InvoiceId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid InvoiceId;
```

**Anmerkungen**

This is InvoiceId, a member of class OrderInvoice.

### 1.1.39.4.4 OrderInvoice.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class OrderInvoice.

### 1.1.39.4.5 OrderInvoice.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDbContext, a member of class OrderInvoice.

### 1.1.39.4.6 OrderInvoice.Order Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_OrderInvoice",
Storage="_Order", ThisKey="OrderId", OtherKey="Id", IsForeignKey=true)]
public Order Order;
```

**Anmerkungen**

This is Order, a member of class OrderInvoice.

### 1.1.39.4.7 OrderInvoice.OrderId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderId",
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]
public System.Guid OrderId;
```

**Anmerkungen**

This is OrderId, a member of class OrderInvoice.

## 1.1.39.5 OrderInvoice Ereignisse

### 1.1.39.5.1 OrderInvoice.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class OrderInvoice.

### 1.1.39.5.2 OrderInvoice.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class OrderInvoice.

## 1.1.40 OrderItem Klasse

Erweiterungsklasse für die OrderItem Tabelle

**Klassen Hierarchie****C#**

```
public class OrderItem : ILogging;
```

**Datei**

	PropertyChanging (🔗 see page 412)	This is PropertyChanging, a member of class OrderItem.

## ILogging Eigenschaften

	Name	Beschreibung
	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

## OrderItem Klasse

	Name	Beschreibung
	Amount (🔗 see page 408)	This is Amount, a member of class OrderItem.
	CostCenter (🔗 see page 408)	This is CostCenter, a member of class OrderItem.
	CostCenterId (🔗 see page 409)	This is CostCenterId, a member of class OrderItem.

	Count ( <a href="#">see page 409</a> )	This is Count, a member of class OrderItem.
	EntityState ( <a href="#">see page 409</a> )	This is EntityState, a member of class OrderItem.
	Id ( <a href="#">see page 409</a> )	This is Id, a member of class OrderItem.
	Invoiceltem ( <a href="#">see page 409</a> )	This is Invoiceltem, a member of class OrderItem.
	IsAuthorativeCharge ( <a href="#">see page 409</a> )	This is IsAuthorativeCharge, a member of class OrderItem.
	Itemld ( <a href="#">see page 410</a> )	This is Itemld, a member of class OrderItem.
	LogDBContext ( <a href="#">see page 410</a> )	This is LogDBContext, a member of class OrderItem.
	NeedsVAT ( <a href="#">see page 410</a> )	This is NeedsVAT, a member of class OrderItem.
	Order ( <a href="#">see page 410</a> )	This is Order, a member of class OrderItem.
	Orderld ( <a href="#">see page 410</a> )	This is Orderld, a member of class OrderItem.
	OrderItem1 ( <a href="#">see page 410</a> )	This is OrderItem1, a member of class OrderItem.
	OrderItem2 ( <a href="#">see page 411</a> )	This is OrderItem2, a member of class OrderItem.
	OrderItemStatus ( <a href="#">see page 411</a> )	This is OrderItemStatus, a member of class OrderItem.
	Product ( <a href="#">see page 411</a> )	This is Product, a member of class OrderItem.
	Productld ( <a href="#">see page 411</a> )	This is Productld, a member of class OrderItem.
	ProductName ( <a href="#">see page 411</a> )	This is ProductName, a member of class OrderItem.
	Status ( <a href="#">see page 412</a> )	This is Status, a member of class OrderItem.
	SuperOrderItemld ( <a href="#">see page 412</a> )	This is SuperOrderItemld, a member of class OrderItem.

## OrderItem Ereignisse

### OrderItem Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">see page 412</a> )	This is PropertyChanged, a member of class OrderItem.
	PropertyChanging ( <a href="#">see page 412</a> )	This is PropertyChanging, a member of class OrderItem.

## OrderItem Felder

### OrderItem Klasse

	Name	Beschreibung
	_Amount ( <a href="#">see page 399</a> )	This is _Amount, a member of class OrderItem.
	_CostCenter ( <a href="#">see page 399</a> )	This is _CostCenter, a member of class OrderItem.
	_CostCenterld ( <a href="#">see page 400</a> )	This is _CostCenterld, a member of class OrderItem.
	_Count ( <a href="#">see page 400</a> )	This is _Count, a member of class OrderItem.
	_ld ( <a href="#">see page 400</a> )	This is _ld, a member of class OrderItem.
	_Invoiceltem ( <a href="#">see page 400</a> )	This is _Invoiceltem, a member of class OrderItem.
	_IsAuthorativeCharge ( <a href="#">see page 400</a> )	This is _IsAuthorativeCharge, a member of class OrderItem.
	_NeedsVAT ( <a href="#">see page 400</a> )	This is _NeedsVAT, a member of class OrderItem.
	_Order ( <a href="#">see page 400</a> )	This is _Order, a member of class OrderItem.
	_Orderld ( <a href="#">see page 401</a> )	This is _Orderld, a member of class OrderItem.
	_OrderItem1 ( <a href="#">see page 401</a> )	This is _OrderItem1, a member of class OrderItem.
	_OrderItem2 ( <a href="#">see page 401</a> )	This is _OrderItem2, a member of class OrderItem.
	_OrderItemStatus ( <a href="#">see page 401</a> )	This is _OrderItemStatus, a member of class OrderItem.
	_Product ( <a href="#">see page 401</a> )	This is _Product, a member of class OrderItem.
	_Productld ( <a href="#">see page 401</a> )	This is _Productld, a member of class OrderItem.
	_ProductName ( <a href="#">see page 402</a> )	This is _ProductName, a member of class OrderItem.
	_Status ( <a href="#">see page 402</a> )	This is _Status, a member of class OrderItem.
	_SuperOrderItemld ( <a href="#">see page 402</a> )	This is _SuperOrderItemld, a member of class OrderItem.
	emptyChangingEventArgs ( <a href="#">see page 402</a> )	This is emptyChangingEventArgs, a member of class OrderItem.

## OrderItem Methoden

### OrderItem Klasse

	Name	Beschreibung
	attach_Invoiceltem ( <a href="#">see page 402</a> )	This is attach_Invoiceltem, a member of class OrderItem.
	attach_OrderItem2 ( <a href="#">see page 402</a> )	This is attach_OrderItem2, a member of class OrderItem.
	detach_Invoiceltem ( <a href="#">see page 403</a> )	This is detach_Invoiceltem, a member of class OrderItem.
	detach_OrderItem2 ( <a href="#">see page 403</a> )	This is detach_OrderItem2, a member of class OrderItem.
	OnAmountChanged ( <a href="#">see page 403</a> )	This is OnAmountChanged, a member of class OrderItem.
	OnAmountChanging ( <a href="#">see page 403</a> )	Aenderungsevents für die Historie
	OnCostCenterldChanged ( <a href="#">see page 403</a> )	This is OnCostCenterldChanged, a member of class OrderItem.

	OnCostCenterIdChanging ( <a href="#">see page 403</a> )	Aenderungsevents f��r die Historie
	OnCountChanged ( <a href="#">see page 404</a> )	This is OnCountChanged, a member of class OrderItem.
	OnCountChanging ( <a href="#">see page 404</a> )	Aenderungsevents f��r die Historie
	OnCreated ( <a href="#">see page 404</a> )	Aenderungsevents f��r die Historie
	OnIdChanged ( <a href="#">see page 404</a> )	This is OnIdChanged, a member of class OrderItem.
	OnIdChanging ( <a href="#">see page 404</a> )	This is OnIdChanging, a member of class OrderItem.
	OnIsAuthorativeChargeChanged ( <a href="#">see page 405</a> )	This is OnIsAuthorativeChargeChanged, a member of class OrderItem.
	OnIsAuthorativeChargeChanging ( <a href="#">see page 405</a> )	Aenderungsevents f��r die Historie
	OnLoaded ( <a href="#">see page 405</a> )	Aenderungsevents f��r die Historie
	OnNeedsVATChanged ( <a href="#">see page 405</a> )	This is OnNeedsVATChanged, a member of class OrderItem.
	OnNeedsVATChanging ( <a href="#">see page 405</a> )	Aenderungsevents f��r die Historie
	OnOrderIdChanged ( <a href="#">see page 406</a> )	This is OnOrderIdChanged, a member of class OrderItem.
	OnOrderIdChanging ( <a href="#">see page 406</a> )	This is OnOrderIdChanging, a member of class OrderItem.
	OnProductIdChanged ( <a href="#">see page 406</a> )	This is OnProductIdChanged, a member of class OrderItem.
	OnProductIdChanging ( <a href="#">see page 406</a> )	Aenderungsevents f��r die Historie
	OnProductNameChanged ( <a href="#">see page 406</a> )	This is OnProductNameChanged, a member of class OrderItem.
	OnProductNameChanging ( <a href="#">see page 407</a> )	Aenderungsevents f��r die Historie
	OnStatusChanged ( <a href="#">see page 407</a> )	This is OnStatusChanged, a member of class OrderItem.
	OnStatusChanging ( <a href="#">see page 407</a> )	Aenderungsevents f��r die Historie
	OnSuperOrderIdChanged ( <a href="#">see page 407</a> )	This is OnSuperOrderIdChanged, a member of class OrderItem.
	OnSuperOrderIdChanging ( <a href="#">see page 407</a> )	This is OnSuperOrderIdChanging, a member of class OrderItem.
	OnValidate ( <a href="#">see page 407</a> )	This is OnValidate, a member of class OrderItem.
	RemoveOrderItem ( <a href="#">see page 408</a> )	Loescht eine Auftragsposition und ggf. die Amtlichen Gebuehren dazu
	SendPropertyChanged ( <a href="#">see page 408</a> )	This is SendPropertyChanged, a member of class OrderItem.
	SendPropertyChanging ( <a href="#">see page 408</a> )	This is SendPropertyChanging, a member of class OrderItem.

## 1.1.40.1 OrderItem.OrderItem Konstruktor

C#

```
public OrderItem();
```

Anmerkungen

This is OrderItem, a member of class OrderItem.

## 1.1.40.2 OrderItem Felder

### 1.1.40.2.1 OrderItem.\_Amount Feld

C#

```
private decimal _Amount;
```

Anmerkungen

This is \_Amount, a member of class OrderItem.

### 1.1.40.2.2 OrderItem.\_CostCenter Feld

C#

```
private EntityRef<CostCenter> _CostCenter;
```

Anmerkungen

This is \_CostCenter, a member of class OrderItem.

### 1.1.40.2.3 OrderItem.\_CostCenterId Feld

**C#**

```
private System.Nullable<System.Guid> _CostCenterId;
```

**Anmerkungen**

This is \_CostCenterId, a member of class OrderItem.

### 1.1.40.2.4 OrderItem.\_Count Feld

**C#**

```
private int _Count;
```

**Anmerkungen**

This is \_Count, a member of class OrderItem.

### 1.1.40.2.5 OrderItem.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class OrderItem.

### 1.1.40.2.6 OrderItem.\_InvoiceItem Feld

**C#**

```
private EntitySet<InvoiceItem> _InvoiceItem;
```

**Anmerkungen**

This is \_InvoiceItem, a member of class OrderItem.

### 1.1.40.2.7 OrderItem.\_IsAuthorativeCharge Feld

**C#**

```
private bool _IsAuthorativeCharge;
```

**Anmerkungen**

This is \_IsAuthorativeCharge, a member of class OrderItem.

### 1.1.40.2.8 OrderItem.\_NeedsVAT Feld

**C#**

```
private bool _NeedsVAT;
```

**Anmerkungen**

This is \_NeedsVAT, a member of class OrderItem.

### 1.1.40.2.9 OrderItem.\_Order Feld

**C#**

```
private EntityRef<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class OrderItem.

**1.1.40.2.10 OrderItem.\_OrderId Feld****C#**

```
private System.Guid _OrderId;
```

**Anmerkungen**

This is \_OrderId, a member of class OrderItem.

**1.1.40.2.11 OrderItem.\_OrderItem1 Feld****C#**

```
private EntityRef<OrderItem> _OrderItem1;
```

**Anmerkungen**

This is \_OrderItem1, a member of class OrderItem.

**1.1.40.2.12 OrderItem.\_OrderItem2 Feld****C#**

```
private EntitySet<OrderItem> _OrderItem2;
```

**Anmerkungen**

This is \_OrderItem2, a member of class OrderItem.

**1.1.40.2.13 OrderItem.\_OrderItemStatus Feld****C#**

```
private EntityRef<OrderItemStatus> _OrderItemStatus;
```

**Anmerkungen**

This is \_OrderItemStatus, a member of class OrderItem.

**1.1.40.2.14 OrderItem.\_Product Feld****C#**

```
private EntityRef<Product> _Product;
```

**Anmerkungen**

This is \_Product, a member of class OrderItem.

**1.1.40.2.15 OrderItem.\_ProductId Feld****C#**

```
private System.Guid _ProductId;
```

**Anmerkungen**

This is \_ProductId, a member of class OrderItem.

### 1.1.40.2.16 OrderItem.\_ProductName Feld

**C#**

```
private string _ProductName;
```

**Anmerkungen**

This is \_ProductName, a member of class OrderItem.

### 1.1.40.2.17 OrderItem.\_Status Feld

**C#**

```
private int _Status;
```

**Anmerkungen**

This is \_Status, a member of class OrderItem.

### 1.1.40.2.18 OrderItem.\_SuperOrderItemId Feld

**C#**

```
private System.Nullable<System.Guid> _SuperOrderItemId;
```

**Anmerkungen**

This is \_SuperOrderItemId, a member of class OrderItem.

### 1.1.40.2.19 OrderItem.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class OrderItem.

## 1.1.40.3 OrderItem Methoden

### 1.1.40.3.1 OrderItem.attach\_InvoiceItem Methode

**C#**

```
private void attach_InvoiceItem(InvoiceItem entity);
```

**Anmerkungen**

This is attach\_InvoiceItem, a member of class OrderItem.

### 1.1.40.3.2 OrderItem.attach\_OrderItem2 Methode

**C#**

```
private void attach_OrderItem2(OrderItem entity);
```

**Anmerkungen**

This is attach\_OrderItem2, a member of class OrderItem.

### 1.1.40.3.3 OrderItem.detach\_InvoiceItem Methode

**C#**

```
private void detach_InvoiceItem(InvoiceItem entity);
```

**Anmerkungen**

This is detach\_InvoiceItem, a member of class OrderItem.

### 1.1.40.3.4 OrderItem.detach\_OrderItem2 Methode

**C#**

```
private void detach_OrderItem2(OrderItem entity);
```

**Anmerkungen**

This is detach\_OrderItem2, a member of class OrderItem.

### 1.1.40.3.5 OrderItem.OnAmountChanged Methode

**C#**

```
private void OnAmountChanged();
```

**Anmerkungen**

This is OnAmountChanged, a member of class OrderItem.

### 1.1.40.3.6 OrderItem.OnAmountChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnAmountChanging(decimal value);
```

**Parameter**

Parameter	Beschreibung
decimal value	

### 1.1.40.3.7 OrderItem.OnCostCenterIdChanged Methode

**C#**

```
private void OnCostCenterIdChanged();
```

**Anmerkungen**

This is OnCostCenterIdChanged, a member of class OrderItem.

### 1.1.40.3.8 OnCostCenterIdChanging Methode

#### 1.1.40.3.8.1 OrderItem.OnCostCenterIdChanging Methode (Guid?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnCostCenterIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.40.3.8.2 OrderItem.OnCostCenterIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnCostCenterIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnCostCenterIdChanging, a member of class OrderItem.

**1.1.40.3.9 OrderItem.OnCountChanged Methode****C#**

```
private void OnCountChanged();
```

**Anmerkungen**

This is OnCountChanged, a member of class OrderItem.

**1.1.40.3.10 OrderItem.OnCountChanging Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCountChanging(int value);
```

**Parameter**

Parameter	Beschreibung
int value	

**1.1.40.3.11 OrderItem.OnCreated Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.40.3.12 OrderItem.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class OrderItem.

**1.1.40.3.13 OrderItem.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class OrderItem.

**1.1.40.3.14 OrderItem.OnIsAuthorativeChargeChanged Methode****C#**

```
private void OnIsAuthorativeChargeChanged();
```

**Anmerkungen**

This is OnIsAuthorativeChargeChanged, a member of class OrderItem.

**1.1.40.3.15 OrderItem.OnIsAuthorativeChargeChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnIsAuthorativeChargeChanging(bool value);
```

**Parameter**

Parameter	Beschreibung
bool value	

**1.1.40.3.16 OrderItem.OnLoaded Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.40.3.17 OrderItem.OnNeedsVATChanged Methode****C#**

```
private void OnNeedsVATChanged();
```

**Anmerkungen**

This is OnNeedsVATChanged, a member of class OrderItem.

**1.1.40.3.18 OrderItem.OnNeedsVATChanging Methode**

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnNeedsVATChanging(bool value);
```

**Parameter**

Parameter	Beschreibung
bool value	

### 1.1.40.3.19 OrderItem.OnOrderIdChanged Methode

**C#**

```
private void OnOrderIdChanged();
```

**Anmerkungen**

This is OnOrderIdChanged, a member of class OrderItem.

### 1.1.40.3.20 OrderItem.OnOrderIdChanging Methode

**C#**

```
private void OnOrderIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderIdChanging, a member of class OrderItem.

### 1.1.40.3.21 OrderItem.OnProductIdChanged Methode

**C#**

```
private void OnProductIdChanged();
```

**Anmerkungen**

This is OnProductIdChanged, a member of class OrderItem.

### 1.1.40.3.22 OnProductIdChanging Methode

#### 1.1.40.3.22.1 OrderItem.OnProductIdChanging Methode (Guid)

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnProductIdChanging(Guid value);
```

**Parameter**

Parameter	Beschreibung
Guid value	

#### 1.1.40.3.22.2 OrderItem.OnProductIdChanging Methode (System.Guid)

**C#**

```
private void OnProductIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnProductIdChanging, a member of class OrderItem.

### 1.1.40.3.23 OrderItem.OnProductNameChanged Methode

**C#**

```
private void OnProductNameChanged();
```

**Anmerkungen**

This is OnProductNameChanged, a member of class OrderItem.

### 1.1.40.3.24 OrderItem.OnProductNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnProductNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.40.3.25 OrderItem.OnStatusChanged Methode

**C#**

```
private void OnStatusChanged();
```

**Anmerkungen**

This is OnStatusChanged, a member of class OrderItem.

### 1.1.40.3.26 OrderItem.OnStatusChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnStatusChanging(int value);
```

**Parameter**

Parameter	Beschreibung
int value	

### 1.1.40.3.27 OrderItem.OnSuperOrderItemIdChanged Methode

**C#**

```
private void OnSuperOrderItemIdChanged();
```

**Anmerkungen**

This is OnSuperOrderItemIdChanged, a member of class OrderItem.

### 1.1.40.3.28 OrderItem.OnSuperOrderItemIdChanging Methode

**C#**

```
private void OnSuperOrderItemIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnSuperOrderItemIdChanging, a member of class OrderItem.

### 1.1.40.3.29 OrderItem.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class OrderItem.

### 1.1.40.3.30 OrderItem.RemoveOrderItem Methode

Loescht eine Auftragsposition und ggf. die Amtlichen Gebuehren dazu

**C#**

```
public static void RemoveOrderItem(DataClasses1DataContext dbContext, Guid orderItemId);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Guid orderItemId	AuftragspositionID

### 1.1.40.3.31 OrderItem.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class OrderItem.

### 1.1.40.3.32 OrderItem.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class OrderItem.

## 1.1.40.4 OrderItem Eigenschaften

### 1.1.40.4.1 OrderItem.Amount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Amount", DbType="Money NOT NULL")]  
public decimal Amount;
```

**Anmerkungen**

This is Amount, a member of class OrderItem.

### 1.1.40.4.2 OrderItem.CostCenter Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="CostCenter_OrderItem",  
Storage="_CostCenter", ThisKey="CostCenterId", OtherKey="Id", IsForeignKey=true)]  
public CostCenter CostCenter;
```

**Anmerkungen**

This is CostCenter, a member of class OrderItem.

### 1.1.40.4.3 OrderItem.CostCenterId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CostCenterId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> CostCenterId;
```

**Anmerkungen**

This is CostCenterId, a member of class OrderItem.

### 1.1.40.4.4 OrderItem.Count Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Count", DbType="Int NOT NULL")]  
public int Count;
```

**Anmerkungen**

This is Count, a member of class OrderItem.

### 1.1.40.4.5 OrderItem.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class OrderItem.

### 1.1.40.4.6 OrderItem.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class OrderItem.

### 1.1.40.4.7 OrderItem.InvoiceItem Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderItem_InvoiceItem",  
Storage="_InvoiceItem", ThisKey="Id", OtherKey="OrderItemId")]  
public EntitySet<InvoiceItem> InvoiceItem;
```

**Anmerkungen**

This is InvoiceItem, a member of class OrderItem.

### 1.1.40.4.8 OrderItem.IsAuthorativeCharge Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsAuthorativeCharge",  
DbType="Bit NOT NULL")]  
public bool IsAuthorativeCharge;
```

**Anmerkungen**

This is IsAuthorativeCharge, a member of class OrderItem.

**1.1.40.4.9 OrderItem.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class OrderItem.

**1.1.40.4.10 OrderItem.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class OrderItem.

**1.1.40.4.11 OrderItem.NeedsVAT Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_NeedsVAT", DbType="bit not null")]  
public bool NeedsVAT;
```

**Anmerkungen**

This is NeedsVAT, a member of class OrderItem.

**1.1.40.4.12 OrderItem.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_OrderItem",  
Storage="_Order", ThisKey="OrderId", OtherKey="Id", IsForeignKey=true)]  
public Order Order;
```

**Anmerkungen**

This is Order, a member of class OrderItem.

**1.1.40.4.13 OrderItem.OrderId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid OrderId;
```

**Anmerkungen**

This is OrderId, a member of class OrderItem.

**1.1.40.4.14 OrderItem.OrderItem1 Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderItem_OrderItem",  
Storage="_OrderItem1", ThisKey="SuperOrderItemId", OtherKey="Id", IsForeignKey=true)]
```

```
public OrderItem OrderItem1;
```

**Anmerkungen**

This is OrderItem1, a member of class OrderItem.

### 1.1.40.4.15 OrderItem.OrderItem2 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderItem_OrderItem",  
Storage="_OrderItem2", ThisKey="Id", OtherKey="SuperOrderItemId")]  
public EntitySet<OrderItem> OrderItem2;
```

**Anmerkungen**

This is OrderItem2, a member of class OrderItem.

### 1.1.40.4.16 OrderItem.OrderItemStatus Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderItemStatus_OrderItem",  
Storage="_OrderItemStatus", ThisKey="Status", OtherKey="Id", IsForeignKey=true)]  
public OrderItemStatus OrderItemStatus;
```

**Anmerkungen**

This is OrderItemStatus, a member of class OrderItem.

### 1.1.40.4.17 OrderItem.Product Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Product_OrderItem",  
Storage="_Product", ThisKey="ProductId", OtherKey="Id", IsForeignKey=true)]  
public Product Product;
```

**Anmerkungen**

This is Product, a member of class OrderItem.

### 1.1.40.4.18 OrderItem.ProductId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ProductId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid ProductId;
```

**Anmerkungen**

This is ProductId, a member of class OrderItem.

### 1.1.40.4.19 OrderItem.ProductName Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ProductName",  
DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string ProductName;
```

**Anmerkungen**

This is ProductName, a member of class OrderItem.

### 1.1.40.4.20 OrderItem.Status Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Status", DbType="Int NOT NULL")]  
public int Status;
```

#### Anmerkungen

This is Status, a member of class OrderItem.

### 1.1.40.4.21 OrderItem.SuperOrderItemId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_SuperOrderItemId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> SuperOrderItemId;
```

#### Anmerkungen

This is SuperOrderItemId, a member of class OrderItem.

## 1.1.40.5 OrderItem Ereignisse

### 1.1.40.5.1 OrderItem.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class OrderItem.

### 1.1.40.5.2 OrderItem.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class OrderItem.

---

## 1.1.41 OrderItemStatus Klasse

#### Klassen Hierarchie

#### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.OrderItemStatus")]  
public class OrderItemStatus : INotifyPropertyChanging, INotifyPropertyChanged;
```

#### Datei

DataClasses1.designer.cs (🔗 see page 695)

**Anmerkungen**

This is class KVSCCommon.Database.OrderItemStatus.

**Mitglieder****Methoden**

	Name	Beschreibung
	OrderItemStatus ( <a href="#">see page 414</a> )	This is OrderItemStatus, a member of class OrderItemStatus.

 	SendPropertyChanging (  see page 416)	This is SendPropertyChanging, a member of class OrderItemStatus.

**1.1.41.1 OrderItemStatus.OrderItemStatus Konstruktor****C#**

```
public OrderItemStatus();
```

**Anmerkungen**

This is OrderItemStatus, a member of class OrderItemStatus.

**1.1.41.2 OrderItemStatus Felder****1.1.41.2.1 OrderItemStatus.\_Id Feld****C#**

```
private int _Id;
```

**Anmerkungen**

This is \_Id, a member of class OrderItemStatus.

**1.1.41.2.2 OrderItemStatus.\_Name Feld****C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class OrderItemStatus.

**1.1.41.2.3 OrderItemStatus.\_OrderItem Feld****C#**

```
private EntitySet<OrderItem> _OrderItem;
```

**Anmerkungen**

This is \_OrderItem, a member of class OrderItemStatus.

#### 1.1.41.2.4 OrderItemStatus.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class OrderItemStatus.

#### 1.1.41.3 OrderItemStatus Methoden

##### 1.1.41.3.1 OrderItemStatus.attach\_OrderItem Methode

**C#**

```
private void attach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is attach\_OrderItem, a member of class OrderItemStatus.

##### 1.1.41.3.2 OrderItemStatus.detach\_OrderItem Methode

**C#**

```
private void detach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is detach\_OrderItem, a member of class OrderItemStatus.

##### 1.1.41.3.3 OrderItemStatus.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class OrderItemStatus.

##### 1.1.41.3.4 OrderItemStatus.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class OrderItemStatus.

##### 1.1.41.3.5 OrderItemStatus.OnIdChanging Methode

**C#**

```
private void OnIdChanging(int value);
```

**Anmerkungen**

This is OnIdChanging, a member of class OrderItemStatus.

### 1.1.41.3.6 OrderItemStatus.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class OrderItemStatus.

### 1.1.41.3.7 OrderItemStatus.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class OrderItemStatus.

### 1.1.41.3.8 OrderItemStatus.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class OrderItemStatus.

### 1.1.41.3.9 OrderItemStatus.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class OrderItemStatus.

### 1.1.41.3.10 OrderItemStatus.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class OrderItemStatus.

### 1.1.41.3.11 OrderItemStatus.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class OrderItemStatus.

## 1.1.41.4 OrderItemStatus Eigenschaften

### 1.1.41.4.1 OrderItemStatus.Id Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="Int NOT NULL",  
IsPrimaryKey=true)]  
public int Id;
```

#### Anmerkungen

This is Id, a member of class OrderItemStatus.

### 1.1.41.4.2 OrderItemStatus.Name Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Name;
```

#### Anmerkungen

This is Name, a member of class OrderItemStatus.

### 1.1.41.4.3 OrderItemStatus.OrderItem Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderItemStatus_OrderItem",  
Storage="_OrderItem", ThisKey="Id", OtherKey="Status")]  
public EntitySet<OrderItem> OrderItem;
```

#### Anmerkungen

This is OrderItem, a member of class OrderItemStatus.

## 1.1.41.5 OrderItemStatus Ereignisse

### 1.1.41.5.1 OrderItemStatus.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class OrderItemStatus.

### 1.1.41.5.2 OrderItemStatus.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class OrderItemStatus.

## 1.1.42 OrderStatus Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.OrderStatus")]
public class OrderStatus : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([↗](#) see page 695)

### Anmerkungen

This is class KVSCCommon.Database.OrderStatus.

	detach_Order ( <a href="#">↗</a> see page 426)	This is detach_Order, a member of class OrderType.
	detach_Product ( <a href="#">↗</a> see page 426)	This is detach_Product, a member of class OrderType.
	detach_RequiredField ( <a href="#">↗</a> see page 427)	This is detach_RequiredField, a member of class OrderType.
	OnCreated ( <a href="#">↗</a> see page 427)	This is OnCreated, a member of class OrderType.
	OnIdChanged ( <a href="#">↗</a> see page 427)	This is OnIdChanged, a member of class OrderType.
	OnIdChanging ( <a href="#">↗</a> see page 427)	This is OnIdChanging, a member of class OrderType.
	OnLoaded ( <a href="#">↗</a> see page 427)	This is OnLoaded, a member of class OrderType.
	OnNameChanged ( <a href="#">↗</a> see page 427)	This is OnNameChanged, a member of class OrderType.
	OnNameChanging ( <a href="#">↗</a> see page 427)	This is OnNameChanging, a member of class OrderType.
	OnValidate ( <a href="#">↗</a> see page 428)	This is OnValidate, a member of class OrderType.
	SendPropertyChanged ( <a href="#">↗</a> see page 428)	This is SendPropertyChanged, a member of class OrderType.
	SendPropertyChanging ( <a href="#">↗</a> see page 428)	This is SendPropertyChanging, a member of class OrderType.

## 1.1.43.1 OrderType.OrderType Konstruktor

**C#**

```
public OrderType();
```

### Anmerkungen

This is OrderType, a member of class OrderType.

## 1.1.43.2 OrderType Felder

### 1.1.43.2.1 OrderType.\_Id Feld

**C#**

```
private System.Guid _Id;
```

### Anmerkungen

This is \_Id, a member of class OrderType.

### 1.1.43.2.2 OrderType.\_Name Feld

**C#**

```
private string _Name;
```

### Anmerkungen

This is \_Name, a member of class OrderType.

### 1.1.43.2.3 OrderType.\_Order Feld

**C#**

```
private EntitySet<Order> _Order;
```

### Anmerkungen

This is \_Order, a member of class OrderType.

### 1.1.43.2.4 OrderType.\_Product Feld

**C#**

```
private EntitySet<Product> _Product;
```

### Anmerkungen

This is \_Product, a member of class OrderType.

### 1.1.43.2.5 OrderType.\_RequiredField Feld

**C#**

```
private EntitySet<RequiredField> _RequiredField;
```

### Anmerkungen

This is \_RequiredField, a member of class OrderType.

### 1.1.43.2.6 OrderType.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class OrderType.

## 1.1.43.3 OrderType Methoden

### 1.1.43.3.1 OrderType.attach\_Order Methode

**C#**

```
private void attach_Order(Order entity);
```

**Anmerkungen**

This is attach\_Order, a member of class OrderType.

### 1.1.43.3.2 OrderType.attach\_Product Methode

**C#**

```
private void attach_Product(Product entity);
```

**Anmerkungen**

This is attach\_Product, a member of class OrderType.

### 1.1.43.3.3 OrderType.attach\_RequiredField Methode

**C#**

```
private void attach_RequiredField(RequiredField entity);
```

**Anmerkungen**

This is attach\_RequiredField, a member of class OrderType.

### 1.1.43.3.4 OrderType.detach\_Order Methode

**C#**

```
private void detach_Order(Order entity);
```

**Anmerkungen**

This is detach\_Order, a member of class OrderType.

### 1.1.43.3.5 OrderType.detach\_Product Methode

**C#**

```
private void detach_Product(Product entity);
```

**Anmerkungen**

This is detach\_Product, a member of class OrderType.

### 1.1.43.3.6 OrderType.detach\_RequiredField Methode

**C#**

```
private void detach_RequiredField(RequiredField entity);
```

**Anmerkungen**

This is detach\_RequiredField, a member of class OrderType.

### 1.1.43.3.7 OrderType.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class OrderType.

### 1.1.43.3.8 OrderType.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class OrderType.

### 1.1.43.3.9 OrderType.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class OrderType.

### 1.1.43.3.10 OrderType.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class OrderType.

### 1.1.43.3.11 OrderType.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class OrderType.

### 1.1.43.3.12 OrderType.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class OrderType.

**1.1.43.3.13 OrderType.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class OrderType.

**1.1.43.3.14 OrderType.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class OrderType.

**1.1.43.3.15 OrderType.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class OrderType.

**1.1.43.4 OrderType Eigenschaften****1.1.43.4.1 OrderType.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class OrderType.

**1.1.43.4.2 OrderType.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="NChar(10)")]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class OrderType.

### 1.1.43.4.3 OrderType.Order Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderType_Order",  
Storage="_Order", ThisKey="Id", OtherKey="OrderTypeId")]  
public EntitySet<Order> Order;
```

#### Anmerkungen

This is Order, a member of class OrderType.

### 1.1.43.4.4 OrderType.Product Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderType_Product",  
Storage="_Product", ThisKey="Id", OtherKey="OrderTypeId")]  
public EntitySet<Product> Product;
```

#### Anmerkungen

This is Product, a member of class OrderType.

### 1.1.43.4.5 OrderType.RequiredField Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderType_RequiredField",  
Storage="_RequiredField", ThisKey="Id", OtherKey="OrderTypeId")]  
public EntitySet<RequiredField> RequiredField;
```

#### Anmerkungen

This is RequiredField, a member of class OrderType.

## 1.1.43.5 OrderType Ereignisse

### 1.1.43.5.1 OrderType.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class OrderType.

### 1.1.43.5.2 OrderType.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class OrderType.

## 1.1.44 PackingList Klasse

Erweiterungsklasse für die Datenbanktabelle PackingList (Lieferscheintabelle)

### Klassen Hierarchie

### C#

```
public class PackingList : ILogging;
```

### Datei

PackingList.cs (see page 700)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (see page 658)	This is LogDbContext, a member of class ILogging.

#### PackingList Klasse

	Name	Beschreibung
	Adress (see page 441)	This is Adress, a member of class PackingList.
	DispatchOrderNumber (see page 441)	This is DispatchOrderNumber, a member of class PackingList.
	Document (see page 442)	This is Document, a member of class PackingList.
	DocumentId (see page 442)	This is DocumentId, a member of class PackingList.
	EntityState (see page 442)	This is EntityState, a member of class PackingList.
	Id (see page 442)	This is Id, a member of class PackingList.
	IsPrinted (see page 442)	This is IsPrinted, a member of class PackingList.
	IsSelfDispatch (see page 442)	This is IsSelfDispatch, a member of class PackingList.
	ItemId (see page 443)	This is ItemId, a member of class PackingList.
	LogDbContext (see page 443)	This is LogDbContext, a member of class PackingList.
	OldOrderId (see page 443)	This is OldOrderId, a member of class PackingList.
	Order (see page 443)	This is Order, a member of class PackingList.
	Order1 (see page 443)	This is Order1, a member of class PackingList.
	PackingListNumber (see page 443)	This is PackingListNumber, a member of class PackingList.
	Recipient (see page 444)	This is Recipient, a member of class PackingList.
	RecipientAdressId (see page 444)	This is RecipientAdressId, a member of class PackingList.

### Methoden

#### PackingList Klasse

	Name	Beschreibung
	PackingList (see page 433)	This is PackingList, a member of class PackingList.

#### PackingList Felder

#### PackingList Klasse

	Name	Beschreibung
	_Adress (see page 433)	This is _Adress, a member of class PackingList.
	_DispatchOrderNumber (see page 433)	This is _DispatchOrderNumber, a member of class PackingList.
	_Document (see page 433)	This is _Document, a member of class PackingList.
	_DocumentId (see page 434)	This is _DocumentId, a member of class PackingList.
	_Id (see page 434)	This is _Id, a member of class PackingList.
	_IsPrinted (see page 434)	This is _IsPrinted, a member of class PackingList.
	_IsSelfDispatch (see page 434)	This is _IsSelfDispatch, a member of class PackingList.
	_OldOrderId (see page 434)	This is _OldOrderId, a member of class PackingList.

	_Order ( <a href="#">↗</a> see page 434)	This is _Order, a member of class PackingList.
	_Order1 ( <a href="#">↗</a> see page 434)	This is _Order1, a member of class PackingList.
	_PackingListNumber ( <a href="#">↗</a> see page 435)	This is _PackingListNumber, a member of class PackingList.
	_Recipient ( <a href="#">↗</a> see page 435)	This is _Recipient, a member of class PackingList.
	_RecipientAdressId ( <a href="#">↗</a> see page 435)	This is _RecipientAdressId, a member of class PackingList.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 435)	This is emptyChangingEventArgs, a member of class PackingList.

## PackingList Methoden

### PackingList Klasse

	Name	Beschreibung
	AddOrderByld ( <a href="#">↗</a> see page 435)	Fügt dem Lieferschein einen Auftrag anhand der AuftragsId hinzu.
	attach_Order ( <a href="#">↗</a> see page 436)	This is attach_Order, a member of class PackingList.
	CreatePackingList ( <a href="#">↗</a> see page 436)	Erstellt einen neuen Lieferscheindatensatz.
	detach_Order ( <a href="#">↗</a> see page 436)	This is detach_Order, a member of class PackingList.
	MergePackingLists ( <a href="#">↗</a> see page 436)	Merged PDFs
	OnCreated ( <a href="#">↗</a> see page 436)	Aenderungsereignis für die Historie
	OnDispatchOrderNumberChanged ( <a href="#">↗</a> see page 437)	This is OnDispatchOrderNumberChanged, a member of class PackingList.
	OnDispatchOrderNumberChanging ( <a href="#">↗</a> see page 437)	Aenderungsereignis für die Historie
	OnDocumentIdChanged ( <a href="#">↗</a> see page 437)	This is OnDocumentIdChanged, a member of class PackingList.
	OnDocumentIdChanging ( <a href="#">↗</a> see page 437)	This is OnDocumentIdChanging, a member of class PackingList.
	OnIdChanged ( <a href="#">↗</a> see page 437)	This is OnIdChanged, a member of class PackingList.
	OnIdChanging ( <a href="#">↗</a> see page 437)	This is OnIdChanging, a member of class PackingList.
	OnIsPrintedChanged ( <a href="#">↗</a> see page 438)	This is OnIsPrintedChanged, a member of class PackingList.
	OnIsPrintedChanging ( <a href="#">↗</a> see page 438)	This is OnIsPrintedChanging, a member of class PackingList.
	OnIsSelfDispatchChanged ( <a href="#">↗</a> see page 438)	This is OnIsSelfDispatchChanged, a member of class PackingList.
	OnIsSelfDispatchChanging ( <a href="#">↗</a> see page 438)	This is OnIsSelfDispatchChanging, a member of class PackingList.
	OnLoaded ( <a href="#">↗</a> see page 438)	Aenderungsereignis für die Historie
	OnOldOrderIdChanged ( <a href="#">↗</a> see page 439)	This is OnOldOrderIdChanged, a member of class PackingList.
	OnOldOrderIdChanging ( <a href="#">↗</a> see page 439)	This is OnOldOrderIdChanging, a member of class PackingList.
	OnPackingListNumberChanged ( <a href="#">↗</a> see page 439)	This is OnPackingListNumberChanged, a member of class PackingList.
	OnPackingListNumberChanging ( <a href="#">↗</a> see page 439)	This is OnPackingListNumberChanging, a member of class PackingList.
	OnRecipientAdressIdChanged ( <a href="#">↗</a> see page 439)	This is OnRecipientAdressIdChanged, a member of class PackingList.
	OnRecipientAdressIdChanging ( <a href="#">↗</a> see page 439)	This is OnRecipientAdressIdChanging, a member of class PackingList.
	OnRecipientChanged ( <a href="#">↗</a> see page 440)	This is OnRecipientChanged, a member of class PackingList.
	OnRecipientChanging ( <a href="#">↗</a> see page 440)	Aenderungsereignis für die Historie
	OnValidate ( <a href="#">↗</a> see page 440)	This is OnValidate, a member of class PackingList.
	Print ( <a href="#">↗</a> see page 440)	Erstellt den Lieferschein als PDF und schreibt ihn in den angegebenen MemoryStream.
	RemoveOrderByld ( <a href="#">↗</a> see page 440)	Entfernt einen Auftrag aus dem Lieferschein.
	SendByEmail ( <a href="#">↗</a> see page 441)	Versendet den Lieferschein per Email, falls erforderlich.
	SendPropertyChanged ( <a href="#">↗</a> see page 441)	This is SendPropertyChanged, a member of class PackingList.
	SendPropertyChanging ( <a href="#">↗</a> see page 441)	This is SendPropertyChanging, a member of class PackingList.

## PackingList Ereignisse

### PackingList Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 444)	This is PropertyChanged, a member of class PackingList.
	PropertyChanging ( <a href="#">↗</a> see page 444)	This is PropertyChanging, a member of class PackingList.

## ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

## PackingList Klasse

	Name	Beschreibung
	Adress ( <a href="#">↗</a> see page 441)	This is Adress, a member of class PackingList.

	DispatchOrderNumber ( <a href="#">see page 441</a> )	This is DispatchOrderNumber, a member of class PackingList.
	Document ( <a href="#">see page 442</a> )	This is Document, a member of class PackingList.
	DocumentId ( <a href="#">see page 442</a> )	This is DocumentId, a member of class PackingList.
	EntityState ( <a href="#">see page 442</a> )	This is EntityState, a member of class PackingList.
	Id ( <a href="#">see page 442</a> )	This is Id, a member of class PackingList.
	IsPrinted ( <a href="#">see page 442</a> )	This is IsPrinted, a member of class PackingList.
	IsSelfDispatch ( <a href="#">see page 442</a> )	This is IsSelfDispatch, a member of class PackingList.
	ItemId ( <a href="#">see page 443</a> )	This is ItemId, a member of class PackingList.
	LogDbContext ( <a href="#">see page 443</a> )	This is LogDbContext, a member of class PackingList.
	OldOrderId ( <a href="#">see page 443</a> )	This is OldOrderId, a member of class PackingList.
	Order ( <a href="#">see page 443</a> )	This is Order, a member of class PackingList.
	Order1 ( <a href="#">see page 443</a> )	This is Order1, a member of class PackingList.
	PackingListNumber ( <a href="#">see page 443</a> )	This is PackingListNumber, a member of class PackingList.
	Recipient ( <a href="#">see page 444</a> )	This is Recipient, a member of class PackingList.
	RecipientAdressId ( <a href="#">see page 444</a> )	This is RecipientAdressId, a member of class PackingList.

## PackingList Ereignisse

### 1.1.44.1 PackingList.PackingList Konstruktor

**C#**

```
public PackingList();
```

**Anmerkungen**

This is PackingList, a member of class PackingList.

### 1.1.44.2 PackingList Felder

#### 1.1.44.2.1 PackingList.\_Adress Feld

**C#**

```
private EntityRef<Adress> _Adress;
```

**Anmerkungen**

This is \_Adress, a member of class PackingList.

#### 1.1.44.2.2 PackingList.\_DispatchOrderNumber Feld

**C#**

```
private string _DispatchOrderNumber;
```

**Anmerkungen**

This is \_DispatchOrderNumber, a member of class PackingList.

#### 1.1.44.2.3 PackingList.\_Document Feld

**C#**

```
private EntityRef<Document> _Document;
```

**Anmerkungen**

This is \_Document, a member of class PackingList.

#### 1.1.44.2.4 PackingList.\_DocumentId Feld

**C#**

```
private System.Nullable<System.Guid> _DocumentId;
```

**Anmerkungen**

This is \_DocumentId, a member of class PackingList.

#### 1.1.44.2.5 PackingList.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class PackingList.

#### 1.1.44.2.6 PackingList.\_IsPrinted Feld

**C#**

```
private System.Nullable<bool> _IsPrinted;
```

**Anmerkungen**

This is \_IsPrinted, a member of class PackingList.

#### 1.1.44.2.7 PackingList.\_IsSelfDispatch Feld

**C#**

```
private System.Nullable<bool> _IsSelfDispatch;
```

**Anmerkungen**

This is \_IsSelfDispatch, a member of class PackingList.

#### 1.1.44.2.8 PackingList.\_OldOrderId Feld

**C#**

```
private System.Nullable<System.Guid> _OldOrderId;
```

**Anmerkungen**

This is \_OldOrderId, a member of class PackingList.

#### 1.1.44.2.9 PackingList.\_Order Feld

**C#**

```
private EntitySet<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class PackingList.

#### 1.1.44.2.10 PackingList.\_Order1 Feld

**C#**

```
private EntityRef<Order> _Order1;
```

Anmerkungen

This is \_Order1, a member of class PackingList.

1.1.44.2.11 PackingList.\_PackingListNumber Feld

C#

```
private int _PackingListNumber;
```

Anmerkungen

This is \_PackingListNumber, a member of class PackingList.

1.1.44.2.12 PackingList.\_Recipient Feld

C#

```

private System.Guid _RecipientAdressId;
```

Anmerkungen

This is \_RecipientAdressId, a member of class PackingList.

1.1.44.2.14 PackingList.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

Anmerkungen

This is emptyChangingEventArgs, a member of class PackingList.

1.1.44.3 PackingList Methoden

1.1.44.3.1 PackingList.AddOrderById Methode

FÃ¼gt dem Lieferschein einen Auftrag anhand der AuftragsId hinzu.

C#

```
public void AddOrderById(Guid orderId, DataClasses1DataContext dbContext);
```

Parameter

Parameter	Beschreibung
Guid orderId	Id (see page 442) des Auftrags.
DataClasses1DataContext dbContext	Datenbankkontext fÃ¼r die Transaktion.

### 1.1.44.3.2 PackingList.attach\_Order Methode

**C#**

```
private void attach_Order(Order entity);
```

#### Anmerkungen

This is attach\_Order, a member of class PackingList.

### 1.1.44.3.3 PackingList.CreatePackingList Methode

Erstellt einen neuen Lieferscheindatensatz.

**C#**

```
public static PackingList CreatePackingList(string recipient, Guid recipientAdressId,
DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string recipient	Empfänger des Lieferscheins.
Guid recipientAdressId	Id (see page 442) der Adresse für den Lieferschein.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

#### Resultate

Den neuen Lieferscheindatensatz.

### 1.1.44.3.4 PackingList.detach\_Order Methode

**C#**

```
private void detach_Order(Order entity);
```

#### Anmerkungen

This is detach\_Order, a member of class PackingList.

### 1.1.44.3.5 PackingList.MergePackingLists Methode

Merged PDFs

**C#**

```
public static void MergePackingLists(string[] files, string mergedFileName);
```

#### Parameter

Parameter	Beschreibung
orderId	File Array
return	Gemerged PDF

### 1.1.44.3.6 PackingList.OnCreated Methode

Aenderungsereignis für die Historie

**C#**

```
private void OnCreated();
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.44.3.7 PackingList.OnDispatchOrderNumberChanged Methode

**C#**

```
private void OnDispatchOrderNumberChanged();
```

#### Anmerkungen

This is OnDispatchOrderNumberChanged, a member of class PackingList.

### 1.1.44.3.8 PackingList.OnDispatchOrderNumberChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnDispatchOrderNumberChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.44.3.9 PackingList.OnDocumentIdChanged Methode

**C#**

```
private void OnDocumentIdChanged();
```

#### Anmerkungen

This is OnDocumentIdChanged, a member of class PackingList.

### 1.1.44.3.10 PackingList.OnDocumentIdChanging Methode

**C#**

```
private void OnDocumentIdChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnDocumentIdChanging, a member of class PackingList.

### 1.1.44.3.11 PackingList.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

#### Anmerkungen

This is OnIdChanged, a member of class PackingList.

### 1.1.44.3.12 PackingList.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnIdChanging, a member of class PackingList.

### 1.1.44.3.13 PackingList.OnIsPrintedChanged Methode

**C#**

```
private void OnIsPrintedChanged();
```

**Anmerkungen**

This is OnIsPrintedChanged, a member of class PackingList.

### 1.1.44.3.14 PackingList.OnIsPrintedChanging Methode

**C#**

```
private void OnIsPrintedChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnIsPrintedChanging, a member of class PackingList.

### 1.1.44.3.15 PackingList.OnIsSelfDispatchChanged Methode

**C#**

```
private void OnIsSelfDispatchChanged();
```

**Anmerkungen**

This is OnIsSelfDispatchChanged, a member of class PackingList.

### 1.1.44.3.16 OnIsSelfDispatchChanging Methode

#### 1.1.44.3.16.1 PackingList.OnIsSelfDispatchChanging Methode (System.Nullable<bool>)

**C#**

```
private void OnIsSelfDispatchChanging(System.Nullable<bool> value);
```

**Anmerkungen**

This is OnIsSelfDispatchChanging, a member of class PackingList.

#### 1.1.44.3.16.2 PackingList.OnIsSelfDispatchChanging Methode (bool?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnIsSelfDispatchChanging(bool? value);
```

**Parameter**

Parameter	Beschreibung
bool? value	

### 1.1.44.3.17 PackingList.OnLoaded Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.44.3.18 PackingList.OnOldOrderIdChanged Methode****C#**

```
private void OnOldOrderIdChanged();
```

**Anmerkungen**

This is OnOldOrderIdChanged, a member of class PackingList.

**1.1.44.3.19 PackingList.OnOldOrderIdChanging Methode****C#**

```
private void OnOldOrderIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnOldOrderIdChanging, a member of class PackingList.

**1.1.44.3.20 PackingList.OnPackingListNumberChanged Methode****C#**

```
private void OnPackingListNumberChanged();
```

**Anmerkungen**

This is OnPackingListNumberChanged, a member of class PackingList.

**1.1.44.3.21 PackingList.OnPackingListNumberChanging Methode****C#**

```
private void OnPackingListNumberChanging(int value);
```

**Anmerkungen**

This is OnPackingListNumberChanging, a member of class PackingList.

**1.1.44.3.22 PackingList.OnRecipientAdressIdChanged Methode****C#**

```
private void OnRecipientAdressIdChanged();
```

**Anmerkungen**

This is OnRecipientAdressIdChanged, a member of class PackingList.

**1.1.44.3.23 PackingList.OnRecipientAdressIdChanging Methode****C#**

```
private void OnRecipientAdressIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRecipientAdressIdChanging, a member of class PackingList.

### 1.1.44.3.24 PackingList.OnRecipientChanged Methode

**C#**

```
private void OnRecipientChanged();
```

#### Anmerkungen

This is OnRecipientChanged, a member of class PackingList.

### 1.1.44.3.25 PackingList.OnRecipientChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnRecipientChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.44.3.26 PackingList.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

#### Anmerkungen

This is OnValidate, a member of class PackingList.

### 1.1.44.3.27 PackingList.Print Methode

Erstellt den Lieferschein als PDF und schreibt ihn in den   bergebenen MemoryStream.

**C#**

```
public void Print(MemoryStream ms, string headerLogoPath, DataClasses1DataContext dbContext, string fileName, bool isZulassungsStelle);
```

#### Parameter

Parameter	Beschreibung
MemoryStream ms	Der MemoryStream, in den das PDF geschrieben wird.
string headerLogoPath	Der Pfad zum Logo f��r den Header.
DataClasses1DataContext dbContext	Datenbankkontext f��r die Transaktion.

#### Anmerkungen

Setzt im Erfolgsfall im Lieferscheindatensatz das Merkmal "IsPrinted ([see page 442](#))" auf "true".

### 1.1.44.3.28 PackingList.RemoveOrderByld Methode

Entfernt einen Auftrag aus dem Lieferschein.

**C#**

```
public void RemoveOrderByld(Guid orderId, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
Guid orderId	Id ( <a href="#">see page 442</a> ) des Auftrags, der entfernt werden soll.
DataClasses1DataContext dbContext	Datenbankkontext f��r die Transaktion.

### 1.1.44.3.29 PackingList.SendByEmail Methode

Versendet den Lieferschein per Email, falls erforderlich.

**C#**

```
public void SendByEmail(MemoryStream ms, string fromAddress, string smtpServer);
```

**Parameter**

Parameter	Beschreibung
MemoryStream ms	MemoryStream mit dem Lieferschein-PDF.
string fromAddress	Absenderemailadresse.
string smtpServer	SMTP-Server für den Emailversand.

**Resultate**

True, wenn eine Email versendet wurde, sonst false.

### 1.1.44.3.30 PackingList.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class PackingList.

### 1.1.44.3.31 PackingList.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class PackingList.

## 1.1.44.4 PackingList Eigenschaften

### 1.1.44.4.1 PackingList.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_PackingList",  
Storage="_Adress", ThisKey="RecipientAdressId", OtherKey="Id", IsForeignKey=true)]  
public Address Address;
```

**Anmerkungen**

This is Adress, a member of class PackingList.

### 1.1.44.4.2 PackingList.DispatchOrderNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DispatchOrderNumber",  
DbType="VarChar(50)")]  
public string DispatchOrderNumber;
```

**Anmerkungen**

This is DispatchOrderNumber, a member of class PackingList.

### 1.1.44.4.3 PackingList.Document Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Document_PackingList",  
Storage="_Document", ThisKey="DocumentId", OtherKey="Id", IsForeignKey=true)]  
public Document Document;
```

**Anmerkungen**

This is Document, a member of class PackingList.

### 1.1.44.4.4 PackingList.DocumentId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_DocumentId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> DocumentId;
```

**Anmerkungen**

This is DocumentId, a member of class PackingList.

### 1.1.44.4.5 PackingList.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class PackingList.

### 1.1.44.4.6 PackingList.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class PackingList.

### 1.1.44.4.7 PackingList.IsPrinted Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsPrinted", DbType="bit")]  
public System.Nullable<bool> IsPrinted;
```

**Anmerkungen**

This is IsPrinted, a member of class PackingList.

### 1.1.44.4.8 PackingList.IsSelfDispatch Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsSelfDispatch", DbType="Bit")]  
public System.Nullable<bool> IsSelfDispatch;
```

**Anmerkungen**

This is IsSelfDispatch, a member of class PackingList.

**1.1.44.4.9 PackingList.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class PackingList.

**1.1.44.4.10 PackingList.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class PackingList.

**1.1.44.4.11 PackingList.OldOrderId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OldOrderId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> OldOrderId;
```

**Anmerkungen**

This is OldOrderId, a member of class PackingList.

**1.1.44.4.12 PackingList.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="PackingList_Order",  
Storage="_Order", ThisKey="Id", OtherKey="PackingListId")]  
public EntitySet<Order> Order;
```

**Anmerkungen**

This is Order, a member of class PackingList.

**1.1.44.4.13 PackingList.Order1 Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_PackingList",  
Storage="_Order1", ThisKey="OldOrderId", OtherKey="Id", IsForeignKey=true)]  
public Order Order1;
```

**Anmerkungen**

This is Order1, a member of class PackingList.

**1.1.44.4.14 PackingList.PackingListNumber Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Name="PackingListNumber",  
Storage="_PackingListNumber", AutoSync=AutoSync.Always, DbType="Int NOT NULL IDENTITY",
```

```
IsDbGenerated=true)]  
public int PackingListNumber;
```

**Anmerkungen**

This is PackingListNumber, a member of class PackingList.

### 1.1.44.4.15 PackingList.Recipient Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Recipient", DbType="varchar(50)  
not null", CanBeNull=false)]  
public string Recipient;
```

**Anmerkungen**

This is Recipient, a member of class PackingList.

### 1.1.44.4.16 PackingList.RecipientAdressId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RecipientAdressId",  
DbType="uniqueidentifier not null")]  
public System.Guid RecipientAdressId;
```

**Anmerkungen**

This is RecipientAdressId, a member of class PackingList.

## 1.1.44.5 PackingList Ereignisse

### 1.1.44.5.1 PackingList.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class PackingList.

### 1.1.44.5.2 PackingList.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class PackingList.

---

## 1.1.45 PathPosition Klasse

Klasse für die Pfadverwaltung

**Klassen Hierarchie**

```
KVSCCommon.Database.PathPosition
```

**C#**

```
public class PathPosition;
```

**Datei**

PathPosition.cs ([↗](#) see page 701)

**Mitglieder****Methoden**

	Name	Beschreibung
	PathPosition ( <a href="#">↗</a> see page 445)	This is PathPosition, a member of class PathPosition.

**PathPosition Felder**

	Name	Beschreibung
	_ID ( <a href="#">↗</a> see page 446)	This is _ID, a member of class PathPosition.
	_Path ( <a href="#">↗</a> see page 446)	This is _Path, a member of class PathPosition.
	_PostionName ( <a href="#">↗</a> see page 446)	This is _PostionName, a member of class PathPosition.

**PathPosition Methoden**

	Name	Beschreibung
	GetPathPostions ( <a href="#">↗</a> see page 446)	Gibt alle Pfadpositionen zurueck

**PathPosition Eigenschaften**

	Name	Beschreibung
	ID ( <a href="#">↗</a> see page 446)	This is ID, a member of class PathPosition.
	Path ( <a href="#">↗</a> see page 447)	This is Path, a member of class PathPosition.
	PostionName ( <a href="#">↗</a> see page 447)	This is PostionName, a member of class PathPosition.

**PathPosition Eigenschaften**

	Name	Beschreibung
	ID ( <a href="#">↗</a> see page 446)	This is ID, a member of class PathPosition.
	Path ( <a href="#">↗</a> see page 447)	This is Path, a member of class PathPosition.
	PostionName ( <a href="#">↗</a> see page 447)	This is PostionName, a member of class PathPosition.

**PathPosition Felder**

	Name	Beschreibung
	_ID ( <a href="#">↗</a> see page 446)	This is _ID, a member of class PathPosition.
	_Path ( <a href="#">↗</a> see page 446)	This is _Path, a member of class PathPosition.
	_PostionName ( <a href="#">↗</a> see page 446)	This is _PostionName, a member of class PathPosition.

**PathPosition Methoden**

	Name	Beschreibung
	GetPathPostions ( <a href="#">↗</a> see page 446)	Gibt alle Pfadpositionen zurueck

## 1.1.45.1 PathPosition.PathPosition Konstruktor

**C#**

```
public PathPosition();
```

**Anmerkungen**

This is PathPosition, a member of class PathPosition.

## 1.1.45.2 PathPosition Felder

### 1.1.45.2.1 PathPosition.\_ID Feld

**C#**

```
private System.Guid _ID;
```

**Anmerkungen**

This is \_ID, a member of class PathPosition.

### 1.1.45.2.2 PathPosition.\_Path Feld

**C#**

```
private string _Path;
```

**Anmerkungen**

This is \_Path, a member of class PathPosition.

### 1.1.45.2.3 PathPosition.\_PostionName Feld

**C#**

```
private string _PostionName;
```

**Anmerkungen**

This is \_PostionName, a member of class PathPosition.

## 1.1.45.3 PathPosition Methoden

### 1.1.45.3.1 PathPosition.GetPathPostions Methode

Gibt alle Pfadpositionen zurueck

**C#**

```
public static Dictionary<string, string> GetPathPostions(DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	Datenbank Kontext

**Resultate**

Dictionary

## 1.1.45.4 PathPosition Eigenschaften

### 1.1.45.4.1 PathPosition.ID Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ID", DbType="UniqueIdentifier NOT NULL")]  
public System.Guid ID;
```

**Anmerkungen**

This is ID, a member of class PathPosition.

### 1.1.45.4.2 PathPosition.Path Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Path", DbType="VarChar(255)")]
public string Path;
```

#### Anmerkungen

This is Path, a member of class PathPosition.

### 1.1.45.4.3 PathPosition.PostionName Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PostionName",
DbType="VarChar(255)")]
public string PostionName;
```

#### Anmerkungen

This is PostionName, a member of class PathPosition.

## 1.1.46 Permission Klasse

Erweiterungsklasse fuer die DB Tabelle Permission

#### Klassen Hierarchie

#### C#

```
public class Permission : ILogging;
```

#### Datei

Permission.cs (see page 702)

#### Mitglieder

##### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (see page 658)	This is LogDbContext, a member of class ILogging.

##### Permission Klasse

	Name	Beschreibung
	Description (see page 453)	This is Description, a member of class Permission.
	EntityState (see page 453)	This is EntityState, a member of class Permission.
	Id (see page 453)	This is Id, a member of class Permission.
	ItemId (see page 453)	This is ItemId, a member of class Permission.
	LogDbContext (see page 453)	This is LogDbContext, a member of class Permission.
	Name (see page 454)	This is Name, a member of class Permission.
	PermissionProfilePermission (see page 454)	This is PermissionProfilePermission, a member of class Permission.
	UserPermission (see page 454)	This is UserPermission, a member of class Permission.

#### Methoden

##### Permission Klasse

	Name	Beschreibung
	Permission (see page 449)	This is Permission, a member of class Permission.

**Permission Felder****Permission Klasse**

	Name	Beschreibung
	_Description ( <a href="#">↗</a> see page 449)	This is _Description, a member of class Permission.
	_Id ( <a href="#">↗</a> see page 449)	This is _Id, a member of class Permission.
	_Name ( <a href="#">↗</a> see page 450)	This is _Name, a member of class Permission.
	_PermissionProfilePermission ( <a href="#">↗</a> see page 450)	This is _PermissionProfilePermission, a member of class Permission.
	_UserPermission ( <a href="#">↗</a> see page 450)	This is _UserPermission, a member of class Permission.
 	emptyChangingEventArgs ( <a href="#">↗</a> see page 450)	This is emptyChangingEventArgs, a member of class Permission.

**Permission Methoden****Permission Klasse**

	Name	Beschreibung
	attach_PermissionProfilePermission ( <a href="#">↗</a> see page 450)	This is attach_PermissionProfilePermission, a member of class Permission.
	attach_UserPermission ( <a href="#">↗</a> see page 450)	This is attach_UserPermission, a member of class Permission.
	detach_PermissionProfilePermission ( <a href="#">↗</a> see page 451)	This is detach_PermissionProfilePermission, a member of class Permission.
	detach_UserPermission ( <a href="#">↗</a> see page 451)	This is detach_UserPermission, a member of class Permission.
	OnCreated ( <a href="#">↗</a> see page 451)	Aenderungsevents fÃ¼r die Historie
	OnDescriptionChanged ( <a href="#">↗</a> see page 451)	This is OnDescriptionChanged, a member of class Permission.
	OnDescriptionChanging ( <a href="#">↗</a> see page 451)	Aenderungsevents fÃ¼r die Historie
	OnIdChanged ( <a href="#">↗</a> see page 451)	This is OnIdChanged, a member of class Permission.
	OnIdChanging ( <a href="#">↗</a> see page 452)	This is OnIdChanging, a member of class Permission.
	OnLoaded ( <a href="#">↗</a> see page 452)	Aenderungsevents fÃ¼r die Historie
	OnNameChanged ( <a href="#">↗</a> see page 452)	This is OnNameChanged, a member of class Permission.
	OnNameChanging ( <a href="#">↗</a> see page 452)	This is OnNameChanging, a member of class Permission.
	OnValidate ( <a href="#">↗</a> see page 452)	This is OnValidate, a member of class Permission.
 	SendPropertyChanged ( <a href="#">↗</a> see page 452)	This is SendPropertyChanged, a member of class Permission.
 	SendPropertyChanging ( <a href="#">↗</a> see page 453)	This is SendPropertyChanging, a member of class Permission.

**Permission Ereignisse****Permission Klasse**

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 454)	This is PropertyChanged, a member of class Permission.
	PropertyChanging ( <a href="#">↗</a> see page 454)	This is PropertyChanging, a member of class Permission.

**ILogging Eigenschaften**

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

**Permission Klasse**

	Name	Beschreibung
	Description ( <a href="#">↗</a> see page 453)	This is Description, a member of class Permission.
	EntityState ( <a href="#">↗</a> see page 453)	This is EntityState, a member of class Permission.
	Id ( <a href="#">↗</a> see page 453)	This is Id, a member of class Permission.
	ItemId ( <a href="#">↗</a> see page 453)	This is ItemId, a member of class Permission.
	LogDbContext ( <a href="#">↗</a> see page 453)	This is LogDbContext, a member of class Permission.
	Name ( <a href="#">↗</a> see page 454)	This is Name, a member of class Permission.
	PermissionProfilePermission ( <a href="#">↗</a> see page 454)	This is PermissionProfilePermission, a member of class Permission.
	UserPermission ( <a href="#">↗</a> see page 454)	This is UserPermission, a member of class Permission.

**Permission Ereignisse****Permission Klasse**

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 454)	This is PropertyChanged, a member of class Permission.
	PropertyChanging ( <a href="#">↗</a> see page 454)	This is PropertyChanging, a member of class Permission.

**Permission Felder****Permission Klasse**

	Name	Beschreibung
	_Description ( <a href="#">↗</a> see page 449)	This is _Description, a member of class Permission.
	_Id ( <a href="#">↗</a> see page 449)	This is _Id, a member of class Permission.

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class Permission.

**1.1.46.3.13 Permission.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Permission.

**1.1.46.3.14 Permission.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Permission.

### 1.1.46.3.15 Permission.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Permission.

## 1.1.46.4 Permission Eigenschaften

### 1.1.46.4.1 Permission.Description Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Description",  
DbType="VarChar(255) NOT NULL", CanBeNull=false)]  
public string Description;
```

**Anmerkungen**

This is Description, a member of class Permission.

### 1.1.46.4.2 Permission.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Permission.

### 1.1.46.4.3 Permission.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Permission.

### 1.1.46.4.4 Permission.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Permission.

### 1.1.46.4.5 Permission.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDbContext, a member of class Permission.

### 1.1.46.4.6 Permission.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class Permission.

### 1.1.46.4.7 Permission.PermissionProfilePermission Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Permission_PermissionProfilePer  
mission",  
Storage="_PermissionProfilePermission", ThisKey="Id", OtherKey="PermissionId")]  
public EntitySet<PermissionProfilePermission> PermissionProfilePermission;
```

**Anmerkungen**

This is PermissionProfilePermission, a member of class Permission.

### 1.1.46.4.8 Permission.UserPermission Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Permission_UserPermission",  
Storage="_UserPermission", ThisKey="Id", OtherKey="PermissionId")]  
public EntitySet<UserPermission> UserPermission;
```

**Anmerkungen**

This is UserPermission, a member of class Permission.

## 1.1.46.5 Permission Ereignisse

### 1.1.46.5.1 Permission.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Permission.

### 1.1.46.5.2 Permission.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Permission.

## 1.1.47 PermissionProfile Klasse

Erweiterungsklasse fuer die DB Tabelle PermissionProfile

### Klassen Hierarchie

### C#

```
public class PermissionProfile : ILogging;
```

### Datei

PermissionProfile.cs ([see page 702](#))

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">see page 658</a> )	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">see page 658</a> )	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">see page 658</a> )	This is LogDbContext, a member of class ILogging.

#### PermissionProfile Klasse

**1.1.47.1 PermissionProfile.PermissionProfile Konstruktor****C#**

```
public PermissionProfile();
```

**Anmerkungen**

This is PermissionProfile, a member of class PermissionProfile.

**1.1.47.2 PermissionProfile Felder****1.1.47.2.1 PermissionProfile.\_Description Feld****C#**

```
private string _Description;
```

**Anmerkungen**

This is \_Description, a member of class PermissionProfile.

**1.1.47.2.2 PermissionProfile.\_Id Feld****C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class PermissionProfile.

### 1.1.47.2.3 PermissionProfile.\_Name Feld

**C#**

```
private string _Name;
```

#### Anmerkungen

This is \_Name, a member of class PermissionProfile.

### 1.1.47.2.4 PermissionProfile.\_PermissionProfilePermission Feld

**C#**

```
private EntitySet<PermissionProfilePermission> _PermissionProfilePermission;
```

#### Anmerkungen

This is \_PermissionProfilePermission, a member of class PermissionProfile.

### 1.1.47.2.5 PermissionProfile.\_UserPermissionProfile Feld

**C#**

```
private EntitySet<UserPermissionProfile> _UserPermissionProfile;
```

#### Anmerkungen

This is \_UserPermissionProfile, a member of class PermissionProfile.

### 1.1.47.2.6 PermissionProfile.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

#### Anmerkungen

This is emptyChangingEventArgs, a member of class PermissionProfile.

## 1.1.47.3 PermissionProfile Methoden

### 1.1.47.3.1 PermissionProfile.AddPermission Methode

Fuegt dem Rechteprofil das uebergebene Recht hinzu.

**C#**

```
public void AddPermission(Guid permissionId, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
Guid permissionId	Id (see page 462) des Rechts.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### 1.1.47.3.2 PermissionProfile.attach\_PermissionProfilePermission Methode

**C#**

```
private void attach_PermissionProfilePermission(PermissionProfilePermission entity);
```

### Anmerkungen

This is attach\_PermissionProfilePermission, a member of class PermissionProfile.

## 1.1.47.3.3 PermissionProfile.attach\_UserPermissionProfile Methode

### C#

```
private void attach_UserPermissionProfile(UserPermissionProfile entity);
```

### Anmerkungen

This is attach\_UserPermissionProfile, a member of class PermissionProfile.

## 1.1.47.3.4 PermissionProfile.CreatePermissionProfile Methode

Erstellt ein neues Rechteprofil.

### C#

```
public static PermissionProfile CreatePermissionProfile(string name, string description,
DataClasses1DataContext dbContext);
```

### Parameter

Parameter	Beschreibung
string name	Name (see page 463) des Rechteprofils.
string description	Beschreibung des Rechteprofils.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### Resultate

Das neue Rechteprofil.

## 1.1.47.3.5 PermissionProfile.DeletePermissionProfileById Methode

Loescht das Rechteprofil mit der uebergebenen Id (see page 462).

### C#

```
public static void DeletePermissionProfileById(Guid id, DataClasses1DataContext dbContext);
```

### Parameter

Parameter	Beschreibung
Guid id	Id (see page 462) des Rechteprofils.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

## 1.1.47.3.6 PermissionProfile.detach\_PermissionProfilePermission Methode

### C#

```
private void detach_PermissionProfilePermission(PermissionProfilePermission entity);
```

### Anmerkungen

This is detach\_PermissionProfilePermission, a member of class PermissionProfile.

## 1.1.47.3.7 PermissionProfile.detach\_UserPermissionProfile Methode

### C#

```
private void detach_UserPermissionProfile(UserPermissionProfile entity);
```

### Anmerkungen

This is detach\_UserPermissionProfile, a member of class PermissionProfile.

### 1.1.47.3.8 PermissionProfile.OnCreated Methode

Änderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.47.3.9 PermissionProfile.OnDescriptionChanged Methode

**C#**

```
private void OnDescriptionChanged();
```

**Anmerkungen**

This is OnDescriptionChanged, a member of class PermissionProfile.

### 1.1.47.3.10 PermissionProfile.OnDescriptionChanging Methode

Änderungsevents für die Historie

**C#**

```
private void OnDescriptionChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.47.3.11 PermissionProfile.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class PermissionProfile.

### 1.1.47.3.12 PermissionProfile.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class PermissionProfile.

### 1.1.47.3.13 PermissionProfile.OnLoaded Methode

Änderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.47.3.14 PermissionProfile.OnNameChanged Methode****C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class PermissionProfile.

**1.1.47.3.15 PermissionProfile.OnNameChanging Methode**

Aenderungsevents f  r die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.47.3.16 PermissionProfile.OnValidate Methode**

Aenderungsevents f  r die Historie

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.47.3.17 PermissionProfile.RemovePermission Methode**

Entfernt das   bergebene Recht aus dem Rechteprofil.

**C#**

```
public void RemovePermission(Guid permissionId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid permissionId	Id ( <a href="#">? see page 462</a> ) des Rechts.
DataClasses1DataContext dbContext	Datenbankkontext f��r die Transaktion.

**1.1.47.3.18 PermissionProfile.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class PermissionProfile.

### 1.1.47.3.19 PermissionProfile.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class PermissionProfile.

## 1.1.47.4 PermissionProfile Eigenschaften

### 1.1.47.4.1 PermissionProfile.Description Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Description",  
DbType="VarChar(255) NOT NULL", CanBeNull=false)]  
public string Description;
```

**Anmerkungen**

This is Description, a member of class PermissionProfile.

### 1.1.47.4.2 PermissionProfile.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class PermissionProfile.

### 1.1.47.4.3 PermissionProfile.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class PermissionProfile.

### 1.1.47.4.4 PermissionProfile.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class PermissionProfile.

### 1.1.47.4.5 PermissionProfile.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDbContext, a member of class PermissionProfile.

### 1.1.47.4.6 PermissionProfile.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class PermissionProfile.

### 1.1.47.4.7 PermissionProfile.PermissionProfilePermission Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="PermissionProfile_PermissionProfilePermission",  
Storage="_PermissionProfilePermission", ThisKey="Id", OtherKey="PermissionProfileId")]  
public EntitySet<PermissionProfilePermission> PermissionProfilePermission;
```

**Anmerkungen**

This is PermissionProfilePermission, a member of class PermissionProfile.

### 1.1.47.4.8 PermissionProfile.UserPermissionProfile Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="PermissionProfile_UserPermissionProfile",  
Storage="_UserPermissionProfile", ThisKey="Id", OtherKey="PermissionProfileId")]  
public EntitySet<UserPermissionProfile> UserPermissionProfile;
```

**Anmerkungen**

This is UserPermissionProfile, a member of class PermissionProfile.

## 1.1.47.5 PermissionProfile Ereignisse

### 1.1.47.5.1 PermissionProfile.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class PermissionProfile.

### 1.1.47.5.2 PermissionProfile.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class PermissionProfile.

# 1.1.48 PermissionProfilePermission Klasse

## Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.PermissionProfilePermission")]
public class PermissionProfilePermission : INotifyPropertyChanging, INotifyPropertyChanged;
```

## Datei

**1.1.48.1****PermissionProfilePermission.PermissionProfilePermission Konstruktor****C#**

```
public PermissionProfilePermission();
```

**Anmerkungen**

This is PermissionProfilePermission, a member of class PermissionProfilePermission.

**1.1.48.2 PermissionProfilePermission Felder**

### 1.1.48.2.1 PermissionProfilePermission.\_Permission Feld

**C#**

```
private EntityRef<Permission> _Permission;
```

**Anmerkungen**

This is \_Permission, a member of class PermissionProfilePermission.

### 1.1.48.2.2 PermissionProfilePermission.\_PermissionId Feld

**C#**

```
private System.Guid _PermissionId;
```

**Anmerkungen**

This is \_PermissionId, a member of class PermissionProfilePermission.

### 1.1.48.2.3 PermissionProfilePermission.\_PermissionProfile Feld

**C#**

```
private EntityRef<PermissionProfile> _PermissionProfile;
```

**Anmerkungen**

This is \_PermissionProfile, a member of class PermissionProfilePermission.

### 1.1.48.2.4 PermissionProfilePermission.\_PermissionProfileId Feld

**C#**

```
private System.Guid _PermissionProfileId;
```

**Anmerkungen**

This is \_PermissionProfileId, a member of class PermissionProfilePermission.

### 1.1.48.2.5 PermissionProfilePermission.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class PermissionProfilePermission.

## 1.1.48.3 PermissionProfilePermission Methoden

### 1.1.48.3.1 PermissionProfilePermission.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class PermissionProfilePermission.

### 1.1.48.3.2 PermissionProfilePermission.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class PermissionProfilePermission.

### 1.1.48.3.3 PermissionProfilePermission.OnPermissionIdChanged Methode

**C#**

```
private void OnPermissionIdChanged();
```

**Anmerkungen**

This is OnPermissionIdChanged, a member of class PermissionProfilePermission.

### 1.1.48.3.4 PermissionProfilePermission.OnPermissionIdChanging Methode

**C#**

```
private void OnPermissionIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPermissionIdChanging, a member of class PermissionProfilePermission.

### 1.1.48.3.5 PermissionProfilePermission.OnPermissionProfileIdChanged Methode

**C#**

```
private void OnPermissionProfileIdChanged();
```

**Anmerkungen**

This is OnPermissionProfileIdChanged, a member of class PermissionProfilePermission.

### 1.1.48.3.6 PermissionProfilePermission.OnPermissionProfileIdChanging Methode

**C#**

```
private void OnPermissionProfileIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPermissionProfileIdChanging, a member of class PermissionProfilePermission.

### 1.1.48.3.7 PermissionProfilePermission.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class PermissionProfilePermission.

### 1.1.48.3.8 PermissionProfilePermission.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class PermissionProfilePermission.

### 1.1.48.3.9 PermissionProfilePermission.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class PermissionProfilePermission.

## 1.1.48.4 PermissionProfilePermission Eigenschaften

### 1.1.48.4.1 PermissionProfilePermission.Permission Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Permission_PermissionProfilePer  
mission",  
Storage="_Permission", ThisKey="PermissionId", OtherKey="Id", IsForeignKey=true)]  
public Permission Permission;
```

**Anmerkungen**

This is Permission, a member of class PermissionProfilePermission.

### 1.1.48.4.2 PermissionProfilePermission.PermissionId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PermissionId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid PermissionId;
```

**Anmerkungen**

This is PermissionId, a member of class PermissionProfilePermission.

### 1.1.48.4.3 PermissionProfilePermission.PermissionProfile Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="PermissionProfile_PermissionPro  
filePermission",  
Storage="_PermissionProfile", ThisKey="PermissionProfileId", OtherKey="Id",  
IsForeignKey=true)]  
public PermissionProfile PermissionProfile;
```

**Anmerkungen**

This is PermissionProfile, a member of class PermissionProfilePermission.

### 1.1.48.4.4 PermissionProfilePermission.PermissionProfileId Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PermissionProfileId",
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]
public System.Guid PermissionProfileId;
```

Anmerkungen

This is PermissionProfileId, a member of class PermissionProfilePermission.

### 1.1.48.5 PermissionProfilePermission Ereignisse

#### 1.1.48.5.1 PermissionProfilePermission.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class PermissionProfilePermission.

#### 1.1.48.5.2 PermissionProfilePermission.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class PermissionProfilePermission.

## 1.1.49 Person Klasse

Erweiterungsklasse fuer die DB Tabelle Person

Klassen Hierarchie

C#

```
public class Person : ILogging;
```

private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Person.

## 1.1.49.3 Person Methoden

### 1.1.49.3.1 Person.attach\_LargeCustomer Methode

**C#**

```
private void attach_LargeCustomer(LargeCustomer entity);
```

**Anmerkungen**

This is attach\_LargeCustomer, a member of class Person.

### 1.1.49.3.2 Person.attach\_SmallCustomer Methode

**C#**

```
private void attach_SmallCustomer(SmallCustomer entity);
```

**Anmerkungen**

This is attach\_SmallCustomer, a member of class Person.

### 1.1.49.3.3 Person.attach\_User Methode

**C#**

```
private void attach_User(User entity);
```

**Anmerkungen**

This is attach\_User, a member of class Person.

### 1.1.49.3.4 Person.CreatePerson Methode

Erstellt einen neuen Person (🔗 see page 469) Datensatz

**C#**

```
public static Person CreatePerson(DataClasses1DataContext dbContext, string firstname,
string name, string title, string extension);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
string firstname	Vorname
string name	Name (🔗 see page 480)
string title	Titel
string extension	Zusatz

**Resultate**

Person (🔗 see page 469)

### 1.1.49.3.5 Person.DeletePerson Methode

Loescht die angegebene Person (🔗 see page 469) aus der Datenbank.

**C#**

```
public static void DeletePerson(Guid personId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
adressId	Id (🔗 see page 480) der Person (🔗 see page 469).

### 1.1.49.3.6 Person.detach\_LargeCustomer Methode

**C#**

```
private void detach_LargeCustomer(LargeCustomer entity);
```

**Anmerkungen**

This is detach\_LargeCustomer, a member of class Person.

### 1.1.49.3.7 Person.detach\_SmallCustomer Methode

**C#**

```
private void detach_SmallCustomer(SmallCustomer entity);
```

**Anmerkungen**

This is detach\_SmallCustomer, a member of class Person.

### 1.1.49.3.8 Person.detach\_User Methode

**C#**

```
private void detach_User(User entity);
```

**Anmerkungen**

This is detach\_User, a member of class Person.

### 1.1.49.3.9 Person.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.49.3.10 Person.OnExtensionChanged Methode

**C#**

```
private void OnExtensionChanged();
```

**Anmerkungen**

This is OnExtensionChanged, a member of class Person.

### 1.1.49.3.11 Person.OnExtensionChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnExtensionChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.49.3.12 Person.OnFirstNameChanged Methode

**C#**

```
private void OnFirstNameChanged();
```

**Anmerkungen**

This is OnFirstNameChanged, a member of class Person.

### 1.1.49.3.13 Person.OnFirstNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnFirstNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.49.3.14 Person.OnGenderChanged Methode

**C#**

```
private void OnGenderChanged();
```

**Anmerkungen**

This is OnGenderChanged, a member of class Person.

**1.1.49.3.15 Person.OnGenderChanging Methode**

Änderungsereignis für die Historie

**C#**

```
private void OnGenderChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.49.3.16 Person.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Person.

**1.1.49.3.17 Person.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Person.

**1.1.49.3.18 Person.OnLoaded Methode**

Änderungsereignis für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.49.3.19 Person.OnNameChanged Methode****C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class Person.

**1.1.49.3.20 Person.OnNameChanging Methode**

Änderungsereignis für die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.49.3.21 Person.OnSalutationChanged Methode

**C#**

```
private void OnsalutationChanged();
```

**Anmerkungen**

This is OnsalutationChanged, a member of class Person.

### 1.1.49.3.22 Person.OnsalutationChanging Methode

**C#**

```
private void OnsalutationChanging(string value);
```

**Anmerkungen**

This is OnsalutationChanging, a member of class Person.

### 1.1.49.3.23 Person.OnTitleChanged Methode

**C#**

```
private void OnTitleChanged();
```

**Anmerkungen**

This is OnTitleChanged, a member of class Person.

### 1.1.49.3.24 Person.OnTitleChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnTitleChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.49.3.25 Person.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Person.

### 1.1.49.3.26 Person.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Person.

**1.1.49.3.27 Person.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Person.

**1.1.49.4 Person Eigenschaften****1.1.49.4.1 Person.EntityState Eigenschaft****C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Person.

**1.1.49.4.2 Person.Extension Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Extension",  
DbType="VarChar(255)")]  
public string Extension;
```

**Anmerkungen**

This is Extension, a member of class Person.

**1.1.49.4.3 Person.FirstName Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FirstName",  
DbType="VarChar(50)")]  
public string FirstName;
```

**Anmerkungen**

This is FirstName, a member of class Person.

**1.1.49.4.4 Person.FullName Eigenschaft**

Gibt den vollständigen Benutzernamen zurück

**C#**

```
public string FullName;
```

**1.1.49.4.5 Person.Gender Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Gender", DbType="VarChar(1)")]
```

```
public string Gender;
```

**Anmerkungen**

This is Gender, a member of class Person.

### 1.1.49.4.6 Person.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Person.

### 1.1.49.4.7 Person.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Person.

### 1.1.49.4.8 Person.LargeCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Person_LargeCustomer",  
Storage="_LargeCustomer", ThisKey="Id", OtherKey="PersonId")]  
public EntitySet<LargeCustomer> LargeCustomer;
```

**Anmerkungen**

This is LargeCustomer, a member of class Person.

### 1.1.49.4.9 Person.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Person.

### 1.1.49.4.10 Person.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class Person.

### 1.1.49.4.11 Person.salutation Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_salutation",
```

```
DbType="VarChar(50)")]
public string salutation;
```

**Anmerkungen**

This is salutation, a member of class Person.

## 1.1.49.4.12 Person.SmallCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Person_SmallCustomer",
Storage="_SmallCustomer", ThisKey="Id", OtherKey="PersonId")]
public EntitySet<SmallCustomer> SmallCustomer;
```

**Anmerkungen**

This is SmallCustomer, a member of class Person.

## 1.1.49.4.13 Person.Title Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Title", DbType="VarChar(20)")]
public string Title;
```

**Anmerkungen**

This is Title, a member of class Person.

## 1.1.49.4.14 Person.User Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Person_User", Storage="_User",
ThisKey="Id", OtherKey="PersonId")]
public EntitySet<User> User;
```

**Anmerkungen**

This is User, a member of class Person.

## 1.1.49.5 Person Ereignisse

### 1.1.49.5.1 Person.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Person.

### 1.1.49.5.2 Person.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Person.

## 1.1.50 Price Klasse

Erweiterungsklasse fuer die DB Tabelle Price

### Klassen Hierarchie

### C#

```
public class Price : ILogging;
```

### Datei

Price.cs (see page 702)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (see page 658)	This is EntityState, a member of class ILogging.
	ItemId (see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (see page 658)	This is LogDbContext, a member of class ILogging.

#### Price Klasse

	Name	Beschreibung
	Amount (see page 490)	This is Amount, a member of class Price.
	AuthorativeCharge (see page 490)	This is AuthorativeCharge, a member of class Price.
	EntityState (see page 490)	This is EntityState, a member of class Price.
	Id (see page 490)	This is Id, a member of class Price.
	ItemId (see page 491)	This is ItemId, a member of class Price.
	Location (see page 491)	This is Location, a member of class Price.
	LocationId (see page 491)	This is LocationId, a member of class Price.
	LogDbContext (see page 491)	This is LogDbContext, a member of class Price.
	PriceAccount (see page 491)	This is PriceAccount, a member of class Price.
	Product (see page 491)	This is Product, a member of class Price.
	ProductId (see page 492)	This is ProductId, a member of class Price.

### Methoden

#### Price Klasse

	Name	Beschreibung
	Price (see page 484)	This is Price, a member of class Price.

### Price Felder

#### Price Klasse

	Name	Beschreibung
	_Amount (see page 484)	This is _Amount, a member of class Price.
	_AuthorativeCharge (see page 485)	This is _AuthorativeCharge, a member of class Price.
	_Id (see page 485)	This is _Id, a member of class Price.
	_Location (see page 485)	This is _Location, a member of class Price.
	_LocationId (see page 485)	This is _LocationId, a member of class Price.
	_PriceAccount (see page 485)	This is _PriceAccount, a member of class Price.
	_Product (see page 485)	This is _Product, a member of class Price.
	_ProductId (see page 485)	This is _ProductId, a member of class Price.
	emptyChangingEventArgs (see page 486)	This is emptyChangingEventArgs, a member of class Price.

### Price Methoden

**Price Klasse**

	Name	Beschreibung
	attach_PriceAccount ( <a href="#">↗</a> see page 486)	This is attach_PriceAccount, a member of class Price.
	CreatePrice ( <a href="#">↗</a> see page 486)	Erstellt einen neuen Preis.
	detach_PriceAccount ( <a href="#">↗</a> see page 486)	This is detach_PriceAccount, a member of class Price.
	OnAmountChanged ( <a href="#">↗</a> see page 487)	This is OnAmountChanged, a member of class Price.
	OnAmountChanging ( <a href="#">↗</a> see page 487)	This is OnAmountChanging, a member of class Price.
	OnAuthorativeChargeChanged ( <a href="#">↗</a> see page 487)	This is OnAuthorativeChargeChanged, a member of class Price.
	OnAuthorativeChargeChanging ( <a href="#">↗</a> see page 487)	This is OnAuthorativeChargeChanging, a member of class Price.
	OnCreated ( <a href="#">↗</a> see page 487)	This is OnCreated, a member of class Price.
	OnIdChanged ( <a href="#">↗</a> see page 488)	This is OnIdChanged, a member of class Price.
	OnIdChanging ( <a href="#">↗</a> see page 488)	This is OnIdChanging, a member of class Price.

**1.1.50.1 Price.Price Konstruktor****C#**

```
public Price();
```

**Anmerkungen**

This is Price, a member of class Price.

**1.1.50.2 Price Felder****1.1.50.2.1 Price.\_Amount Feld****C#**

```
private decimal _Amount;
```

**Anmerkungen**

This is \_Amount, a member of class Price.

### 1.1.50.2.2 Price.\_AuthorativeCharge Feld

**C#**

```
private System.Nullable<decimal> _AuthorativeCharge;
```

**Anmerkungen**

This is \_AuthorativeCharge, a member of class Price.

### 1.1.50.2.3 Price.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Price.

### 1.1.50.2.4 Price.\_Location Feld

**C#**

```
private EntityRef<Location> _Location;
```

**Anmerkungen**

This is \_Location, a member of class Price.

### 1.1.50.2.5 Price.\_LocationId Feld

**C#**

```
private System.Nullable<System.Guid> _LocationId;
```

**Anmerkungen**

This is \_LocationId, a member of class Price.

### 1.1.50.2.6 Price.\_PriceAccount Feld

**C#**

```
private EntitySet<PriceAccount> _PriceAccount;
```

**Anmerkungen**

This is \_PriceAccount, a member of class Price.

### 1.1.50.2.7 Price.\_Product Feld

**C#**

```
private EntityRef<Product> _Product;
```

**Anmerkungen**

This is \_Product, a member of class Price.

### 1.1.50.2.8 Price.\_ProductId Feld

**C#**

```
private System.Guid _ProductId;
```

Anmerkungen

This is \_ProductId, a member of class Price.

1.1.50.2.9 Price.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

Anmerkungen

This is emptyChangingEventArgs, a member of class Price.

1.1.50.3 Price Methoden

1.1.50.3.1 Price.attach\_PriceAccount Methode

C#

```
private void attach_PriceAccount(PriceAccount entity);
```

Anmerkungen

This is attach\_PriceAccount, a member of class Price.

1.1.50.3.2 Price.CreatePrice Methode

Erstellt einen neuen Preis.

C#

```
public static Price CreatePrice(decimal amount, decimal? authorativeCharge, Guid productId,
Guid? locationId, Guid? accountId, DataClasses1DataContext dbContext);
```

Parameter

Parameter	Beschreibung
decimal amount	Der Betrag des Preises.
decimal? authorativeCharge	Die behoerdliche Gebuehr.
Guid productId	Id (see page 490) des Produkts, für den der Preis gilt.
Guid? locationId	Id (see page 490) des Standorts, falls benoetigt.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

Resultate

Den neuen Preis.

1.1.50.3.3 Price.detach\_PriceAccount Methode

C#

```
private void detach_PriceAccount(PriceAccount entity);
```

Anmerkungen

This is detach\_PriceAccount, a member of class Price.

### 1.1.50.3.4 Price.OnAmountChanged Methode

**C#**

```
private void OnAmountChanged();
```

**Anmerkungen**

This is OnAmountChanged, a member of class Price.

### 1.1.50.3.5 Price.OnAmountChanging Methode

**C#**

```
private void OnAmountChanging(decimal value);
```

**Anmerkungen**

This is OnAmountChanging, a member of class Price.

### 1.1.50.3.6 Price.OnAuthorativeChargeChanged Methode

**C#**

```
private void OnAuthorativeChargeChanged();
```

**Anmerkungen**

This is OnAuthorativeChargeChanged, a member of class Price.

### 1.1.50.3.7 OnAuthorativeChargeChanging Methode

#### 1.1.50.3.7.1 Price.OnAuthorativeChargeChanging Methode (System.Nullable<decimal>)

**C#**

```
private void OnAuthorativeChargeChanging(System.Nullable<decimal> value);
```

**Anmerkungen**

This is OnAuthorativeChargeChanging, a member of class Price.

#### 1.1.50.3.7.2 Price.OnAuthorativeChargeChanging Methode (decimal?)

**C#**

```
private void OnAuthorativeChargeChanging(decimal? value);
```

**Anmerkungen**

This is OnAuthorativeChargeChanging, a member of class Price.

### 1.1.50.3.8 Price.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class Price.

### 1.1.50.3.9 Price.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Price.

### 1.1.50.3.10 Price.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Price.

### 1.1.50.3.11 Price.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class Price.

### 1.1.50.3.12 Price.OnLocationIdChanged Methode

**C#**

```
private void OnLocationIdChanged();
```

**Anmerkungen**

This is OnLocationIdChanged, a member of class Price.

### 1.1.50.3.13 OnLocationIdChanging Methode

#### 1.1.50.3.13.1 Price.OnLocationIdChanging Methode (Guid?)

**C#**

```
private void OnLocationIdChanging(Guid? value);
```

**Anmerkungen**

This is OnLocationIdChanging, a member of class Price.

#### 1.1.50.3.13.2 Price.OnLocationIdChanging Methode (System.Nullable<System.Guid>)

**C#**

```
private void OnLocationIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnLocationIdChanging, a member of class Price.

### 1.1.50.3.14 Price.OnProductIdChanged Methode

**C#**

```
private void OnProductIdChanged();
```

**Anmerkungen**

This is OnProductIdChanged, a member of class Price.

### 1.1.50.3.15 OnProductIdChanging Methode

#### 1.1.50.3.15.1 Price.OnProductIdChanging Methode (Guid)

**C#**

```
private void OnProductIdChanging(Guid value);
```

**Anmerkungen**

This is OnProductIdChanging, a member of class Price.

#### 1.1.50.3.15.2 Price.OnProductIdChanging Methode (System.Guid)

**C#**

```
private void OnProductIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnProductIdChanging, a member of class Price.

### 1.1.50.3.16 Price.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Price.

### 1.1.50.3.17 Price.RemovePrice Methode

Loescht Eintraege aus der Preisliste

**C#**

```
public static void RemovePrice(Price[] pr, DataClasses1DataContext dbContext, bool callFromProduct);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	
bool callFromProduct	
Price[]	Preisliste

### 1.1.50.3.18 Price.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Price.

### 1.1.50.3.19 Price.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Price.

## 1.1.50.4 Price Eigenschaften

### 1.1.50.4.1 Price.Amount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Amount", DbType="Money NOT NULL")]  
public decimal Amount;
```

**Anmerkungen**

This is Amount, a member of class Price.

### 1.1.50.4.2 Price.AuthorativeCharge Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AuthorativeCharge",  
DbType="Money")]  
public System.Nullable<decimal> AuthorativeCharge;
```

**Anmerkungen**

This is AuthorativeCharge, a member of class Price.

### 1.1.50.4.3 Price.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Price.

### 1.1.50.4.4 Price.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Price.

### 1.1.50.4.5 Price.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Price.

### 1.1.50.4.6 Price.Location Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Location_Price",  
Storage="_Location", ThisKey="LocationId", OtherKey="Id", IsForeignKey=true)]  
public Location Location;
```

**Anmerkungen**

This is Location, a member of class Price.

### 1.1.50.4.7 Price.LocationId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LocationId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> LocationId;
```

**Anmerkungen**

This is LocationId, a member of class Price.

### 1.1.50.4.8 Price.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Price.

### 1.1.50.4.9 Price.PriceAccount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Price_PriceAccount",  
Storage="_PriceAccount", ThisKey="Id", OtherKey="PriceId")]  
public EntitySet<PriceAccount> PriceAccount;
```

**Anmerkungen**

This is PriceAccount, a member of class Price.

### 1.1.50.4.10 Price.Product Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Product_Price",  
Storage="_Product", ThisKey="ProductId", OtherKey="Id", IsForeignKey=true)]  
public Product Product;
```

**Anmerkungen**

This is Product, a member of class Price.

### 1.1.50.4.11 Price.ProductId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ProductId",
DbType="UniqueIdentifier NOT NULL")]
public System.Guid ProductId;
```

**Anmerkungen**

This is ProductId, a member of class Price.

## 1.1.50.5 Price Ereignisse

### 1.1.50.5.1 Price.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Price.

### 1.1.50.5.2 Price.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Price.

---

## 1.1.51 PriceAccount Klasse

**Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.PriceAccount")]
public class PriceAccount : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

DataClasses1.designer.cs (📄 see page 695)

**Anmerkungen**

This is class KVSCCommon.Database.PriceAccount.

**Mitglieder****Methoden**

```
private void OnAccountIdChanged();
```

**Anmerkungen**

This is OnAccountIdChanged, a member of class PriceAccount.

**1.1.51.3.2 PriceAccount.OnAccountIdChanging Methode****C#**

```
private void OnAccountIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnAccountIdChanging, a member of class PriceAccount.

**1.1.51.3.3 PriceAccount.OnCreated Methode****C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class PriceAccount.

**1.1.51.3.4 PriceAccount.OnLoaded Methode****C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class PriceAccount.

**1.1.51.3.5 PriceAccount.OnPricIdChanged Methode****C#**

```
private void OnPriceIdChanged();
```

**Anmerkungen**

This is OnPriceIdChanged, a member of class PriceAccount.

**1.1.51.3.6 PriceAccount.OnPriceIdChanging Methode****C#**

```
private void OnPriceIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPriceIdChanging, a member of class PriceAccount.

**1.1.51.3.7 PriceAccount.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class PriceAccount.

**1.1.51.3.8 PriceAccount.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class PriceAccount.

**1.1.51.3.9 PriceAccount.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class PriceAccount.

**1.1.51.4 PriceAccount Eigenschaften****1.1.51.4.1 PriceAccount.AccountId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_AccountId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid AccountId;
```

**Anmerkungen**

This is AccountId, a member of class PriceAccount.

**1.1.51.4.2 PriceAccount.Accounts Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Accounts_PriceAccount",
```

```
Storage="_Accounts", ThisKey="AccountId", OtherKey="AccountId", IsForeignKey=true,  
DeleteOnNull=true, DeleteRule="CASCADE"]]  
public Accounts Accounts;
```

#### Anmerkungen

This is Accounts, a member of class PriceAccount.

### 1.1.51.4.3 PriceAccount.Price Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Price_PriceAccount",  
Storage="_Price", ThisKey="PriceId", OtherKey="Id", IsForeignKey=true, DeleteOnNull=true,  
DeleteRule="CASCADE")]  
public Price Price;
```

#### Anmerkungen

This is Price, a member of class PriceAccount.

### 1.1.51.4.4 PriceAccount.PriceId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PriceId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid PriceId;
```

#### Anmerkungen

This is PriceId, a member of class PriceAccount.

## 1.1.51.5 PriceAccount Ereignisse

### 1.1.51.5.1 PriceAccount.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class PriceAccount.

### 1.1.51.5.2 PriceAccount.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class PriceAccount.

## 1.1.52 Product Klasse

#### Klassen Hierarchie

**C#**

```
public class Product : ILogging;

	OnIsLockedChanging ( <a href="#">see page 506</a> )	Aenderungsevents f��r die Historie
	OnItemNumberChanged ( <a href="#">see page 506</a> )	This is OnItemNumberChanged, a member of class Product.
	OnItemNumberChanging ( <a href="#">see page 506</a> )	Aenderungsevents f��r die Historie
	OnLoaded ( <a href="#">see page 507</a> )	Aenderungsevents f��r die Historie
	OnNameChanged ( <a href="#">see page 507</a> )	This is OnNameChanged, a member of class Product.

	OnNameChanging ( <a href="#">see page 507</a> )	Aenderungsevents für die Historie
	OnNeedsVATChanged ( <a href="#">see page 507</a> )	This is OnNeedsVATChanged, a member of class Product.
	OnNeedsVATChanging ( <a href="#">see page 507</a> )	Aenderungsevents für die Historie
	OnOrderTypeldChanged ( <a href="#">see page 507</a> )	This is OnOrderTypeldChanged, a member of class Product.
	OnOrderTypeldChanging ( <a href="#">see page 508</a> )	Aenderungsevents für die Historie
	OnProductCategoryIdChanged ( <a href="#">see page 508</a> )	This is OnProductCategoryIdChanged, a member of class Product.
	OnProductCategoryIdChanging ( <a href="#">see page 508</a> )	Aenderungsevents für die Historie
	OnRegistrationOrderTypeldChanged ( <a href="#">see page 509</a> )	This is OnRegistrationOrderTypeldChanged, a member of class Product.
	OnRegistrationOrderTypeldChanging ( <a href="#">see page 509</a> )	Aenderungsevents für die Historie
	OnValidate ( <a href="#">see page 509</a> )	Aenderungsevents für die Historie
	RemoveProduct ( <a href="#">see page 509</a> )	Löscht das angegebene Produkt
	SendPropertyChanged ( <a href="#">see page 510</a> )	This is SendPropertyChanged, a member of class Product.
	SendPropertyChanging ( <a href="#">see page 510</a> )	This is SendPropertyChanging, a member of class Product.

## 1.1.52.1 Product.Product Konstruktor

C#

```
public Product();
```

Anmerkungen

This is Product, a member of class Product.

## 1.1.52.2 Product Felder

### 1.1.52.2.1 Product.\_CustomerProduct Feld

C#

```
private EntitySet<CustomerProduct> _CustomerProduct;
```

Anmerkungen

This is \_CustomerProduct, a member of class Product.

### 1.1.52.2.2 Product.\_Id Feld

C#

```
private System.Guid _Id;
```

Anmerkungen

This is \_Id, a member of class Product.

### 1.1.52.2.3 Product.\_IsLocked Feld

C#

```
private bool _IsLocked;
```

Anmerkungen

This is \_IsLocked, a member of class Product.

### 1.1.52.2.4 Product.\_ItemNumber Feld

C#

```
private string _ItemNumber;
```

**Anmerkungen**

This is \_ItemNumber, a member of class Product.

**1.1.52.2.5 Product.\_Name Feld****C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class Product.

**1.1.52.2.6 Product.\_NeedsVAT Feld****C#**

```
private bool _NeedsVAT;
```

**Anmerkungen**

This is \_NeedsVAT, a member of class Product.

**1.1.52.2.7 Product.\_OrderItem Feld****C#**

```
private EntitySet<OrderItem> _OrderItem;
```

**Anmerkungen**

This is \_OrderItem, a member of class Product.

**1.1.52.2.8 Product.\_OrderType Feld****C#**

```
private EntityRef<OrderType> _OrderType;
```

**Anmerkungen**

This is \_OrderType, a member of class Product.

**1.1.52.2.9 Product.\_OrderTypeId Feld****C#**

```
private System.Guid _OrderTypeId;
```

**Anmerkungen**

This is \_OrderTypeId, a member of class Product.

**1.1.52.2.10 Product.\_Price Feld****C#**

```
private EntitySet<Price> _Price;
```

**Anmerkungen**

This is \_Price, a member of class Product.

### 1.1.52.2.11 Product.\_ProductCategory Feld

**C#**

```
private EntityRef<ProductCategory> _ProductCategory;
```

**Anmerkungen**

This is \_ProductCategory, a member of class Product.

### 1.1.52.2.12 Product.\_ProductCategoryId Feld

**C#**

```
private System.Nullable<System.Guid> _ProductId;
```

**Anmerkungen**

This is \_ProductId, a member of class Product.

### 1.1.52.2.13 Product.\_RegistrationOrderType Feld

**C#**

```
private EntityRef<RegistrationOrderType> _RegistrationOrderType;
```

**Anmerkungen**

This is \_RegistrationOrderType, a member of class Product.

### 1.1.52.2.14 Product.\_RegistrationOrderTypeId Feld

**C#**

```
private System.Nullable<System.Guid> _RegistrationOrderId;
```

**Anmerkungen**

This is \_RegistrationOrderId, a member of class Product.

### 1.1.52.2.15 Product.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Product.

### 1.1.52.2.16 Product.myDbContext Feld

**C#**

```
private DataClasses1DataContext myDbContext;
```

**Anmerkungen**

This is myDbContext, a member of class Product.

## 1.1.52.3 Product Methoden

### 1.1.52.3.1 Product.attach\_CustomerProduct Methode

C#

```
private void attach_CustomerProduct(CustomerProduct entity);
```

#### Anmerkungen

This is attach\_CustomerProduct, a member of class Product.

### 1.1.52.3.2 Product.attach\_OrderItem Methode

C#

```
private void attach_OrderItem(OrderItem entity);
```

#### Anmerkungen

This is attach\_OrderItem, a member of class Product.

### 1.1.52.3.3 Product.attach\_Price Methode

C#

```
private void attach_Price(Price entity);
```

#### Anmerkungen

This is attach\_Price, a member of class Product.

### 1.1.52.3.4 CreateProduct Methode

#### 1.1.52.3.4.1 Product.CreateProduct Methode (string, Guid?, decimal, decimal?, string, Guid, Guid?, bool, DataClasses1DataContext)

Erstellt ein neues Produkt.

C#

```
public static Product CreateProduct(string name, Guid? productCategoryId, decimal priceAmount, decimal? authorativeCharge, string itemNumber, Guid orderTypeId, Guid? registrationOrderTypeId, bool needsVAT, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string name	Name (see page 511) des Produkts.
Guid? productCategoryId	Id (see page 510) der Produktkategorie, falls gewünscht.
decimal priceAmount	Standardpreis des Produkts.
decimal? authorativeCharge	Standardmäßige behördliche Gebühr, falls gewünscht.
string itemNumber	Artikelnummer des Produkts.
Guid orderTypeId	Id (see page 510) der Auftragsart.
Guid? registrationOrderTypeId	Id (see page 510) der Zulassungsauftragsart, falls benötigt.
bool needsVAT	Gibt an, ob das Produkt mehrwertsteuerpflichtig ist oder nicht.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

#### Resultate

Das neue Produkt.

#### 1.1.52.3.4.2 Product.CreateProduct Methode (string, Guid?, decimal, decimal?, string, Guid, Guid?, bool, bool, DataClasses1DataContext)

Erstellt ein neues Produkt.

**C#**

```
public static Price CreateProduct(string name, Guid? categoryId, decimal priceAmount, decimal? authorativeCharge, string itemNumber, Guid orderId, Guid? registrationOrderId, bool needsVAT, bool accountId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string name	Name (see page 511) des Produkts.
Guid? categoryId	Id (see page 510) der Produktkategorie, falls gewünscht.
decimal priceAmount	Standardpreis des Produkts.
decimal? authorativeCharge	Standardmäßige behördliche Gebühr, falls gewünscht.
string itemNumber	Artikelnummer des Produkts.
Guid orderId	Id (see page 510) der Auftragsart.
Guid? registrationOrderId	Id (see page 510) der Zulassungsauftragsart, falls benötigt.
bool needsVAT	Gibt an, ob das Produkt mehrwertsteuerpflichtig ist oder nicht.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Den neuen Preis.

### 1.1.52.3.5 Product.detach\_CustomerProduct Methode

**C#**

```
private void detach_CustomerProduct(CustomerProduct entity);
```

**Anmerkungen**

This is detach\_CustomerProduct, a member of class Product.

### 1.1.52.3.6 Product.detach\_OrderItem Methode

**C#**

```
private void detach_OrderItem(OrderItem entity);
```

**Anmerkungen**

This is detach\_OrderItem, a member of class Product.

### 1.1.52.3.7 Product.detach\_Price Methode

**C#**

```
private void detach_Price(Price entity);
```

**Anmerkungen**

This is detach\_Price, a member of class Product.

### 1.1.52.3.8 Product.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.52.3.9 Product.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Product.

### 1.1.52.3.10 Product.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Product.

### 1.1.52.3.11 Product.OnIsLockedChanged Methode

**C#**

```
private void OnIsLockedChanged();
```

**Anmerkungen**

This is OnIsLockedChanged, a member of class Product.

### 1.1.52.3.12 Product.OnIsLockedChanging Methode

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnIsLockedChanging(bool value);
```

**Parameter**

Parameter	Beschreibung
bool value	

### 1.1.52.3.13 Product.OnItemNumberChanged Methode

**C#**

```
private void OnItemNumberChanged();
```

**Anmerkungen**

This is OnItemNumberChanged, a member of class Product.

### 1.1.52.3.14 Product.OnItemNumberChanging Methode

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnItemNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.52.3.15 Product.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.52.3.16 Product.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class Product.

### 1.1.52.3.17 Product.OnNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.52.3.18 Product.OnNeedsVATChanged Methode

**C#**

```
private void OnNeedsVATChanged();
```

**Anmerkungen**

This is OnNeedsVATChanged, a member of class Product.

### 1.1.52.3.19 Product.OnNeedsVATChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnNeedsVATChanging(bool value);
```

**Parameter**

Parameter	Beschreibung
bool value	

### 1.1.52.3.20 Product.OnOrderTypeIdChanged Methode

**C#**

```
private void OnOrderTypeIdChanged();
```

**Anmerkungen**

This is OnOrderTypeIdChanged, a member of class Product.

**1.1.52.3.21 OnOrderTypeIdChanging Methode****1.1.52.3.21.1 Product.OnOrderTypeIdChanging Methode (Guid)**

Aenderungsevents für die Historie

**C#**

```
private void OnOrderTypeIdChanging(Guid value);
```

**Parameter**

Parameter	Beschreibung
Guid value	

**1.1.52.3.21.2 Product.OnOrderTypeIdChanging Methode (System.Guid)****C#**

```
private void OnOrderTypeIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderTypeIdChanging, a member of class Product.

**1.1.52.3.22 Product.OnProductCategoryIdChanged Methode****C#**

```
private void OnProductCategoryIdChanged();
```

**Anmerkungen**

This is OnProductCategoryIdChanged, a member of class Product.

**1.1.52.3.23 OnProductCategoryIdChanging Methode****1.1.52.3.23.1 Product.OnProductCategoryIdChanging Methode (Guid?)**

Aenderungsevents für die Historie

**C#**

```
private void OnProductCategoryIdChanging(Guid? value);
```

**Parameter**

Parameter	Beschreibung
Guid? value	

**1.1.52.3.23.2 Product.OnProductCategoryIdChanging Methode (System.Nullable<System.Guid>)****C#**

```
private void OnProductCategoryIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnProductCategoryIdChanging, a member of class Product.

### 1.1.52.3.24 Product.OnRegistrationOrderTypeIdChanged Methode

**C#**

```
private void OnRegistrationOrderTypeIdChanged();
```

#### Anmerkungen

This is OnRegistrationOrderTypeIdChanged, a member of class Product.

### 1.1.52.3.25 OnRegistrationOrderTypeIdChanging Methode

#### 1.1.52.3.25.1 Product.OnRegistrationOrderTypeIdChanging Methode (Guid?)

Änderungsevents für die Historie

**C#**

```
private void OnRegistrationOrderTypeIdChanging(Guid? value);
```

#### Parameter

Parameter	Beschreibung
Guid? value	

#### 1.1.52.3.25.2 Product.OnRegistrationOrderTypeIdChanging Methode (System.Nullable<System.Guid>)

**C#**

```
private void OnRegistrationOrderTypeIdChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnRegistrationOrderTypeIdChanging, a member of class Product.

### 1.1.52.3.26 Product.OnValidate Methode

Änderungsevents für die Historie

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

#### Parameter

Parameter	Beschreibung
value	

### 1.1.52.3.27 Product.RemoveProduct Methode

Löscht das angegebene Produkt

**C#**

```
public static void RemoveProduct(Guid productId, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
Guid productId	Id (see page 510) des Products.
DataClasses1DataContext dbContext	

### 1.1.52.3.28 Product.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Product.

### 1.1.52.3.29 Product.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Product.

## 1.1.52.4 Product Eigenschaften

### 1.1.52.4.1 Product.\_dbContext Eigenschaft

**C#**

```
public DataClasses1DataContext _dbContext;
```

**Anmerkungen**

This is \_dbContext, a member of class Product.

### 1.1.52.4.2 Product.CustomerProduct Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Product_CustomerProduct",  
Storage="_CustomerProduct", ThisKey="Id", OtherKey="ProductId")]  
public EntitySet<CustomerProduct> CustomerProduct;
```

**Anmerkungen**

This is CustomerProduct, a member of class Product.

### 1.1.52.4.3 Product.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Product.

### 1.1.52.4.4 Product.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Product.

**1.1.52.4.5 Product.IsLocked Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsLocked", DbType="Bit NOT NULL")]  
public bool IsLocked;
```

**Anmerkungen**

This is IsLocked, a member of class Product.

**1.1.52.4.6 Product.ItemId Eigenschaft****C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Product.

**1.1.52.4.7 Product.ItemNumber Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ItemNumber",  
DbType="VarChar(10) NOT NULL", CanBeNull=false)]  
public string ItemNumber;
```

**Anmerkungen**

This is ItemNumber, a member of class Product.

**1.1.52.4.8 Product.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Product.

**1.1.52.4.9 Product.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class Product.

**1.1.52.4.10 Product.NeedsVAT Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_NeedsVAT", DbType="Bit NOT  
NULL")]
```

```
public bool NeedsVAT;
```

**Anmerkungen**

This is NeedsVAT, a member of class Product.

### 1.1.52.4.11 Product.OrderItem Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Product_OrderItem",  
Storage="_OrderItem", ThisKey="Id", OtherKey="ProductId")]  
public EntitySet<OrderItem> OrderItem;
```

**Anmerkungen**

This is OrderItem, a member of class Product.

### 1.1.52.4.12 Product.OrderType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderType_Product",  
Storage="_OrderType", ThisKey="OrderTypeId", OtherKey="Id", IsForeignKey=true)]  
public OrderType OrderType;
```

**Anmerkungen**

This is OrderType, a member of class Product.

### 1.1.52.4.13 Product.OrderTypeld Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderTypeId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid OrderTypeId;
```

**Anmerkungen**

This is OrderTypeld, a member of class Product.

### 1.1.52.4.14 Product.Price Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Product_Price",  
Storage="_Price", ThisKey="Id", OtherKey="ProductId")]  
public EntitySet<Price> Price;
```

**Anmerkungen**

This is Price, a member of class Product.

### 1.1.52.4.15 Product.ProductCategory Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="ProductCategory_Product",  
Storage="_ProductCategory", ThisKey="ProductCategoryId", OtherKey="Id", IsForeignKey=true)]  
public ProductCategory ProductCategory;
```

**Anmerkungen**

This is ProductCategory, a member of class Product.

### 1.1.52.4.16 Product.ProductCategoryId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ProductCategoryId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> ProductCategoryId;
```

**Anmerkungen**

This is ProductCategoryId, a member of class Product.

### 1.1.52.4.17 Product.RegistrationOrderType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RegistrationOrderType_Product",
Storage="_RegistrationOrderType", ThisKey="RegistrationOrderId", OtherKey="Id",
IsForeignKey=true)]
public RegistrationOrderType RegistrationOrderType;
```

**Anmerkungen**

This is RegistrationOrderType, a member of class Product.

### 1.1.52.4.18 Product.RegistrationOrderTypeId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationOrderId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> RegistrationOrderId;
```

**Anmerkungen**

This is RegistrationOrderId, a member of class Product.

## 1.1.52.5 Product Ereignisse

### 1.1.52.5.1 Product.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Product.

### 1.1.52.5.2 Product.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Product.

## 1.1.53 ProductCategory Klasse

Erweiterungsklasse fuer die DB Tabelle ProductCategory

### Klassen Hierarchie

### C#

```
public class ProductCategory : ILogging;
```

### Datei

ProductCategory.cs (🔗 see page 703)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

#### ProductCategory Klasse

	Name	Beschreibung
	EntityState (🔗 see page 519)	This is EntityState, a member of class ProductCategory.
	Id (🔗 see page 519)	This is Id, a member of class ProductCategory.
	ItemId (🔗 see page 519)	This is ItemId, a member of class ProductCategory.
	LogDbContext (🔗 see page 519)	This is LogDbContext, a member of class ProductCategory.
	Name (🔗 see page 519)	This is Name, a member of class ProductCategory.
	Product (🔗 see page 520)	This is Product, a member of class ProductCategory.

### Methoden

#### ProductCategory Klasse

	Name	Beschreibung
	ProductCategory (🔗 see page 516)	This is ProductCategory, a member of class ProductCategory.

#### ProductCategory Felder

#### ProductCategory Klasse

	Name	Beschreibung
	_Id (🔗 see page 516)	This is _Id, a member of class ProductCategory.
	_Name (🔗 see page 516)	This is _Name, a member of class ProductCategory.
	_Product (🔗 see page 516)	This is _Product, a member of class ProductCategory.
	emptyChangingEventArgs (🔗 see page 516)	This is emptyChangingEventArgs, a member of class ProductCategory.

#### ProductCategory Methoden

#### ProductCategory Klasse

	Name	Beschreibung
	attach_Product (🔗 see page 516)	This is attach_Product, a member of class ProductCategory.
	CreateProductCategory (🔗 see page 517)	Erstellt eine neue Produktkategorie mit uebergebenem Namen.
	detach_Product (🔗 see page 517)	This is detach_Product, a member of class ProductCategory.
	OnCreated (🔗 see page 517)	Aenderungsevents fÃ¼r die Historie
	OnIdChanged (🔗 see page 517)	This is OnIdChanged, a member of class ProductCategory.
	OnIdChanging (🔗 see page 517)	This is OnIdChanging, a member of class ProductCategory.
	OnLoaded (🔗 see page 518)	Aenderungsevents fÃ¼r die Historie
	OnNameChanged (🔗 see page 518)	This is OnNameChanged, a member of class ProductCategory.
	OnNameChanging (🔗 see page 518)	Aenderungsevents fÃ¼r die Historie

	OnValidate ( <a href="#">↗</a> see page 518)	Aenderungsevents f��r die Historie
	SendPropertyChanged ( <a href="#">↗</a> see page 518)	This is SendPropertyChanged, a member of class ProductCategory.
	SendPropertyChanging ( <a href="#">↗</a> see page 518)	This is SendPropertyChanging, a member of class ProductCategory.

## ProductCategory Ereignisse

### ProductCategory Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 520)	This is PropertyChanged, a member of class ProductCategory.
	PropertyChanging ( <a href="#">↗</a> see page 520)	This is PropertyChanging, a member of class ProductCategory.

	SendPropertyChanged ( <a href="#">↗</a> see page 518)	This is SendPropertyChanged, a member of class ProductCategory.
	SendPropertyChanging ( <a href="#">↗</a> see page 518)	This is SendPropertyChanging, a member of class ProductCategory.

## 1.1.53.1 ProductCategory.ProductCategory Konstruktor

**C#**

```
public ProductCategory();
```

**Anmerkungen**

This is ProductCategory, a member of class ProductCategory.

## 1.1.53.2 ProductCategory Felder

### 1.1.53.2.1 ProductCategory.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class ProductCategory.

### 1.1.53.2.2 ProductCategory.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class ProductCategory.

### 1.1.53.2.3 ProductCategory.\_Product Feld

**C#**

```
private EntitySet<Product> _Product;
```

**Anmerkungen**

This is \_Product, a member of class ProductCategory.

### 1.1.53.2.4 ProductCategory.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class ProductCategory.

## 1.1.53.3 ProductCategory Methoden

### 1.1.53.3.1 ProductCategory.attach\_Product Methode

**C#**

```
private void attach_Product(Product entity);
```

**Anmerkungen**

This is attach\_Product, a member of class ProductCategory.

**1.1.53.3.2 ProductCategory.CreateProductCategory Methode**

Erstellt eine neue Produktkategorie mit uebergebenem Namen.

**C#**

```
public static ProductCategory CreateProductCategory(string name, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string name	Name (see page 519) der Kategorie.
DataClasses1DataContext dbContext	Datenbankkontext, mit dem die Kategorie erstellt wird.

**Resultate**

Die neu erstellte Produktkategorie.

**1.1.53.3.3 ProductCategory.detach\_Product Methode****C#**

```
private void detach_Product(Product entity);
```

**Anmerkungen**

This is detach\_Product, a member of class ProductCategory.

**1.1.53.3.4 ProductCategory.OnCreated Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.53.3.5 ProductCategory.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class ProductCategory.

**1.1.53.3.6 ProductCategory.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class ProductCategory.

### 1.1.53.3.7 ProductCategory.OnLoaded Methode

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.53.3.8 ProductCategory.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class ProductCategory.

### 1.1.53.3.9 ProductCategory.OnNameChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnNameChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.53.3.10 ProductCategory.OnValidate Methode

Aenderungsevents für die Historie

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.53.3.11 ProductCategory.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class ProductCategory.

### 1.1.53.3.12 ProductCategory.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class ProductCategory.

## 1.1.53.4 ProductCategory Eigenschaften

### 1.1.53.4.1 ProductCategory.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class ProductCategory.

### 1.1.53.4.2 ProductCategory.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class ProductCategory.

### 1.1.53.4.3 ProductCategory.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class ProductCategory.

### 1.1.53.4.4 ProductCategory.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class ProductCategory.

### 1.1.53.4.5 ProductCategory.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class ProductCategory.

### 1.1.53.4.6 ProductCategory.Product Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="ProductCategory_Product",  
Storage="_Product", ThisKey="Id", OtherKey="ProductCategoryId")]  
public EntitySet<Product> Product;
```

#### Anmerkungen

This is Product, a member of class ProductCategory.

## 1.1.53.5 ProductCategory Ereignisse

### 1.1.53.5.1 ProductCategory.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class ProductCategory.

### 1.1.53.5.2 ProductCategory.PropertyChanging Ereignis

#### C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

#### Anmerkungen

This is PropertyChanging, a member of class ProductCategory.

## 1.1.54 Registration Klasse

Erweiterungsklasse fuer die DB Tabelle Registration

#### Klassen Hierarchie

#### C#

```
public class Registration : ILogging;
```

#### Datei

Registration.cs (🔗 see page 703)

#### Mitglieder

##### ILogging Eigenschaften

	Name	Beschreibung
	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

##### Registration Klasse

	Name	Beschreibung
	CarOwner (🔗 see page 532)	This is CarOwner, a member of class Registration.

	CarOwnerId ( <a href="#">↗</a> see page 532)	This is CarOwnerId, a member of class Registration.
	DeregistrationOrder ( <a href="#">↗</a> see page 532)	This is DeregistrationOrder, a member of class Registration.
	EmissionCode ( <a href="#">↗</a> see page 533)	This is EmissionCode, a member of class Registration.
	EntityState ( <a href="#">↗</a> see page 533)	This is EntityState, a member of class Registration.
	eVBNumber ( <a href="#">↗</a> see page 533)	This is eVBNumber, a member of class Registration.
	GeneralInspectionDate ( <a href="#">↗</a> see page 533)	This is GeneralInspectionDate, a member of class Registration.
	Id ( <a href="#">↗</a> see page 533)	This is Id, a member of class Registration.
	ItemId ( <a href="#">↗</a> see page 533)	This is ItemId, a member of class Registration.
	Licencenumber ( <a href="#">↗</a> see page 534)	This is Licencenumber, a member of class Registration.
	LogDBContext ( <a href="#">↗</a> see page 534)	This is LogDBContext, a member of class Registration.
	RegistrationDate ( <a href="#">↗</a> see page 534)	This is RegistrationDate, a member of class Registration.
	RegistrationDocumentNumber ( <a href="#">↗</a> see page 534)	This is RegistrationDocumentNumber, a member of class Registration.
	RegistrationOrder ( <a href="#">↗</a> see page 534)	This is RegistrationOrder, a member of class Registration.
	Vehicle ( <a href="#">↗</a> see page 535)	This is Vehicle, a member of class Registration.
	Vehicle1 ( <a href="#">↗</a> see page 535)	This is Vehicle1, a member of class Registration.
	VehicleId ( <a href="#">↗</a> see page 535)	This is VehicleId, a member of class Registration.

## Methoden

### Registration Klasse

	Name	Beschreibung
	Registration ( <a href="#">↗</a> see page 524)	This is Registration, a member of class Registration.

### Registration Felder

#### Registration Klasse

	Name	Beschreibung
	_CarOwner ( <a href="#">↗</a> see page 524)	This is _CarOwner, a member of class Registration.
	_CarOwnerId ( <a href="#">↗</a> see page 524)	This is _CarOwnerId, a member of class Registration.
	_DeregistrationOrder ( <a href="#">↗</a> see page 524)	This is _DeregistrationOrder, a member of class Registration.
	_EmissionCode ( <a href="#">↗</a> see page 524)	This is _EmissionCode, a member of class Registration.
	_eVBNumber ( <a href="#">↗</a> see page 524)	This is _eVBNumber, a member of class Registration.
	_GeneralInspectionDate ( <a href="#">↗</a> see page 525)	This is _GeneralInspectionDate, a member of class Registration.
	_Id ( <a href="#">↗</a> see page 525)	This is _Id, a member of class Registration.
	_Licencenumber ( <a href="#">↗</a> see page 525)	This is _Licencenumber, a member of class Registration.
	_RegistrationDate ( <a href="#">↗</a> see page 525)	This is _RegistrationDate, a member of class Registration.
	_RegistrationDocumentNumber ( <a href="#">↗</a> see page 525)	This is _RegistrationDocumentNumber, a member of class Registration.
	_RegistrationOrder ( <a href="#">↗</a> see page 525)	This is _RegistrationOrder, a member of class Registration.
	_Vehicle ( <a href="#">↗</a> see page 525)	This is _Vehicle, a member of class Registration.
	_Vehicle1 ( <a href="#">↗</a> see page 526)	This is _Vehicle1, a member of class Registration.
	_VehicleId ( <a href="#">↗</a> see page 526)	This is _VehicleId, a member of class Registration.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 526)	This is emptyChangingEventArgs, a member of class Registration.

## Registration Methoden

### Registration Klasse

## 1.1.54.1 Registration.Registration Konstruktor

**C#**

```
public Registration();
```

### Anmerkungen

This is Registration, a member of class Registration.

## 1.1.54.2 Registration Felder

### 1.1.54.2.1 Registration.\_CarOwner Feld

**C#**

```
private EntityRef<CarOwner> _CarOwner;
```

### Anmerkungen

This is \_CarOwner, a member of class Registration.

### 1.1.54.2.2 Registration.\_CarOwnerId Feld

**C#**

```
private System.Guid _CarOwnerId;
```

### Anmerkungen

This is \_CarOwnerId, a member of class Registration.

### 1.1.54.2.3 Registration.\_DeregistrationOrder Feld

**C#**

```
private EntitySet<DeregistrationOrder> _DeregistrationOrder;
```

### Anmerkungen

This is \_DeregistrationOrder, a member of class Registration.

### 1.1.54.2.4 Registration.\_EmissionCode Feld

**C#**

```
private string _EmissionCode;
```

### Anmerkungen

This is \_EmissionCode, a member of class Registration.

### 1.1.54.2.5 Registration.\_eVBNumber Feld

**C#**

```
private string _eVBNumber;
```

### Anmerkungen

This is \_eVBNumber, a member of class Registration.

### 1.1.54.2.6 Registration.\_GeneralInspectionDate Feld

**C#**

```
private System.Nullable<System.DateTime> _GeneralInspectionDate;
```

**Anmerkungen**

This is \_GeneralInspectionDate, a member of class Registration.

### 1.1.54.2.7 Registration.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Registration.

### 1.1.54.2.8 Registration.\_Licencenumber Feld

**C#**

```
private string _Licencenumber;
```

**Anmerkungen**

This is \_Licencenumber, a member of class Registration.

### 1.1.54.2.9 Registration.\_RegistrationDate Feld

**C#**

```
private System.Nullable<System.DateTime> _RegistrationDate;
```

**Anmerkungen**

This is \_RegistrationDate, a member of class Registration.

### 1.1.54.2.10 Registration.\_RegistrationDocumentNumber Feld

**C#**

```
private string _RegistrationDocumentNumber;
```

**Anmerkungen**

This is \_RegistrationDocumentNumber, a member of class Registration.

### 1.1.54.2.11 Registration.\_RegistrationOrder Feld

**C#**

```
private EntitySet<RegistrationOrder> _RegistrationOrder;
```

**Anmerkungen**

This is \_RegistrationOrder, a member of class Registration.

### 1.1.54.2.12 Registration.\_Vehicle Feld

**C#**

```
private EntityRef<Vehicle> _Vehicle;
```

**Anmerkungen**

This is \_Vehicle, a member of class Registration.

**1.1.54.2.13 Registration.\_Vehicle1 Feld****C#**

```
private EntitySet<Vehicle> _Vehicle1;
```

**Anmerkungen**

This is \_Vehicle1, a member of class Registration.

**1.1.54.2.14 Registration.\_VehicleId Feld****C#**

```
private System.Guid _VehicleId;
```

**Anmerkungen**

This is \_VehicleId, a member of class Registration.

**1.1.54.2.15 Registration.emptyChangingEventArgs Feld****C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Registration.

**1.1.54.3 Registration Methoden****1.1.54.3.1 Registration.attach\_DeregistrationOrder Methode****C#**

```
private void attach_DeregistrationOrder(DeregistrationOrder entity);
```

**Anmerkungen**

This is attach\_DeregistrationOrder, a member of class Registration.

**1.1.54.3.2 Registration.attach\_RegistrationOrder Methode****C#**

```
private void attach_RegistrationOrder(RegistrationOrder entity);
```

**Anmerkungen**

This is attach\_RegistrationOrder, a member of class Registration.

**1.1.54.3.3 Registration.attach\_Vehicle1 Methode****C#**

```
private void attach_Vehicle1(Vehicle entity);
```

**Anmerkungen**

This is attach\_Vehicle1, a member of class Registration.

**1.1.54.3.4 Registration.CreateRegistration Methode**

Erstellt eine neue Zulassung.

**C#**

```
public static Registration CreateRegistration(Guid carOwnerId, Guid vehicleId, string
licencenumber, string evbNumber, DateTime? generalInspectionDate, DateTime?
registrationDate, string registrationDocumentNumber, string emissionCode,
DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid carOwnerId	Id (see page 533) des Halters.
Guid vehicleId	Id (see page 533) des Fahrzeugs.
string licencenumber	Kennzeichen für die Zulassung.
string evbNumber	eVB-Nummer der Fahrzeugversicherung.
DateTime? generalInspectionDate	Datum der Hauptuntersuchung (HU).
DateTime? registrationDate	Zulassungsdatum.
string registrationDocumentNumber	Fahrzeugbriefnummer, falls vorhanden.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

**Resultate**

Die neue Zulassung.

**1.1.54.3.5 Registration.detach\_DeregistrationOrder Methode****C#**

```
private void detach_DeregistrationOrder(DeregistrationOrder entity);
```

**Anmerkungen**

This is detach\_DeregistrationOrder, a member of class Registration.

**1.1.54.3.6 Registration.detach\_RegistrationOrder Methode****C#**

```
private void detach_RegistrationOrder(RegistrationOrder entity);
```

**Anmerkungen**

This is detach\_RegistrationOrder, a member of class Registration.

**1.1.54.3.7 Registration.detach\_Vehicle1 Methode****C#**

```
private void detach_Vehicle1(Vehicle entity);
```

**Anmerkungen**

This is detach\_Vehicle1, a member of class Registration.

### 1.1.54.3.8 Registration.OnCarOwnerIdChanged Methode

**C#**

```
private void OnCarOwnerIdChanged();
```

**Anmerkungen**

This is OnCarOwnerIdChanged, a member of class Registration.

### 1.1.54.3.9 Registration.OnCarOwnerIdChanging Methode

**C#**

```
private void OnCarOwnerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnCarOwnerIdChanging, a member of class Registration.

### 1.1.54.3.10 Registration.OnCreated Methode

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.54.3.11 Registration.OnEmissionCodeChanged Methode

**C#**

```
private void OnEmissionCodeChanged();
```

**Anmerkungen**

This is OnEmissionCodeChanged, a member of class Registration.

### 1.1.54.3.12 Registration.OnEmissionCodeChanging Methode

Aenderungsevents für die Historie

**C#**

```
private void OnEmissionCodeChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.54.3.13 Registration.OneVBNumberChanged Methode

**C#**

```
private void OneVBNumberChanged();
```

**Anmerkungen**

This is OneVBNumberChanged, a member of class Registration.

### 1.1.54.3.14 Registration.OneVBNumberChanging Methode

Änderungsevents für die Historie

**C#**

```
private void OneVBNumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

### 1.1.54.3.15 Registration.OnGeneralInspectionDateChanged Methode

**C#**

```
private void OnGeneralInspectionDateChanged();
```

**Anmerkungen**

This is OnGeneralInspectionDateChanged, a member of class Registration.

### 1.1.54.3.16 OnGeneralInspectionDateChanging Methode

#### 1.1.54.3.16.1 Registration.OnGeneralInspectionDateChanging Methode (DateTime?)

Änderungsevents für die Historie

**C#**

```
private void OnGeneralInspectionDateChanging(DateTime? value);
```

**Parameter**

Parameter	Beschreibung
DateTime? value	

#### 1.1.54.3.16.2 Registration.OnGeneralInspectionDateChanging Methode (System.Nullable<System.DateTime>)

**C#**

```
private void OnGeneralInspectionDateChanging(System.Nullable<System.DateTime> value);
```

**Anmerkungen**

This is OnGeneralInspectionDateChanging, a member of class Registration.

### 1.1.54.3.17 Registration.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Registration.

### 1.1.54.3.18 Registration.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Registration.

**1.1.54.3.19 Registration.OnLicencenumberChanged Methode****C#**

```
private void OnLicencenumberChanged();
```

**Anmerkungen**

This is OnLicencenumberChanged, a member of class Registration.

**1.1.54.3.20 Registration.OnLicencenumberChanging Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnLicencenumberChanging(string value);
```

**Parameter**

Parameter	Beschreibung
string value	

**1.1.54.3.21 Registration.OnLoaded Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.54.3.22 Registration.OnRegistrationDateChanged Methode****C#**

```
private void OnRegistrationDateChanged();
```

**Anmerkungen**

This is OnRegistrationDateChanged, a member of class Registration.

**1.1.54.3.23 OnRegistrationDateChanging Methode****1.1.54.3.23.1 Registration.OnRegistrationDateChanging Methode (DateTime?)**

Aenderungsevents für die Historie

**C#**

```
private void OnRegistrationDateChanging(DateTime? value);
```

**Parameter**

Parameter	Beschreibung
DateTime? value	

### 1.1.54.3.23.2 Registration.OnRegistrationDateChanging Methode (System.Nullable<System.DateTime>)

C#

```
private void OnRegistrationDateChanging(System.Nullable<System.DateTime> value);
```

#### Anmerkungen

This is OnRegistrationDateChanging, a member of class Registration.

### 1.1.54.3.24 Registration.OnRegistrationDocumentNumberChanged Methode

C#

```
private void OnRegistrationDocumentNumberChanged();
```

#### Anmerkungen

This is OnRegistrationDocumentNumberChanged, a member of class Registration.

### 1.1.54.3.25 Registration.OnRegistrationDocumentNumberChanging Methode

Aenderungsevents für die Historie

C#

```
private void OnRegistrationDocumentNumberChanging(string value);
```

#### Parameter

Parameter	Beschreibung
string value	

### 1.1.54.3.26 Registration.OnValidate Methode

C#

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

#### Anmerkungen

This is OnValidate, a member of class Registration.

### 1.1.54.3.27 Registration.OnVehicleIdChanged Methode

C#

```
private void OnVehicleIdChanged();
```

#### Anmerkungen

This is OnVehicleIdChanged, a member of class Registration.

### 1.1.54.3.28 Registration.OnVehicleIdChanging Methode

C#

```
private void OnVehicleIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnVehicleIdChanging, a member of class Registration.

### 1.1.54.3.29 Registration.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Registration.

### 1.1.54.3.30 Registration.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Registration.

## 1.1.54.4 Registration Eigenschaften

### 1.1.54.4.1 Registration.CarOwner Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="CarOwner_Registration",  
Storage="_CarOwner", ThisKey="CarOwnerId", OtherKey="Id", IsForeignKey=true)]  
public CarOwner CarOwner;
```

**Anmerkungen**

This is CarOwner, a member of class Registration.

### 1.1.54.4.2 Registration.CarOwnerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CarOwnerId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid CarOwnerId;
```

**Anmerkungen**

This is CarOwnerId, a member of class Registration.

### 1.1.54.4.3 Registration.DeregistrationOrder Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Registration_DeregistrationOrder",  
Storage="_DeregistrationOrder", ThisKey="Id", OtherKey="RegistrationId")]  
public EntitySet<DeregistrationOrder> DeregistrationOrder;
```

**Anmerkungen**

This is DeregistrationOrder, a member of class Registration.

#### 1.1.54.4.4 Registration.EmissionCode Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_EmissionCode",
DbType="varchar(5)")]
public string EmissionCode;
```

**Anmerkungen**

This is EmissionCode, a member of class Registration.

#### 1.1.54.4.5 Registration.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Registration.

#### 1.1.54.4.6 Registration.eVBNumber Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_eVBNumber",
DbType="VarChar(7)")]
public string eVBNumber;
```

**Anmerkungen**

This is eVBNumber, a member of class Registration.

#### 1.1.54.4.7 Registration.GeneralInspectionDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_GeneralInspectionDate",
DbType="DateTime")]
public System.Nullable<System.DateTime> GeneralInspectionDate;
```

**Anmerkungen**

This is GeneralInspectionDate, a member of class Registration.

#### 1.1.54.4.8 Registration.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier
NOT NULL", IsPrimaryKey=true)]
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Registration.

#### 1.1.54.4.9 Registration.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Registration.

**1.1.54.4.10 Registration.Licencenumber Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Licencenumber",
DbType="VarChar(15) NOT NULL")]
public string Licencenumber;
```

**Anmerkungen**

This is Licencenumber, a member of class Registration.

**1.1.54.4.11 Registration.LogDBContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Registration.

**1.1.54.4.12 Registration.RegistrationDate Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationDate",
DbType="Date")]
public System.Nullable<System.DateTime> RegistrationDate;
```

**Anmerkungen**

This is RegistrationDate, a member of class Registration.

**1.1.54.4.13 Registration.RegistrationDocumentNumber Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationDocumentNumber",
DbType="VarChar(20)")]
public string RegistrationDocumentNumber;
```

**Anmerkungen**

This is RegistrationDocumentNumber, a member of class Registration.

**1.1.54.4.14 Registration.RegistrationOrder Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Registration_RegistrationOrder",
Storage="_RegistrationOrder", ThisKey="Id", OtherKey="RegistrationId")]
public EntitySet<RegistrationOrder> RegistrationOrder;
```

**Anmerkungen**

This is RegistrationOrder, a member of class Registration.

### 1.1.54.4.15 Registration.Vehicle Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Vehicle_Registration",  
Storage="_Vehicle", ThisKey="VehicleId", OtherKey="Id", IsForeignKey=true)]  
public Vehicle Vehicle;
```

**Anmerkungen**

This is Vehicle, a member of class Registration.

### 1.1.54.4.16 Registration.Vehicle1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Registration_Vehicle",  
Storage="_Vehicle1", ThisKey="Id", OtherKey="CurrentRegistrationId")]  
public EntitySet<Vehicle> Vehicle1;
```

**Anmerkungen**

This is Vehicle1, a member of class Registration.

### 1.1.54.4.17 Registration.VehicleId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VehicleId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid VehicleId;
```

**Anmerkungen**

This is VehicleId, a member of class Registration.

## 1.1.54.5 Registration Ereignisse

### 1.1.54.5.1 Registration.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class Registration.

### 1.1.54.5.2 Registration.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class Registration.

## 1.1.55 RegistrationLocation Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.RegistrationLocation")]
public class RegistrationLocation : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([🔗](#) see page 695)

### Anmerkungen

This is class KVSCCommon.Database.RegistrationLocation.

### Mitglieder

#### Methoden

	Name	Beschreibung
	RegistrationLocation ( <a href="#">🔗</a> see page 537)	This is RegistrationLocation, a member of class RegistrationLocation.

	SendPropertyChanging (  see page 541)	This is SendPropertyChanging, a member of class RegistrationLocation.

**1.1.55.1 RegistrationLocation.RegistrationLocation Konstruktor****C#**

```
public RegistrationLocation();
```

**Anmerkungen**

This is RegistrationLocation, a member of class RegistrationLocation.

## 1.1.55.2 RegistrationLocation Felder

### 1.1.55.2.1 RegistrationLocation.\_Adress Feld

**C#**

```
private EntityRef<Adress> _Adress;
```

**Anmerkungen**

This is \_Adress, a member of class RegistrationLocation.

### 1.1.55.2.2 RegistrationLocation.\_ID Feld

**C#**

```
private System.Guid _ID;
```

**Anmerkungen**

This is \_ID, a member of class RegistrationLocation.

### 1.1.55.2.3 RegistrationLocation.\_Order Feld

**C#**

```
private EntitySet<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class RegistrationLocation.

### 1.1.55.2.4 RegistrationLocation.\_RegistrationLocationAdressId Feld

**C#**

```
private System.Nullable<System.Guid> _RegistrationLocationAdressId;
```

**Anmerkungen**

This is \_RegistrationLocationAdressId, a member of class RegistrationLocation.

### 1.1.55.2.5 RegistrationLocation.\_RegistrationLocationName Feld

**C#**

```
private string _RegistrationLocationName;
```

**Anmerkungen**

This is \_RegistrationLocationName, a member of class RegistrationLocation.

### 1.1.55.2.6 RegistrationLocation.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class RegistrationLocation.

## 1.1.55.3 RegistrationLocation Methoden

### 1.1.55.3.1 RegistrationLocation.attach\_Order Methode

**C#**

```
private void attach_Order(Order entity);
```

**Anmerkungen**

This is attach\_Order, a member of class RegistrationLocation.

### 1.1.55.3.2 RegistrationLocation.detach\_Order Methode

**C#**

```
private void detach_Order(Order entity);
```

**Anmerkungen**

This is detach\_Order, a member of class RegistrationLocation.

### 1.1.55.3.3 RegistrationLocation.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class RegistrationLocation.

### 1.1.55.3.4 RegistrationLocation.OnIDChanged Methode

**C#**

```
private void OnIDChanged();
```

**Anmerkungen**

This is OnIDChanged, a member of class RegistrationLocation.

### 1.1.55.3.5 RegistrationLocation.OnIDChanging Methode

**C#**

```
private void OnIDChanging(System.Guid value);
```

**Anmerkungen**

This is OnIDChanging, a member of class RegistrationLocation.

### 1.1.55.3.6 RegistrationLocation.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class RegistrationLocation.

### 1.1.55.3.7 RegistrationLocation.OnRegistrationLocationAdressIdChanged Methode

C#

```
private void OnRegistrationLocationAdressIdChanged();
```

Anmerkungen

This is OnRegistrationLocationAdressIdChanged, a member of class RegistrationLocation.

### 1.1.55.3.8 RegistrationLocation.OnRegistrationLocationAdressIdChanging Methode

C#

```
private void OnRegistrationLocationAdressIdChanging(System.Nullable<System.Guid> value);
```

Anmerkungen

This is OnRegistrationLocationAdressIdChanging, a member of class RegistrationLocation.

### 1.1.55.3.9 RegistrationLocation.OnRegistrationLocationNameChanged Methode

C#

```
private void OnRegistrationLocationNameChanged();
```

Anmerkungen

This is OnRegistrationLocationNameChanged, a member of class RegistrationLocation.

### 1.1.55.3.10 RegistrationLocation.OnRegistrationLocationNameChanging Methode

C#

```
private void OnRegistrationLocationNameChanging(string value);
```

Anmerkungen

This is OnRegistrationLocationNameChanging, a member of class RegistrationLocation.

### 1.1.55.3.11 RegistrationLocation.OnValidate Methode

C#

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

Anmerkungen

This is OnValidate, a member of class RegistrationLocation.

### 1.1.55.3.12 RegistrationLocation.SendPropertyChanged Methode

C#

```
protected virtual void SendPropertyChanged(String propertyName);
```

Anmerkungen

This is SendPropertyChanged, a member of class RegistrationLocation.

### 1.1.55.3.13 RegistrationLocation.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class RegistrationLocation.

## 1.1.55.4 RegistrationLocation Eigenschaften

### 1.1.55.4.1 RegistrationLocation.Adress Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Adress_RegistrationLocation",  
Storage="_Adress", ThisKey="RegistrationLocationAdressId", OtherKey="Id",  
IsForeignKey=true, DeleteRule="CASCADE")]  
public Address Adress;
```

**Anmerkungen**

This is Adress, a member of class RegistrationLocation.

### 1.1.55.4.2 RegistrationLocation.ID Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ID", DbType="UniqueIdentifier  
NOT NULL", IsPrimaryKey=true)]  
public System.Guid ID;
```

**Anmerkungen**

This is ID, a member of class RegistrationLocation.

### 1.1.55.4.3 RegistrationLocation.Order Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RegistrationLocation_Order",  
Storage="_Order", ThisKey="ID", OtherKey="Zulassungsstelle")]  
public EntitySet<Order> Order;
```

**Anmerkungen**

This is Order, a member of class RegistrationLocation.

### 1.1.55.4.4 RegistrationLocation.RegistrationLocationAdressId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationLocationAdressId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> RegistrationLocationAdressId;
```

**Anmerkungen**

This is RegistrationLocationAdressId, a member of class RegistrationLocation.

### 1.1.55.4.5 RegistrationLocation.RegistrationLocationName Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationLocationName",
DbType="VarChar(255)")]
public string RegistrationLocationName;
```

Anmerkungen

This is RegistrationLocationName, a member of class RegistrationLocation.

### 1.1.55.5 RegistrationLocation Ereignisse

#### 1.1.55.5.1 RegistrationLocation.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class RegistrationLocation.

#### 1.1.55.5.2 RegistrationLocation.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class RegistrationLocation.

## 1.1.56 RegistrationOrder Klasse

Erweiterungsklasse fuer die DB Tabelle RegistrationOrder

Klassen Hierarchie

C#

```
public class RegistrationOrder : ILogging;

### RegistrationOrder Klasse

	Name	Beschreibung
	RegistrationOrder ( <a href="#">↗</a> see page 545)	This is RegistrationOrder, a member of class RegistrationOrder.

### RegistrationOrder Felder

### RegistrationOrder Klasse

	Name	Beschreibung
	_eVBNumber ( <a href="#">↗</a> see page 545)	This is _eVBNumber, a member of class RegistrationOrder.
	_Licencenumber ( <a href="#">↗</a> see page 545)	This is _Licencenumber, a member of class RegistrationOrder.
	_Order ( <a href="#">↗</a> see page 546)	This is _Order, a member of class RegistrationOrder.
	_OrderId ( <a href="#">↗</a> see page 546)	This is _OrderId, a member of class RegistrationOrder.
	_PreviousLicencenumber ( <a href="#">↗</a> see page 546)	This is _PreviousLicencenumber, a member of class RegistrationOrder.
	_Registration ( <a href="#">↗</a> see page 546)	This is _Registration, a member of class RegistrationOrder.
	_RegistrationId ( <a href="#">↗</a> see page 546)	This is _RegistrationId, a member of class RegistrationOrder.
	_RegistrationOrderType ( <a href="#">↗</a> see page 546)	This is _RegistrationOrderType, a member of class RegistrationOrder.
	_RegistrationOrderTypeld ( <a href="#">↗</a> see page 546)	This is _RegistrationOrderTypeld, a member of class RegistrationOrder.
	_Vehicle ( <a href="#">↗</a> see page 547)	This is _Vehicle, a member of class RegistrationOrder.
	_VehicleId ( <a href="#">↗</a> see page 547)	This is _VehicleId, a member of class RegistrationOrder.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 547)	This is emptyChangingEventArgs, a member of class RegistrationOrder.

## RegistrationOrder Methoden

### RegistrationOrder Klasse

	Name	Beschreibung
	CreateRegistrationOrder ( <a href="#">↗</a> see page 547)	Erstellt einen Zulassungsauftrag.
	OnCreated ( <a href="#">↗</a> see page 548)	Aenderungsevents f��r die Historie
	OneVBNumberChanged ( <a href="#">↗</a> see page 548)	This is OneVBNumberChanged, a member of class RegistrationOrder.
	OneVBNumberChanging ( <a href="#">↗</a> see page 548)	This is OneVBNumberChanging, a member of class RegistrationOrder.
	OnLicencenumberChanged ( <a href="#">↗</a> see page 548)	This is OnLicencenumberChanged, a member of class RegistrationOrder.
	OnLicencenumberChanging ( <a href="#">↗</a> see page 548)	This is OnLicencenumberChanging, a member of class RegistrationOrder.
	OnLoaded ( <a href="#">↗</a> see page 548)	Aenderungsevents f��r die Historie
	OnOrderIdChanged ( <a href="#">↗</a> see page 549)	This is OnOrderIdChanged, a member of class RegistrationOrder.
	OnOrderIdChanging ( <a href="#">↗</a> see page 549)	This is OnOrderIdChanging, a member of class RegistrationOrder.
	OnPreviousLicencenumberChanged ( <a href="#">↗</a> see page 549)	This is OnPreviousLicencenumberChanged, a member of class RegistrationOrder.
	OnPreviousLicencenumberChanging ( <a href="#">↗</a> see page 549)	This is OnPreviousLicencenumberChanging, a member of class RegistrationOrder.
	OnRegistrationIdChanged ( <a href="#">↗</a> see page 549)	This is OnRegistrationIdChanged, a member of class RegistrationOrder.
	OnRegistrationIdChanging ( <a href="#">↗</a> see page 549)	This is OnRegistrationIdChanging, a member of class RegistrationOrder.
	OnRegistrationOrderTypeldChanged ( <a href="#">↗</a> see page 550)	This is OnRegistrationOrderTypeldChanged, a member of class RegistrationOrder.
	OnRegistrationOrderTypeldChanging ( <a href="#">↗</a> see page 550)	This is OnRegistrationOrderTypeldChanging, a member of class RegistrationOrder.
	OnValidate ( <a href="#">↗</a> see page 550)	This is OnValidate, a member of class RegistrationOrder.
	OnVehicleIdChanged ( <a href="#">↗</a> see page 550)	This is OnVehicleIdChanged, a member of class RegistrationOrder.

	OnVehicleIdChanging ( <a href="#">↗</a> see page 550)	This is OnVehicleIdChanging, a member of class RegistrationOrder.
	SendPropertyChanged ( <a href="#">↗</a> see page 550)	This is SendPropertyChanged, a member of class RegistrationOrder.
	SendPropertyChanging ( <a href="#">↗</a> see page 551)	This is SendPropertyChanging, a member of class RegistrationOrder.

## RegistrationOrder Ereignisse

### RegistrationOrder Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 553)	This is PropertyChanged, a member of class RegistrationOrder.
	PropertyChanging ( <a href="#">↗</a> see page 554)	This is PropertyChanging, a member of class RegistrationOrder.

## ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

## RegistrationOrder Klasse

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 551)	This is EntityState, a member of class RegistrationOrder.
	eVBNumber ( <a href="#">↗</a> see page 551)	This is eVBNumber, a member of class RegistrationOrder.
	ItemId ( <a href="#">↗</a> see page 551)	This is ItemId, a member of class RegistrationOrder.
	Licencenumber ( <a href="#">↗</a> see page 551)	This is Licencenumber, a member of class RegistrationOrder.
	LogDbContext ( <a href="#">↗</a> see page 551)	This is LogDbContext, a member of class RegistrationOrder.
	Order ( <a href="#">↗</a> see page 552)	This is Order, a member of class RegistrationOrder.
	OrderId ( <a href="#">↗</a> see page 552)	This is OrderId, a member of class RegistrationOrder.
	PreviousLicencenumber ( <a href="#">↗</a> see page 552)	This is PreviousLicencenumber, a member of class RegistrationOrder.
	Registration ( <a href="#">↗</a> see page 552)	This is Registration, a member of class RegistrationOrder.
	RegistrationId ( <a href="#">↗</a> see page 552)	This is RegistrationId, a member of class RegistrationOrder.
	RegistrationOrderType ( <a href="#">↗</a> see page 553)	This is RegistrationOrderType, a member of class RegistrationOrder.
	RegistrationOrderTypeld ( <a href="#">↗</a> see page 553)	This is RegistrationOrderTypeld, a member of class RegistrationOrder.
	Vehicle ( <a href="#">↗</a> see page 553)	This is Vehicle, a member of class RegistrationOrder.
	VehicleId ( <a href="#">↗</a> see page 553)	This is VehicleId, a member of class RegistrationOrder.

## RegistrationOrder Ereignisse

### RegistrationOrder Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 553)	This is PropertyChanged, a member of class RegistrationOrder.
	PropertyChanging ( <a href="#">↗</a> see page 554)	This is PropertyChanging, a member of class RegistrationOrder.

## RegistrationOrder Felder

### RegistrationOrder Klasse

	Name	Beschreibung
	_eVBNumber ( <a href="#">↗</a> see page 545)	This is _eVBNumber, a member of class RegistrationOrder.
	_Licencenumber ( <a href="#">↗</a> see page 545)	This is _Licencenumber, a member of class RegistrationOrder.

	OnPreviousLicencenumberChanging ( <a href="#">see page 549</a> )	This is OnPreviousLicencenumberChanging, a member of class RegistrationOrder.
	OnRegistrationIdChanged ( <a href="#">see page 549</a> )	This is OnRegistrationIdChanged, a member of class RegistrationOrder.
	OnRegistrationIdChanging ( <a href="#">see page 549</a> )	This is OnRegistrationIdChanging, a member of class RegistrationOrder.
	OnRegistrationOrderTypeIdChanged ( <a href="#">see page 550</a> )	This is OnRegistrationOrderTypeIdChanged, a member of class RegistrationOrder.
	OnRegistrationOrderTypeIdChanging ( <a href="#">see page 550</a> )	This is OnRegistrationOrderTypeIdChanging, a member of class RegistrationOrder.
	OnValidate ( <a href="#">see page 550</a> )	This is OnValidate, a member of class RegistrationOrder.
	OnVehicleIdChanged ( <a href="#">see page 550</a> )	This is OnVehicleIdChanged, a member of class RegistrationOrder.
	OnVehicleIdChanging ( <a href="#">see page 550</a> )	This is OnVehicleIdChanging, a member of class RegistrationOrder.
	SendPropertyChanged ( <a href="#">see page 550</a> )	This is SendPropertyChanged, a member of class RegistrationOrder.
	SendPropertyChanging ( <a href="#">see page 551</a> )	This is SendPropertyChanging, a member of class RegistrationOrder.

**1.1.56.1 RegistrationOrder.RegistrationOrder Konstruktor****C#**

```
public RegistrationOrder();
```

**Anmerkungen**

This is RegistrationOrder, a member of class RegistrationOrder.

**1.1.56.2 RegistrationOrder Felder****1.1.56.2.1 RegistrationOrder.\_eVBNumber Feld****C#**

```
private string _eVBNumber;
```

**Anmerkungen**

This is \_eVBNumber, a member of class RegistrationOrder.

**1.1.56.2.2 RegistrationOrder.\_Licencenumber Feld****C#**

```
private string _Licencenumber;
```

**Anmerkungen**

This is \_Licencenumber, a member of class RegistrationOrder.

### 1.1.56.2.3 RegistrationOrder.\_Order Feld

**C#**

```
private EntityRef<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class RegistrationOrder.

### 1.1.56.2.4 RegistrationOrder.\_OrderId Feld

**C#**

```
private System.Guid _OrderId;
```

**Anmerkungen**

This is \_OrderId, a member of class RegistrationOrder.

### 1.1.56.2.5 RegistrationOrder.\_PreviousLicencenumber Feld

**C#**

```
private string _PreviousLicencenumber;
```

**Anmerkungen**

This is \_PreviousLicencenumber, a member of class RegistrationOrder.

### 1.1.56.2.6 RegistrationOrder.\_Registration Feld

**C#**

```
private EntityRef<Registration> _Registration;
```

**Anmerkungen**

This is \_Registration, a member of class RegistrationOrder.

### 1.1.56.2.7 RegistrationOrder.\_RegistrationId Feld

**C#**

```
private System.Guid _RegistrationId;
```

**Anmerkungen**

This is \_RegistrationId, a member of class RegistrationOrder.

### 1.1.56.2.8 RegistrationOrder.\_RegistrationOrderType Feld

**C#**

```
private EntityRef<RegistrationOrderType> _RegistrationOrderType;
```

**Anmerkungen**

This is \_RegistrationOrderType, a member of class RegistrationOrder.

### 1.1.56.2.9 RegistrationOrder.\_RegistrationOrderTypeId Feld

**C#**

```
private System.Guid _RegistrationOrderTypeId;
```

Anmerkungen

This is \_RegistrationOrderTypeId, a member of class RegistrationOrder.

1.1.56.2.10 RegistrationOrder.\_Vehicle Feld

C#

```
private EntityRef<Vehicle> _Vehicle;
```

Anmerkungen

This is \_Vehicle, a member of class RegistrationOrder.

1.1.56.2.11 RegistrationOrder.\_VehicleId Feld

C#

```
private System.Guid _VehicleId;
```

Anmerkungen

This is \_VehicleId, a member of class RegistrationOrder.

1.1.56.2.12 RegistrationOrder.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

Anmerkungen

This is emptyChangingEventArgs, a member of class RegistrationOrder.

1.1.56.3 RegistrationOrder Methoden

1.1.56.3.1 RegistrationOrder.CreateRegistrationOrder Methode

Erstellt einen Zulassungsauftrag.

C#

```
public static RegistrationOrder CreateRegistrationOrder(Guid userId, Guid customerId,
string licencenumber, string previousLicencenumber, string evbNumber, Guid vehicleId, Guid
registrationId, Guid registrationOrderId, Guid? locationId, Guid zulassungsstelleId,
DataClasses1DataContext dbContext);
```

Parameter

Parameter	Beschreibung
Guid userId	Id des Benutzers.
Guid customerId	Id des Kunden.
string licencenumber	Kennzeichen f��r die Zulassung.
string previousLicencenumber	Vorheriges Kennzeichen (nur bei Umkennzeichnung).
string evbNumber	eVB-Nummer der Fahrzeugversicherung.
Guid vehicleId	Id des Fahrzeugs.
Guid registrationId	Id der Zulassung.
Guid registrationOrderId	Id der Zulassungsart.
Guid? locationId	Id des Standorts (Pflicht bei Grosskunden, sonst null).
DataClasses1DataContext dbContext	Datenbankkontext f��r die Transaktion.

**Resultate**

Den neuen Zulassungsauftrag.

**Anmerkungen**

Erstellt auch gleichzeitig den Order (see page 552)-Datensatz.

**1.1.56.3.2 RegistrationOrder.OnCreated Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**Parameter**

Parameter	Beschreibung
value	

**1.1.56.3.3 RegistrationOrder.OneVBNumberChanged Methode****C#**

```
private void OneVBNumberChanged();
```

**Anmerkungen**

This is OneVBNumberChanged, a member of class RegistrationOrder.

**1.1.56.3.4 RegistrationOrder.OneVBNumberChanging Methode****C#**

```
private void OneVBNumberChanging(string value);
```

**Anmerkungen**

This is OneVBNumberChanging, a member of class RegistrationOrder.

**1.1.56.3.5 RegistrationOrder.OnLicencenumberChanged Methode****C#**

```
private void OnLicencenumberChanged();
```

**Anmerkungen**

This is OnLicencenumberChanged, a member of class RegistrationOrder.

**1.1.56.3.6 RegistrationOrder.OnLicencenumberChanging Methode****C#**

```
private void OnLicencenumberChanging(string value);
```

**Anmerkungen**

This is OnLicencenumberChanging, a member of class RegistrationOrder.

**1.1.56.3.7 RegistrationOrder.OnLoaded Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnLoaded();
```

**Parameter**

Parameter	Beschreibung
value	

### 1.1.56.3.8 RegistrationOrder.OnOrderIdChanged Methode

**C#**

```
private void OnOrderIdChanged();
```

**Anmerkungen**

This is OnOrderIdChanged, a member of class RegistrationOrder.

### 1.1.56.3.9 RegistrationOrder.OnOrderIdChanging Methode

**C#**

```
private void OnOrderIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderIdChanging, a member of class RegistrationOrder.

### 1.1.56.3.10 RegistrationOrder.OnPreviousLicencenumberChanged Methode

**C#**

```
private void OnPreviousLicencenumberChanged();
```

**Anmerkungen**

This is OnPreviousLicencenumberChanged, a member of class RegistrationOrder.

### 1.1.56.3.11 RegistrationOrder.OnPreviousLicencenumberChanging Methode

**C#**

```
private void OnPreviousLicencenumberChanging(string value);
```

**Anmerkungen**

This is OnPreviousLicencenumberChanging, a member of class RegistrationOrder.

### 1.1.56.3.12 RegistrationOrder.OnRegistrationIdChanged Methode

**C#**

```
private void OnRegistrationIdChanged();
```

**Anmerkungen**

This is OnRegistrationIdChanged, a member of class RegistrationOrder.

### 1.1.56.3.13 RegistrationOrder.OnRegistrationIdChanging Methode

**C#**

```
private void OnRegistrationIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRegistrationIdChanging, a member of class RegistrationOrder.

**1.1.56.3.14 RegistrationOrder.OnRegistrationOrderTypeIdChanged Methode****C#**

```
private void OnRegistrationOrderTypeIdChanged();
```

**Anmerkungen**

This is OnRegistrationOrderTypeIdChanged, a member of class RegistrationOrder.

**1.1.56.3.15 RegistrationOrder.OnRegistrationOrderTypeIdChanging Methode****C#**

```
private void OnRegistrationOrderTypeIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRegistrationOrderTypeIdChanging, a member of class RegistrationOrder.

**1.1.56.3.16 RegistrationOrder.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class RegistrationOrder.

**1.1.56.3.17 RegistrationOrder.OnVehicleIdChanged Methode****C#**

```
private void OnVehicleIdChanged();
```

**Anmerkungen**

This is OnVehicleIdChanged, a member of class RegistrationOrder.

**1.1.56.3.18 RegistrationOrder.OnVehicleIdChanging Methode****C#**

```
private void OnVehicleIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnVehicleIdChanging, a member of class RegistrationOrder.

**1.1.56.3.19 RegistrationOrder.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class RegistrationOrder.

### 1.1.56.3.20 RegistrationOrder.SendPropertyChanging Methode

C#

```
protected virtual void SendPropertyChanging();
```

#### Anmerkungen

This is SendPropertyChanging, a member of class RegistrationOrder.

## 1.1.56.4 RegistrationOrder Eigenschaften

### 1.1.56.4.1 RegistrationOrder.EntityState Eigenschaft

C#

```
public EntityState EntityState;
```

#### Anmerkungen

This is EntityState, a member of class RegistrationOrder.

### 1.1.56.4.2 RegistrationOrder.eVBNumber Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_eVBNumber",  
DbType="VarChar(7)")]  
public string eVBNumber;
```

#### Anmerkungen

This is eVBNumber, a member of class RegistrationOrder.

### 1.1.56.4.3 RegistrationOrder.ItemId Eigenschaft

C#

```
public object ItemId;
```

#### Anmerkungen

This is ItemId, a member of class RegistrationOrder.

### 1.1.56.4.4 RegistrationOrder.Licencenumber Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Licencenumber",  
DbType="VarChar(15) NOT NULL")]  
public string Licencenumber;
```

#### Anmerkungen

This is Licencenumber, a member of class RegistrationOrder.

### 1.1.56.4.5 RegistrationOrder.LogDBContext Eigenschaft

C#

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDbContext, a member of class RegistrationOrder.

**1.1.56.4.6 RegistrationOrder.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Order_RegistrationOrder",
Storage="_Order", ThisKey="OrderId", OtherKey="Id", IsForeignKey=true)]
public Order Order;
```

**Anmerkungen**

This is Order, a member of class RegistrationOrder.

**1.1.56.4.7 RegistrationOrder.OrderId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderId",
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]
public System.Guid OrderId;
```

**Anmerkungen**

This is OrderId, a member of class RegistrationOrder.

**1.1.56.4.8 RegistrationOrder.PreviousLicencenumber Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PreviousLicencenumber",
DbType="VarChar(15)")]
public string PreviousLicencenumber;
```

**Anmerkungen**

This is PreviousLicencenumber, a member of class RegistrationOrder.

**1.1.56.4.9 RegistrationOrder.Registration Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Registration_RegistrationOrder",
Storage="_Registration", ThisKey="RegistrationId", OtherKey="Id", IsForeignKey=true)]
public Registration Registration;
```

**Anmerkungen**

This is Registration, a member of class RegistrationOrder.

**1.1.56.4.10 RegistrationOrder.RegistrationId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationId",
DbType="UniqueIdentifier NOT NULL")]
public System.Guid RegistrationId;
```

**Anmerkungen**

This is RegistrationId, a member of class RegistrationOrder.

### 1.1.56.4.11 RegistrationOrder.RegistrationOrderType Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RegistrationOrderType_Registrat  
ionOrder",  
Storage="_RegistrationOrderType", ThisKey="RegistrationOrderId", OtherKey="Id",  
IsForeignKey=true)]  
public RegistrationOrderType RegistrationOrderType;
```

#### Anmerkungen

This is RegistrationOrderType, a member of class RegistrationOrder.

### 1.1.56.4.12 RegistrationOrder.RegistrationOrderTypeId Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RegistrationOrderTypeId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid RegistrationOrderTypeId;
```

#### Anmerkungen

This is RegistrationOrderTypeId, a member of class RegistrationOrder.

### 1.1.56.4.13 RegistrationOrder.Vehicle Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Vehicle_RegistrationOrder",  
Storage="_Vehicle", ThisKey="VehicleId", OtherKey="Id", IsForeignKey=true)]  
public Vehicle Vehicle;
```

#### Anmerkungen

This is Vehicle, a member of class RegistrationOrder.

### 1.1.56.4.14 RegistrationOrder.VehicleId Eigenschaft

```
C#  
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VehicleId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid VehicleId;
```

#### Anmerkungen

This is VehicleId, a member of class RegistrationOrder.

## 1.1.56.5 RegistrationOrder Ereignisse

### 1.1.56.5.1 RegistrationOrder.PropertyChanged Ereignis

```
C#  
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class RegistrationOrder.

1.1.56.5.2 RegistrationOrder.PropertyChanging Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class RegistrationOrder.

1.1.57 RegistrationOrderType Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.RegistrationOrderType")]
public class RegistrationOrderType : INotifyPropertyChanging, INotifyPropertyChanged;
```

Datei

DataClasses1.designer.cs (🔗 see page 695)

Anmerkungen

This is class KVSCCommon.Database.RegistrationOrderType.

	Id (  see page 559)	This is Id, a member of class RegistrationOrderType.
	Name (  see page 559)	This is Name, a member of class RegistrationOrderType.
	Product (  see page 559)	This is Product, a member of class RegistrationOrderType.
	RegistrationOrder (  see page 559)	This is RegistrationOrder, a member of class RegistrationOrderType.

**RegistrationOrderType Ereignisse**

	Name	Beschreibung
	PropertyChanged (  see page 559)	This is PropertyChanged, a member of class RegistrationOrderType.
	PropertyChanging (  see page 560)	This is PropertyChanging, a member of class RegistrationOrderType.

**RegistrationOrderType Felder**

	Name	Beschreibung
	_Id (  see page 556)	This is _Id, a member of class RegistrationOrderType.
	_Name (  see page 556)	This is _Name, a member of class RegistrationOrderType.
	_Product (  see page 556)	This is _Product, a member of class RegistrationOrderType.
	_RegistrationOrder (  see page 556)	This is _RegistrationOrder, a member of class RegistrationOrderType.
	emptyChangingEventArgs (  see page 556)	This is emptyChangingEventArgs, a member of class RegistrationOrderType.

**RegistrationOrderType Methoden**

	Name	Beschreibung
	attach_Product (  see page 556)	This is attach_Product, a member of class RegistrationOrderType.
	attach_RegistrationOrder (  see page 557)	This is attach_RegistrationOrder, a member of class RegistrationOrderType.
	detach_Product (  see page 557)	This is detach_Product, a member of class RegistrationOrderType.
	detach_RegistrationOrder (  see page 557)	This is detach_RegistrationOrder, a member of class RegistrationOrderType.
	OnCreated (  see page 557)	This is OnCreated, a member of class RegistrationOrderType.
	OnIdChanged (  see page 557)	This is OnIdChanged, a member of class RegistrationOrderType.
	OnIdChanging (  see page 557)	This is OnIdChanging, a member of class RegistrationOrderType.
	OnLoaded (  see page 558)	This is OnLoaded, a member of class RegistrationOrderType.
	OnNameChanged (  see page 558)	This is OnNameChanged, a member of class RegistrationOrderType.
	OnNameChanging (  see page 558)	This is OnNameChanging, a member of class RegistrationOrderType.
	OnValidate (  see page 558)	This is OnValidate, a member of class RegistrationOrderType.
	SendPropertyChanged (  see page 558)	This is SendPropertyChanged, a member of class RegistrationOrderType.
	SendPropertyChanging (  see page 558)	This is SendPropertyChanging, a member of class RegistrationOrderType.

**1.1.57.1 RegistrationOrderType.RegistrationOrderType Konstruktor****C#**

```
public RegistrationOrderType();
```

**Anmerkungen**

This is RegistrationOrderType, a member of class RegistrationOrderType.

## 1.1.57.2 RegistrationOrderType Felder

### 1.1.57.2.1 RegistrationOrderType.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class RegistrationOrderType.

### 1.1.57.2.2 RegistrationOrderType.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class RegistrationOrderType.

### 1.1.57.2.3 RegistrationOrderType.\_Product Feld

**C#**

```
private EntitySet<Product> _Product;
```

**Anmerkungen**

This is \_Product, a member of class RegistrationOrderType.

### 1.1.57.2.4 RegistrationOrderType.\_RegistrationOrder Feld

**C#**

```
private EntitySet<RegistrationOrder> _RegistrationOrder;
```

**Anmerkungen**

This is \_RegistrationOrder, a member of class RegistrationOrderType.

### 1.1.57.2.5 RegistrationOrderType.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class RegistrationOrderType.

## 1.1.57.3 RegistrationOrderType Methoden

### 1.1.57.3.1 RegistrationOrderType.attach\_Product Methode

**C#**

```
private void attach_Product(Product entity);
```

**Anmerkungen**

This is attach\_Product, a member of class RegistrationOrderType.

**1.1.57.3.2 RegistrationOrderType.attach\_RegistrationOrder Methode****C#**

```
private void attach_RegistrationOrder(RegistrationOrder entity);
```

**Anmerkungen**

This is attach\_RegistrationOrder, a member of class RegistrationOrderType.

**1.1.57.3.3 RegistrationOrderType.detach\_Product Methode****C#**

```
private void detach_Product(Product entity);
```

**Anmerkungen**

This is detach\_Product, a member of class RegistrationOrderType.

**1.1.57.3.4 RegistrationOrderType.detach\_RegistrationOrder Methode****C#**

```
private void detach_RegistrationOrder(RegistrationOrder entity);
```

**Anmerkungen**

This is detach\_RegistrationOrder, a member of class RegistrationOrderType.

**1.1.57.3.5 RegistrationOrderType.OnCreated Methode****C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class RegistrationOrderType.

**1.1.57.3.6 RegistrationOrderType.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class RegistrationOrderType.

**1.1.57.3.7 RegistrationOrderType.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class RegistrationOrderType.

### 1.1.57.3.8 RegistrationOrderType.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class RegistrationOrderType.

### 1.1.57.3.9 RegistrationOrderType.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class RegistrationOrderType.

### 1.1.57.3.10 RegistrationOrderType.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class RegistrationOrderType.

### 1.1.57.3.11 RegistrationOrderType.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class RegistrationOrderType.

### 1.1.57.3.12 RegistrationOrderType.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class RegistrationOrderType.

### 1.1.57.3.13 RegistrationOrderType.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class RegistrationOrderType.

## 1.1.57.4 RegistrationOrderType Eigenschaften

### 1.1.57.4.1 RegistrationOrderType.Id Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

#### Anmerkungen

This is Id, a member of class RegistrationOrderType.

### 1.1.57.4.2 RegistrationOrderType.Name Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

#### Anmerkungen

This is Name, a member of class RegistrationOrderType.

### 1.1.57.4.3 RegistrationOrderType.Product Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RegistrationOrderType_Product",  
Storage="_Product", ThisKey="Id", OtherKey="RegistrationOrderId")]  
public EntitySet<Product> Product;
```

#### Anmerkungen

This is Product, a member of class RegistrationOrderType.

### 1.1.57.4.4 RegistrationOrderType.RegistrationOrder Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RegistrationOrderType_Registrat  
ionOrder",  
Storage="_RegistrationOrder", ThisKey="Id", OtherKey="RegistrationOrderId")]  
public EntitySet<RegistrationOrder> RegistrationOrder;
```

#### Anmerkungen

This is RegistrationOrder, a member of class RegistrationOrderType.

## 1.1.57.5 RegistrationOrderType Ereignisse

### 1.1.57.5.1 RegistrationOrderType.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

#### Anmerkungen

This is PropertyChanged, a member of class RegistrationOrderType.

## 1.1.57.5.2 RegistrationOrderType.PropertyChanging Ereignis

### C#

```
public event PropertyChangedEventHandler PropertyChanging;
```

### Anmerkungen

This is PropertyChanging, a member of class RegistrationOrderType.

## 1.1.58 RequiredField Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.RequiredField")]
public class RequiredField : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([see page 695](#))

### Anmerkungen

This is class KVSCCommon.Database.RequiredField.

### Mitglieder

#### Methoden

	Name	Beschreibung
	RequiredField ( <a href="#">see page 562</a> )	This is RequiredField, a member of class RequiredField.

#### RequiredField Felder

	Name	Beschreibung
	_Id ( <a href="#">see page 562</a> )	This is _Id, a member of class RequiredField.

## 1.1.58.1 RequiredField.RequiredField Konstruktor

**C#**

```
public RequiredField();
```

**Anmerkungen**

This is RequiredField, a member of class RequiredField.

## 1.1.58.2 RequiredField Felder

### 1.1.58.2.1 RequiredField.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class RequiredField.

### 1.1.58.2.2 RequiredField.\_LargeCustomerRequiredField Feld

**C#**

```
private EntitySet<LargeCustomerRequiredField> _LargeCustomerRequiredField;
```

**Anmerkungen**

This is \_LargeCustomerRequiredField, a member of class RequiredField.

### 1.1.58.2.3 RequiredField.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class RequiredField.

### 1.1.58.2.4 RequiredField.\_OrderType Feld

**C#**

```
private EntityRef<OrderType> _OrderType;
```

**Anmerkungen**

This is \_OrderType, a member of class RequiredField.

### 1.1.58.2.5 RequiredField.\_OrderTypeId Feld

**C#**

```
private System.Guid _OrderTypeId;
```

**Anmerkungen**

This is \_OrderTypeId, a member of class RequiredField.

### 1.1.58.2.6 RequiredField.\_RequiredFieldTranslation Feld

**C#**

```
private EntityRef<RequiredFieldTranslation> _RequiredFieldTranslation;
```

**Anmerkungen**

This is \_RequiredFieldTranslation, a member of class RequiredField.

### 1.1.58.2.7 RequiredField.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class RequiredField.

## 1.1.58.3 RequiredField Methoden

### 1.1.58.3.1 RequiredField.attach\_LargeCustomerRequiredField Methode

**C#**

```
private void attach_LargeCustomerRequiredField(LargeCustomerRequiredField entity);
```

**Anmerkungen**

This is attach\_LargeCustomerRequiredField, a member of class RequiredField.

### 1.1.58.3.2 RequiredField.detach\_LargeCustomerRequiredField Methode

**C#**

```
private void detach_LargeCustomerRequiredField(LargeCustomerRequiredField entity);
```

**Anmerkungen**

This is detach\_LargeCustomerRequiredField, a member of class RequiredField.

### 1.1.58.3.3 RequiredField.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class RequiredField.

### 1.1.58.3.4 RequiredField.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class RequiredField.

### 1.1.58.3.5 RequiredField.OnIdChanging Methode

**C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class RequiredField.

### 1.1.58.3.6 RequiredField.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class RequiredField.

### 1.1.58.3.7 RequiredField.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class RequiredField.

### 1.1.58.3.8 RequiredField.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class RequiredField.

### 1.1.58.3.9 RequiredField.OnOrderTypeIdChanged Methode

**C#**

```
private void OnOrderTypeIdChanged();
```

**Anmerkungen**

This is OnOrderTypeIdChanged, a member of class RequiredField.

### 1.1.58.3.10 RequiredField.OnOrderTypeIdChanging Methode

**C#**

```
private void OnOrderTypeIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnOrderTypeIdChanging, a member of class RequiredField.

### 1.1.58.3.11 RequiredField.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class RequiredField.

**1.1.58.3.12 RequiredField.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class RequiredField.

**1.1.58.3.13 RequiredField.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class RequiredField.

**1.1.58.4 RequiredField Eigenschaften****1.1.58.4.1 RequiredField.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class RequiredField.

**1.1.58.4.2 RequiredField.LargeCustomerRequiredField Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RequiredField_LargeCustomerRequiredField",  
Storage="_LargeCustomerRequiredField", ThisKey="Id", OtherKey="RequiredFieldId")]  
public EntitySet<LargeCustomerRequiredField> LargeCustomerRequiredField;
```

**Anmerkungen**

This is LargeCustomerRequiredField, a member of class RequiredField.

**1.1.58.4.3 RequiredField.Name Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(50) NOT NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class RequiredField.

#### 1.1.58.4.4 RequiredField.OrderType Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="OrderType_RequiredField",  
Storage="_OrderType", ThisKey="OrderTypeId", OtherKey="Id", IsForeignKey=true)]  
public OrderType OrderType;
```

**Anmerkungen**

This is OrderType, a member of class RequiredField.

#### 1.1.58.4.5 RequiredField.OrderTypeId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_OrderTypeId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid OrderTypeId;
```

**Anmerkungen**

This is OrderTypeId, a member of class RequiredField.

#### 1.1.58.4.6 RequiredField.RequiredFieldTranslation Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RequiredFieldTranslation_RequiredField",  
Storage="_RequiredFieldTranslation", ThisKey="Id", OtherKey="RequiredFieldId",  
IsForeignKey=true, DeleteOnNull=true, DeleteRule="CASCADE")]  
public RequiredFieldTranslation RequiredFieldTranslation;
```

**Anmerkungen**

This is RequiredFieldTranslation, a member of class RequiredField.

### 1.1.58.5 RequiredField Ereignisse

#### 1.1.58.5.1 RequiredField.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class RequiredField.

#### 1.1.58.5.2 RequiredField.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class RequiredField.

## 1.1.59 RequiredFieldTranslation Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.RequiredFieldTranslation")]
public class RequiredFieldTranslation : INotifyPropertyChanging, INotifyPropertyChanged;
```

### Datei

DataClasses1.designer.cs ([🔗](#) see page 695)

### Anmerkungen

This is class KVSCCommon.Database.RequiredFieldTranslation.

### Mitglieder

#### Methoden

	Name	Beschreibung
	RequiredFieldTranslation ( <a href="#">🔗</a> see page 568)	This is RequiredFieldTranslation, a member of class RequiredFieldTranslation.

**RequiredFieldTranslation Felder**

	Name	Beschreibung
	_Name ( <a href="#">see page 568</a> )	This is _Name, a member of class RequiredFieldTranslation.
	_RequiredField ( <a href="#">see page 569</a> )	This is _RequiredField, a member of class RequiredFieldTranslation.
	_RequiredFieldId ( <a href="#">see page 569</a> )	This is _RequiredFieldId, a member of class RequiredFieldTranslation.
	emptyChangingEventArgs ( <a href="#">see page 569</a> )	This is emptyChangingEventArgs, a member of class RequiredFieldTranslation.

**RequiredFieldTranslation Methoden**

	Name	Beschreibung
	OnCreated ( <a href="#">see page 569</a> )	This is OnCreated, a member of class RequiredFieldTranslation.
	OnLoaded ( <a href="#">see page 569</a> )	This is OnLoaded, a member of class RequiredFieldTranslation.
	OnNameChanged ( <a href="#">see page 569</a> )	This is OnNameChanged, a member of class RequiredFieldTranslation.
	OnNameChanging ( <a href="#">see page 570</a> )	This is OnNameChanging, a member of class RequiredFieldTranslation.
	OnRequiredFieldIdChanged ( <a href="#">see page 570</a> )	This is OnRequiredFieldIdChanged, a member of class RequiredFieldTranslation.
	OnRequiredFieldIdChanging ( <a href="#">see page 570</a> )	This is OnRequiredFieldIdChanging, a member of class RequiredFieldTranslation.
	OnValidate ( <a href="#">see page 570</a> )	This is OnValidate, a member of class RequiredFieldTranslation.
	SendPropertyChanged ( <a href="#">see page 570</a> )	This is SendPropertyChanged, a member of class RequiredFieldTranslation.
	SendPropertyChanging ( <a href="#">see page 570</a> )	This is SendPropertyChanging, a member of class RequiredFieldTranslation.

## 1.1.59.1 RequiredFieldTranslation.RequiredFieldTranslation Konstruktor

**C#**

```
public RequiredFieldTranslation();
```

**Anmerkungen**

This is RequiredFieldTranslation, a member of class RequiredFieldTranslation.

## 1.1.59.2 RequiredFieldTranslation Felder

### 1.1.59.2.1 RequiredFieldTranslation.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class RequiredFieldTranslation.

### 1.1.59.2.2 RequiredFieldTranslation.\_RequiredField Feld

**C#**

```
private EntityRef<RequiredField> _RequiredField;
```

**Anmerkungen**

This is \_RequiredField, a member of class RequiredFieldTranslation.

### 1.1.59.2.3 RequiredFieldTranslation.\_RequiredFieldId Feld

**C#**

```
private System.Guid _RequiredFieldId;
```

**Anmerkungen**

This is \_RequiredFieldId, a member of class RequiredFieldTranslation.

### 1.1.59.2.4 RequiredFieldTranslation.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class RequiredFieldTranslation.

## 1.1.59.3 RequiredFieldTranslation Methoden

### 1.1.59.3.1 RequiredFieldTranslation.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class RequiredFieldTranslation.

### 1.1.59.3.2 RequiredFieldTranslation.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class RequiredFieldTranslation.

### 1.1.59.3.3 RequiredFieldTranslation.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class RequiredFieldTranslation.

### 1.1.59.3.4 RequiredFieldTranslation.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class RequiredFieldTranslation.

### 1.1.59.3.5 RequiredFieldTranslation.OnRequiredFieldIdChanged Methode

**C#**

```
private void OnRequiredFieldIdChanged();
```

**Anmerkungen**

This is OnRequiredFieldIdChanged, a member of class RequiredFieldTranslation.

### 1.1.59.3.6 RequiredFieldTranslation.OnRequiredFieldIdChanging Methode

**C#**

```
private void OnRequiredFieldIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnRequiredFieldIdChanging, a member of class RequiredFieldTranslation.

### 1.1.59.3.7 RequiredFieldTranslation.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class RequiredFieldTranslation.

### 1.1.59.3.8 RequiredFieldTranslation.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class RequiredFieldTranslation.

### 1.1.59.3.9 RequiredFieldTranslation.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class RequiredFieldTranslation.

## 1.1.59.4 RequiredFieldTranslation Eigenschaften

### 1.1.59.4.1 RequiredFieldTranslation.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(255) NOT NULL", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class RequiredFieldTranslation.

### 1.1.59.4.2 RequiredFieldTranslation.RequiredField Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="RequiredFieldTranslation_RequiredField",  
Storage="_RequiredField", ThisKey="RequiredFieldId", OtherKey="Id", IsUnique=true,  
IsForeignKey=false)]  
public RequiredField RequiredField;
```

**Anmerkungen**

This is RequiredField, a member of class RequiredFieldTranslation.

### 1.1.59.4.3 RequiredFieldTranslation.RequiredFieldId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_RequiredFieldId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid RequiredFieldId;
```

**Anmerkungen**

This is RequiredFieldId, a member of class RequiredFieldTranslation.

## 1.1.59.5 RequiredFieldTranslation Ereignisse

### 1.1.59.5.1 RequiredFieldTranslation.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class RequiredFieldTranslation.

### 1.1.59.5.2 RequiredFieldTranslation.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class RequiredFieldTranslation.

## 1.1.60 SmallCustomer Klasse

Erweiterungsklasse fuer die DB Tabelle SmallCustomer

### Klassen Hierarchie

### C#

```
public class SmallCustomer : ILogging;
```

### Datei

SmallCustomer.cs (🔗 see page 704)

### Mitglieder

#### ILogging Eigenschaften

	Name	Beschreibung
📄	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
📄	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
📄	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

#### SmallCustomer Klasse

	Name	Beschreibung
📄	BankAccount (🔗 see page 578)	This is BankAccount, a member of class SmallCustomer.
📄	BankAccountId (🔗 see page 578)	This is BankAccountId, a member of class SmallCustomer.
📄	Customer (🔗 see page 578)	This is Customer, a member of class SmallCustomer.
📄	CustomerId (🔗 see page 578)	This is CustomerId, a member of class SmallCustomer.
📄	EntityState (🔗 see page 578)	This is EntityState, a member of class SmallCustomer.
📄	ItemId (🔗 see page 579)	This is ItemId, a member of class SmallCustomer.
📄	LogDbContext (🔗 see page 579)	This is LogDbContext, a member of class SmallCustomer.
📄	Person (🔗 see page 579)	This is Person, a member of class SmallCustomer.
📄	PersonId (🔗 see page 579)	This is PersonId, a member of class SmallCustomer.

### Methoden

#### SmallCustomer Klasse

	Name	Beschreibung
📄	SmallCustomer (🔗 see page 574)	This is SmallCustomer, a member of class SmallCustomer.

### SmallCustomer Felder

#### SmallCustomer Klasse

	Name	Beschreibung
📄	_BankAccount (🔗 see page 574)	This is _BankAccount, a member of class SmallCustomer.
📄	_BankAccountId (🔗 see page 574)	This is _BankAccountId, a member of class SmallCustomer.
📄	_Customer (🔗 see page 574)	This is _Customer, a member of class SmallCustomer.
📄	_CustomerId (🔗 see page 574)	This is _CustomerId, a member of class SmallCustomer.
📄	_Person (🔗 see page 575)	This is _Person, a member of class SmallCustomer.
📄	_PersonId (🔗 see page 575)	This is _PersonId, a member of class SmallCustomer.
📄	emptyChangingEventArgs (🔗 see page 575)	This is emptyChangingEventArgs, a member of class SmallCustomer.

### SmallCustomer Methoden

#### SmallCustomer Klasse

	Name	Beschreibung
📄	CreateSmallCustomer (🔗 see page 575)	Erstellt einen Laufkunden.
📄	OnBankAccountIdChanged (🔗 see page 576)	This is OnBankAccountIdChanged, a member of class SmallCustomer.
📄	OnBankAccountIdChanging (🔗 see page 576)	This is OnBankAccountIdChanging, a member of class SmallCustomer.

	OnCreated ( <a href="#">↗</a> see page 576)	Aenderungsevents f��r die Historie
	OnCustomerIdChanged ( <a href="#">↗</a> see page 576)	This is OnCustomerIdChanged, a member of class SmallCustomer.

## 1.1.60.1 SmallCustomer.SmallCustomer Konstruktor

**C#**

```
public SmallCustomer();
```

**Anmerkungen**

This is SmallCustomer, a member of class SmallCustomer.

## 1.1.60.2 SmallCustomer Felder

### 1.1.60.2.1 SmallCustomer.\_BankAccount Feld

**C#**

```
private EntityRef<BankAccount> _BankAccount;
```

**Anmerkungen**

This is \_BankAccount, a member of class SmallCustomer.

### 1.1.60.2.2 SmallCustomer.\_BankAccountId Feld

**C#**

```
private System.Nullable<System.Guid> _BankAccountId;
```

**Anmerkungen**

This is \_BankAccountId, a member of class SmallCustomer.

### 1.1.60.2.3 SmallCustomer.\_Customer Feld

**C#**

```
private EntityRef<Customer> _Customer;
```

**Anmerkungen**

This is \_Customer, a member of class SmallCustomer.

### 1.1.60.2.4 SmallCustomer.\_CustomerId Feld

**C#**

```
private System.Guid _CustomerId;
```

## Anmerkungen

This is \_CustomerId, a member of class SmallCustomer.

### 1.1.60.2.5 SmallCustomer.\_Person Feld

#### C#

```
private EntityRef<Person> _Person;
```

## Anmerkungen

This is \_Person, a member of class SmallCustomer.

### 1.1.60.2.6 SmallCustomer.\_PersonId Feld

#### C#

```
private System.Guid _PersonId;
```

## Anmerkungen

This is \_PersonId, a member of class SmallCustomer.

### 1.1.60.2.7 SmallCustomer.emptyChangingEventArgs Feld

#### C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

## Anmerkungen

This is emptyChangingEventArgs, a member of class SmallCustomer.

## 1.1.60.3 SmallCustomer Methoden

### 1.1.60.3.1 SmallCustomer.CreateSmallCustomer Methode

Erstellt einen Laufkunden.

#### C#

```
public static SmallCustomer CreateSmallCustomer(string name, string firstName, string  
title, string gender, string street, string streetnumber, string zipcode, string city,  
string country, string phone, string fax, string mobilephone, string email, decimal vat,  
int? termOfCredit, string customerNumber, DataClasses1DataContext dbContext);
```

## Parameter

Parameter	Beschreibung
string name	Name des Kunden.
string firstName	Vorname des Kunden.
string title	Anrede.
string gender	Geschlecht.
string street	Stra�e.
string streetnumber	Hausnummer.
string zipcode	Postleitzahl.
string city	Stra�e.
string country	Land.
string phone	Telefonnummer.
string fax	Faxnummer.
string mobilephone	Mobiltelefonnummer.

string email	Emailadresse.
decimal vat	Mehrwertsteuersatz fÃ¼r den Kunden.
int? termOfCredit	Zahlungsziel (in Tagen).
string customerNumber	Kundennummer.
DataClasses1DataContext dbContext	Datenbankkontext fÃ¼r die Transaktion.

**Resultate**

Den neuen Laufkunden.

### 1.1.60.3.2 SmallCustomer.OnBankAccountIdChanged Methode

**C#**

```
private void OnBankAccountIdChanged();
```

**Anmerkungen**

This is OnBankAccountIdChanged, a member of class SmallCustomer.

### 1.1.60.3.3 SmallCustomer.OnBankAccountIdChanging Methode

**C#**

```
private void OnBankAccountIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnBankAccountIdChanging, a member of class SmallCustomer.

### 1.1.60.3.4 SmallCustomer.OnCreated Methode

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnCreated();
```

### 1.1.60.3.5 SmallCustomer.OnCustomerIdChanged Methode

**C#**

```
private void OnCustomerIdChanged();
```

**Anmerkungen**

This is OnCustomerIdChanged, a member of class SmallCustomer.

### 1.1.60.3.6 SmallCustomer.OnCustomerIdChanging Methode

**C#**

```
private void OnCustomerIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnCustomerIdChanging, a member of class SmallCustomer.

### 1.1.60.3.7 SmallCustomer.OnLoaded Methode

Aenderungsevents fÃ¼r die Historie

**C#**

```
private void OnLoaded();
```

### 1.1.60.3.8 SmallCustomer.OnPersonIdChanged Methode

**C#**

```
private void OnPersonIdChanged();
```

**Anmerkungen**

This is OnPersonIdChanged, a member of class SmallCustomer.

### 1.1.60.3.9 SmallCustomer.OnPersonIdChanging Methode

**C#**

```
private void OnPersonIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPersonIdChanging, a member of class SmallCustomer.

### 1.1.60.3.10 SmallCustomer.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class SmallCustomer.

### 1.1.60.3.11 SmallCustomer.RemoveSmallCutomer Methode

Loescht einen Laufkunden, aber nur wenn der Kunde mit keinen Auftraegen und Rechnungen verknuepft ist

**C#**

```
public static void RemoveSmallCutomer(DataClasses1DataContext dbContext, Guid smallCustomerId);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Guid smallCustomerId	Laufkunden ID

### 1.1.60.3.12 SmallCustomer.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class SmallCustomer.

### 1.1.60.3.13 SmallCustomer.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class SmallCustomer.

## 1.1.60.4 SmallCustomer Eigenschaften

### 1.1.60.4.1 SmallCustomer.BankAccount Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="BankAccount_SmallCustomer",
Storage="_BankAccount", ThisKey="BankAccountId", OtherKey="Id", IsForeignKey=true)]
public BankAccount BankAccount;
```

**Anmerkungen**

This is BankAccount, a member of class SmallCustomer.

### 1.1.60.4.2 SmallCustomer.BankAccountId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_BankAccountId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> BankAccountId;
```

**Anmerkungen**

This is BankAccountId, a member of class SmallCustomer.

### 1.1.60.4.3 SmallCustomer.Customer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_SmallCustomer",
Storage="_Customer", ThisKey="CustomerId", OtherKey="Id", IsForeignKey=true)]
public Customer Customer;
```

**Anmerkungen**

This is Customer, a member of class SmallCustomer.

### 1.1.60.4.4 SmallCustomer.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]
public System.Guid CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class SmallCustomer.

### 1.1.60.4.5 SmallCustomer.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class SmallCustomer.

### 1.1.60.4.6 SmallCustomer.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class SmallCustomer.

### 1.1.60.4.7 SmallCustomer.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class SmallCustomer.

### 1.1.60.4.8 SmallCustomer.Person Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Person_SmallCustomer",  
Storage="_Person", ThisKey="PersonId", OtherKey="Id", IsForeignKey=true)]  
public Person Person;
```

**Anmerkungen**

This is Person, a member of class SmallCustomer.

### 1.1.60.4.9 SmallCustomer.PersonId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PersonId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid PersonId;
```

**Anmerkungen**

This is PersonId, a member of class SmallCustomer.

## 1.1.60.5 SmallCustomer Ereignisse

### 1.1.60.5.1 SmallCustomer.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class SmallCustomer.

### 1.1.60.5.2 SmallCustomer.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class SmallCustomer.

## 1.1.61 Systemlog Klasse

**Klassen Hierarchie****C#**

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.[Systemlog]")]
public class Systemlog : INotifyPropertyChanging, INotifyPropertyChanged;
```

**Datei**

DataClasses1.designer.cs ([↗](#) see page 695)

**Anmerkungen**

This is class KVSCCommon.Database.Systemlog.

**Mitglieder****Methoden**

	Name	Beschreibung
	Systemlog ( <a href="#">↗</a> see page 582)	This is Systemlog, a member of class Systemlog.

	OnExceptionChanged (  see page 585)	This is OnExceptionChanged, a member of class Systemlog.
	OnExceptionChanging (  see page 585)	This is OnExceptionChanging, a member of class Systemlog.
	OnIdChanged (  see page 586)	This is OnIdChanged, a member of class Systemlog.
	OnIdChanging (  see page 586)	This is OnIdChanging, a member of class Systemlog.
	OnLoaded (  see page 586)	This is OnLoaded, a member of class Systemlog.
	OnLogTypeldChanged (  see page 586)	This is OnLogTypeldChanged, a member of class Systemlog.
	OnLogTypeldChanging (  see page 586)	This is OnLogTypeldChanging, a member of class Systemlog.
	OnLogUserIdChanged (  see page 586)	This is OnLogUserIdChanged, a member of class Systemlog.
	OnLogUserIdChanging (  see page 587)	This is OnLogUserIdChanging, a member of class Systemlog.
	OnReferenceldChanged (  see page 587)	This is OnReferenceldChanged, a member of class Systemlog.
	OnReferenceldChanging (  see page 587)	This is OnReferenceldChanging, a member of class Systemlog.
	OnTableNameChanged (  see page 587)	This is OnTableNameChanged, a member of class Systemlog.
	OnTableNameChanging (  see page 587)	This is OnTableNameChanging, a member of class Systemlog.
	OnTablePropertyChanged (  see page 587)	This is OnTablePropertyChanged, a member of class Systemlog.
	OnTablePropertyChanging (  see page 587)	This is OnTablePropertyChanging, a member of class Systemlog.
	OnTextChanged (  see page 588)	This is OnTextChanged, a member of class Systemlog.
	OnTextChanging (  see page 588)	This is OnTextChanging, a member of class Systemlog.
	OnValidate (  see page 588)	This is OnValidate, a member of class Systemlog.
 	SendPropertyChanged (  see page 588)	This is SendPropertyChanged, a member of class Systemlog.
 	SendPropertyChanging (  see page 588)	This is SendPropertyChanging, a member of class Systemlog.

## 1.1.61.1 Systemlog.Systemlog Konstruktor

C#

```
public Systemlog();
```

### Anmerkungen

This is Systemlog, a member of class Systemlog.

## 1.1.61.2 Systemlog Felder

### 1.1.61.2.1 Systemlog.\_ChildReferenceld Feld

C#

```
private System.Nullable<System.Guid> _ChildReferenceId;
```

**Anmerkungen**

This is \_ChildReferenceId, a member of class Systemlog.

**1.1.61.2.2 Systemlog.\_Date Feld****C#**

```
private System.DateTime _Date;
```

**Anmerkungen**

This is \_Date, a member of class Systemlog.

**1.1.61.2.3 Systemlog.\_Exception Feld****C#**

```
private string _Exception;
```

**Anmerkungen**

This is \_Exception, a member of class Systemlog.

**1.1.61.2.4 Systemlog.\_Id Feld****C#**

```
private long _Id;
```

**Anmerkungen**

This is \_Id, a member of class Systemlog.

**1.1.61.2.5 Systemlog.\_LogType Feld****C#**

```
private EntityRef<LogType> _LogType;
```

**Anmerkungen**

This is \_LogType, a member of class Systemlog.

**1.1.61.2.6 Systemlog.\_LogTypeId Feld****C#**

```
private int _LogTypeId;
```

**Anmerkungen**

This is \_LogTypeId, a member of class Systemlog.

**1.1.61.2.7 Systemlog.\_LogUserId Feld****C#**

```
private System.Guid _LogUserId;
```

**Anmerkungen**

This is \_LogUserId, a member of class Systemlog.

### 1.1.61.2.8 Systemlog.\_ReferenceId Feld

**C#**

```
private System.Nullable<System.Guid> _ReferenceId;
```

**Anmerkungen**

This is \_ReferenceId, a member of class Systemlog.

### 1.1.61.2.9 Systemlog.\_TableName Feld

**C#**

```
private string _TableName;
```

**Anmerkungen**

This is \_TableName, a member of class Systemlog.

### 1.1.61.2.10 Systemlog.\_TableProperty Feld

**C#**

```
private string _TableProperty;
```

**Anmerkungen**

This is \_TableProperty, a member of class Systemlog.

### 1.1.61.2.11 Systemlog.\_Text Feld

**C#**

```
private string _Text;
```

**Anmerkungen**

This is \_Text, a member of class Systemlog.

### 1.1.61.2.12 Systemlog.\_User Feld

**C#**

```
private EntityRef<User> _User;
```

**Anmerkungen**

This is \_User, a member of class Systemlog.

### 1.1.61.2.13 Systemlog.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class Systemlog.

## 1.1.61.3 Systemlog Methoden

### 1.1.61.3.1 Systemlog.OnChildReferenceIdChanged Methode

**C#**

```
private void OnChildReferenceIdChanged();
```

**Anmerkungen**

This is OnChildReferenceIdChanged, a member of class Systemlog.

### 1.1.61.3.2 Systemlog.OnChildReferenceIdChanging Methode

**C#**

```
private void OnChildReferenceIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnChildReferenceIdChanging, a member of class Systemlog.

### 1.1.61.3.3 Systemlog.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class Systemlog.

### 1.1.61.3.4 Systemlog.OnDateChanged Methode

**C#**

```
private void OnDateChanged();
```

**Anmerkungen**

This is OnDateChanged, a member of class Systemlog.

### 1.1.61.3.5 Systemlog.OnDateChanging Methode

**C#**

```
private void OnDateChanging(System.DateTime value);
```

**Anmerkungen**

This is OnDateChanging, a member of class Systemlog.

### 1.1.61.3.6 Systemlog.OnExceptionChanged Methode

**C#**

```
private void OnExceptionChanged();
```

**Anmerkungen**

This is OnExceptionChanged, a member of class Systemlog.

### 1.1.61.3.7 Systemlog.OnExceptionChanging Methode

**C#**

```
private void OnExceptionChanging(string value);
```

**Anmerkungen**

This is OnExceptionChanging, a member of class Systemlog.

**1.1.61.3.8 Systemlog.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class Systemlog.

**1.1.61.3.9 Systemlog.OnIdChanging Methode****C#**

```
private void OnIdChanging(long value);
```

**Anmerkungen**

This is OnIdChanging, a member of class Systemlog.

**1.1.61.3.10 Systemlog.OnLoaded Methode****C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class Systemlog.

**1.1.61.3.11 Systemlog.OnLogTypeIdChanged Methode****C#**

```
private void OnLogTypeIdChanged();
```

**Anmerkungen**

This is OnLogTypeIdChanged, a member of class Systemlog.

**1.1.61.3.12 Systemlog.OnLogTypeIdChanging Methode****C#**

```
private void OnLogTypeIdChanging(int value);
```

**Anmerkungen**

This is OnLogTypeIdChanging, a member of class Systemlog.

**1.1.61.3.13 Systemlog.OnLogUserIdChanged Methode****C#**

```
private void OnLogUserIdChanged();
```

**Anmerkungen**

This is OnLogUserIdChanged, a member of class Systemlog.

### 1.1.61.3.14 Systemlog.OnLogUserIdChanging Methode

**C#**

```
private void OnLogUserIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnLogUserIdChanging, a member of class Systemlog.

### 1.1.61.3.15 Systemlog.OnReferenceIdChanged Methode

**C#**

```
private void OnReferenceIdChanged();
```

**Anmerkungen**

This is OnReferenceIdChanged, a member of class Systemlog.

### 1.1.61.3.16 Systemlog.OnReferenceIdChanging Methode

**C#**

```
private void OnReferenceIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnReferenceIdChanging, a member of class Systemlog.

### 1.1.61.3.17 Systemlog.OnTableNameChanged Methode

**C#**

```
private void OnTableNameChanged();
```

**Anmerkungen**

This is OnTableNameChanged, a member of class Systemlog.

### 1.1.61.3.18 Systemlog.OnTableNameChanging Methode

**C#**

```
private void OnTableNameChanging(string value);
```

**Anmerkungen**

This is OnTableNameChanging, a member of class Systemlog.

### 1.1.61.3.19 Systemlog.OnTablePropertyChanged Methode

**C#**

```
private void OnTablePropertyChanged();
```

**Anmerkungen**

This is OnTablePropertyChanged, a member of class Systemlog.

### 1.1.61.3.20 Systemlog.OnTablePropertyChanging Methode

**C#**

```
private void OnTablePropertyChanging(string value);
```

**Anmerkungen**

This is OnTablePropertyChanging, a member of class Systemlog.

**1.1.61.3.21 Systemlog.OnTextChanged Methode****C#**

```
private void OnTextChanged();
```

**Anmerkungen**

This is OnTextChanged, a member of class Systemlog.

**1.1.61.3.22 Systemlog.OnTextChanging Methode****C#**

```
private void OnTextChanging(string value);
```

**Anmerkungen**

This is OnTextChanging, a member of class Systemlog.

**1.1.61.3.23 Systemlog.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Systemlog.

**1.1.61.3.24 Systemlog.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Systemlog.

**1.1.61.3.25 Systemlog.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Systemlog.

**1.1.61.4 Systemlog Eigenschaften****1.1.61.4.1 Systemlog.ChildReferenceId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ChildReferenceId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> ChildReferenceId;
```

**Anmerkungen**

This is ChildReferenceId, a member of class Systemlog.

**1.1.61.4.2 Systemlog.Date Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Date", DbType="DateTime NOT NULL")]  
public System.DateTime Date;
```

**Anmerkungen**

This is Date, a member of class Systemlog.

**1.1.61.4.3 Systemlog.Exception Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Exception",  
DbType="VarChar(MAX)")]  
public string Exception;
```

**Anmerkungen**

This is Exception, a member of class Systemlog.

**1.1.61.4.4 Systemlog.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id",  
AutoSync=AutoSync.OnInsert, DbType="BigInt NOT NULL IDENTITY", IsPrimaryKey=true,  
IsDbGenerated=true)]  
public long Id;
```

**Anmerkungen**

This is Id, a member of class Systemlog.

**1.1.61.4.5 Systemlog.LogType Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="LogType_Systemlog",  
Storage="_LogType", ThisKey="LogTypeId", OtherKey="Id", IsForeignKey=true)]  
public LogType LogType;
```

**Anmerkungen**

This is LogType, a member of class Systemlog.

**1.1.61.4.6 Systemlog.LogTypeld Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LogTypeId", DbType="Int NOT NULL")]  
public int LogTypeId;
```

**Anmerkungen**

This is LogTypeld, a member of class Systemlog.

### 1.1.61.4.7 Systemlog.LogUserId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LogUserId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid LogUserId;
```

#### Anmerkungen

This is LogUserId, a member of class Systemlog.

### 1.1.61.4.8 Systemlog.ReferenceId Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ReferenceId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> ReferenceId;
```

#### Anmerkungen

This is ReferenceId, a member of class Systemlog.

### 1.1.61.4.9 Systemlog.TableName Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TableName",  
DbType="VarChar(50)")]  
public string TableName;
```

#### Anmerkungen

This is TableName, a member of class Systemlog.

### 1.1.61.4.10 Systemlog.TableProperty Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TableProperty",  
DbType="VarChar(50)")]  
public string TableProperty;
```

#### Anmerkungen

This is TableProperty, a member of class Systemlog.

### 1.1.61.4.11 Systemlog.Text Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Text", DbType="VarChar(MAX)")]  
public string Text;
```

#### Anmerkungen

This is Text, a member of class Systemlog.

### 1.1.61.4.12 Systemlog.User Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_Systemlog",  
Storage="_User", ThisKey="LogUserId", OtherKey="Id", IsForeignKey=true)]  
public User User;
```

Anmerkungen

This is User, a member of class Systemlog.

1.1.61.5 Systemlog Ereignisse

1.1.61.5.1 Systemlog.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class Systemlog.

1.1.61.5.2 Systemlog.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class Systemlog.

1.1.62 temp\_Customers2 Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.temp_Customers2")]
public class temp_Customers2;
```

Datei

DataClasses1.designer.cs (see page 695)

Anmerkungen

This is class KVSCCommon.Database.temp\_Customers2.

## 1.1.62.1 temp\_Customers2.temp\_Customers2 Konstruktor

**C#**

```
public temp_Customers2();
```

**Anmerkungen**

This is temp\_Customers2, a member of class temp\_Customers2.

## 1.1.62.2 temp\_Customers2 Felder

### 1.1.62.2.1 temp\_Customers2.\_Anrede Feld

**C#**

```
private string _Anrede;
```

**Anmerkungen**

This is \_Anrede, a member of class temp\_Customers2.

### 1.1.62.2.2 temp\_Customers2.\_Ansprechpartner Feld

**C#**

```
private string _Ansprechpartner;
```

**Anmerkungen**

This is \_Ansprechpartner, a member of class temp\_Customers2.

### 1.1.62.2.3 temp\_Customers2.\_Debitorenkonto Feld

**C#**

```
private string _Debitorenkonto;
```

**Anmerkungen**

This is \_Debitorenkonto, a member of class temp\_Customers2.

### 1.1.62.2.4 temp\_Customers2.\_EMAIL Feld

**C#**

```
private string _EMAIL;
```

**Anmerkungen**

This is \_EMAIL, a member of class temp\_Customers2.

### 1.1.62.2.5 temp\_Customers2.\_Firma Feld

**C#**

```
private string _Firma;
```

**Anmerkungen**

This is \_Firma, a member of class temp\_Customers2.

### 1.1.62.2.6 temp\_Customers2.\_Hausnummer Feld

**C#**

```
private string _Hausnummer;
```

**Anmerkungen**

This is \_Hausnummer, a member of class temp\_Customers2.

### 1.1.62.2.7 temp\_Customers2.\_Kundennummer Feld

**C#**

```
private string _Kundennummer;
```

**Anmerkungen**

This is \_Kundennummer, a member of class temp\_Customers2.

### 1.1.62.2.8 temp\_Customers2.\_Land Feld

**C#**

```
private string _Land;
```

**Anmerkungen**

This is \_Land, a member of class temp\_Customers2.

### 1.1.62.2.9 temp\_Customers2.\_Matchcode Feld

**C#**

```
private string _Matchcode;
```

**Anmerkungen**

This is \_Matchcode, a member of class temp\_Customers2.

### 1.1.62.2.10 temp\_Customers2.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class temp\_Customers2.

### 1.1.62.2.11 temp\_Customers2.\_Ort Feld

**C#**

```
private string _Ort;
```

**Anmerkungen**

This is \_Ort, a member of class temp\_Customers2.

**1.1.62.2.12 temp\_Customers2.\_Strasse Feld****C#**

```
private string _Strasse;
```

**Anmerkungen**

This is \_Strasse, a member of class temp\_Customers2.

**1.1.62.2.13 temp\_Customers2.\_Telefax Feld****C#**

```
private string _Telefax;
```

**Anmerkungen**

This is \_Telefax, a member of class temp\_Customers2.

**1.1.62.2.14 temp\_Customers2.\_Telefon Feld****C#**

```
private string _Telefon;
```

**Anmerkungen**

This is \_Telefon, a member of class temp\_Customers2.

**1.1.62.2.15 temp\_Customers2.\_Vorname Feld****C#**

```
private string _Vorname;
```

**Anmerkungen**

This is \_Vorname, a member of class temp\_Customers2.

**1.1.62.2.16 temp\_Customers2.\_Zip Feld****C#**

```
private string _Zip;
```

**Anmerkungen**

This is \_Zip, a member of class temp\_Customers2.

**1.1.62.2.17 temp\_Customers2.\_Zusatz Feld****C#**

```
private string _Zusatz;
```

**Anmerkungen**

This is \_Zusatz, a member of class temp\_Customers2.

## 1.1.62.3 temp\_Customers2 Eigenschaften

### 1.1.62.3.1 temp\_Customers2.Anrede Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Anrede", DbType="VarChar(255)")]  
public string Anrede;
```

**Anmerkungen**

This is Anrede, a member of class temp\_Customers2.

### 1.1.62.3.2 temp\_Customers2.Ansprechpartner Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Ansprechpartner",  
DbType="VarChar(255)")]  
public string Ansprechpartner;
```

**Anmerkungen**

This is Ansprechpartner, a member of class temp\_Customers2.

### 1.1.62.3.3 temp\_Customers2.Debitorenkonto Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Debitorenkonto",  
DbType="VarChar(255)")]  
public string Debitorenkonto;
```

**Anmerkungen**

This is Debitorenkonto, a member of class temp\_Customers2.

### 1.1.62.3.4 temp\_Customers2.EMAIL Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_EMAIL", DbType="VarChar(250)")]  
public string EMAIL;
```

**Anmerkungen**

This is EMAIL, a member of class temp\_Customers2.

### 1.1.62.3.5 temp\_Customers2.Firma Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Firma", DbType="VarChar(255)")]  
public string Firma;
```

**Anmerkungen**

This is Firma, a member of class temp\_Customers2.

### 1.1.62.3.6 temp\_Customers2.Hausnummer Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Hausnummer",
DbType="VarChar(50)")]
public string Hausnummer;
```

#### Anmerkungen

This is Hausnummer, a member of class temp\_Customers2.

### 1.1.62.3.7 temp\_Customers2.Kundennummer Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Kundennummer",
DbType="VarChar(255)")]
public string Kundennummer;
```

#### Anmerkungen

This is Kundennummer, a member of class temp\_Customers2.

### 1.1.62.3.8 temp\_Customers2.Land Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Land", DbType="VarChar(255)")]
public string Land;
```

#### Anmerkungen

This is Land, a member of class temp\_Customers2.

### 1.1.62.3.9 temp\_Customers2.Matchcode Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Matchcode",
DbType="VarChar(255)")]
public string Matchcode;
```

#### Anmerkungen

This is Matchcode, a member of class temp\_Customers2.

### 1.1.62.3.10 temp\_Customers2.Name Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="VarChar(255)")]
public string Name;
```

#### Anmerkungen

This is Name, a member of class temp\_Customers2.

### 1.1.62.3.11 temp\_Customers2.Ort Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Ort", DbType="VarChar(255)")]
public string Ort;
```

**Anmerkungen**

This is Ort, a member of class temp\_Customers2.

**1.1.62.3.12 temp\_Customers2.Strasse Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Strasse",
DbType="VarChar(255)")]
public string Strasse;
```

**Anmerkungen**

This is Strasse, a member of class temp\_Customers2.

**1.1.62.3.13 temp\_Customers2.Telefax Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Telefax",
DbType="VarChar(255)")]
public string Telefax;
```

**Anmerkungen**

This is Telefax, a member of class temp\_Customers2.

**1.1.62.3.14 temp\_Customers2.Telefon Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Telefon",
DbType="VarChar(255)")]
public string Telefon;
```

**Anmerkungen**

This is Telefon, a member of class temp\_Customers2.

**1.1.62.3.15 temp\_Customers2.Vorname Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Vorname",
DbType="VarChar(255)")]
public string Vorname;
```

**Anmerkungen**

This is Vorname, a member of class temp\_Customers2.

**1.1.62.3.16 temp\_Customers2.Zip Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Zip", DbType="VarChar(50)")]
public string Zip;
```

**Anmerkungen**

This is Zip, a member of class temp\_Customers2.

1.1.62.3.17 temp\_Customers2.Zusatz Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Zusatz", DbType="VarChar(255)")]
public string Zusatz;
```

Anmerkungen

This is Zusatz, a member of class temp\_Customers2.

1.1.63 temp\_Products Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.temp_Products")]
public class temp_Products;
```

Datei

DataClasses1.designer.cs (see page 695)

Anmerkungen

This is class KVSCCommon.Database.temp\_Products.

	_UserPermissionProfile ( <a href="#">↗</a> see page 609)	This is _UserPermissionProfile, a member of class User.
	emptyChangingEventArgs ( <a href="#">↗</a> see page 609)	This is emptyChangingEventArgs, a member of class User.

## User Methoden

### User Klasse

	Name	Beschreibung
	AddContact ( <a href="#">↗</a> see page 610)	Weist dem Benutzer die Ã¼bergebenen Kontaktinformationen zu.
	AddPermission ( <a href="#">↗</a> see page 610)	Weist dem Benutzer das uebergebene Recht zu.
	AddPermissionProfile ( <a href="#">↗</a> see page 610)	Weist dem Benutzer das uebergebene Rechteprofil zu.
	attach_Invoice ( <a href="#">↗</a> see page 610)	This is attach_Invoice, a member of class User.
	attach_Log ( <a href="#">↗</a> see page 610)	This is attach_Log, a member of class User.
	attach_Order ( <a href="#">↗</a> see page 611)	This is attach_Order, a member of class User.
	attach_UserPermission ( <a href="#">↗</a> see page 611)	This is attach_UserPermission, a member of class User.
	attach_UserPermissionProfile ( <a href="#">↗</a> see page 611)	This is attach_UserPermissionProfile, a member of class User.
	ChangePassword ( <a href="#">↗</a> see page 611)	Ermoeoglicht es, das Passwort eines Benutzers zu setzen. Der im dbContext uebergebene Benutzer muss das Administratorrecht "ADMIN_PASSWORT_AENDERN" besitzen.
	CheckPassword ( <a href="#">↗</a> see page 612)	Prueft ob das Passwort leer oder kleiner 8 Zeichen lang ist
	CreateUser ( <a href="#">↗</a> see page 612)	Legt einen Benutzer mit den angegebenen Daten an.
	detach_Invoice ( <a href="#">↗</a> see page 612)	This is detach_Invoice, a member of class User.
	detach_Log ( <a href="#">↗</a> see page 612)	This is detach_Log, a member of class User.
	detach_Order ( <a href="#">↗</a> see page 612)	This is detach_Order, a member of class User.
	detach_UserPermission ( <a href="#">↗</a> see page 613)	This is detach_UserPermission, a member of class User.
	detach_UserPermissionProfile ( <a href="#">↗</a> see page 613)	This is detach_UserPermissionProfile, a member of class User.
	GetAllPermissionsById ( <a href="#">↗</a> see page 613)	Gibt zurueck alle Berechtigungen fÃ¼r den angegebenen Benutzer.
	GetUserNameById ( <a href="#">↗</a> see page 613)	Gibt den Benutzernamen zurueck, anhand der gesetzten Id ( <a href="#">↗</a> see page 618).
	HasPermission ( <a href="#">↗</a> see page 613)	Gibt zurueck, ob der Benutzer die uebergebene Berechtigung besitzt.
	Logon ( <a href="#">↗</a> see page 614)	Versucht, sich mit den gegebenen Login ( <a href="#">↗</a> see page 619)-Daten im System einzuloggen.
	OnContactIdChanged ( <a href="#">↗</a> see page 614)	This is OnContactIdChanged, a member of class User.
	OnContactIdChanging ( <a href="#">↗</a> see page 614)	This is OnContactIdChanging, a member of class User.
	OnCreated ( <a href="#">↗</a> see page 614)	Aenderungsevents fÃ¼r die Historie
	OnIdChanged ( <a href="#">↗</a> see page 614)	This is OnIdChanged, a member of class User.

	OnIdChanging ( <a href="#">↗</a> see page 614)	This is OnIdChanging, a member of class User.
	OnIsLockedChanged ( <a href="#">↗</a> see page 615)	This is OnIsLockedChanged, a member of class User.
	OnIsLockedChanging ( <a href="#">↗</a> see page 615)	Aenderungsevents f��r die Historie
	OnLastLoginChanged ( <a href="#">↗</a> see page 615)	This is OnLastLoginChanged, a member of class User.
	OnLastLoginChanging ( <a href="#">↗</a> see page 615)	This is OnLastLoginChanging, a member of class User.
	OnLoaded ( <a href="#">↗</a> see page 615)	Aenderungsevents f��r die Historie
	OnLoginChanged ( <a href="#">↗</a> see page 615)	This is OnLoginChanged, a member of class User.
	OnLoginChanging ( <a href="#">↗</a> see page 615)	This is OnLoginChanging, a member of class User.
	OnPasswordChanged ( <a href="#">↗</a> see page 616)	This is OnPasswordChanged, a member of class User.
	OnPasswordChanging ( <a href="#">↗</a> see page 616)	Aenderungsevents f��r die Historie
	OnPersonIdChanged ( <a href="#">↗</a> see page 616)	This is OnPersonIdChanged, a member of class User.
	OnPersonIdChanging ( <a href="#">↗</a> see page 616)	This is OnPersonIdChanging, a member of class User.
	OnSaltChanged ( <a href="#">↗</a> see page 616)	This is OnSaltChanged, a member of class User.
	OnSaltChanging ( <a href="#">↗</a> see page 616)	This is OnSaltChanging, a member of class User.
	OnValidate ( <a href="#">↗</a> see page 616)	Aenderungsevents f��r die Historie
	RemovePermission ( <a href="#">↗</a> see page 617)	Entzieht dem Benutzer das ��bergebene Recht.
	RemovePermissionProfile ( <a href="#">↗</a> see page 617)	Entzieht dem Benutzer das uebergebene Rechteprofil.
	SendPropertyChanged ( <a href="#">↗</a> see page 617)	This is SendPropertyChanged, a member of class User.
	SendPropertyChanging ( <a href="#">↗</a> see page 617)	This is SendPropertyChanging, a member of class User.

## User Ereignisse

### User Klasse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 621)	This is PropertyChanged, a member of class User.
	PropertyChanging ( <a href="#">↗</a> see page 621)	This is PropertyChanging, a member of class User.

### ILogging Eigenschaften

	Name	Beschreibung
	EntityState ( <a href="#">↗</a> see page 658)	This is EntityState, a member of class ILogging.
	ItemId ( <a href="#">↗</a> see page 658)	This is ItemId, a member of class ILogging.
	LogDbContext ( <a href="#">↗</a> see page 658)	This is LogDbContext, a member of class ILogging.

### User Klasse

	Name	Beschreibung
	Contact ( <a href="#">↗</a> see page 617)	This is Contact, a member of class User.
	ContactId ( <a href="#">↗</a> see page 618)	This is ContactId, a member of class User.
	EntityState ( <a href="#">↗</a> see page 618)	This is EntityState, a member of class User.
	Id ( <a href="#">↗</a> see page 618)	This is Id, a member of class User.
	Invoice ( <a href="#">↗</a> see page 618)	This is Invoice, a member of class User.
	IsLocked ( <a href="#">↗</a> see page 618)	This is IsLocked, a member of class User.
	ItemId ( <a href="#">↗</a> see page 618)	This is ItemId, a member of class User.
	LastLogin ( <a href="#">↗</a> see page 619)	This is LastLogin, a member of class User.
	LogDbContext ( <a href="#">↗</a> see page 619)	This is LogDbContext, a member of class User.
	Login ( <a href="#">↗</a> see page 619)	This is Login, a member of class User.
	Order ( <a href="#">↗</a> see page 619)	This is Order, a member of class User.
	Password ( <a href="#">↗</a> see page 619)	This is Password, a member of class User.
	Person ( <a href="#">↗</a> see page 619)	This is Person, a member of class User.
	PersonId ( <a href="#">↗</a> see page 620)	This is PersonId, a member of class User.
	Salt ( <a href="#">↗</a> see page 620)	This is Salt, a member of class User.
	Systemlog ( <a href="#">↗</a> see page 620)	This is Systemlog, a member of class User.
	UserPermission ( <a href="#">↗</a> see page 620)	This is UserPermission, a member of class User.
	UserPermissionProfile ( <a href="#">↗</a> see page 620)	This is UserPermissionProfile, a member of class User.

## User Ereignisse

## User Methoden

## User Klasse

	Name	Beschreibung
	AddContact ( <a href="#">↗</a> see page 610)	Weist dem Benutzer die Ã¼bergebenen Kontaktinformationen zu.
	AddPermission ( <a href="#">↗</a> see page 610)	Weist dem Benutzer das uebergebene Recht zu.
	AddPermissionProfile ( <a href="#">↗</a> see page 610)	Weist dem Benutzer das uebergebene Rechteprofil zu.
 	attach_Invoice ( <a href="#">↗</a> see page 610)	This is attach_Invoice, a member of class User.
 	attach_Log ( <a href="#">↗</a> see page 610)	This is attach_Log, a member of class User.
 	attach_Order ( <a href="#">↗</a> see page 611)	This is attach_Order, a member of class User.
 	attach_UserPermission ( <a href="#">↗</a> see page 611)	This is attach_UserPermission, a member of class User.
 	attach_UserPermissionProfile ( <a href="#">↗</a> see page 611)	This is attach_UserPermissionProfile, a member of class User.
	ChangePassword ( <a href="#">↗</a> see page 611)	Ermoeeglicht es, das Passwort eines Benutzers zu setzen. Der im dbContext uebergebene Benutzer muss das Administratorrecht "ADMIN_PASSWORT_AENDERN" besitzen.
 	CheckPassword ( <a href="#">↗</a> see page 612)	Prueft ob das Passwort leer oder kleiner 8 Zeichen lang ist
 	CreateUser ( <a href="#">↗</a> see page 612)	Legt einen Benutzer mit den angegebenen Daten an.
 	detach_Invoice ( <a href="#">↗</a> see page 612)	This is detach_Invoice, a member of class User.
 	detach_Log ( <a href="#">↗</a> see page 612)	This is detach_Log, a member of class User.
 	detach_Order ( <a href="#">↗</a> see page 612)	This is detach_Order, a member of class User.
 	detach_UserPermission ( <a href="#">↗</a> see page 613)	This is detach_UserPermission, a member of class User.
 	detach_UserPermissionProfile ( <a href="#">↗</a> see page 613)	This is detach_UserPermissionProfile, a member of class User.
 	GetAllPermissionsById ( <a href="#">↗</a> see page 613)	Gibt zurueck alle Berechtigungen fÃ¼r den angegebenen Benutzer.
 	GetUserNameById ( <a href="#">↗</a> see page 613)	Gibt den Benutzernamen zurueck, anhand der gesetzten Id ( <a href="#">↗</a> see page 618).
	HasPermission ( <a href="#">↗</a> see page 613)	Gibt zurueck, ob der Benutzer die uebergebene Berechtigung besitzt.
 	Logon ( <a href="#">↗</a> see page 614)	Versucht, sich mit den gegebenen Login ( <a href="#">↗</a> see page 619)-Daten im System einzuloggen.
 	OnContactIdChanged ( <a href="#">↗</a> see page 614)	This is OnContactIdChanged, a member of class User.
 	OnContactIdChanging ( <a href="#">↗</a> see page 614)	This is OnContactIdChanging, a member of class User.
 	OnCreated ( <a href="#">↗</a> see page 614)	Aenderungsevents fÃ¼r die Historie
 	OnIdChanged ( <a href="#">↗</a> see page 614)	This is OnIdChanged, a member of class User.
 	OnIdChanging ( <a href="#">↗</a> see page 614)	This is OnIdChanging, a member of class User.
 	OnIsLockedChanged ( <a href="#">↗</a> see page 615)	This is OnIsLockedChanged, a member of class User.
 	OnIsLockedChanging ( <a href="#">↗</a> see page 615)	Aenderungsevents fÃ¼r die Historie
 	OnLastLoginChanged ( <a href="#">↗</a> see page 615)	This is OnLastLoginChanged, a member of class User.
 	OnLastLoginChanging ( <a href="#">↗</a> see page 615)	This is OnLastLoginChanging, a member of class User.
 	OnLoaded ( <a href="#">↗</a> see page 615)	Aenderungsevents fÃ¼r die Historie
 	OnLoginChanged ( <a href="#">↗</a> see page 615)	This is OnLoginChanged, a member of class User.
 	OnLoginChanging ( <a href="#">↗</a> see page 615)	This is OnLoginChanging, a member of class User.

	OnPasswordChanged ( <a href="#">see page 616</a> )	This is OnPasswordChanged, a member of class User.
	OnPasswordChanging ( <a href="#">see page 616</a> )	Aenderungsevents f��r die Historie
	OnPersonIdChanged ( <a href="#">see page 616</a> )	This is OnPersonIdChanged, a member of class User.
	OnPersonIdChanging ( <a href="#">see page 616</a> )	This is OnPersonIdChanging, a member of class User.
	OnSaltChanged ( <a href="#">see page 616</a> )	This is OnSaltChanged, a member of class User.
	OnSaltChanging ( <a href="#">see page 616</a> )	This is OnSaltChanging, a member of class User.
	OnValidate ( <a href="#">see page 616</a> )	Aenderungsevents f��r die Historie
	RemovePermission ( <a href="#">see page 617</a> )	Entzieht dem Benutzer das ��bergebene Recht.
	RemovePermissionProfile ( <a href="#">see page 617</a> )	Entzieht dem Benutzer das uebergebene Rechteprofil.
	SendPropertyChanged ( <a href="#">see page 617</a> )	This is SendPropertyChanged, a member of class User.
	SendPropertyChanging ( <a href="#">see page 617</a> )	This is SendPropertyChanging, a member of class User.

## 1.1.65.1 User.User Konstruktor

**C#**

```
public User();
```

**Anmerkungen**

This is User, a member of class User.

## 1.1.65.2 User Felder

### 1.1.65.2.1 User.\_Contact Feld

**C#**

```
private EntityRef<Contact> _Contact;
```

**Anmerkungen**

This is \_Contact, a member of class User.

### 1.1.65.2.2 User.\_ContactId Feld

**C#**

```
private System.Nullable<System.Guid> _ContactId;
```

**Anmerkungen**

This is \_ContactId, a member of class User.

### 1.1.65.2.3 User.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class User.

### 1.1.65.2.4 User.\_Invoice Feld

**C#**

```
private EntitySet<Invoice> _Invoice;
```

**Anmerkungen**

This is \_Invoice, a member of class User.

**1.1.65.2.5 User.\_IsLocked Feld****C#**

```
private bool _IsLocked;
```

**Anmerkungen**

This is \_IsLocked, a member of class User.

**1.1.65.2.6 User.\_LastLogin Feld****C#**

```
private System.Nullable<System.DateTime> _LastLogin;
```

**Anmerkungen**

This is \_LastLogin, a member of class User.

**1.1.65.2.7 User.\_Log Feld****C#**

```
private EntitySet<Systemlog> _Log;
```

**Anmerkungen**

This is \_Log, a member of class User.

**1.1.65.2.8 User.\_Login Feld****C#**

```
private string _Login;
```

**Anmerkungen**

This is \_Login, a member of class User.

**1.1.65.2.9 User.\_Order Feld****C#**

```
private EntitySet<Order> _Order;
```

**Anmerkungen**

This is \_Order, a member of class User.

**1.1.65.2.10 User.\_Password Feld****C#**

```
private string _Password;
```

**Anmerkungen**

This is \_Password, a member of class User.

### 1.1.65.2.11 User.\_Person Feld

**C#**

```
private EntityRef<Person> _Person;
```

#### Anmerkungen

This is \_Person, a member of class User.

### 1.1.65.2.12 User.\_PersonId Feld

**C#**

```
private System.Guid _PersonId;
```

#### Anmerkungen

This is \_PersonId, a member of class User.

### 1.1.65.2.13 User.\_Salt Feld

**C#**

```
private string _Salt;
```

#### Anmerkungen

This is \_Salt, a member of class User.

### 1.1.65.2.14 User.\_UserPermission Feld

**C#**

```
private EntitySet<UserPermission> _UserPermission;
```

#### Anmerkungen

This is \_UserPermission, a member of class User.

### 1.1.65.2.15 User.\_UserPermissionProfile Feld

**C#**

```
private EntitySet<UserPermissionProfile> _UserPermissionProfile;
```

#### Anmerkungen

This is \_UserPermissionProfile, a member of class User.

### 1.1.65.2.16 User.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

#### Anmerkungen

This is emptyChangingEventArgs, a member of class User.

## 1.1.65.3 User Methoden

### 1.1.65.3.1 User.AddContact Methode

Weist dem Benutzer die übergebenen Kontaktinformationen zu.

**C#**

```
public void AddContact(Contact contact, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Contact contact	Kontakt, der dem Benutzer zugewiesen werden soll.
DataClasses1DataContext dbContext	Datenbankkontext.

### 1.1.65.3.2 User.AddPermission Methode

Weist dem Benutzer das uebergebene Recht zu.

**C#**

```
public void AddPermission(Guid permissionId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid permissionId	Id (see page 618) des Rechts, das zugewiesen werden soll.
DataClasses1DataContext dbContext	Datenbank-Context, mit dem das Recht zugewiesen wird.

### 1.1.65.3.3 User.AddPermissionProfile Methode

Weist dem Benutzer das uebergebene Rechteprofil zu.

**C#**

```
public void AddPermissionProfile(Guid profileId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid profileId	Id (see page 618) des Rechteprofils, das zugewiesen werden soll.
DataClasses1DataContext dbContext	Datenbank-Context, mit dem das Rechteprofil zugewiesen wird.

### 1.1.65.3.4 User.attach\_Invoice Methode

**C#**

```
private void attach_Invoice(Invoice entity);
```

**Anmerkungen**

This is attach\_Invoice, a member of class User.

### 1.1.65.3.5 User.attach\_Log Methode

**C#**

```
private void attach_Log(Systemlog entity);
```

**Anmerkungen**

This is attach\_Log, a member of class User.

### 1.1.65.3.6 User.attach\_Order Methode

**C#**

```
private void attach_Order(Order entity);
```

#### Anmerkungen

This is attach\_Order, a member of class User.

### 1.1.65.3.7 User.attach\_UserPermission Methode

**C#**

```
private void attach_UserPermission(UserPermission entity);
```

#### Anmerkungen

This is attach\_UserPermission, a member of class User.

### 1.1.65.3.8 User.attach\_UserPermissionProfile Methode

**C#**

```
private void attach_UserPermissionProfile(UserPermissionProfile entity);
```

#### Anmerkungen

This is attach\_UserPermissionProfile, a member of class User.

### 1.1.65.3.9 ChangePassword Methode

#### 1.1.65.3.9.1 User.ChangePassword Methode (string, DataClasses1DataContext)

Ermöglicht es, das Passwort eines Benutzers zu setzen. Der im dbContext uebergebene Benutzer muss dafür das Administratorrecht "ADMIN\_PASSWORT\_AENDERN" besitzen.

**C#**

```
public void ChangePassword(string newPassword, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string newPassword	Das neue Passwort.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

#### 1.1.65.3.9.2 User.ChangePassword Methode (string, string, DataClasses1DataContext)

Aendert das Passwort des Benutzers.

**C#**

```
public void ChangePassword(string newPassword, string oldPassword, DataClasses1DataContext dbContext);
```

#### Parameter

Parameter	Beschreibung
string newPassword	Neues Passwort.
string oldPassword	Altes Passwort.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

### 1.1.65.3.10 User.CheckPassword Methode

Prueft ob das Passwort leer oder kleiner 8 Zeichen lang ist

**C#**

```
private static void CheckPassword(string newPassword);
```

**Parameter**

Parameter	Beschreibung
string newPassword	Neues Passwort

### 1.1.65.3.11 User.CreateUser Methode

Legt einen Benutzer mit den angegebenen Daten an.

**C#**

```
public static User CreateUser(string login, string password, string name, string firstname, string title, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
string login	Login (see page 619) des Benutzers.
string password	Passwort des Benutzers.
string name	Nachname des Benutzers.
string firstname	Vorname des Benutzers.
string title	Anrede des Benutzers.
DataClasses1DataContext dbContext	Datenbankkontext, mit dem die Transaktion durchgefuehrt werden soll.

**Resultate**

Den neu erstellten Benutzer.

**Ausnahmen**

Ausnahmen	Beschreibung
ArgumentNullException	
ArgumentException	

### 1.1.65.3.12 User.detach\_Invoice Methode

**C#**

```
private void detach_Invoice(Invoice entity);
```

**Anmerkungen**

This is detach\_Invoice, a member of class User.

### 1.1.65.3.13 User.detach\_Log Methode

**C#**

```
private void detach_Log(Systemlog entity);
```

**Anmerkungen**

This is detach\_Log, a member of class User.

### 1.1.65.3.14 User.detach\_Order Methode

**C#**

```
private void detach_Order(Order entity);
```

**Anmerkungen**

This is detach\_Order, a member of class User.

**1.1.65.3.15 User.detach\_UserPermission Methode****C#**

```
private void detach_UserPermission(UserPermission entity);
```

**Anmerkungen**

This is detach\_UserPermission, a member of class User.

**1.1.65.3.16 User.detach\_UserPermissionProfile Methode****C#**

```
private void detach_UserPermissionProfile(UserPermissionProfile entity);
```

**Anmerkungen**

This is detach\_UserPermissionProfile, a member of class User.

**1.1.65.3.17 User.GetAllPermissionsById Methode**

Gibt zurueck alle Berechtigungen für den angegebenen Benutzer.

**C#**

```
public static List<string> GetAllPermissionsById(Guid userId);
```

**Parameter**

Parameter	Beschreibung
Guid userId	ID des Benutzers.

**Resultate**

Eine Liste mit Berechtigungen.

**1.1.65.3.18 User.GetUserNamebyId Methode**

Gibt den Benutzernamen zurueck, anhand der gesetzten Id (see page 618).

**C#**

```
public static string GetUserNamebyId(Guid userid);
```

**Parameter**

Parameter	Beschreibung
Guid userid	Id (see page 618) des Benutzers.

**1.1.65.3.19 User.HasPermission Methode**

Gibt zurueck, ob der Benutzer die uebergebene Berechtigung besitzt.

**C#**

```
public bool HasPermission(string permissionName);
```

**Parameter**

Parameter	Beschreibung
string permissionName	Name der Berechtigung.

**Resultate**

True, wenn der Benutzer die Berechtigung besitzt, sonst false.

**1.1.65.3.20 User.Logon Methode**

Versucht, sich mit den gegebenen Login (see page 619)-Daten im System einzuloggen.

**C#**

```
public static Guid Logon(string login, string password);
```

**Parameter**

Parameter	Beschreibung
string login	Benutzername des Benutzers.
string password	Passwort des Benutzers.

**Resultate**

Datenbank-Id (see page 618) des Benutzers, falls Logon erfolgreich.

**1.1.65.3.21 User.OnContactIdChanged Methode****C#**

```
private void OnContactIdChanged();
```

**Anmerkungen**

This is OnContactIdChanged, a member of class User.

**1.1.65.3.22 User.OnContactIdChanging Methode****C#**

```
private void OnContactIdChanging(System.Nullable<System.Guid> value);
```

**Anmerkungen**

This is OnContactIdChanging, a member of class User.

**1.1.65.3.23 User.OnCreated Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnCreated();
```

**1.1.65.3.24 User.OnIdChanged Methode****C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class User.

**1.1.65.3.25 User.OnIdChanging Methode****C#**

```
private void OnIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnIdChanging, a member of class User.

**1.1.65.3.26 User.OnIsLockedChanged Methode****C#**

```
private void OnIsLockedChanged();
```

**Anmerkungen**

This is OnIsLockedChanged, a member of class User.

**1.1.65.3.27 User.OnIsLockedChanging Methode**

Aenderungsevents f  r die Historie

**C#**

```
private void OnIsLockedChanging(bool value);
```

**1.1.65.3.28 User.OnLastLoginChanged Methode****C#**

```
private void OnLastLoginChanged();
```

**Anmerkungen**

This is OnLastLoginChanged, a member of class User.

**1.1.65.3.29 User.OnLastLoginChanging Methode****C#**

```
private void OnLastLoginChanging(System.Nullable<System.DateTime> value);
```

**Anmerkungen**

This is OnLastLoginChanging, a member of class User.

**1.1.65.3.30 User.OnLoaded Methode**

Aenderungsevents f  r die Historie

**C#**

```
private void OnLoaded();
```

**1.1.65.3.31 User.OnLoginChanged Methode****C#**

```
private void OnLoginChanged();
```

**Anmerkungen**

This is OnLoginChanged, a member of class User.

**1.1.65.3.32 User.OnLoginChanging Methode****C#**

```
private void OnLoginChanging(string value);
```

**Anmerkungen**

This is OnLoginChanging, a member of class User.

**1.1.65.3.33 User.OnPasswordChanged Methode****C#**

```
private void OnPasswordChanged();
```

**Anmerkungen**

This is OnPasswordChanged, a member of class User.

**1.1.65.3.34 User.OnPasswordChanging Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnPasswordChanging(string value);
```

**1.1.65.3.35 User.OnPersonIdChanged Methode****C#**

```
private void OnPersonIdChanged();
```

**Anmerkungen**

This is OnPersonIdChanged, a member of class User.

**1.1.65.3.36 User.OnPersonIdChanging Methode****C#**

```
private void OnPersonIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPersonIdChanging, a member of class User.

**1.1.65.3.37 User.OnSaltChanged Methode****C#**

```
private void OnSaltChanged();
```

**Anmerkungen**

This is OnSaltChanged, a member of class User.

**1.1.65.3.38 User.OnSaltChanging Methode****C#**

```
private void OnSaltChanging(string value);
```

**Anmerkungen**

This is OnSaltChanging, a member of class User.

**1.1.65.3.39 User.OnValidate Methode**

Aenderungsevents für die Historie

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

### 1.1.65.3.40 User.RemovePermission Methode

Entzieht dem Benutzer das Ã¼bergebene Recht.

**C#**

```
public void RemovePermission(Guid permissionId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid permissionId	Id (see page 618) des Rechts, das entzogen werden soll.
DataClasses1DataContext dbContext	Datenbank-Context, mit dem das Recht entzogen wird.

### 1.1.65.3.41 User.RemovePermissionProfile Methode

Entzieht dem Benutzer das uebergebene Rechteprofil.

**C#**

```
public void RemovePermissionProfile(Guid profileId, DataClasses1DataContext dbContext);
```

**Parameter**

Parameter	Beschreibung
Guid profileId	Id (see page 618) des Rechteprofils, das entzogen werden soll.
DataClasses1DataContext dbContext	Datenbank-Context, mit dem das Rechteprofil entzogen wird.

### 1.1.65.3.42 User.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class User.

### 1.1.65.3.43 User.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class User.

## 1.1.65.4 User Eigenschaften

### 1.1.65.4.1 User.Contact Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Contact_User",  
Storage="_Contact", ThisKey="ContactId", OtherKey="Id", IsForeignKey=true)]  
public Contact Contact;
```

**Anmerkungen**

This is Contact, a member of class User.

### 1.1.65.4.2 User.ContactId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ContactId",
DbType="UniqueIdentifier")]
public System.Nullable<System.Guid> ContactId;
```

**Anmerkungen**

This is ContactId, a member of class User.

### 1.1.65.4.3 User.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class User.

### 1.1.65.4.4 User.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier
NOT NULL", IsPrimaryKey=true)]
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class User.

### 1.1.65.4.5 User.Invoice Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_Invoice",
Storage="_Invoice", ThisKey="Id", OtherKey="UserId")]
public EntitySet<Invoice> Invoice;
```

**Anmerkungen**

This is Invoice, a member of class User.

### 1.1.65.4.6 User.IsLocked Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_IsLocked", DbType="bit not
null")]
public bool IsLocked;
```

**Anmerkungen**

This is IsLocked, a member of class User.

### 1.1.65.4.7 User.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class User.

**1.1.65.4.8 User.LastLogin Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_LastLogin", DbType="DateTime")]  
public System.Nullable<System.DateTime> LastLogin;
```

**Anmerkungen**

This is LastLogin, a member of class User.

**1.1.65.4.9 User.LogDbContext Eigenschaft****C#**

```
public DataClasses1DataContext LogDbContext;
```

**Anmerkungen**

This is LogDbContext, a member of class User.

**1.1.65.4.10 User.Login Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Login", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Login;
```

**Anmerkungen**

This is Login, a member of class User.

**1.1.65.4.11 User.Order Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_Order", Storage="_Order",  
ThisKey="Id", OtherKey="UserId")]  
public EntitySet<Order> Order;
```

**Anmerkungen**

This is Order, a member of class User.

**1.1.65.4.12 User.Password Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Password", DbType="VarChar(50)  
NOT NULL", CanBeNull=false)]  
public string Password;
```

**Anmerkungen**

This is Password, a member of class User.

**1.1.65.4.13 User.Person Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Person_User",
```

```
Storage="_Person", ThisKey="PersonId", OtherKey="Id", IsForeignKey=true)]  
public Person Person;
```

**Anmerkungen**

This is Person, a member of class User.

## 1.1.65.4.14 User.PersonId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PersonId",  
DbType="UniqueIdentifier NOT NULL")]  
public System.Guid PersonId;
```

**Anmerkungen**

This is PersonId, a member of class User.

## 1.1.65.4.15 User.Salt Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Salt", DbType="VarChar(50) NOT  
NULL", CanBeNull=false)]  
public string Salt;
```

**Anmerkungen**

This is Salt, a member of class User.

## 1.1.65.4.16 User.Systemlog Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_Systemlog",  
Storage="_Log", ThisKey="Id", OtherKey="LogUserId")]  
public EntitySet<Systemlog> Systemlog;
```

**Anmerkungen**

This is Systemlog, a member of class User.

## 1.1.65.4.17 User.UserPermission Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_UserPermission",  
Storage="_UserPermission", ThisKey="Id", OtherKey="UserId")]  
public EntitySet<UserPermission> UserPermission;
```

**Anmerkungen**

This is UserPermission, a member of class User.

## 1.1.65.4.18 User.UserPermissionProfile Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_UserPermissionProfile",  
Storage="_UserPermissionProfile", ThisKey="Id", OtherKey="UserId")]  
public EntitySet<UserPermissionProfile> UserPermissionProfile;
```

**Anmerkungen**

This is UserPermissionProfile, a member of class User.

# 1.1.65.5 User Ereignisse

## 1.1.65.5.1 User.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class User.

## 1.1.65.5.2 User.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class User.

# 1.1.66 UserPermission Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.UserPermission")]
public class UserPermission : INotifyPropertyChanging, INotifyPropertyChanged;
```

DataClasses1.designer.cs (see page 695)

Anmerkungen

This is class KVSCCommon.Database.UserPermission.

Mitglieder

Methoden

	Name	Beschreibung
	UserPermission (see page 622)	This is UserPermission, a member of class UserPermission.

UserPermission Felder

	Name	Beschreibung
	_Permission (see page 623)	This is _Permission, a member of class UserPermission.
	_PermissionId (see page 623)	This is _PermissionId, a member of class UserPermission.
	_User (see page 623)	This is _User, a member of class UserPermission.
	_UserId (see page 623)	This is _UserId, a member of class UserPermission.
	emptyChangingEventArgs (see page 623)	This is emptyChangingEventArgs, a member of class UserPermission.

UserPermission Methoden

	Name	Beschreibung
	OnCreated (see page 624)	This is OnCreated, a member of class UserPermission.
	OnLoaded (see page 624)	This is OnLoaded, a member of class UserPermission.

	OnPermissionIdChanged ( <a href="#">↗</a> see page 624)	This is OnPermissionIdChanged, a member of class UserPermission.
	OnPermissionIdChanging ( <a href="#">↗</a> see page 624)	This is OnPermissionIdChanging, a member of class UserPermission.
	OnUserIdChanged ( <a href="#">↗</a> see page 624)	This is OnUserIdChanged, a member of class UserPermission.
	OnUserIdChanging ( <a href="#">↗</a> see page 624)	This is OnUserIdChanging, a member of class UserPermission.
	OnValidate ( <a href="#">↗</a> see page 624)	This is OnValidate, a member of class UserPermission.
	SendPropertyChanged ( <a href="#">↗</a> see page 625)	This is SendPropertyChanged, a member of class UserPermission.
	SendPropertyChanging ( <a href="#">↗</a> see page 625)	This is SendPropertyChanging, a member of class UserPermission.

### UserPermission Eigenschaften

	Name	Beschreibung
	Permission ( <a href="#">↗</a> see page 625)	This is Permission, a member of class UserPermission.
	PermissionId ( <a href="#">↗</a> see page 625)	This is PermissionId, a member of class UserPermission.
	User ( <a href="#">↗</a> see page 625)	This is User, a member of class UserPermission.
	UserId ( <a href="#">↗</a> see page 626)	This is UserId, a member of class UserPermission.

### UserPermission Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 626)	This is PropertyChanged, a member of class UserPermission.
	PropertyChanging ( <a href="#">↗</a> see page 626)	This is PropertyChanging, a member of class UserPermission.

### UserPermission Eigenschaften

	Name	Beschreibung
	Permission ( <a href="#">↗</a> see page 625)	This is Permission, a member of class UserPermission.
	PermissionId ( <a href="#">↗</a> see page 625)	This is PermissionId, a member of class UserPermission.
	User ( <a href="#">↗</a> see page 625)	This is User, a member of class UserPermission.
	UserId ( <a href="#">↗</a> see page 626)	This is UserId, a member of class UserPermission.

### UserPermission Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">↗</a> see page 626)	This is PropertyChanged, a member of class UserPermission.
	PropertyChanging ( <a href="#">↗</a> see page 626)	This is PropertyChanging, a member of class UserPermission.

### UserPermission Felder

	Name	Beschreibung
	_Permission ( <a href="#">↗</a> see page 623)	This is _Permission, a member of class UserPermission.
	_PermissionId ( <a href="#">↗</a> see page 623)	This is _PermissionId, a member of class UserPermission.
	_User ( <a href="#">↗</a> see page 623)	This is _User, a member of class UserPermission.

	Name	Beschreibung
	OnCreated ( <a href="#">↗</a> see page 624)	This is OnCreated, a member of class UserPermission.
	OnLoaded ( <a href="#">↗</a> see page 624)	This is OnLoaded, a member of class UserPermission.
	OnPermissionIdChanged ( <a href="#">↗</a> see page 624)	This is OnPermissionIdChanged, a member of class UserPermission.
	OnPermissionIdChanging ( <a href="#">↗</a> see page 624)	This is OnPermissionIdChanging, a member of class UserPermission.
	OnUserIdChanged ( <a href="#">↗</a> see page 624)	This is OnUserIdChanged, a member of class UserPermission.
	OnUserIdChanging ( <a href="#">↗</a> see page 624)	This is OnUserIdChanging, a member of class UserPermission.
	OnValidate ( <a href="#">↗</a> see page 624)	This is OnValidate, a member of class UserPermission.
	SendPropertyChanged ( <a href="#">↗</a> see page 625)	This is SendPropertyChanged, a member of class UserPermission.
	SendPropertyChanging ( <a href="#">↗</a> see page 625)	This is SendPropertyChanging, a member of class UserPermission.

## 1.1.66.1 UserPermission.UserPermission Konstruktor

### C#

```
public UserPermission();
```

**Anmerkungen**

This is UserPermission, a member of class UserPermission.

## 1.1.66.2 UserPermission Felder

### 1.1.66.2.1 UserPermission.\_Permission Feld

**C#**

```
private EntityRef<Permission> _Permission;
```

**Anmerkungen**

This is \_Permission, a member of class UserPermission.

### 1.1.66.2.2 UserPermission.\_PermissionId Feld

**C#**

```
private System.Guid _PermissionId;
```

**Anmerkungen**

This is \_PermissionId, a member of class UserPermission.

### 1.1.66.2.3 UserPermission.\_User Feld

**C#**

```
private EntityRef<User> _User;
```

**Anmerkungen**

This is \_User, a member of class UserPermission.

### 1.1.66.2.4 UserPermission.\_UserId Feld

**C#**

```
private System.Guid _UserId;
```

**Anmerkungen**

This is \_UserId, a member of class UserPermission.

### 1.1.66.2.5 UserPermission.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class UserPermission.

## 1.1.66.3 UserPermission Methoden

### 1.1.66.3.1 UserPermission.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class UserPermission.

### 1.1.66.3.2 UserPermission.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class UserPermission.

### 1.1.66.3.3 UserPermission.OnPermissionIdChanged Methode

**C#**

```
private void OnPermissionIdChanged();
```

**Anmerkungen**

This is OnPermissionIdChanged, a member of class UserPermission.

### 1.1.66.3.4 UserPermission.OnPermissionIdChanging Methode

**C#**

```
private void OnPermissionIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPermissionIdChanging, a member of class UserPermission.

### 1.1.66.3.5 UserPermission.OnUserIdChanged Methode

**C#**

```
private void OnUserIdChanged();
```

**Anmerkungen**

This is OnUserIdChanged, a member of class UserPermission.

### 1.1.66.3.6 UserPermission.OnUserIdChanging Methode

**C#**

```
private void OnUserIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnUserIdChanging, a member of class UserPermission.

### 1.1.66.3.7 UserPermission.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class UserPermission.

**1.1.66.3.8 UserPermission.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class UserPermission.

**1.1.66.3.9 UserPermission.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class UserPermission.

**1.1.66.4 UserPermission Eigenschaften****1.1.66.4.1 UserPermission.Permission Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Permission_UserPermission",  
Storage="_Permission", ThisKey="PermissionId", OtherKey="Id", IsForeignKey=true)]  
public Permission Permission;
```

**Anmerkungen**

This is Permission, a member of class UserPermission.

**1.1.66.4.2 UserPermission.PermissionId Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PermissionId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid PermissionId;
```

**Anmerkungen**

This is PermissionId, a member of class UserPermission.

**1.1.66.4.3 UserPermission.User Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_UserPermission",  
Storage="_User", ThisKey="UserId", OtherKey="Id", IsForeignKey=true)]  
public User User;
```

**Anmerkungen**

This is User, a member of class UserPermission.

### 1.1.66.4.4 UserPermission.UserId Eigenschaft

C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_UserId",
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]
public System.Guid UserId;
```

Anmerkungen

This is UserId, a member of class UserPermission.

### 1.1.66.5 UserPermission Ereignisse

#### 1.1.66.5.1 UserPermission.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class UserPermission.

#### 1.1.66.5.2 UserPermission.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class UserPermission.

## 1.1.67 UserPermissionProfile Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute(Name="dbo.UserPermissionProfile")]
public class UserPermissionProfile : INotifyPropertyChanging, INotifyPropertyChanged;

## 1.1.67.1 UserPermissionProfile.UserPermissionProfile Konstruktor

**C#**

```
public UserPermissionProfile();
```

**Anmerkungen**

This is UserPermissionProfile, a member of class UserPermissionProfile.

## 1.1.67.2 UserPermissionProfile Felder

### 1.1.67.2.1 UserPermissionProfile.\_PermissionProfile Feld

**C#**

```
private EntityRef<PermissionProfile> _PermissionProfile;
```

**Anmerkungen**

This is \_PermissionProfile, a member of class UserPermissionProfile.

### 1.1.67.2.2 UserPermissionProfile.\_PermissionProfileId Feld

**C#**

```
private System.Guid _PermissionProfileId;
```

**Anmerkungen**

This is \_PermissionProfileId, a member of class UserPermissionProfile.

### 1.1.67.2.3 UserPermissionProfile.\_User Feld

**C#**

```
private EntityRef<User> _User;
```

**Anmerkungen**

This is \_User, a member of class UserPermissionProfile.

### 1.1.67.2.4 UserPermissionProfile.\_UserId Feld

**C#**

```
private System.Guid _UserId;
```

**Anmerkungen**

This is \_UserId, a member of class UserPermissionProfile.

### 1.1.67.2.5 UserPermissionProfile.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class UserPermissionProfile.

## 1.1.67.3 UserPermissionProfile Methoden

### 1.1.67.3.1 UserPermissionProfile.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class UserPermissionProfile.

### 1.1.67.3.2 UserPermissionProfile.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class UserPermissionProfile.

### 1.1.67.3.3 UserPermissionProfile.OnPermissionProfileIdChanged Methode

**C#**

```
private void OnPermissionProfileIdChanged();
```

**Anmerkungen**

This is OnPermissionProfileIdChanged, a member of class UserPermissionProfile.

### 1.1.67.3.4 UserPermissionProfile.OnPermissionProfileIdChanging Methode

**C#**

```
private void OnPermissionProfileIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnPermissionProfileIdChanging, a member of class UserPermissionProfile.

### 1.1.67.3.5 UserPermissionProfile.OnUserIdChanged Methode

**C#**

```
private void OnUserIdChanged();
```

**Anmerkungen**

This is OnUserIdChanged, a member of class UserPermissionProfile.

### 1.1.67.3.6 UserPermissionProfile.OnUserIdChanging Methode

**C#**

```
private void OnUserIdChanging(System.Guid value);
```

**Anmerkungen**

This is OnUserIdChanging, a member of class UserPermissionProfile.

### 1.1.67.3.7 UserPermissionProfile.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class UserPermissionProfile.

### 1.1.67.3.8 UserPermissionProfile.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class UserPermissionProfile.

### 1.1.67.3.9 UserPermissionProfile.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class UserPermissionProfile.

## 1.1.67.4 UserPermissionProfile Eigenschaften

### 1.1.67.4.1 UserPermissionProfile.PermissionProfile Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="PermissionProfile_UserPermissionProfile",  
Storage="_PermissionProfile", ThisKey="PermissionProfileId", OtherKey="Id",  
IsForeignKey=true)]  
public PermissionProfile PermissionProfile;
```

**Anmerkungen**

This is PermissionProfile, a member of class UserPermissionProfile.

### 1.1.67.4.2 UserPermissionProfile.PermissionProfileId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_PermissionProfileId",  
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid PermissionProfileId;
```

**Anmerkungen**

This is PermissionProfileId, a member of class UserPermissionProfile.

### 1.1.67.4.3 UserPermissionProfile.User Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="User_UserPermissionProfile",
Storage="_User", ThisKey="UserId", OtherKey="Id", IsForeignKey=true)]
public User User;
```

**Anmerkungen**

This is User, a member of class UserPermissionProfile.

### 1.1.67.4.4 UserPermissionProfile.UserId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_UserId",
DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]
public System.Guid UserId;
```

**Anmerkungen**

This is UserId, a member of class UserPermissionProfile.

## 1.1.67.5 UserPermissionProfile Ereignisse

### 1.1.67.5.1 UserPermissionProfile.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class UserPermissionProfile.

### 1.1.67.5.2 UserPermissionProfile.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class UserPermissionProfile.

---

## 1.1.68 Vehicle Klasse

Erweiterungsklasse fuer die DB Tabelle Vehicle

**Klassen Hierarchie****C#**

```
public class Vehicle : ILogging;
```

**Datei**

Vehicle.cs (🔗 see page 704)

**Mitglieder****ILogging Eigenschaften**

	Name	Beschreibung
🔗	EntityState (🔗 see page 658)	This is EntityState, a member of class ILogging.
🔗	ItemId (🔗 see page 658)	This is ItemId, a member of class ILogging.
🔗	LogDbContext (🔗 see page 658)	This is LogDbContext, a member of class ILogging.

**Vehicle Klasse**

	Name	Beschreibung
🔗	ColorCode (🔗 see page 642)	This is ColorCode, a member of class Vehicle.
🔗	CurrentRegistrationId (🔗 see page 642)	This is CurrentRegistrationId, a member of class Vehicle.
🔗	DeregistrationOrder (🔗 see page 642)	This is DeregistrationOrder, a member of class Vehicle.
🔗	EntityState (🔗 see page 642)	This is EntityState, a member of class Vehicle.
🔗	FirstRegistrationDate (🔗 see page 642)	This is FirstRegistrationDate, a member of class Vehicle.
🔗	HSN (🔗 see page 643)	This is HSN, a member of class Vehicle.
🔗	Id (🔗 see page 643)	This is Id, a member of class Vehicle.
🔗	ItemId (🔗 see page 643)	This is ItemId, a member of class Vehicle.
🔗	LogDbContext (🔗 see page 643)	This is LogDbContext, a member of class Vehicle.
🔗	Registration (🔗 see page 643)	This is Registration, a member of class Vehicle.
🔗	Registration1 (🔗 see page 643)	This is Registration1, a member of class Vehicle.
🔗	RegistrationOrder (🔗 see page 644)	This is RegistrationOrder, a member of class Vehicle.
🔗	TSN (🔗 see page 644)	This is TSN, a member of class Vehicle.
🔗	Variant (🔗 see page 644)	This is Variant, a member of class Vehicle.
🔗	VIN (🔗 see page 644)	This is VIN, a member of class Vehicle.

**Methoden****Vehicle Klasse**

	Name	Beschreibung
🔗	Vehicle (🔗 see page 635)	This is Vehicle, a member of class Vehicle.

**Vehicle Felder****Vehicle Klasse**

	Name	Beschreibung
🔗	_ColorCode (🔗 see page 635)	This is _ColorCode, a member of class Vehicle.
🔗	_CurrentRegistrationId (🔗 see page 635)	This is _CurrentRegistrationId, a member of class Vehicle.

	OnTSNChanging ( <a href="#">↗</a> see page 641)	Aenderungsevents fÃ¼r die Historie
	OnValidate ( <a href="#">↗</a> see page 641)	This is OnValidate, a member of class Vehicle.
	OnVariantChanged ( <a href="#">↗</a> see page 641)	This is OnVariantChanged, a member of class Vehicle.
	OnVariantChanging ( <a href="#">↗</a> see page 641)	Aenderungsevents fÃ¼r die Historie
	OnVINChanged ( <a href="#">↗</a> see page 641)	This is OnVINChanged, a member of class Vehicle.
	OnVINChanging ( <a href="#">↗</a> see page 641)	Aenderungsevents fÃ¼r die Historie
 	SendPropertyChanged ( <a href="#">↗</a> see page 641)	This is SendPropertyChanged, a member of class Vehicle.
 	SendPropertyChanging ( <a href="#">↗</a> see page 642)	This is SendPropertyChanging, a member of class Vehicle.

## 1.1.68.1 Vehicle.Vehicle Konstruktor

**C#**

```
public Vehicle();
```

### Anmerkungen

This is Vehicle, a member of class Vehicle.

## 1.1.68.2 Vehicle Felder

### 1.1.68.2.1 Vehicle.\_ColorCode Feld

**C#**

```
private System.Nullable<int> _ColorCode;
```

### Anmerkungen

This is \_ColorCode, a member of class Vehicle.

### 1.1.68.2.2 Vehicle.\_CurrentRegistrationId Feld

**C#**

```
private System.Nullable<System.Guid> _CurrentRegistrationId;
```

### Anmerkungen

This is \_CurrentRegistrationId, a member of class Vehicle.

### 1.1.68.2.3 Vehicle.\_DeregistrationOrder Feld

**C#**

```
private EntitySet<DeregistrationOrder> _DeregistrationOrder;
```

### Anmerkungen

This is \_DeregistrationOrder, a member of class Vehicle.

### 1.1.68.2.4 Vehicle.\_FirstRegistrationDate Feld

**C#**

```
private System.Nullable<System.DateTime> _FirstRegistrationDate;
```

### Anmerkungen

This is \_FirstRegistrationDate, a member of class Vehicle.

### 1.1.68.2.5 Vehicle.\_HSN Feld

**C#**

```
private string _HSN;
```

### Anmerkungen

This is \_HSN, a member of class Vehicle.

### 1.1.68.2.6 Vehicle.\_Id Feld

**C#**

```
private System.Guid _Id;
```

**Anmerkungen**

This is \_Id, a member of class Vehicle.

### 1.1.68.2.7 Vehicle.\_Registration Feld

**C#**

```
private EntitySet<Registration> _Registration;
```

**Anmerkungen**

This is \_Registration, a member of class Vehicle.

### 1.1.68.2.8 Vehicle.\_Registration1 Feld

**C#**

```
private EntityRef<Registration> _Registration1;
```

**Anmerkungen**

This is \_Registration1, a member of class Vehicle.

### 1.1.68.2.9 Vehicle.\_RegistrationOrder Feld

**C#**

```
private EntitySet<RegistrationOrder> _RegistrationOrder;
```

**Anmerkungen**

This is \_RegistrationOrder, a member of class Vehicle.

### 1.1.68.2.10 Vehicle.\_TSN Feld

**C#**

```
private string _TSN;
```

**Anmerkungen**

This is \_TSN, a member of class Vehicle.

### 1.1.68.2.11 Vehicle.\_Variant Feld

**C#**

```
private string _Variant;
```

**Anmerkungen**

This is \_Variant, a member of class Vehicle.

### 1.1.68.2.12 Vehicle.\_VIN Feld

**C#**

```
private string _VIN;
```

Anmerkungen

This is \_VIN, a member of class Vehicle.

1.1.68.2.13 Vehicle.emptyChangingEventArgs Feld

C#

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new
PropertyChangingEventArgs(String.Empty);
```

Anmerkungen

This is emptyChangingEventArgs, a member of class Vehicle.

1.1.68.3 Vehicle Methoden

1.1.68.3.1 Vehicle.attach\_DeregistrationOrder Methode

C#

```
private void attach_DeregistrationOrder(DeregistrationOrder entity);
```

Anmerkungen

This is attach\_DeregistrationOrder, a member of class Vehicle.

1.1.68.3.2 Vehicle.attach\_Registration Methode

C#

```
private void attach_Registration(Registration entity);
```

Anmerkungen

This is attach\_Registration, a member of class Vehicle.

1.1.68.3.3 Vehicle.attach\_RegistrationOrder Methode

C#

```
private void attach_RegistrationOrder(RegistrationOrder entity);
```

Anmerkungen

This is attach\_RegistrationOrder, a member of class Vehicle.

1.1.68.3.4 Vehicle.CreateVehicle Methode

Erstellt ein neues Fahrzeug.

C#

```
public static Vehicle CreateVehicle(string vin, string hsn, string tsn, string variant,
DateTime? firstRegistrationDate, int? colorCode, DataClasses1DataContext dbContext);
```

Parameter

Parameter	Beschreibung
string vin	Fahrgestellnummer des Fahrzeugs.
string hsn	HSN ( see page 643) des Fahrzeugs..
string tsn	TSN ( see page 644) des Fahrzeugs..
string variant	Variante / Edition des Fahrzeugs.

DateTime? firstRegistrationDate	Erstzulassungsdatum.
int? colorCode	Farbcode.
DataClasses1DataContext dbContext	Datenbankkontext für die Transaktion.

Resultate

Das neue Fahrzeug.

1.1.68.3.5 Vehicle.detach\_DeregistrationOrder Methode

C#

```
private void detach_DeregistrationOrder(DeregistrationOrder entity);
```

Anmerkungen

This is detach\_DeregistrationOrder, a member of class Vehicle.

1.1.68.3.6 Vehicle.detach\_Registration Methode

C#

```
private void detach_Registration(Registration entity);
```

Anmerkungen

This is detach\_Registration, a member of class Vehicle.

1.1.68.3.7 Vehicle.detach\_RegistrationOrder Methode

C#

```
private void detach_RegistrationOrder(RegistrationOrder entity);
```

Anmerkungen

This is detach\_RegistrationOrder, a member of class Vehicle.

1.1.68.3.8 Vehicle.OnColorCodeChanged Methode

C#

```
private void OnColorCodeChanged();
```

Anmerkungen

This is OnColorCodeChanged, a member of class Vehicle.

1.1.68.3.9 OnColorCodeChanging Methode

1.1.68.3.9.1 Vehicle.OnColorCodeChanging Methode (System.Nullable<int>)

C#

```
private void OnColorCodeChanging(System.Nullable<int> value);
```

Anmerkungen

This is OnColorCodeChanging, a member of class Vehicle.

1.1.68.3.9.2 Vehicle.OnColorCodeChanging Methode (int?)

Aenderungsevents für die Historie

**C#**

```
private void OnColorCodeChanging(int? value);
```

### 1.1.68.3.10 Vehicle.OnCreated Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnCreated();
```

### 1.1.68.3.11 Vehicle.OnCurrentRegistrationIdChanged Methode

**C#**

```
private void OnCurrentRegistrationIdChanged();
```

#### Anmerkungen

This is OnCurrentRegistrationIdChanged, a member of class Vehicle.

### 1.1.68.3.12 OnCurrentRegistrationIdChanging Methode

#### 1.1.68.3.12.1 Vehicle.OnCurrentRegistrationIdChanging Methode (Guid?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnCurrentRegistrationIdChanging(Guid? value);
```

#### 1.1.68.3.12.2 Vehicle.OnCurrentRegistrationIdChanging Methode (System.Nullable<System.Guid>)

**C#**

```
private void OnCurrentRegistrationIdChanging(System.Nullable<System.Guid> value);
```

#### Anmerkungen

This is OnCurrentRegistrationIdChanging, a member of class Vehicle.

### 1.1.68.3.13 Vehicle.OnFirstRegistrationDateChanged Methode

**C#**

```
private void OnFirstRegistrationDateChanged();
```

#### Anmerkungen

This is OnFirstRegistrationDateChanged, a member of class Vehicle.

### 1.1.68.3.14 OnFirstRegistrationDateChanging Methode

#### 1.1.68.3.14.1 Vehicle.OnFirstRegistrationDateChanging Methode (DateTime?)

Aenderungsevents f  r die Historie

**C#**

```
private void OnFirstRegistrationDateChanging(DateTime? value);
```

### 1.1.68.3.14.2 Vehicle.OnFirstRegistrationDateChanging Methode (System.Nullable<System.DateTime>)

C#

```
private void OnFirstRegistrationDateChanging(System.Nullable<System.DateTime> value);
```

#### Anmerkungen

This is OnFirstRegistrationDateChanging, a member of class Vehicle.

### 1.1.68.3.15 Vehicle.OnHSNChanged Methode

C#

```
private void OnHSNChanged();
```

#### Anmerkungen

This is OnHSNChanged, a member of class Vehicle.

### 1.1.68.3.16 Vehicle.OnHSNChanging Methode

Aenderungsevents f r die Historie

C#

```
private void OnHSNChanging(string value);
```

### 1.1.68.3.17 Vehicle.OnIdChanged Methode

C#

```
private void OnIdChanged();
```

#### Anmerkungen

This is OnIdChanged, a member of class Vehicle.

### 1.1.68.3.18 Vehicle.OnIdChanging Methode

C#

```
private void OnIdChanging(System.Guid value);
```

#### Anmerkungen

This is OnIdChanging, a member of class Vehicle.

### 1.1.68.3.19 Vehicle.OnLoaded Methode

Aenderungsevents f r die Historie

C#

```
private void OnLoaded();
```

### 1.1.68.3.20 Vehicle.OnTSNChanged Methode

C#

```
private void OnTSNChanged();
```

#### Anmerkungen

This is OnTSNChanged, a member of class Vehicle.

### 1.1.68.3.21 Vehicle.OnTSNChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnTSNChanging(string value);
```

### 1.1.68.3.22 Vehicle.OnValidate Methode

**C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class Vehicle.

### 1.1.68.3.23 Vehicle.OnVariantChanged Methode

**C#**

```
private void OnVariantChanged();
```

**Anmerkungen**

This is OnVariantChanged, a member of class Vehicle.

### 1.1.68.3.24 Vehicle.OnVariantChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnVariantChanging(string value);
```

### 1.1.68.3.25 Vehicle.OnVINChanged Methode

**C#**

```
private void OnVINChanged();
```

**Anmerkungen**

This is OnVINChanged, a member of class Vehicle.

### 1.1.68.3.26 Vehicle.OnVINChanging Methode

Aenderungsevents f  r die Historie

**C#**

```
private void OnVINChanging(string value);
```

### 1.1.68.3.27 Vehicle.SendPropertyChanged Methode

**C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class Vehicle.

### 1.1.68.3.28 Vehicle.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class Vehicle.

## 1.1.68.4 Vehicle Eigenschaften

### 1.1.68.4.1 Vehicle.ColorCode Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_ColorCode", DbType="int")]  
public System.Nullable<int> ColorCode;
```

**Anmerkungen**

This is ColorCode, a member of class Vehicle.

### 1.1.68.4.2 Vehicle.CurrentRegistrationId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CurrentRegistrationId",  
DbType="UniqueIdentifier")]  
public System.Nullable<System.Guid> CurrentRegistrationId;
```

**Anmerkungen**

This is CurrentRegistrationId, a member of class Vehicle.

### 1.1.68.4.3 Vehicle.DeregistrationOrder Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Vehicle_DeregistrationOrder",  
Storage="_DeregistrationOrder", ThisKey="Id", OtherKey="VehicleId")]  
public EntitySet<DeregistrationOrder> DeregistrationOrder;
```

**Anmerkungen**

This is DeregistrationOrder, a member of class Vehicle.

### 1.1.68.4.4 Vehicle.EntityState Eigenschaft

**C#**

```
public EntityState EntityState;
```

**Anmerkungen**

This is EntityState, a member of class Vehicle.

### 1.1.68.4.5 Vehicle.FirstRegistrationDate Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_FirstRegistrationDate",  
DbType="datetime")]
```

```
public System.Nullable<System.DateTime> FirstRegistrationDate;
```

**Anmerkungen**

This is FirstRegistrationDate, a member of class Vehicle.

### 1.1.68.4.6 Vehicle.HSN Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_HSN", DbType="varchar(4) not null")]  
public string HSN;
```

**Anmerkungen**

This is HSN, a member of class Vehicle.

### 1.1.68.4.7 Vehicle.Id Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="UniqueIdentifier NOT NULL", IsPrimaryKey=true)]  
public System.Guid Id;
```

**Anmerkungen**

This is Id, a member of class Vehicle.

### 1.1.68.4.8 Vehicle.ItemId Eigenschaft

**C#**

```
public object ItemId;
```

**Anmerkungen**

This is ItemId, a member of class Vehicle.

### 1.1.68.4.9 Vehicle.LogDBContext Eigenschaft

**C#**

```
public DataClasses1DataContext LogDBContext;
```

**Anmerkungen**

This is LogDBContext, a member of class Vehicle.

### 1.1.68.4.10 Vehicle.Registration Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Vehicle_Registration",  
Storage="_Registration", ThisKey="Id", OtherKey="VehicleId")]  
public EntitySet<Registration> Registration;
```

**Anmerkungen**

This is Registration, a member of class Vehicle.

### 1.1.68.4.11 Vehicle.Registration1 Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Registration_Vehicle",
```

```
Storage="_Registration1", ThisKey="CurrentRegistrationId", OtherKey="Id",  
IsForeignKey=true)]  
public Registration Registration1;
```

#### Anmerkungen

This is Registration1, a member of class Vehicle.

### 1.1.68.4.12 Vehicle.RegistrationOrder Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Vehicle_RegistrationOrder",  
Storage="_RegistrationOrder", ThisKey="Id", OtherKey="VehicleId")]  
public EntitySet<RegistrationOrder> RegistrationOrder;
```

#### Anmerkungen

This is RegistrationOrder, a member of class Vehicle.

### 1.1.68.4.13 Vehicle.TSN Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_TSN", DbType="VarChar(4) NOT  
NULL")]  
public string TSN;
```

#### Anmerkungen

This is TSN, a member of class Vehicle.

### 1.1.68.4.14 Vehicle.Variant Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Variant", DbType="VarChar(50)")]  
public string Variant;
```

#### Anmerkungen

This is Variant, a member of class Vehicle.

### 1.1.68.4.15 Vehicle.VIN Eigenschaft

#### C#

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_VIN", DbType="VarChar(17) NOT  
NULL")]  
public string VIN;
```

#### Anmerkungen

This is VIN, a member of class Vehicle.

## 1.1.68.5 Vehicle Ereignisse

### 1.1.68.5.1 Vehicle.PropertyChanged Ereignis

#### C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class Vehicle.

1.1.68.5.2 Vehicle.PropertyChanging Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class Vehicle.

1.1.69 WebServiceLogin Klasse

Klassen Hierarchie

C#

```
[global::System.Data.Linq.Mapping.TableAttribute()]
public class WebServiceLogin : INotifyPropertyChanging, INotifyPropertyChanged;
```

Datei

DataClasses1.designer.cs (see page 695)

Anmerkungen

This is class KVSCCommon.Database.WebServiceLogin.

Mitglieder

Methoden

	Name	Beschreibung
	WebServiceLogin (see page 647)	This is WebServiceLogin, a member of class WebServiceLogin.

WebServiceLogin Felder

	Name	Beschreibung
	_Id (see page 647)	This is _Id, a member of class WebServiceLogin.
	_Login (see page 647)	This is _Login, a member of class WebServiceLogin.
	_Name (see page 647)	This is _Name, a member of class WebServiceLogin.
	_Password (see page 647)	This is _Password, a member of class WebServiceLogin.
	_WebServiceLoginCustomer (see page 647)	This is _WebServiceLoginCustomer, a member of class WebServiceLogin.
	emptyChangingEventArgs (see page 648)	This is emptyChangingEventArgs, a member of class WebServiceLogin.

WebServiceLogin Methoden

	Name	Beschreibung
	attach_WebServiceLoginCustomer (see page 648)	This is attach_WebServiceLoginCustomer, a member of class WebServiceLogin.
	detach_WebServiceLoginCustomer (see page 648)	This is detach_WebServiceLoginCustomer, a member of class WebServiceLogin.
	OnCreated (see page 648)	This is OnCreated, a member of class WebServiceLogin.
	OnIdChanged (see page 648)	This is OnIdChanged, a member of class WebServiceLogin.
	OnIdChanging (see page 648)	This is OnIdChanging, a member of class WebServiceLogin.
	OnLoaded (see page 649)	This is OnLoaded, a member of class WebServiceLogin.
	OnLoginChanged (see page 649)	This is OnLoginChanged, a member of class WebServiceLogin.
	OnLoginChanging (see page 649)	This is OnLoginChanging, a member of class WebServiceLogin.
	OnNameChanged (see page 649)	This is OnNameChanged, a member of class WebServiceLogin.

	OnNameChanging ( <a href="#">see page 649</a> )	This is OnNameChanging, a member of class WebServiceLogin.
	OnPasswordChanged ( <a href="#">see page 649</a> )	This is OnPasswordChanged, a member of class WebServiceLogin.
	OnPasswordChanging ( <a href="#">see page 649</a> )	This is OnPasswordChanging, a member of class WebServiceLogin.
	OnValidate ( <a href="#">see page 650</a> )	This is OnValidate, a member of class WebServiceLogin.
	SendPropertyChanged ( <a href="#">see page 650</a> )	This is SendPropertyChanged, a member of class WebServiceLogin.
	SendPropertyChanging ( <a href="#">see page 650</a> )	This is SendPropertyChanging, a member of class WebServiceLogin.

### WebServiceLogin Eigenschaften

	Name	Beschreibung
	Id ( <a href="#">see page 650</a> )	This is Id, a member of class WebServiceLogin.
	Login ( <a href="#">see page 650</a> )	This is Login, a member of class WebServiceLogin.
	Name ( <a href="#">see page 651</a> )	This is Name, a member of class WebServiceLogin.
	Password ( <a href="#">see page 651</a> )	This is Password, a member of class WebServiceLogin.
	WebServiceLoginCustomer ( <a href="#">see page 651</a> )	This is WebServiceLoginCustomer, a member of class WebServiceLogin.

### WebServiceLogin Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">see page 651</a> )	This is PropertyChanged, a member of class WebServiceLogin.
	PropertyChanging ( <a href="#">see page 651</a> )	This is PropertyChanging, a member of class WebServiceLogin.

### WebServiceLogin Eigenschaften

	Name	Beschreibung
	Id ( <a href="#">see page 650</a> )	This is Id, a member of class WebServiceLogin.
	Login ( <a href="#">see page 650</a> )	This is Login, a member of class WebServiceLogin.
	Name ( <a href="#">see page 651</a> )	This is Name, a member of class WebServiceLogin.
	Password ( <a href="#">see page 651</a> )	This is Password, a member of class WebServiceLogin.
	WebServiceLoginCustomer ( <a href="#">see page 651</a> )	This is WebServiceLoginCustomer, a member of class WebServiceLogin.

### WebServiceLogin Ereignisse

	Name	Beschreibung
	PropertyChanged ( <a href="#">see page 651</a> )	This is PropertyChanged, a member of class WebServiceLogin.
	PropertyChanging ( <a href="#">see page 651</a> )	This is PropertyChanging, a member of class WebServiceLogin.

### WebServiceLogin Felder

	Name	Beschreibung
	_Id ( <a href="#">see page 647</a> )	This is _Id, a member of class WebServiceLogin.
	_Login ( <a href="#">see page 647</a> )	This is _Login, a member of class WebServiceLogin.
	_Name ( <a href="#">see page 647</a> )	This is _Name, a member of class WebServiceLogin.
	_Password ( <a href="#">see page 647</a> )	This is _Password, a member of class WebServiceLogin.
	_WebServiceLoginCustomer ( <a href="#">see page 647</a> )	This is _WebServiceLoginCustomer, a member of class WebServiceLogin.
	emptyChangingEventArgs ( <a href="#">see page 648</a> )	This is emptyChangingEventArgs, a member of class WebServiceLogin.

### WebServiceLogin Methoden

	Name	Beschreibung
	attach_WebServiceLoginCustomer ( <a href="#">see page 648</a> )	This is attach_WebServiceLoginCustomer, a member of class WebServiceLogin.
	detach_WebServiceLoginCustomer ( <a href="#">see page 648</a> )	This is detach_WebServiceLoginCustomer, a member of class WebServiceLogin.
	OnCreated ( <a href="#">see page 648</a> )	This is OnCreated, a member of class WebServiceLogin.
	OnIdChanged ( <a href="#">see page 648</a> )	This is OnIdChanged, a member of class WebServiceLogin.
	OnIdChanging ( <a href="#">see page 648</a> )	This is OnIdChanging, a member of class WebServiceLogin.
	OnLoaded ( <a href="#">see page 649</a> )	This is OnLoaded, a member of class WebServiceLogin.
	OnLoginChanged ( <a href="#">see page 649</a> )	This is OnLoginChanged, a member of class WebServiceLogin.
	OnLoginChanging ( <a href="#">see page 649</a> )	This is OnLoginChanging, a member of class WebServiceLogin.
	OnNameChanged ( <a href="#">see page 649</a> )	This is OnNameChanged, a member of class WebServiceLogin.
	OnNameChanging ( <a href="#">see page 649</a> )	This is OnNameChanging, a member of class WebServiceLogin.
	OnPasswordChanged ( <a href="#">see page 649</a> )	This is OnPasswordChanged, a member of class WebServiceLogin.
	OnPasswordChanging ( <a href="#">see page 649</a> )	This is OnPasswordChanging, a member of class WebServiceLogin.
	OnValidate ( <a href="#">see page 650</a> )	This is OnValidate, a member of class WebServiceLogin.
	SendPropertyChanged ( <a href="#">see page 650</a> )	This is SendPropertyChanged, a member of class WebServiceLogin.

SendPropertyChanging (see page 650)

This is SendPropertyChanging, a member of class WebServiceLogin.

## 1.1.69.1 WebServiceLogin.WebServiceLogin Konstruktor

**C#**

```
public WebServiceLogin();
```

**Anmerkungen**

This is WebServiceLogin, a member of class WebServiceLogin.

## 1.1.69.2 WebServiceLogin Felder

### 1.1.69.2.1 WebServiceLogin.\_Id Feld

**C#**

```
private int _Id;
```

**Anmerkungen**

This is \_Id, a member of class WebServiceLogin.

### 1.1.69.2.2 WebServiceLogin.\_Login Feld

**C#**

```
private string _Login;
```

**Anmerkungen**

This is \_Login, a member of class WebServiceLogin.

### 1.1.69.2.3 WebServiceLogin.\_Name Feld

**C#**

```
private string _Name;
```

**Anmerkungen**

This is \_Name, a member of class WebServiceLogin.

### 1.1.69.2.4 WebServiceLogin.\_Password Feld

**C#**

```
private string _Password;
```

**Anmerkungen**

This is \_Password, a member of class WebServiceLogin.

### 1.1.69.2.5 WebServiceLogin.\_WebServiceLoginCustomer Feld

**C#**

```
private EntitySet<WebServiceLoginCustomer> _WebServiceLoginCustomer;
```

**Anmerkungen**

This is \_WebServiceLoginCustomer, a member of class WebServiceLogin.

### 1.1.69.2.6 WebServiceLogin.emptyChangingEventArgs Feld

**C#**

```
private static PropertyChangingEventArgs emptyChangingEventArgs = new  
PropertyChangingEventArgs(String.Empty);
```

**Anmerkungen**

This is emptyChangingEventArgs, a member of class WebServiceLogin.

## 1.1.69.3 WebServiceLogin Methoden

### 1.1.69.3.1 WebServiceLogin.attach\_WebServiceLoginCustomer Methode

**C#**

```
private void attach_WebServiceLoginCustomer(WebServiceLoginCustomer entity);
```

**Anmerkungen**

This is attach\_WebServiceLoginCustomer, a member of class WebServiceLogin.

### 1.1.69.3.2 WebServiceLogin.detach\_WebServiceLoginCustomer Methode

**C#**

```
private void detach_WebServiceLoginCustomer(WebServiceLoginCustomer entity);
```

**Anmerkungen**

This is detach\_WebServiceLoginCustomer, a member of class WebServiceLogin.

### 1.1.69.3.3 WebServiceLogin.OnCreated Methode

**C#**

```
private void OnCreated();
```

**Anmerkungen**

This is OnCreated, a member of class WebServiceLogin.

### 1.1.69.3.4 WebServiceLogin.OnIdChanged Methode

**C#**

```
private void OnIdChanged();
```

**Anmerkungen**

This is OnIdChanged, a member of class WebServiceLogin.

### 1.1.69.3.5 WebServiceLogin.OnIdChanging Methode

**C#**

```
private void OnIdChanging(int value);
```

**Anmerkungen**

This is OnIdChanging, a member of class WebServiceLogin.

### 1.1.69.3.6 WebServiceLogin.OnLoaded Methode

**C#**

```
private void OnLoaded();
```

**Anmerkungen**

This is OnLoaded, a member of class WebServiceLogin.

### 1.1.69.3.7 WebServiceLogin.OnLoginChanged Methode

**C#**

```
private void OnLoginChanged();
```

**Anmerkungen**

This is OnLoginChanged, a member of class WebServiceLogin.

### 1.1.69.3.8 WebServiceLogin.OnLoginChanging Methode

**C#**

```
private void OnLoginChanging(string value);
```

**Anmerkungen**

This is OnLoginChanging, a member of class WebServiceLogin.

### 1.1.69.3.9 WebServiceLogin.OnNameChanged Methode

**C#**

```
private void OnNameChanged();
```

**Anmerkungen**

This is OnNameChanged, a member of class WebServiceLogin.

### 1.1.69.3.10 WebServiceLogin.OnNameChanging Methode

**C#**

```
private void OnNameChanging(string value);
```

**Anmerkungen**

This is OnNameChanging, a member of class WebServiceLogin.

### 1.1.69.3.11 WebServiceLogin.OnPasswordChanged Methode

**C#**

```
private void OnPasswordChanged();
```

**Anmerkungen**

This is OnPasswordChanged, a member of class WebServiceLogin.

### 1.1.69.3.12 WebServiceLogin.OnPasswordChanging Methode

**C#**

```
private void OnPasswordChanging(string value);
```

**Anmerkungen**

This is OnPasswordChanging, a member of class WebServiceLogin.

**1.1.69.3.13 WebServiceLogin.OnValidate Methode****C#**

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class WebServiceLogin.

**1.1.69.3.14 WebServiceLogin.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class WebServiceLogin.

**1.1.69.3.15 WebServiceLogin.SendPropertyChanging Methode****C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class WebServiceLogin.

**1.1.69.4 WebServiceLogin Eigenschaften****1.1.69.4.1 WebServiceLogin.Id Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Id", DbType="int not null",  
IsPrimaryKey=true)]  
public int Id;
```

**Anmerkungen**

This is Id, a member of class WebServiceLogin.

**1.1.69.4.2 WebServiceLogin.Login Eigenschaft****C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Login", DbType="varchar(20) not  
null", CanBeNull=false)]  
public string Login;
```

**Anmerkungen**

This is Login, a member of class WebServiceLogin.

### 1.1.69.4.3 WebServiceLogin.Name Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Name", DbType="varchar(50) not null", CanBeNull=false)]  
public string Name;
```

**Anmerkungen**

This is Name, a member of class WebServiceLogin.

### 1.1.69.4.4 WebServiceLogin.Password Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_Password", DbType="varchar(20) not null", CanBeNull=false)]  
public string Password;
```

**Anmerkungen**

This is Password, a member of class WebServiceLogin.

### 1.1.69.4.5 WebServiceLogin.WebServiceLoginCustomer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="WebServiceLogin_WebServiceLoginCustomer",  
Storage="_WebServiceLoginCustomer", ThisKey="Id", OtherKey="WebServiceLoginId")]  
public EntitySet<WebServiceLoginCustomer> WebServiceLoginCustomer;
```

**Anmerkungen**

This is WebServiceLoginCustomer, a member of class WebServiceLogin.

## 1.1.69.5 WebServiceLogin Ereignisse

### 1.1.69.5.1 WebServiceLogin.PropertyChanged Ereignis

**C#**

```
public event PropertyChangedEventHandler PropertyChanged;
```

**Anmerkungen**

This is PropertyChanged, a member of class WebServiceLogin.

### 1.1.69.5.2 WebServiceLogin.PropertyChanging Ereignis

**C#**

```
public event PropertyChangingEventHandler PropertyChanging;
```

**Anmerkungen**

This is PropertyChanging, a member of class WebServiceLogin.

## 1.1.70 WebServiceLoginCustomer Klasse

### Klassen Hierarchie

### C#

```
[global::System.Data.Linq.Mapping.TableAttribute()]
public class WebServiceLoginCustomer : INotifyPropertyChanging, INotifyPropertyChanged;
```

```
private void OnValidate(System.Data.Linq.ChangeAction action);
```

**Anmerkungen**

This is OnValidate, a member of class WebServiceLoginCustomer.

**1.1.70.3.6 WebServiceLoginCustomer.OnWebServiceLoginIdChanged Methode****C#**

```
private void OnWebServiceLoginIdChanged();
```

**Anmerkungen**

This is OnWebServiceLoginIdChanged, a member of class WebServiceLoginCustomer.

**1.1.70.3.7 WebServiceLoginCustomer.OnWebServiceLoginIdChanging Methode****C#**

```
private void OnWebServiceLoginIdChanging(int value);
```

**Anmerkungen**

This is OnWebServiceLoginIdChanging, a member of class WebServiceLoginCustomer.

**1.1.70.3.8 WebServiceLoginCustomer.SendPropertyChanged Methode****C#**

```
protected virtual void SendPropertyChanged(String propertyName);
```

**Anmerkungen**

This is SendPropertyChanged, a member of class WebServiceLoginCustomer.

### 1.1.70.3.9 WebServiceLoginCustomer.SendPropertyChanging Methode

**C#**

```
protected virtual void SendPropertyChanging();
```

**Anmerkungen**

This is SendPropertyChanging, a member of class WebServiceLoginCustomer.

### 1.1.70.4 WebServiceLoginCustomer Eigenschaften

#### 1.1.70.4.1 WebServiceLoginCustomer.Customer Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="Customer_WebServiceLoginCustomer",  
Storage="_Customer", ThisKey="CustomerId", OtherKey="Id", IsForeignKey=true)]  
public Customer Customer;
```

**Anmerkungen**

This is Customer, a member of class WebServiceLoginCustomer.

#### 1.1.70.4.2 WebServiceLoginCustomer.CustomerId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_CustomerId",  
DbType="uniqueidentifier not null", IsPrimaryKey=true)]  
public System.Guid CustomerId;
```

**Anmerkungen**

This is CustomerId, a member of class WebServiceLoginCustomer.

#### 1.1.70.4.3 WebServiceLoginCustomer.WebServiceLogin Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.AssociationAttribute(Name="WebServiceLogin_WebServiceLoginCustomer",  
Storage="_WebServiceLogin", ThisKey="WebServiceLoginId", OtherKey="Id", IsForeignKey=true)]  
public WebServiceLogin WebServiceLogin;
```

**Anmerkungen**

This is WebServiceLogin, a member of class WebServiceLoginCustomer.

#### 1.1.70.4.4 WebServiceLoginCustomer.WebServiceLoginId Eigenschaft

**C#**

```
[global::System.Data.Linq.Mapping.ColumnAttribute(Storage="_WebServiceLoginId", DbType="int  
not null", IsPrimaryKey=true)]  
public int WebServiceLoginId;
```

**Anmerkungen**

This is WebServiceLoginId, a member of class WebServiceLoginCustomer.

## 1.1.70.5 WebServiceLoginCustomer Ereignisse

### 1.1.70.5.1 WebServiceLoginCustomer.PropertyChanged Ereignis

C#

```
public event PropertyChangedEventHandler PropertyChanged;
```

Anmerkungen

This is PropertyChanged, a member of class WebServiceLoginCustomer.

### 1.1.70.5.2 WebServiceLoginCustomer.PropertyChanging Ereignis

C#

```
public event PropertyChangingEventHandler PropertyChanging;
```

Anmerkungen

This is PropertyChanging, a member of class WebServiceLoginCustomer.

## 1.1.71 ILogging Interface

Stellt die Schnittstelle zwischen der Datenbank und dem Code dar

Klassen Hierarchie

C#

```
public interface ILogging;
```

Datei

## 1.2.1 AbstractPDFCreator Klasse

Abstrakte Klasse fuer die Dokumente

### Klassen Hierarchie

`KVSCCommon.PDF.AbstractPDFCreator`

### C#

```
public abstract class AbstractPDFCreator;
```

### Datei

AbstractPDFCreator.cs ([see page 693](#))

### Mitglieder

### Methoden

	Name	Beschreibung
	AbstractPDFCreator ( <a href="#">see page 661</a> )	Erstellt das Grundgeruest des PDF Dokuments

### AbstractPDFCreator Felder

	Name	Beschreibung
	bottomMargin ( <a href="#">see page 662</a> )	This is bottomMargin, a member of class AbstractPDFCreator.
	leftMargin ( <a href="#">see page 662</a> )	This is leftMargin, a member of class AbstractPDFCreator.
	pageHeight ( <a href="#">see page 662</a> )	This is pageHeight, a member of class AbstractPDFCreator.
	pageWidth ( <a href="#">see page 662</a> )	This is pageWidth, a member of class AbstractPDFCreator.
	rightMargin ( <a href="#">see page 662</a> )	This is rightMargin, a member of class AbstractPDFCreator.
	spaceAfterHeading ( <a href="#">see page 662</a> )	This is spaceAfterHeading, a member of class AbstractPDFCreator.
	topMargin ( <a href="#">see page 662</a> )	This is topMargin, a member of class AbstractPDFCreator.

### AbstractPDFCreator Methoden

	Name	Beschreibung
 	DefineHeaderFooter ( <a href="#">see page 663</a> )	Definiert die Header ( <a href="#">see page 665</a> ) und Footer ( <a href="#">see page 665</a> ) f��r das Dokument.
 	DefinePageSettings ( <a href="#">see page 663</a> )	Definiert die Seiteneigenschaften f��r die angegebene Sektion.
 	DefineStyles ( <a href="#">see page 663</a> )	Definiert die Styles, die im Dokument verwendet werden k��nnen.
	GetTableFromDataTable ( <a href="#">see page 663</a> )	Erstellt aus einer DataTable eine Micradoc Tabelle
 	WriteAppendix ( <a href="#">see page 663</a> )	Schreibt den Anhang des Dokuments.
 	WriteContent ( <a href="#">see page 664</a> )	Schreibt den Inhalt des Dokuments.
 	WriteCoverSheet ( <a href="#">see page 664</a> )	Schreibt das Deckblatt des Dokuments.
 	WriteHeadline ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text als ��berschrift.
 	WriteHeadline1 ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text direkt unter der ��berschrift.
 	WriteInfoBox ( <a href="#">see page 664</a> )	This is WriteInfoBox, a member of class AbstractPDFCreator.
 	WriteLetterHead ( <a href="#">see page 664</a> )	Schreibt den Briefkopf.
 	WritePDF ( <a href="#">see page 665</a> )	Schreibt das PDFDokument in den angegebenen MemoryStream.

### AbstractPDFCreator Eigenschaften

	Name	Beschreibung
	Document ( <a href="#">see page 665</a> )	This is Document, a member of class AbstractPDFCreator.
	Footer ( <a href="#">see page 665</a> )	This is Footer, a member of class AbstractPDFCreator.
	FooterDistance ( <a href="#">see page 665</a> )	This is FooterDistance, a member of class AbstractPDFCreator.
	Header ( <a href="#">see page 665</a> )	This is Header, a member of class AbstractPDFCreator.
	Headline ( <a href="#">see page 665</a> )	This is Headline, a member of class AbstractPDFCreator.
	Headline2 ( <a href="#">see page 666</a> )	This is Headline2, a member of class AbstractPDFCreator.
	isAppendix ( <a href="#">see page 666</a> )	This is isAppendix, a member of class AbstractPDFCreator.
	IsInvoice ( <a href="#">see page 666</a> )	This is IsInvoice, a member of class AbstractPDFCreator.
	Letterhead ( <a href="#">see page 666</a> )	This is Letterhead, a member of class AbstractPDFCreator.
	LogoHeight ( <a href="#">see page 666</a> )	This is LogoHeight, a member of class AbstractPDFCreator.

	TableShadingColor ( <a href="#">↗</a> see page 666)	This is TableShadingColor, a member of class AbstractPDFCreator.
---	---	--

### AbstractPDFCreator Eigenschaften

	Name	Beschreibung
	Document ( <a href="#">↗</a> see page 665)	This is Document, a member of class AbstractPDFCreator.
	Footer ( <a href="#">↗</a> see page 665)	This is Footer, a member of class AbstractPDFCreator.
	FooterDistance ( <a href="#">↗</a> see page 665)	This is FooterDistance, a member of class AbstractPDFCreator.
	Header ( <a href="#">↗</a> see page 665)	This is Header, a member of class AbstractPDFCreator.
	Headline ( <a href="#">↗</a> see page 665)	This is Headline, a member of class AbstractPDFCreator.
	Headline2 ( <a href="#">↗</a> see page 666)	This is Headline2, a member of class AbstractPDFCreator.
	isAppendix ( <a href="#">↗</a> see page 666)	This is isAppendix, a member of class AbstractPDFCreator.
	IsInvoice ( <a href="#">↗</a> see page 666)	This is IsInvoice, a member of class AbstractPDFCreator.
	Letterhead ( <a href="#">↗</a> see page 666)	This is Letterhead, a member of class AbstractPDFCreator.
	LogoHeight ( <a href="#">↗</a> see page 666)	This is LogoHeight, a member of class AbstractPDFCreator.
	TableShadingColor ( <a href="#">↗</a> see page 666)	This is TableShadingColor, a member of class AbstractPDFCreator.

### AbstractPDFCreator Felder

	Name	Beschreibung
	bottomMargin ( <a href="#">↗</a> see page 662)	This is bottomMargin, a member of class AbstractPDFCreator.
	leftMargin ( <a href="#">↗</a> see page 662)	This is leftMargin, a member of class AbstractPDFCreator.
	pageHeight ( <a href="#">↗</a> see page 662)	This is pageHeight, a member of class AbstractPDFCreator.
	pageWidth ( <a href="#">↗</a> see page 662)	This is pageWidth, a member of class AbstractPDFCreator.
	rightMargin ( <a href="#">↗</a> see page 662)	This is rightMargin, a member of class AbstractPDFCreator.
	spaceAfterHeading ( <a href="#">↗</a> see page 662)	This is spaceAfterHeading, a member of class AbstractPDFCreator.
	topMargin ( <a href="#">↗</a> see page 662)	This is topMargin, a member of class AbstractPDFCreator.

### AbstractPDFCreator Methoden

	Name	Beschreibung
	DefineHeaderFooter ( <a href="#">↗</a> see page 663)	Definiert die Header ( <a href="#">↗</a> see page 665) und Footer ( <a href="#">↗</a> see page 665) für das Dokument.
	DefinePageSettings ( <a href="#">↗</a> see page 663)	Definiert die Seiteneigenschaften für die angegebene Sektion.
	DefineStyles ( <a href="#">↗</a> see page 663)	Definiert die Styles, die im Dokument verwendet werden können.
	GetTableFromDataTable ( <a href="#">↗</a> see page 663)	Erstellt aus einer DataTable eine Micradoc Tabelle
	WriteAppendix ( <a href="#">↗</a> see page 663)	Schreibt den Anhang des Dokuments.
	WriteContent ( <a href="#">↗</a> see page 664)	Schreibt den Inhalt des Dokuments.
	WriteCoverSheet ( <a href="#">↗</a> see page 664)	Schreibt das Deckblatt des Dokuments.
	WriteHeadline ( <a href="#">↗</a> see page 664)	Schreibt den angegebenen Text als Überschrift.
	WriteHeadline1 ( <a href="#">↗</a> see page 664)	Schreibt den angegebenen Text direkt unter der Überschrift.
	WriteInfoBox ( <a href="#">↗</a> see page 664)	This is WriteInfoBox, a member of class AbstractPDFCreator.
	WriteLetterHead ( <a href="#">↗</a> see page 664)	Schreibt den Briefkopf.
	WritePDF ( <a href="#">↗</a> see page 665)	Schreibt das PDFDokument in den angegebenen MemoryStream.

## 1.2.1.1 AbstractPDFCreator.AbstractPDFCreator Konstruktor

Erstellt das Grundgerüst des PDF Dokuments

**C#**

```
protected AbstractPDFCreator(KVSCCommon.Database.DataClasses1DataContext dbContext, string
logoFilePath, bool _isInvoice);
```

**Parameter**

Parameter	Beschreibung
KVSCCommon.Database.DataClasses1DataContext dbContext	
string logoFilePath	
bool _isInvoice	

## 1.2.1.2 AbstractPDFCreator Felder

### 1.2.1.2.1 AbstractPDFCreator.bottomMargin Feld

**C#**

```
protected int bottomMargin = 35;
```

**Anmerkungen**

This is bottomMargin, a member of class AbstractPDFCreator.

### 1.2.1.2.2 AbstractPDFCreator.leftMargin Feld

**C#**

```
protected int leftMargin = 25;
```

**Anmerkungen**

This is leftMargin, a member of class AbstractPDFCreator.

### 1.2.1.2.3 AbstractPDFCreator.pageHeight Feld

**C#**

```
protected int pageHeight = 297;
```

**Anmerkungen**

This is pageHeight, a member of class AbstractPDFCreator.

### 1.2.1.2.4 AbstractPDFCreator.pageWidth Feld

**C#**

```
protected int pageWidth = 210;
```

**Anmerkungen**

This is pageWidth, a member of class AbstractPDFCreator.

### 1.2.1.2.5 AbstractPDFCreator.rightMargin Feld

**C#**

```
protected int rightMargin = 25;
```

**Anmerkungen**

This is rightMargin, a member of class AbstractPDFCreator.

### 1.2.1.2.6 AbstractPDFCreator.spaceAfterHeading Feld

**C#**

```
protected int spaceAfterHeading = 10;
```

**Anmerkungen**

This is spaceAfterHeading, a member of class AbstractPDFCreator.

### 1.2.1.2.7 AbstractPDFCreator.topMargin Feld

**C#**

```
protected int topMargin = 35;
```

## Anmerkungen

This is topMargin, a member of class AbstractPDFCreator.

## 1.2.1.3 AbstractPDFCreator Methoden

### 1.2.1.3.1 AbstractPDFCreator.DefineHeaderFooter Methode

Definiert die Header (see page 665) und Footer (see page 665) für das Dokument.

#### C#

```
protected virtual void DefineHeaderFooter();
```

### 1.2.1.3.2 AbstractPDFCreator.DefinePageSettings Methode

Definiert die Seiteneigenschaften für die angegebene Sektion.

#### C#

```
protected virtual void DefinePageSettings(Section section);
```

#### Parameter

Parameter	Beschreibung
Section section	Sektion des Dokuments.

### 1.2.1.3.3 AbstractPDFCreator.DefineStyles Methode

Definiert die Styles, die im Dokument verwendet werden können.

#### C#

```
protected virtual void DefineStyles();
```

### 1.2.1.3.4 AbstractPDFCreator.GetTableFromDataTable Methode

Erstellt aus einer DataTable eine Micradoc Tabelle

#### C#

```
protected Table GetTableFromDataTable(DataTable dt, List<int> columnWidths, List<int> shadedColumns, bool stretchToPageWidth);
```

#### Parameter

Parameter	Beschreibung
DataTable dt	DataTable
List<int> columnWidths	Spaltenbreite
List<int> shadedColumns	Spalten mit Schattierung
bool stretchToPageWidth	Gibt an ob die Tabelle auf das gesamte Blatt gestretch werden soll

#### Resultate

Micradoc Tabelle

### 1.2.1.3.5 AbstractPDFCreator.WriteAppendix Methode

Schreibt den Anhang des Dokuments.

#### C#

```
protected abstract void WriteAppendix();
```

### 1.2.1.3.6 AbstractPDFCreator.WriteContent Methode

Schreibt den Inhalt des Dokuments.

**C#**

```
protected abstract void WriteContent();
```

### 1.2.1.3.7 AbstractPDFCreator.WriteCoverSheet Methode

Schreibt das Deckblatt des Dokuments.

**C#**

```
protected abstract void WriteCoverSheet();
```

### 1.2.1.3.8 AbstractPDFCreator.WriteHeadline Methode

Schreibt den angegebenen Text als Ãœberschrift.

**C#**

```
protected virtual void WriteHeadline(string headline);
```

**Parameter**

Parameter	Beschreibung
string headline	Ãœberschriftstext.

### 1.2.1.3.9 AbstractPDFCreator.WriteHeadline1 Methode

Schreibt den angegebenen Text direkt unter der Ã¼berschrift.

**C#**

```
protected virtual void WriteHeadline1(string headline);
```

**Parameter**

Parameter	Beschreibung
string headline	Ãœberschriftstext.

### 1.2.1.3.10 AbstractPDFCreator.WriteInfoBox Methode

**C#**

```
protected virtual void WriteInfoBox();
```

**Anmerkungen**

This is WriteInfoBox, a member of class AbstractPDFCreator.

### 1.2.1.3.11 AbstractPDFCreator.WriteLetterHead Methode

Schreibt den Briefkopf.

**C#**

```
protected virtual void WriteLetterHead(LetterHead letterhead);
```

**Parameter**

Parameter	Beschreibung
LetterHead letterhead	

### 1.2.1.3.12 AbstractPDFCreator.WritePDF Methode

Schreibt das PDFDokument in den angegebenen MemoryStream.

**C#**

```
public virtual void WritePDF(MemoryStream streamToWriteTo);
```

**Parameter**

Parameter	Beschreibung
MemoryStream streamToWriteTo	MemoryStream, in den geschrieben wird.

### 1.2.1.4 AbstractPDFCreator Eigenschaften

#### 1.2.1.4.1 AbstractPDFCreator.Document Eigenschaft

**C#**

```
internal Document Document;
```

**Anmerkungen**

This is Document, a member of class AbstractPDFCreator.

#### 1.2.1.4.2 AbstractPDFCreator.Footer Eigenschaft

**C#**

```
protected HeaderFooter Footer;
```

**Anmerkungen**

This is Footer, a member of class AbstractPDFCreator.

#### 1.2.1.4.3 AbstractPDFCreator.FooterDistance Eigenschaft

**C#**

```
protected Unit FooterDistance;
```

**Anmerkungen**

This is FooterDistance, a member of class AbstractPDFCreator.

#### 1.2.1.4.4 AbstractPDFCreator.Header Eigenschaft

**C#**

```
protected HeaderFooter Header;
```

**Anmerkungen**

This is Header, a member of class AbstractPDFCreator.

#### 1.2.1.4.5 AbstractPDFCreator.Headline Eigenschaft

**C#**

```
protected string Headline;
```

**Anmerkungen**

This is Headline, a member of class AbstractPDFCreator.

#### 1.2.1.4.6 AbstractPDFCreator.Headline2 Eigenschaft

**C#**

```
protected string Headline2;
```

**Anmerkungen**

This is Headline2, a member of class AbstractPDFCreator.

#### 1.2.1.4.7 AbstractPDFCreator.isAppendix Eigenschaft

**C#**

```
protected bool isAppendix;
```

**Anmerkungen**

This is isAppendix, a member of class AbstractPDFCreator.

#### 1.2.1.4.8 AbstractPDFCreator.IsInvoice Eigenschaft

**C#**

```
public bool IsInvoice;
```

**Anmerkungen**

This is IsInvoice, a member of class AbstractPDFCreator.

#### 1.2.1.4.9 AbstractPDFCreator.Letterhead Eigenschaft

**C#**

```
protected LetterHead Letterhead;
```

**Anmerkungen**

This is Letterhead, a member of class AbstractPDFCreator.

#### 1.2.1.4.10 AbstractPDFCreator.LogoHeight Eigenschaft

**C#**

```
protected Unit LogoHeight;
```

**Anmerkungen**

This is LogoHeight, a member of class AbstractPDFCreator.

#### 1.2.1.4.11 AbstractPDFCreator.TableShadingColor Eigenschaft

**C#**

```
protected Color TableShadingColor;
```

**Anmerkungen**

This is TableShadingColor, a member of class AbstractPDFCreator.

## 1.2.2 GroupedAppendix Klasse

Hilfsklasse fuer die Zusatzdokumente (Anhang)

### Klassen Hierarchie

[KVSCCommon.PDF.GroupedAppendix](#)

### C#

```
public class GroupedAppendix;
```

### Datei

GroupedAppendix.cs ([↗](#) see page 696)

### Mitglieder

#### GroupedAppendix Felder

	Name	Beschreibung
	Amount ( <a href="#">↗</a> see page 667)	This is Amount, a member of class GroupedAppendix.
	AuthorativeCharge ( <a href="#">↗</a> see page 668)	This is AuthorativeCharge, a member of class GroupedAppendix.
	Bezeichnung ( <a href="#">↗</a> see page 668)	This is Bezeichnung, a member of class GroupedAppendix.
	Farbe ( <a href="#">↗</a> see page 668)	This is Farbe, a member of class GroupedAppendix.
	Halter ( <a href="#">↗</a> see page 668)	This is Halter, a member of class GroupedAppendix.
	IsAuthorativeCharge ( <a href="#">↗</a> see page 668)	This is IsAuthorativeCharge, a member of class GroupedAppendix.
	Kennzeichen ( <a href="#">↗</a> see page 668)	This is Kennzeichen, a member of class GroupedAppendix.
	OrderItemId ( <a href="#">↗</a> see page 668)	This is OrderItemId, a member of class GroupedAppendix.
	OrderNumber ( <a href="#">↗</a> see page 669)	This is OrderNumber, a member of class GroupedAppendix.
	PosNumber ( <a href="#">↗</a> see page 669)	This is PosNumber, a member of class GroupedAppendix.
	Vin ( <a href="#">↗</a> see page 669)	This is Vin, a member of class GroupedAppendix.
	Zulassungsdatum ( <a href="#">↗</a> see page 669)	This is Zulassungsdatum, a member of class GroupedAppendix.

#### GroupedAppendix Felder

	Name	Beschreibung
	Amount ( <a href="#">↗</a> see page 667)	This is Amount, a member of class GroupedAppendix.
	AuthorativeCharge ( <a href="#">↗</a> see page 668)	This is AuthorativeCharge, a member of class GroupedAppendix.

	Vin ( <a href="#">↗</a> see page 669)	This is Vin, a member of class GroupedAppendix.
	Zulassungsdatum ( <a href="#">↗</a> see page 669)	This is Zulassungsdatum, a member of class GroupedAppendix.

### 1.2.2.1 GroupedAppendix Felder

#### 1.2.2.1.1 GroupedAppendix.Amount Feld

### C#

```
public string Amount;
```

### Anmerkungen

This is Amount, a member of class GroupedAppendix.

### 1.2.2.1.2 GroupedAppendix.AuthorativeCharge Feld

**C#**

```
public string AuthorativeCharge;
```

**Anmerkungen**

This is AuthorativeCharge, a member of class GroupedAppendix.

### 1.2.2.1.3 GroupedAppendix.Bezeichnung Feld

**C#**

```
public string Bezeichnung;
```

**Anmerkungen**

This is Bezeichnung, a member of class GroupedAppendix.

### 1.2.2.1.4 GroupedAppendix.Farbe Feld

**C#**

```
public string Farbe;
```

**Anmerkungen**

This is Farbe, a member of class GroupedAppendix.

### 1.2.2.1.5 GroupedAppendix.Halter Feld

**C#**

```
public string Halter;
```

**Anmerkungen**

This is Halter, a member of class GroupedAppendix.

### 1.2.2.1.6 GroupedAppendix.IsAuthorativeCharge Feld

**C#**

```
public bool IsAuthorativeCharge;
```

**Anmerkungen**

This is IsAuthorativeCharge, a member of class GroupedAppendix.

### 1.2.2.1.7 GroupedAppendix.Kennzeichen Feld

**C#**

```
public string Kennzeichen;
```

**Anmerkungen**

This is Kennzeichen, a member of class GroupedAppendix.

### 1.2.2.1.8 GroupedAppendix.OrderItemId Feld

**C#**

```
public Guid? OrderItemId;
```

**Anmerkungen**

This is OrderItemId, a member of class GroupedAppendix.

**1.2.2.1.9 GroupedAppendix.OrderNumber Feld****C#**

```
public string OrderNumber;
```

**Anmerkungen**

This is OrderNumber, a member of class GroupedAppendix.

**1.2.2.1.10 GroupedAppendix.PosNumber Feld****C#**

```
public int PosNumber;
```

**Anmerkungen**

This is PosNumber, a member of class GroupedAppendix.

**1.2.2.1.11 GroupedAppendix.Vin Feld****C#**

```
public string Vin;
```

**Anmerkungen**

This is Vin, a member of class GroupedAppendix.

**1.2.2.1.12 GroupedAppendix.Zulassungsdatum Feld****C#**

```
public string Zulassungsdatum;
```

**Anmerkungen**

This is Zulassungsdatum, a member of class GroupedAppendix.

---

**1.2.3 HeaderFooter Klasse**

Klasse fuer die Kopf und Fusszeile

**Klassen Hierarchie**

```
KVSCCommon.PDF.HeaderFooter
```

**C#**

```
public class HeaderFooter;
```

**Datei**

AbstractPDFCreator.cs (📄 see page 693)

**Mitglieder****Methoden**

	Name	Beschreibung
	HeaderFooter ( <a href="#">see page 670</a> )	This is HeaderFooter, a member of class HeaderFooter.

**HeaderFooter Methoden**

	Name	Beschreibung
	Write ( <a href="#">see page 670</a> )	Erstellt das Dokumentenlayout als eine Micra Doc Tabelle

**HeaderFooter Eigenschaften**

	Name	Beschreibung
	Blocks ( <a href="#">see page 671</a> )	This is Blocks, a member of class HeaderFooter.
	FontSize ( <a href="#">see page 671</a> )	This is FontSize, a member of class HeaderFooter.
	LogoFilePath ( <a href="#">see page 671</a> )	This is LogoFilePath, a member of class HeaderFooter.
	LogoHeight ( <a href="#">see page 671</a> )	This is LogoHeight, a member of class HeaderFooter.
	WritePageCount ( <a href="#">see page 671</a> )	This is WritePageCount, a member of class HeaderFooter.

**HeaderFooter Eigenschaften**

	Name	Beschreibung
	Blocks ( <a href="#">see page 671</a> )	This is Blocks, a member of class HeaderFooter.
	FontSize ( <a href="#">see page 671</a> )	This is FontSize, a member of class HeaderFooter.
	LogoFilePath ( <a href="#">see page 671</a> )	This is LogoFilePath, a member of class HeaderFooter.
	LogoHeight ( <a href="#">see page 671</a> )	This is LogoHeight, a member of class HeaderFooter.
	WritePageCount ( <a href="#">see page 671</a> )	This is WritePageCount, a member of class HeaderFooter.

**HeaderFooter Methoden**

	Name	Beschreibung
	Write ( <a href="#">see page 670</a> )	Erstellt das Dokumentenlayout als eine Micra Doc Tabelle

## 1.2.3.1 HeaderFooter.HeaderFooter Konstruktor

**C#**

```
public HeaderFooter();
```

**Anmerkungen**

This is HeaderFooter, a member of class HeaderFooter.

## 1.2.3.2 HeaderFooter Methoden

### 1.2.3.2.1 HeaderFooter.Write Methode

Erstellt das Dokumentenlayout als eine Micra Doc Tabelle

**C#**

```
internal virtual Table Write(MigraDoc.DocumentObjectModel.HeaderFooter hf);
```

**Parameter**

Parameter	Beschreibung
MigraDoc.DocumentObjectModel.HeaderFooter hf	HeaderFooter ( <a href="#">see page 669</a> )

**Resultate**

Tabelle

### 1.2.3.3 HeaderFooter Eigenschaften

#### 1.2.3.3.1 HeaderFooter.Blocks Eigenschaft

**C#**

```
public List<List<string>> Blocks;
```

**Anmerkungen**

This is Blocks, a member of class HeaderFooter.

#### 1.2.3.3.2 HeaderFooter.FontSize Eigenschaft

**C#**

```
public int FontSize;
```

**Anmerkungen**

This is FontSize, a member of class HeaderFooter.

#### 1.2.3.3.3 HeaderFooter.LogoFilePath Eigenschaft

**C#**

```
public string LogoFilePath;
```

**Anmerkungen**

This is LogoFilePath, a member of class HeaderFooter.

#### 1.2.3.3.4 HeaderFooter.LogoHeight Eigenschaft

**C#**

```
public Unit LogoHeight;
```

**Anmerkungen**

This is LogoHeight, a member of class HeaderFooter.

#### 1.2.3.3.5 HeaderFooter.WritePageCount Eigenschaft

**C#**

```
public bool WritePageCount;
```

**Anmerkungen**

This is WritePageCount, a member of class HeaderFooter.

---

## 1.2.4 InvoicePDF Klasse

Klasse fuer das Erstellen eines PDF Dokuments aus einer Rechnung

**Klassen Hierarchie**

**C#**

```
public class InvoicePDF : AbstractPDFCreator;
```

**Datei**

InvoicePDF.cs (🔗 see page 697)

**Mitglieder****Methoden**

	Name	Beschreibung
🔗	AbstractPDFCreator (🔗 see page 661)	Erstellt das Grundgeruest des PDF Dokuments

**InvoicePDF Klasse**

	Name	Beschreibung
🔗	InvoicePDF (🔗 see page 674)	Standartkonstruktort fuer die Klasse InvoicePDF

**AbstractPDFCreator Felder**

	Name	Beschreibung
🔗	bottomMargin (🔗 see page 662)	This is bottomMargin, a member of class AbstractPDFCreator.
🔗	leftMargin (🔗 see page 662)	This is leftMargin, a member of class AbstractPDFCreator.
🔗	pageHeight (🔗 see page 662)	This is pageHeight, a member of class AbstractPDFCreator.
🔗	pageWidth (🔗 see page 662)	This is pageWidth, a member of class AbstractPDFCreator.
🔗	rightMargin (🔗 see page 662)	This is rightMargin, a member of class AbstractPDFCreator.
🔗	spaceAfterHeading (🔗 see page 662)	This is spaceAfterHeading, a member of class AbstractPDFCreator.
🔗	topMargin (🔗 see page 662)	This is topMargin, a member of class AbstractPDFCreator.

**AbstractPDFCreator Methoden**

	Name	Beschreibung
🔗 V	DefineHeaderFooter (🔗 see page 663)	Definiert die Header (🔗 see page 665) und Footer (🔗 see page 665) fÃ¼r das Dokument.
🔗 V	DefinePageSettings (🔗 see page 663)	Definiert die Seiteneigenschaften fÃ¼r die angegebene Sektion.
🔗 V	DefineStyles (🔗 see page 663)	Definiert die Styles, die im Dokument verwendet werden kÃ¶nnen.
🔗	GetTableFromDataTable (🔗 see page 663)	Erstellt aus einer DataTable eine Micradoc Tabelle
🔗 A	WriteAppendix (🔗 see page 663)	Schreibt den Anhang des Dokuments.
🔗 A	WriteContent (🔗 see page 664)	Schreibt den Inhalt des Dokuments.
🔗 A	WriteCoverSheet (🔗 see page 664)	Schreibt das Deckblatt des Dokuments.
🔗 V	WriteHeadline (🔗 see page 664)	Schreibt den angegebenen Text als Ãberschrift.
🔗 V	WriteHeadline1 (🔗 see page 664)	Schreibt den angegebenen Text direkt unter der Ãberschrift.
🔗 V	WriteInfoBox (🔗 see page 664)	This is WriteInfoBox, a member of class AbstractPDFCreator.
🔗 V	WriteLetterHead (🔗 see page 664)	Schreibt den Briefkopf.
🔗 V	WritePDF (🔗 see page 665)	Schreibt das PDFDokument in den angegebenen MemoryStream.

**InvoicePDF Klasse**

	Name	Beschreibung
🔗	AddHeaderLetter (🔗 see page 674)	This is AddHeaderLetter, a member of class InvoicePDF.
🔗	GetDetailDataTable (🔗 see page 674)	Gibt die DataTable fuer die Anhaenge aus der Rechnung
🔗	GetOverviewDataTable (🔗 see page 674)	Erstelle die gruppierten Rechnungspositionen Tabelle
🔗	Utf8Iso (🔗 see page 674)	Filtere die Sonderzeichen raus
🔗	WriteAppendix (🔗 see page 675)	Erstelle die Anhaenge/Erweiterungen
🔗	WriteContent (🔗 see page 675)	Erstelle den Kontent
🔗	WriteCoverSheet (🔗 see page 675)	Erstelle den Rechnugnskopf
🔗	WriteInfoBox (🔗 see page 675)	Erstelle die Infobox in der Rechnung

**AbstractPDFCreator Eigenschaften**

	Name	Beschreibung
🔗	Document (🔗 see page 665)	This is Document, a member of class AbstractPDFCreator.
🔗	Footer (🔗 see page 665)	This is Footer, a member of class AbstractPDFCreator.
🔗	FooterDistance (🔗 see page 665)	This is FooterDistance, a member of class AbstractPDFCreator.
🔗	Header (🔗 see page 665)	This is Header, a member of class AbstractPDFCreator.

	Headline ( <a href="#">see page 665</a> )	This is Headline, a member of class AbstractPDFCreator.
	Headline2 ( <a href="#">see page 666</a> )	This is Headline2, a member of class AbstractPDFCreator.
	isAppendix ( <a href="#">see page 666</a> )	This is isAppendix, a member of class AbstractPDFCreator.
	IsInvoice ( <a href="#">see page 666</a> )	This is IsInvoice, a member of class AbstractPDFCreator.
	Letterhead ( <a href="#">see page 666</a> )	This is Letterhead, a member of class AbstractPDFCreator.
	LogoHeight ( <a href="#">see page 666</a> )	This is LogoHeight, a member of class AbstractPDFCreator.
	TableShadingColor ( <a href="#">see page 666</a> )	This is TableShadingColor, a member of class AbstractPDFCreator.

### InvoicePDF Klasse

	Name	Beschreibung
	_dbContext ( <a href="#">see page 675</a> )	Datenbankkontext
	Invoice ( <a href="#">see page 675</a> )	Rechnungsobjekt
	Preview ( <a href="#">see page 675</a> )	Gibt an, ob es sich um eine Vorschau handelt

### AbstractPDFCreator Eigenschaften

	Name	Beschreibung
	Document ( <a href="#">see page 665</a> )	This is Document, a member of class AbstractPDFCreator.
	Footer ( <a href="#">see page 665</a> )	This is Footer, a member of class AbstractPDFCreator.
	FooterDistance ( <a href="#">see page 665</a> )	This is FooterDistance, a member of class AbstractPDFCreator.
	Header ( <a href="#">see page 665</a> )	This is Header, a member of class AbstractPDFCreator.
	Headline ( <a href="#">see page 665</a> )	This is Headline, a member of class AbstractPDFCreator.
	Headline2 ( <a href="#">see page 666</a> )	This is Headline2, a member of class AbstractPDFCreator.
	isAppendix ( <a href="#">see page 666</a> )	This is isAppendix, a member of class AbstractPDFCreator.
	IsInvoice ( <a href="#">see page 666</a> )	This is IsInvoice, a member of class AbstractPDFCreator.
	Letterhead ( <a href="#">see page 666</a> )	This is Letterhead, a member of class AbstractPDFCreator.
	LogoHeight ( <a href="#">see page 666</a> )	This is LogoHeight, a member of class AbstractPDFCreator.
	TableShadingColor ( <a href="#">see page 666</a> )	This is TableShadingColor, a member of class AbstractPDFCreator.

### InvoicePDF Klasse

	Name	Beschreibung
	_dbContext ( <a href="#">see page 675</a> )	Datenbankkontext
	Invoice ( <a href="#">see page 675</a> )	Rechnungsobjekt
	Preview ( <a href="#">see page 675</a> )	Gibt an, ob es sich um eine Vorschau handelt

### AbstractPDFCreator Felder

	Name	Beschreibung
	bottomMargin ( <a href="#">see page 662</a> )	This is bottomMargin, a member of class AbstractPDFCreator.
	leftMargin ( <a href="#">see page 662</a> )	This is leftMargin, a member of class AbstractPDFCreator.
	pageHeight ( <a href="#">see page 662</a> )	This is pageHeight, a member of class AbstractPDFCreator.
	pageWidth ( <a href="#">see page 662</a> )	This is pageWidth, a member of class AbstractPDFCreator.
	rightMargin ( <a href="#">see page 662</a> )	This is rightMargin, a member of class AbstractPDFCreator.
	spaceAfterHeading ( <a href="#">see page 662</a> )	This is spaceAfterHeading, a member of class AbstractPDFCreator.
	topMargin ( <a href="#">see page 662</a> )	This is topMargin, a member of class AbstractPDFCreator.

### AbstractPDFCreator Methoden

	Name	Beschreibung
	DefineHeaderFooter ( <a href="#">see page 663</a> )	Definiert die Header ( <a href="#">see page 665</a> ) und Footer ( <a href="#">see page 665</a> ) f��r das Dokument.
	DefinePageSettings ( <a href="#">see page 663</a> )	Definiert die Seiteneigenschaften f��r die angegebene Sektion.
	DefineStyles ( <a href="#">see page 663</a> )	Definiert die Styles, die im Dokument verwendet werden k��nnen.
	GetTableFromDataTable ( <a href="#">see page 663</a> )	Erstellt aus einer DataTable eine Micradoc Tabelle
	WriteAppendix ( <a href="#">see page 663</a> )	Schreibt den Anhang des Dokuments.
	WriteContent ( <a href="#">see page 664</a> )	Schreibt den Inhalt des Dokuments.
	WriteCoverSheet ( <a href="#">see page 664</a> )	Schreibt das Deckblatt des Dokuments.
	WriteHeadline ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text als ��berschrift.
	WriteHeadline1 ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text direkt unter der ��berschrift.
	WriteInfoBox ( <a href="#">see page 664</a> )	This is WriteInfoBox, a member of class AbstractPDFCreator.
	WriteLetterHead ( <a href="#">see page 664</a> )	Schreibt den Briefkopf.
	WritePDF ( <a href="#">see page 665</a> )	Schreibt das PDFDokument in den angegebenen MemoryStream.

**InvoicePDF Klasse**

	Name	Beschreibung
	AddHeaderLetter ( <a href="#">↗</a> see page 674)	This is AddHeaderLetter, a member of class InvoicePDF.
	GetDetailDataTable ( <a href="#">↗</a> see page 674)	Gibt die DataTable fuer die Anhaenge aus der Rechnung
	GetOverviewDataTable ( <a href="#">↗</a> see page 674)	Erstelle die gruppierten Rechnungspositionen Tabelle
	Utf8Iso ( <a href="#">↗</a> see page 674)	Filtere die Sonderzeichen raus
	WriteAppendix ( <a href="#">↗</a> see page 675)	Erstelle die Anhaenge/Erweiterungen
	WriteContent ( <a href="#">↗</a> see page 675)	Erstelle den Kontent
	WriteCoverSheet ( <a href="#">↗</a> see page 675)	Erstelle den Rechnugnskopf
	WriteInfoBox ( <a href="#">↗</a> see page 675)	Erstelle die Infobox in der Rechnung

**1.2.4.1 InvoicePDF.InvoicePDF Konstruktor**

Standartkonstruktort fuer die Klasse InvoicePDF

**C#**

```
public InvoicePDF(DataClasses1DataContext dbContext, Invoice invoice, string logoFilePath);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB Kontext
Invoice invoice	Rechnungsobjekt
string logoFilePath	Pfad zum Logo

**1.2.4.2 InvoicePDF Methoden****1.2.4.2.1 InvoicePDF.AddHeaderLetter Methode****C#**

```
private void AddHeaderLetter();
```

**Anmerkungen**

This is AddHeaderLetter, a member of class InvoicePDF.

**1.2.4.2.2 InvoicePDF.GetDetailDataTable Methode**

Gibt die DataTable fuer die Anhaenge aus der Rechnung

**C#**

```
private DataTable GetDetailDataTable();
```

**1.2.4.2.3 InvoicePDF.GetOverviewDataTable Methode**

Erstelle die gruppierten Rechnungspositionen Tabelle

**C#**

```
private DataTable GetOverviewDataTable();
```

**1.2.4.2.4 InvoicePDF.Utf8Iso Methode**

Filtere die Sonderzeichen raus

**C#**

```
public object Utf8Iso(string vsStr);
```

**Parameter**

Parameter	Beschreibung
string vsStr	

**1.2.4.2.5 InvoicePDF.WriteAppendix Methode**

Erstelle die Anhaenge/Erweiterungen

**C#**

```
protected override void WriteAppendix();
```

**1.2.4.2.6 InvoicePDF.WriteContent Methode**

Erstelle den Kontent

**C#**

```
protected override void WriteContent();
```

**1.2.4.2.7 InvoicePDF.WriteCoverSheet Methode**

Erstelle den Rechnugnskopf

**C#**

```
protected override void WriteCoverSheet();
```

**1.2.4.2.8 InvoicePDF.WriteInfoBox Methode**

Erstelle die Infobox in der Rechnung

**C#**

```
protected override void WriteInfoBox();
```

**1.2.4.3 InvoicePDF Eigenschaften****1.2.4.3.1 InvoicePDF.\_dbContext Eigenschaft**

Datenbankkontext

**C#**

```
public DataClasses1DataContext _dbContext;
```

**1.2.4.3.2 InvoicePDF.Invoice Eigenschaft**

Rechnungsobjekt

**C#**

```
protected Invoice Invoice;
```

**1.2.4.3.3 InvoicePDF.Preview Eigenschaft**

Gibt an, ob es sich um eine Vorschau handelt

**C#**

```
public bool Preview;
```

# 1.2.5 LetterHead Klasse

Klasse fuer die Kopfzeile des PDF Dokuments

Klassen Hierarchie

[KVSCCommon.PDF.LetterHead](#)

C#

```
public class LetterHead;
```

Datei

AbstractPDFCreator.cs ([see page 693](#))

Mitglieder

Methoden

	Name	Beschreibung
	LetterHead ( <a href="#">see page 676</a> )	This is LetterHead, a member of class LetterHead.

LetterHead Eigenschaften

	Name	Beschreibung
	Lines ( <a href="#">see page 676</a> )	This is Lines, a member of class LetterHead.
	Topline ( <a href="#">see page 676</a> )	This is Topline, a member of class LetterHead.

LetterHead Eigenschaften

	Name	Beschreibung
	Lines ( <a href="#">see page 676</a> )	This is Lines, a member of class LetterHead.
	Topline ( <a href="#">see page 676</a> )	This is Topline, a member of class LetterHead.

## 1.2.5.1 LetterHead.LetterHead Konstruktor

C#

```
public LetterHead(Database.DataClasses1DataContext dbContext);
```

Anmerkungen

This is LetterHead, a member of class LetterHead.

## 1.2.5.2 LetterHead Eigenschaften

### 1.2.5.2.1 LetterHead.Lines Eigenschaft

C#

```
public List<string> Lines;
```

Anmerkungen

This is Lines, a member of class LetterHead.

### 1.2.5.2.2 LetterHead.Topline Eigenschaft

C#

```
public string Topline;
```

**Anmerkungen**

This is Topline, a member of class LetterHead.

## 1.2.6 PackingListPDF Klasse

Klasse fuer den Lieferschein Dokument

**Klassen Hierarchie****C#**

```
public class PackingListPDF : AbstractPDFCreator;
```

**Datei**

	LogoHeight ( <a href="#">↗</a> see page 666)	This is LogoHeight, a member of class AbstractPDFCreator.
	TableShadingColor ( <a href="#">↗</a> see page 666)	This is TableShadingColor, a member of class AbstractPDFCreator.

**PackingListPDF Klasse**

	Name	Beschreibung
	PackingList ( <a href="#">↗</a> see page 680)	This is PackingList, a member of class PackingListPDF.

**AbstractPDFCreator Felder**

	Name	Beschreibung
	bottomMargin ( <a href="#">↗</a> see page 662)	This is bottomMargin, a member of class AbstractPDFCreator.
	leftMargin ( <a href="#">↗</a> see page 662)	This is leftMargin, a member of class AbstractPDFCreator.
	pageHeight ( <a href="#">↗</a> see page 662)	This is pageHeight, a member of class AbstractPDFCreator.
	pageWidth ( <a href="#">↗</a> see page 662)	This is pageWidth, a member of class AbstractPDFCreator.
	rightMargin ( <a href="#">↗</a> see page 662)	This is rightMargin, a member of class AbstractPDFCreator.
	spaceAfterHeading ( <a href="#">↗</a> see page 662)	This is spaceAfterHeading, a member of class AbstractPDFCreator.
	topMargin ( <a href="#">↗</a> see page 662)	This is topMargin, a member of class AbstractPDFCreator.

**AbstractPDFCreator Methoden**

	Name	Beschreibung
	DefineHeaderFooter ( <a href="#">↗</a> see page 663)	Definiert die Header ( <a href="#">↗</a> see page 665) und Footer ( <a href="#">↗</a> see page 665) fÄ¼r das Dokument.
	DefinePageSettings ( <a href="#">↗</a> see page 663)	Definiert die Seiteneigenschaften fÄ¼r die angegebene Sektion.
	DefineStyles ( <a href="#">↗</a> see page 663)	Definiert die Styles, die im Dokument verwendet werden kÄ¶nnen.
	GetTableFromDataTable ( <a href="#">↗</a> see page 663)	Erstellt aus einer DataTable eine Micradoc Tabelle
	WriteAppendix ( <a href="#">↗</a> see page 663)	Schreibt den Anhang des Dokuments.
	WriteContent ( <a href="#">↗</a> see page 664)	Schreibt den Inhalt des Dokuments.
	WriteCoverSheet ( <a href="#">↗</a> see page 664)	Schreibt das Deckblatt des Dokuments.

	WriteHeadline ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text als Ãberschrift.
	WriteHeadline1 ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text direkt unter der Ãberschrift.
	WriteInfoBox ( <a href="#">see page 664</a> )	This is WriteInfoBox, a member of class AbstractPDFCreator.
	WriteLetterHead ( <a href="#">see page 664</a> )	Schreibt den Briefkopf.
	WritePDF ( <a href="#">see page 665</a> )	Schreibt das PDFDokument in den angegebenen MemoryStream.

### PackingListPDF Klasse

	Name	Beschreibung
	GetPackingListDataTable ( <a href="#">see page 679</a> )	Erstelle die Tabelle fuer den Lieferschein
	WriteAppendix ( <a href="#">see page 679</a> )	Schreibt den Anhang des Dokuments.
	WriteContent ( <a href="#">see page 679</a> )	Erstelle den PDF Kontext
	WriteCoverSheet ( <a href="#">see page 680</a> )	Schreibt das Deckblatt des Dokuments.

## 1.2.6.1 PackingListPDF.PackingListPDF Konstruktor

Standartkonstruktor fuer die Lieferscheinklasse

**C#**

```
public PackingListPDF(DataClasses1DataContext dbContext, PackingList packingList, string
logoFilePath);
```

**Parameter**

Parameter	Beschreibung
DataClasses1DataContext dbContext	DB JIbtext
PackingList packingList	Lieferschein Objekt
string logoFilePath	Pfad zum Logo

## 1.2.6.2 PackingListPDF Methoden

### 1.2.6.2.1 PackingListPDF.GetPackingListDataTable Methode

Erstelle die Tabelle fuer den Lieferschein

**C#**

```
private DataTable GetPackingListDataTable();
```

**Resultate**

DataTable

### 1.2.6.2.2 PackingListPDF.WriteAppendix Methode

Schreibt den Anhang des Dokuments.

**C#**

```
protected override void WriteAppendix();
```

### 1.2.6.2.3 PackingListPDF.WriteContent Methode

Erstelle den PDF Kontext

**C#**

```
protected override void WriteContent();
```

### 1.2.6.2.4 PackingListPDF.WriteCoverSheet Methode

Schreibt das Deckblatt des Dokuments.

**C#**

```
protected override void WriteCoverSheet();
```

### 1.2.6.3 PackingListPDF Eigenschaften

#### 1.2.6.3.1 PackingListPDF.PackingList Eigenschaft

**C#**

```
protected PackingList PackingList;
```

**Anmerkungen**

This is PackingList, a member of class PackingListPDF.

## 1.2.7 PackingListPDF\_Zulassungsstelle Klasse

Klasse fuer das Laufzettel PDF

**Klassen Hierarchie**

**C#**

```
public class PackingListPDF_Zulassungsstelle : AbstractPDFCreator;
```

**Datei**

PackingListPDF\_Zulassungsstelle.cs (see page 701)

**Mitglieder**

**Methoden**

	Name	Beschreibung
	AbstractPDFCreator (see page 661)	Erstellt das Grundgeruest des PDF Dokuments

**PackingListPDF\_Zulassungsstelle Klasse**

	Name	Beschreibung
	PackingListPDF_Zulassungsstelle (see page 682)	Standartkonstruktor zum erstellen des Laufzettels

**AbstractPDFCreator Felder**

	Name	Beschreibung
	bottomMargin (see page 662)	This is bottomMargin, a member of class AbstractPDFCreator.
	leftMargin (see page 662)	This is leftMargin, a member of class AbstractPDFCreator.
	pageHeight (see page 662)	This is pageHeight, a member of class AbstractPDFCreator.
	pageWidth (see page 662)	This is pageWidth, a member of class AbstractPDFCreator.
	rightMargin (see page 662)	This is rightMargin, a member of class AbstractPDFCreator.
	spaceAfterHeading (see page 662)	This is spaceAfterHeading, a member of class AbstractPDFCreator.
	topMargin (see page 662)	This is topMargin, a member of class AbstractPDFCreator.

**AbstractPDFCreator Methoden**

	Name	Beschreibung
	DefineHeaderFooter (see page 663)	Definiert die Header (see page 665) und Footer (see page 665) für das Dokument.

	DefinePageSettings (see page 663)	Definiert die Seiteneigenschaften für die angegebene Sektion.
	DefineStyles (see page 663)	Definiert die Styles, die im Dokument verwendet werden können.
	GetTableFromDataTable (see page 663)	Erstellt aus einer DataTable eine Micradoc Tabelle
	WriteAppendix (see page 663)	Schreibt den Anhang des Dokuments.
	WriteContent (see page 664)	Schreibt den Inhalt des Dokuments.
	WriteCoverSheet (see page 664)	Schreibt das Deckblatt des Dokuments.
	WriteHeadline (see page 664)	Schreibt den angegebenen Text als Überschrift.
	WriteHeadline1 (see page 664)	Schreibt den angegebenen Text direkt unter der Überschrift.
	WriteInfoBox (see page 664)	This is WriteInfoBox, a member of class AbstractPDFCreator.
	WriteLetterHead (see page 664)	Schreibt den Briefkopf.
	WritePDF (see page 665)	Schreibt das PDFDokument in den angegebenen MemoryStream.

### PackingListPDF\_Zulassungsstelle Klasse

	Name	Beschreibung
	DefinePageSettings (see page 682)	Definiere die Seitenbreite und Seitenhöhe
	GetPackingListDataTable (see page 683)	Gibt die DataTable für den Laufzettel
	WriteAppendix (see page 683)	Schreibt den Anhang des Dokuments.
	WriteContent (see page 683)	Erstelle den PDF Kontext
	WriteCoverSheet (see page 683)	Schreibt das Deckblatt des Dokuments.

### AbstractPDFCreator Eigenschaften

	Name	Beschreibung
	Document (see page 665)	This is Document, a member of class AbstractPDFCreator.
	Footer (see page 665)	This is Footer, a member of class AbstractPDFCreator.
	FooterDistance (see page 665)	This is FooterDistance, a member of class AbstractPDFCreator.
	Header (see page 665)	This is Header, a member of class AbstractPDFCreator.
	Headline (see page 665)	This is Headline, a member of class AbstractPDFCreator.
	Headline2 (see page 666)	This is Headline2, a member of class AbstractPDFCreator.
	isAppendix (see page 666)	This is isAppendix, a member of class AbstractPDFCreator.
	IsInvoice (see page 666)	This is IsInvoice, a member of class AbstractPDFCreator.
	Letterhead (see page 666)	This is Letterhead, a member of class AbstractPDFCreator.
	LogoHeight (see page 666)	This is LogoHeight, a member of class AbstractPDFCreator.
	TableShadingColor (see page 666)	This is TableShadingColor, a member of class AbstractPDFCreator.

### PackingListPDF\_Zulassungsstelle Klasse

	Name	Beschreibung
	DocketList (see page 683)	This is DocketList, a member of class PackingListPDF_Zulassungsstelle.

### AbstractPDFCreator Eigenschaften

	Name	Beschreibung
	Document (see page 665)	This is Document, a member of class AbstractPDFCreator.
	Footer (see page 665)	This is Footer, a member of class AbstractPDFCreator.
	FooterDistance (see page 665)	This is FooterDistance, a member of class AbstractPDFCreator.
	Header (see page 665)	This is Header, a member of class AbstractPDFCreator.
	Headline (see page 665)	This is Headline, a member of class AbstractPDFCreator.
	Headline2 (see page 666)	This is Headline2, a member of class AbstractPDFCreator.
	isAppendix (see page 666)	This is isAppendix, a member of class AbstractPDFCreator.
	IsInvoice (see page 666)	This is IsInvoice, a member of class AbstractPDFCreator.
	Letterhead (see page 666)	This is Letterhead, a member of class AbstractPDFCreator.
	LogoHeight (see page 666)	This is LogoHeight, a member of class AbstractPDFCreator.
	TableShadingColor (see page 666)	This is TableShadingColor, a member of class AbstractPDFCreator.

### PackingListPDF\_Zulassungsstelle Klasse

	Name	Beschreibung
	DocketList (see page 683)	This is DocketList, a member of class PackingListPDF_Zulassungsstelle.

### AbstractPDFCreator Felder

	Name	Beschreibung
	bottomMargin (see page 662)	This is bottomMargin, a member of class AbstractPDFCreator.

	leftMargin ( <a href="#">see page 662</a> )	This is leftMargin, a member of class AbstractPDFCreator.
	pageHeight ( <a href="#">see page 662</a> )	This is pageHeight, a member of class AbstractPDFCreator.
	pageWidth ( <a href="#">see page 662</a> )	This is pageWidth, a member of class AbstractPDFCreator.
	rightMargin ( <a href="#">see page 662</a> )	This is rightMargin, a member of class AbstractPDFCreator.
	spaceAfterHeading ( <a href="#">see page 662</a> )	This is spaceAfterHeading, a member of class AbstractPDFCreator.
	topMargin ( <a href="#">see page 662</a> )	This is topMargin, a member of class AbstractPDFCreator.

### AbstractPDFCreator Methoden

	Name	Beschreibung
	DefineHeaderFooter ( <a href="#">see page 663</a> )	Definiert die Header ( <a href="#">see page 665</a> ) und Footer ( <a href="#">see page 665</a> ) fÃ¼r das Dokument.
	DefinePageSettings ( <a href="#">see page 663</a> )	Definiert die Seiteneigenschaften fÃ¼r die angegebene Sektion.
	DefineStyles ( <a href="#">see page 663</a> )	Definiert die Styles, die im Dokument verwendet werden kÃ¶nnen.
	GetTableFromDataTable ( <a href="#">see page 663</a> )	Erstellt aus einer DataTable eine Micradoc Tabelle
	WriteAppendix ( <a href="#">see page 663</a> )	Schreibt den Anhang des Dokuments.
	WriteContent ( <a href="#">see page 664</a> )	Schreibt den Inhalt des Dokuments.
	WriteCoverSheet ( <a href="#">see page 664</a> )	Schreibt das Deckblatt des Dokuments.
	WriteHeadline ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text als Ãberschrift.
	WriteHeadline1 ( <a href="#">see page 664</a> )	Schreibt den angegebenen Text direkt unter der Ãberschrift.
	WriteInfoBox ( <a href="#">see page 664</a> )	This is WriteInfoBox, a member of class AbstractPDFCreator.
	WriteLetterHead ( <a href="#">see page 664</a> )	Schreibt den Briefkopf.
	WritePDF ( <a href="#">see page 665</a> )	Schreibt das PDFDokument in den angegebenen MemoryStream.

### PackingListPDF\_Zulassungsstelle Klasse

	Name	Beschreibung
	DefinePageSettings ( <a href="#">see page 682</a> )	Definiere die Seitenbreite und Seitenhoehe
	GetPackingListDataTable ( <a href="#">see page 683</a> )	Gibt die DataTable fuer den Laufzettel
	WriteAppendix ( <a href="#">see page 683</a> )	Schreibt den Anhang des Dokuments.
	WriteContent ( <a href="#">see page 683</a> )	Erstelle den PDF Kontext
	WriteCoverSheet ( <a href="#">see page 683</a> )	Schreibt das Deckblatt des Dokuments.

## 1.2.7.1

# PackingListPDF\_Zulassungsstelle.PackingListPDF\_Zulassungsstelle Konstruktor

Standartkonstruktor zum erstellen des Laufzettels

C#

```
public PackingListPDF_Zulassungsstelle(DocketList docketList, string logoFilePath,
DataClasses1DataContext dbContext);
```

### Parameter

Parameter	Beschreibung
DocketList docketList	Laufzettel Objekt
string logoFilePath	Pfad zum Logo
DataClasses1DataContext dbContext	DB Kontext

## 1.2.7.2 PackingListPDF\_Zulassungsstelle Methoden

### 1.2.7.2.1 PackingListPDF\_Zulassungsstelle.DefinePageSettings Methode

Definiere die Seitenbreite und Seitenhoehe

**C#**

```
protected override void DefinePageSettings(Section section);
```

**Parameter**

Parameter	Beschreibung
Section section	aktuelle Sektion

### 1.2.7.2.2 PackingListPDF\_Zulassungsstelle.GetPackingListDataTable Methode

Gibt die DataTable fuer den Laufzettel

**C#**

```
private DataTable GetPackingListDataTable();
```

### 1.2.7.2.3 PackingListPDF\_Zulassungsstelle.WriteAppendix Methode

Schreibt den Anhang des Dokuments.

**C#**

```
protected override void WriteAppendix();
```

### 1.2.7.2.4 PackingListPDF\_Zulassungsstelle.WriteContent Methode

Erstelle den PDF Kontext

**C#**

```
protected override void WriteContent();
```

### 1.2.7.2.5 PackingListPDF\_Zulassungsstelle.WriteCoverSheet Methode

Schreibt das Deckblatt des Dokuments.

**C#**

```
protected override void WriteCoverSheet();
```

## 1.2.7.3 PackingListPDF\_Zulassungsstelle Eigenschaften

### 1.2.7.3.1 PackingListPDF\_Zulassungsstelle.DocketList Eigenschaft

**C#**

```
protected DocketList DocketList;
```

**Anmerkungen**

This is DocketList, a member of class PackingListPDF\_Zulassungsstelle.

---

## 1.2.8 PDFCreatorExtension Klasse

Hilfsklasse fuer die Micra Doc Tabelle

**Klassen Hierarchie**

```
KVSCCommon.PDF.PDFCreatorExtension
```

**C#**

```
public static class PDFCreatorExtension;
```

**Datei**

PDFCreatorExtension.cs (🔗 see page 701)

**Mitglieder****PDFCreatorExtension Methoden**

	Name	Beschreibung
🔗	AddRow (🔗 see page 684)	Erstellt dynamisch neue Reihen in der MicraDoc Tabelle

**PDFCreatorExtension Methoden**

	Name	Beschreibung
🔗	AddRow (🔗 see page 684)	Erstellt dynamisch neue Reihen in der MicraDoc Tabelle

## 1.2.8.1 PDFCreatorExtension Methoden

### 1.2.8.1.1 PDFCreatorExtension.AddRow Methode

Erstellt dynamisch neue Reihen in der MicraDoc Tabelle

**C#**

```
public static Row AddRow(this Table table, params object[] contents);
```

**Parameter**

Parameter	Beschreibung
this Table table	Table
params object[] contents	contents

**Resultate**

Row

## 1.2.9 PDFSharpUtil Klasse

Hilfklasse fuer Wasserzeichen auf dem PDF Document

**Klassen Hierarchie**

KVSCCommon.PDF.PDFSharpUtil

**C#**

```
public class PDFSharpUtil;
```

**Datei**

PDFSharpUtil.cs (🔗 see page 701)

**Mitglieder****PDFSharpUtil Methoden**

	Name	Beschreibung
🔗	WriteWatermark (🔗 see page 685)	Erstellt eine Wassserzeichen

**PDFSharpUtil Methoden**

	Name	Beschreibung
🔗	WriteWatermark (🔗 see page 685)	Erstellt eine Wassserzeichen

## 1.2.9.1 PDFSharpUtil Methoden

### 1.2.9.1.1 PDFSharpUtil.WriteWatermark Methode

Erstellt eine Wasserzeichen

#### C#

```
public static void WriteWatermark(string watermarkText, MemoryStream source, MemoryStream target);
```

#### Parameter

Parameter	Beschreibung
string watermarkText	Text fuer das Wasserzeichen
MemoryStream source	Quelle PDF Stream
MemoryStream target	Ziel PDF Stream

## 1.3 KVSCCommon.Properties Namensraum

This is namespace KVSCCommon.Properties.

#### Klassen

	Name	Beschreibung
	Settings ( <a href="#">see page 685</a> )	This is class KVSCCommon.Properties.Settings.

### 1.3.1 Settings Klasse

#### Klassen Hierarchie

#### C#

```
[global::System.Runtime.CompilerServices.CompilerGeneratedAttribute()]  
[global::System.CodeDom.Compiler.GeneratedCodeAttribute("Microsoft.VisualStudio.Editors.SettingsDesigner.SettingsSingleFileGenerator",  
"10.0.0.0")]  
internal sealed class Settings : global::System.Configuration.ApplicationSettingsBase;
```

#### Datei

Settings.Designer.cs ([see page 704](#))

#### Anmerkungen

This is class KVSCCommon.Properties.Settings.

#### Mitglieder

##### Settings Felder

	Name	Beschreibung
	defaultInstance ( <a href="#">see page 686</a> )	This is defaultInstance, a member of class Settings.

##### Settings Eigenschaften

	Name	Beschreibung
	Default ( <a href="#">see page 686</a> )	This is Default, a member of class Settings.

	KVSCConnectionString ( <a href="#">see page 686</a> )	This is KVSCConnectionString, a member of class Settings.
	KVSCConnectionString1 ( <a href="#">see page 687</a> )	This is KVSCConnectionString1, a member of class Settings.
	KVSCConnectionString2 ( <a href="#">see page 687</a> )	This is KVSCConnectionString2, a member of class Settings.
	test_fullserviceConnectionString ( <a href="#">see page 687</a> )	This is test_fullserviceConnectionString, a member of class Settings.

### Settings Eigenschaften

	Name	Beschreibung
	Default ( <a href="#">see page 686</a> )	This is Default, a member of class Settings.
	KVSCConnectionString ( <a href="#">see page 686</a> )	This is KVSCConnectionString, a member of class Settings.
	KVSCConnectionString1 ( <a href="#">see page 687</a> )	This is KVSCConnectionString1, a member of class Settings.
	KVSCConnectionString2 ( <a href="#">see page 687</a> )	This is KVSCConnectionString2, a member of class Settings.
	test_fullserviceConnectionString ( <a href="#">see page 687</a> )	This is test_fullserviceConnectionString, a member of class Settings.

### Settings Felder

	Name	Beschreibung
	defaultInstance ( <a href="#">see page 686</a> )	This is defaultInstance, a member of class Settings.

## 1.3.1.1 Settings Felder

### 1.3.1.1.1 Settings.defaultInstance Feld

#### C#

```
private static Settings defaultInstance =
((Settings)(global::System.Configuration.ApplicationSettingsBase.Synchronized(new
Settings())));
```

#### Anmerkungen

This is defaultInstance, a member of class Settings.

## 1.3.1.2 Settings Eigenschaften

### 1.3.1.2.1 Settings.Default Eigenschaft

#### C#

```
public static Settings Default;
```

#### Anmerkungen

This is Default, a member of class Settings.

### 1.3.1.2.2 Settings.KVSCConnectionString Eigenschaft

#### C#

```
[global::System.Configuration.ApplicationScopedSettingAttribute()]
[global::System.Diagnostics.DebuggerNonUserCodeAttribute()]
[global::System.Configuration.SpecialSettingAttribute(global::System.Configuration.SpecialSe
tting.ConnectionString)]
[global::System.Configuration.DefaultSettingValueAttribute("Data
Source=ND2009-DATA\\SQLSERVER2005;Initial Catalog=KVS;Persist Security Info=T" + "rue;User
ID=sa;Password=N3wdirection")]
public string KVSCConnectionString;
```

#### Anmerkungen

This is KVSCConnectionString, a member of class Settings.

### 1.3.1.2.3 Settings.KVSConnectionString1 Eigenschaft

C#

```
[global::System.Configuration.ApplicationScopedSettingAttribute()]
[global::System.Diagnostics.DebuggerNonUserCodeAttribute()]
[global::System.Configuration.SpecialSettingAttribute(global::System.Configuration.SpecialSe
tting.ConnectionString)]
[global::System.Configuration.DefaultSettingValueAttribute("Data
Source=ND2009-DATA\\SQLSERVER2005;Initial Catalog=KVS;Persist Security Info=T" + "rue;User
ID=sa" )]
public string KVSConnectionString1;
```

Anmerkungen

This is KVSConnectionString1, a member of class Settings.

### 1.3.1.2.4 Settings.KVSConnectionString2 Eigenschaft

C#

```
[global::System.Configuration.ApplicationScopedSettingAttribute()]
[global::System.Diagnostics.DebuggerNonUserCodeAttribute()]
[global::System.Configuration.SpecialSettingAttribute(global::System.Configuration.SpecialSe
tting.ConnectionString)]
[global::System.Configuration.DefaultSettingValueAttribute("Data
Source=ND2009-DATA\\SQLSERVER2005;Initial Catalog=KVS;User ID=sa" )]
public string KVSConnectionString2;
```

Anmerkungen

This is KVSConnectionString2, a member of class Settings.

### 1.3.1.2.5 Settings.test\_fullserviceConnectionString Eigenschaft

C#

```
[global::System.Configuration.ApplicationScopedSettingAttribute()]
[global::System.Diagnostics.DebuggerNonUserCodeAttribute()]
[global::System.Configuration.SpecialSettingAttribute(global::System.Configuration.SpecialSe
tting.ConnectionString)]
[global::System.Configuration.DefaultSettingValueAttribute("Data
Source=ND2009-DATA\\SQLSERVER2005;Initial Catalog=test_fullservice;User ID=sa" + "")]
public string test_fullserviceConnectionString;
```

Anmerkungen

This is test\_fullserviceConnectionString, a member of class Settings.

## 1.4 KVSCCommon.Utility Namensraum

This is namespace KVSCCommon.Utility.

#### Klassen

	Name	Beschreibung
	Email (🔗 see page 688)	This is class KVSCCommon.Utility.Email.
	SaltedHash (🔗 see page 689)	This is class KVSCCommon.Utility.SaltedHash.

# 1.4.1 Email Klasse

## Klassen Hierarchie

KVSCCommon.Utility.Email

## C#

```
public class Email;
```

## Datei

Email.cs (see page 696)

## Anmerkungen

This is class KVSCCommon.Utility.Email.

## Mitglieder

### Email Methoden

	Name	Beschreibung
	SendMail (see page 688)	Sendet eine Email über den angegebenen SMTP-Server.

### Email Methoden

	Name	Beschreibung
	SendMail (see page 688)	Sendet eine Email über den angegebenen SMTP-Server.

## 1.4.1.1 Email Methoden

### 1.4.1.1.1 Email.SendMail Methode

Sendet eine Email (see page 688) über den angegebenen SMTP-Server.

## C#

```
public static void SendMail(string from, List<string> to, string subject, string body,
List<string> cc, List<string> bcc, string smtpServer, List<Attachment> attachments);
```

## Parameter

Parameter	Beschreibung
string from	Absenderadresse.
List<string> to	Liste mit Empfängeradressen.
string subject	Betreff.
string body	Inhalt der Email (see page 688) (Text oder HTML).
List<string> cc	Liste mit Empfängeradressen (CC).
List<string> bcc	Liste mit Empfängeradressen (BCC).
string smtpServer	SMTP-Server für den Emailversand.
List<Attachment> attachments	Liste mit Emailattachments.

## Anmerkungen

cc, bcc, und attachments dürfen auch null sein.

## 1.4.2 SaltedHash Klasse

### Klassen Hierarchie

`KVSCCommon.Utility.SaltedHash`

### C#

```
public class SaltedHash;
```

### Datei

SaltedHash.cs ([see page 703](#))

### Anmerkungen

This is class KVSCCommon.Utility.SaltedHash.

### Mitglieder

#### Methoden

	Name	Beschreibung
	SaltedHash ( <a href="#">see page 690</a> )	Default constructor which initialises the SaltedHash with the SHA256Managed algorithm and a Salt of 4 bytes ( or 4*8 = 32 bits)

#### SaltedHash Methoden

	Name	Beschreibung
	ComputeHash ( <a href="#">see page 690</a> )	The actual hash calculation is shared by both GetHashAndSalt ( <a href="#">see page 690</a> ) and the VerifyHash ( <a href="#">see page 691</a> ) functions
	GetHashAndSalt ( <a href="#">see page 690</a> )	Given a data block this routine returns both a Hash and a Salt
	GetHashAndSaltString ( <a href="#">see page 691</a> )	The routine provides a wrapper around the GetHashAndSalt ( <a href="#">see page 690</a> ) function providing conversion from the required byte arrays to strings. Both the Hash and Salt are returned as Base-64 encoded strings.
	VerifyHash ( <a href="#">see page 691</a> )	This routine verifies whether the data generates the same hash as we had stored previously
	VerifyHashString ( <a href="#">see page 691</a> )	This routine provides a wrapper around VerifyHash ( <a href="#">see page 691</a> ) converting the strings containing the data, hash and salt into byte arrays before calling VerifyHash ( <a href="#">see page 691</a> ).

#### SaltedHash Eigenschaften

	Name	Beschreibung
	HashProvider ( <a href="#">see page 691</a> )	Der zu benutzende HashProvider.
	SalthLength ( <a href="#">see page 692</a> )	L�nge des SaltString.

#### SaltedHash Eigenschaften

	Name	Beschreibung
	HashProvider ( <a href="#">see page 691</a> )	Der zu benutzende HashProvider.
	SalthLength ( <a href="#">see page 692</a> )	L�nge des SaltString.

#### SaltedHash Methoden

	Name	Beschreibung
	ComputeHash ( <a href="#">see page 690</a> )	The actual hash calculation is shared by both GetHashAndSalt ( <a href="#">see page 690</a> ) and the VerifyHash ( <a href="#">see page 691</a> ) functions
	GetHashAndSalt ( <a href="#">see page 690</a> )	Given a data block this routine returns both a Hash and a Salt
	GetHashAndSaltString ( <a href="#">see page 691</a> )	The routine provides a wrapper around the GetHashAndSalt ( <a href="#">see page 690</a> ) function providing conversion from the required byte arrays to strings. Both the Hash and Salt are returned as Base-64 encoded strings.
	VerifyHash ( <a href="#">see page 691</a> )	This routine verifies whether the data generates the same hash as we had stored previously
	VerifyHashString ( <a href="#">see page 691</a> )	This routine provides a wrapper around VerifyHash ( <a href="#">see page 691</a> ) converting the strings containing the data, hash and salt into byte arrays before calling VerifyHash ( <a href="#">see page 691</a> ).

## 1.4.2.1 SaltedHash Konstruktor

### 1.4.2.1.1 SaltedHash.SaltedHash Konstruktor ()

Default constructor which initialises the SaltedHash with the SHA256Managed algorithm and a Salt of 4 bytes ( or  $4 \cdot 8 = 32$  bits)

C#

```
public SaltedHash();
```

### 1.4.2.1.2 SaltedHash.SaltedHash Konstruktor (HashAlgorithm, int)

The constructor takes a HashAlgorithm as a parameter.

C#

```
public SaltedHash(HashAlgorithm hashAlgorithm, int theSaltLength);
```

Parameter

Parameter	Beschreibung
HashAlgorithm hashAlgorithm	A hashAlgorithm HashAlgorihtm which is derived from HashAlgorithm. C# provides the following classes: SHA1Managed,SHA256Managed, SHA384Managed, SHA512Managed and MD5CryptoServiceProvider
int theSaltLength	Length of the generated Salt.

## 1.4.2.2 SaltedHash Methoden

### 1.4.2.2.1 SaltedHash.ComputeHash Methode

The actual hash calculation is shared by both GetHashAndSalt (see page 690) and the VerifyHash (see page 691) functions

C#

```
private byte[] ComputeHash(byte[] data, byte[] salt);
```

Parameter

Parameter	Beschreibung
byte[] data	A byte array of the Data to Hash
byte[] salt	A byte array of the Salt to add to the Hash

Resultate

A byte array with the calculated hash

### 1.4.2.2.2 SaltedHash.GetHashAndSalt Methode

Given a data block this routine returns both a Hash and a Salt

C#

```
public void GetHashAndSalt(byte[] data, out byte[] hash, out byte[] salt);
```

Parameter

Parameter	Beschreibung
byte[] data	A System.Bytebyte array containing the data from which to derive the salt
out byte[] hash	A System.Bytebyte array which will contain the hash calculated
out byte[] salt	A System.Bytebyte array which will contain the salt generated

### 1.4.2.2.3 SaltedHash.GetHashAndSaltString Methode

The routine provides a wrapper around the `GetHashAndSalt` (see page 690) function providing conversion from the required byte arrays to strings. Both the Hash and Salt are returned as Base-64 encoded strings.

**C#**

```
public void GetHashAndSaltString(string data, out string hash, out string salt);
```

**Parameter**

Parameter	Beschreibung
string data	A System.String containing the data to hash
out string hash	A System.String base64 encoded string containing the generated hash
out string salt	A System.String base64 encoded string containing the generated salt

### 1.4.2.2.4 SaltedHash.VerifyHash Methode

This routine verifies whether the data generates the same hash as we had stored previously

**C#**

```
public bool VerifyHash(byte[] data, byte[] hash, byte[] salt);
```

**Parameter**

Parameter	Beschreibung
byte[] data	The data to verify
byte[] hash	The hash we had stored previously
byte[] salt	The salt we had stored previously

**Resultate**

True on a successful match

### 1.4.2.2.5 SaltedHash.VerifyHashString Methode

This routine provides a wrapper around `VerifyHash` (see page 691) converting the strings containing the data, hash and salt into byte arrays before calling `VerifyHash` (see page 691).

**C#**

```
public bool VerifyHashString(string data, string hash, string salt);
```

**Parameter**

Parameter	Beschreibung
string data	A UTF-8 encoded string containing the data to verify
string hash	A base-64 encoded string containing the previously stored hash
string salt	A base-64 encoded string containing the previously stored salt

**Resultate**

True, if verified, else false.

## 1.4.2.3 SaltedHash Eigenschaften

### 1.4.2.3.1 SaltedHash.HashProvider Eigenschaft

Der zu benutzende HashProvider.

**C#**

```
private HashAlgorithm HashProvider;
```

### 1.4.2.3.2 SaltedHash.SalthLength Eigenschaft

Länge des SaltString.

**C#**

```
private int SalthLength;
```

## 1.5 Dateien

The following table lists dateien in this documentation.

## 1.5.1 \_Accounts.cs

This is file \_Accounts.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.2 AbstractPDFCreator.cs

This is file AbstractPDFCreator.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.PDF (🔗 see page 659)	This is namespace KVSCCommon.PDF.

## 1.5.3 Accounts.cs

This is file Accounts.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.4 Adress.cs

This is file Adress.cs.

**Namensräume**

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

---

## 1.5.5 AssemblyInfo.cs

This is file AssemblyInfo.cs.

---

## 1.5.6 BankAccount.cs

This is file BankAccount.cs.

**Namensräume**

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

---

## 1.5.7 CarOwner.cs

This is file CarOwner.cs.

**Namensräume**

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

---

## 1.5.8 Contact.cs

This is file Contact.cs.

**Namensräume**

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

---

## 1.5.9 CostCenter.cs

This is file CostCenter.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

1.5.10 Customer.cs

This is file Customer.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

1.5.11 DataClasses1.cs

This is file DataClasses1.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

1.5.12 DataClasses1.designer.cs

This is file DataClasses1.designer.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

1.5.13 DeregistrationOrder.cs

This is file DeregistrationOrder.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.14 DocketList.cs

This is file DocketList.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.15 Email.cs

This is file Email.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Utility (🔗 see page 687)	This is namespace KVSCCommon.Utility.

## 1.5.16 EmptyStringIfNull.cs

This is file EmptyStringIfNull.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.17 GroupedAppendix.cs

This is file GroupedAppendix.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.PDF (🔗 see page 659)	This is namespace KVSCCommon.PDF.

## 1.5.18 ILogging.cs

This is file ILogging.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.19 Invoice.cs

This is file Invoice.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.20 InvoiceHelper.cs

This is file InvoiceHelper.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.21 Invoiceltem.cs

This is file Invoiceltem.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.22 InvoiceltemAccountltem.cs

This is file InvoiceltemAccountltem.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

This is file InvoicePDF.cs.

Namensräume

Name	Beschreibung
KVSCCommon.PDF (🔗 see page 659)	This is namespace KVSCCommon.PDF.

## 1.5.24 InvoiceRunReport.cs

This is file InvoiceRunReport.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.25 LargeCustomer.cs

This is file LargeCustomer.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.26 Location.cs

This is file Location.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.27 LocationOrderJoins.cs

This is file LocationOrderJoins.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.28 LogTypes.cs

This is file LogTypes.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.29 Mailinglist.cs

This is file Mailinglist.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.30 Make.cs

This is file Make.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.31 Order.cs

This is file Order.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.32 OrderInvoice.cs

This is file OrderInvoice.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

# 1.5.33 OrderItem.cs

This is file OrderItem.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

# 1.5.34 OrderItemState.cs

This is file OrderItemState.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

# 1.5.35 OrderState.cs

This is file OrderState.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

# 1.5.36 PackingList.cs

This is file PackingList.cs.

Namensräume

Name	Beschreibung
KVSCCommon.Database (🔗 see page 1)	Dieser Code wurde von einem Tool generiert. Laufzeitversion:4.0.30319.17929 Änderungen an dieser Datei können falsches Verhalten verursachen und gehen verloren, wenn der Code erneut generiert wird.

## 1.5.37 PackingListPDF.cs

This is file PackingListPDF.cs.

### Namensräume

Name	Beschreibung
KVSCCommon.PDF ( <a href="#">↗</a> see page 659)	This is namespace KVSCCommon.PDF.
